Category 11: Transport and Mobility

Indicator No: 11.1	Geographical coverage of public transport	**0.07**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	24.5

Denominator	Total area of the city (sq.km)	216.79
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	Availability of public transport	
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	**2.87**
Denominator	Total population of the city	2766
Unit	Number per 1000 persons	962334
Benchmark	>=0.6	
Indicator No: 11.3	Mode share of public transport	**To be computed**
Description	Mode share of public transport	13
Unit	Percentage	
Benchmark		
Indicator No: 11.4	Percentage of road network with dedicated bicycle tracks	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	2198.76
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	Percentage of interchanges with bicycle parking facilities	**266.67**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	8
Denominator	Total number of major transport interchanges in the	3

	city	
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	Mode share of non-motorised transport	**To be computed**
Description	Mode share of non-motorised transport	25
Unit	Percentage	
Benchmark		
Indicator No: 11.7	Availability of Passenger Information System	**2.67**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	8
Denominator	Total number of major interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	Extent of signal synchronisation	**64.62**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	168
Denominator	Total number of signalised intersections in the city	260
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	Availability of paid parking spaces	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	49
Denominator	Total available on-street parking spaces in the city	49
Unit		

Benchmark		
Indicator No: 11.10	Percentage coverage of footpaths – wider than 1.2m	**1.36**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	60
Denominator	Total length of road network in the city	4397.52
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	Percentage of traffic intersections with pedestrian crossing facilities	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	15
Denominator	Total number of junctions/ intersections on major roads in the city	15
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	Extent to which universal accessibility is incorporated in public rights-of-way	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	Data Unavailable
Denominator	Total number of public right-of-way areas in the city	4482
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	Household level coverage of direct water supply connections	**12.2**

Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	30000
Denominator	Total number of households in the city	245938
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	Per capita supply of water	**46.24**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	44.5
Denominator	Total population of the city	962334
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	Quality of water supplied	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	5
Denominator	Total number of samples tested for water quality	5
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	Level of non-revenue water – NRW	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	44.5
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	Percentage of water connections covered through me-	**0.05**

	ters	
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	15
Denominator	Total number of water connections in the city	30000
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	Percentage of plots with rainwater harvesting facility	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	Data Unavailable
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	2504
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	Coverage of toilets	**112.63**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	286088
Denominator	Total number of properties in the city	254000
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	Coverage of sewerage network and/or septage	**96.83**

Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	245938
Denominator	Total number of properties in the city	254000
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	Collection efficiency of sewerage network	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	0
Denominator	Total waste water generated in the city per day	120
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	Extent of reuse and recycling of waste water	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	Data Unavailable
Denominator	Total waste water received at treatment plants per day	0
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	Coverage of storm water drains	**9.02**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	198.39
Denominator	Total length of road network in the city	2198.76
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	Household level coverage of municipal solid waste collection	**100**

Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	283938
Denominator	Total number of households and establishments in the city	283938
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	Efficiency of collection of municipal solid waste	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	529
Denominator	Total quantum of MSW generated in the city	529
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	Extent of municipal solid waste recovered through re-use	**9.45**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	1500
Denominator	Average MSW generated in the city (tons per month)	15870
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**7**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	7
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**16**

Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	16
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**107**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	107
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	8
Denominator	Total number of noise samples	282
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**25**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	27
Denominator	Total number of samples tested	108
Unit	Percentage	
Benchmark	100%

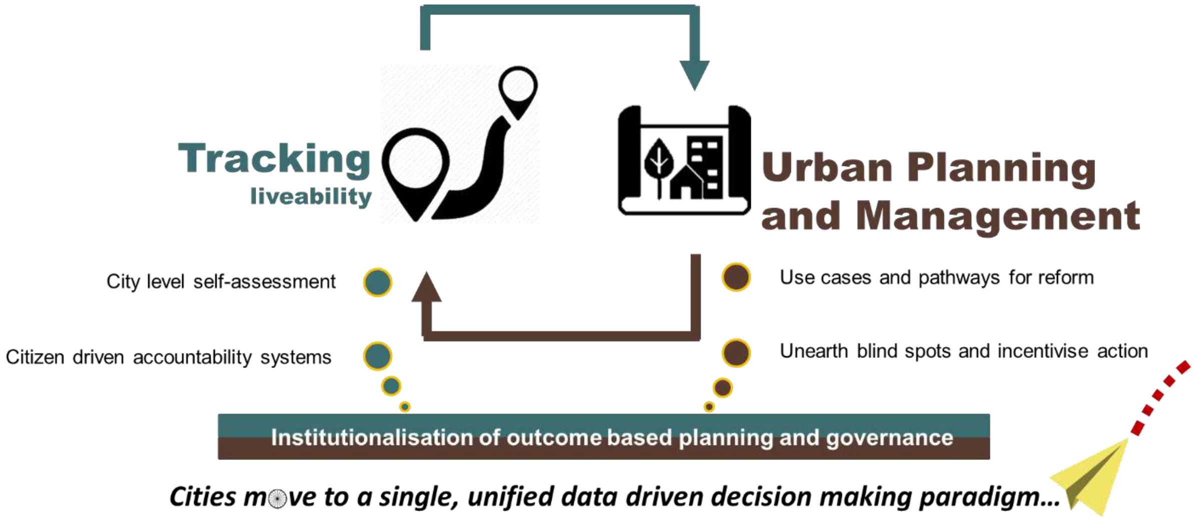
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



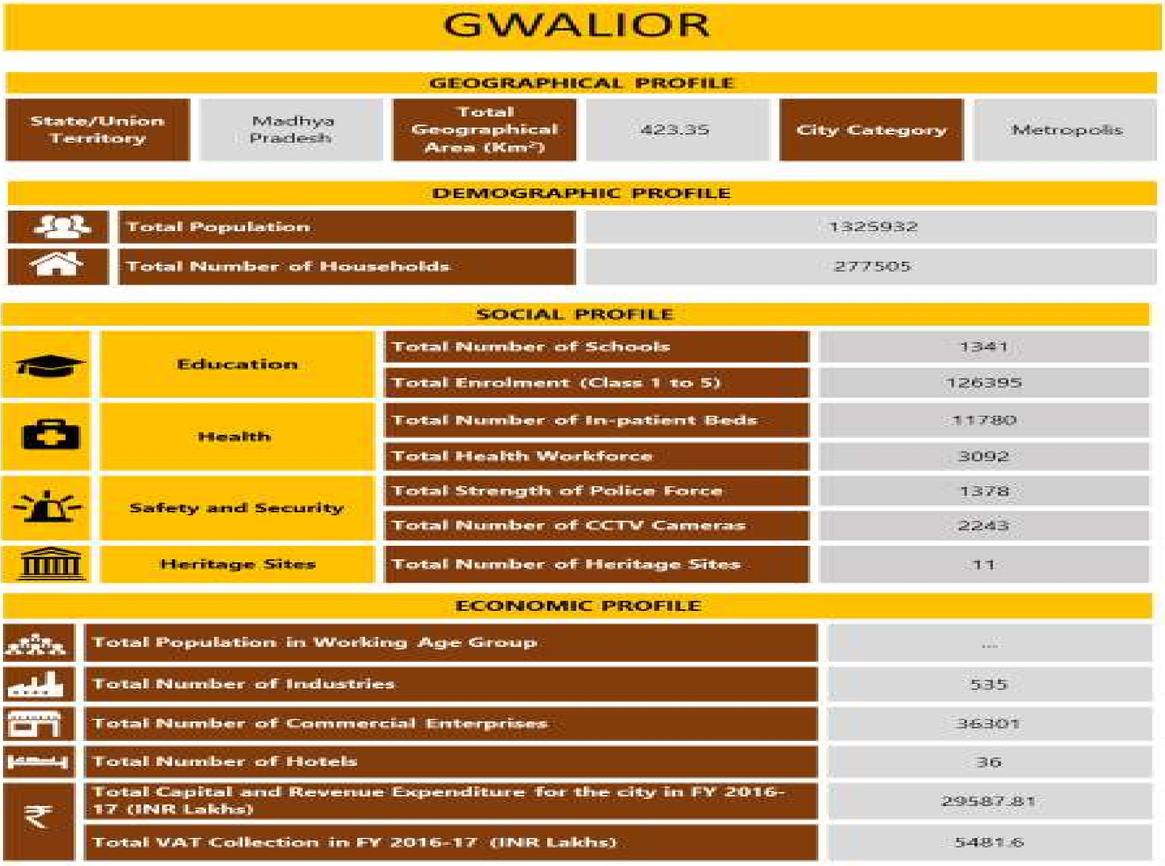
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

Cities move to a single, unified data driven decision making paradigm…

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



GWALIOR

GEOGRAPHICAL PROFILE

State/Union Territory	Madhya Pradesh	Total Geographical Area (Km²)	423.35	City Category	Metropolis

DEMOGRAPHIC PROFILE

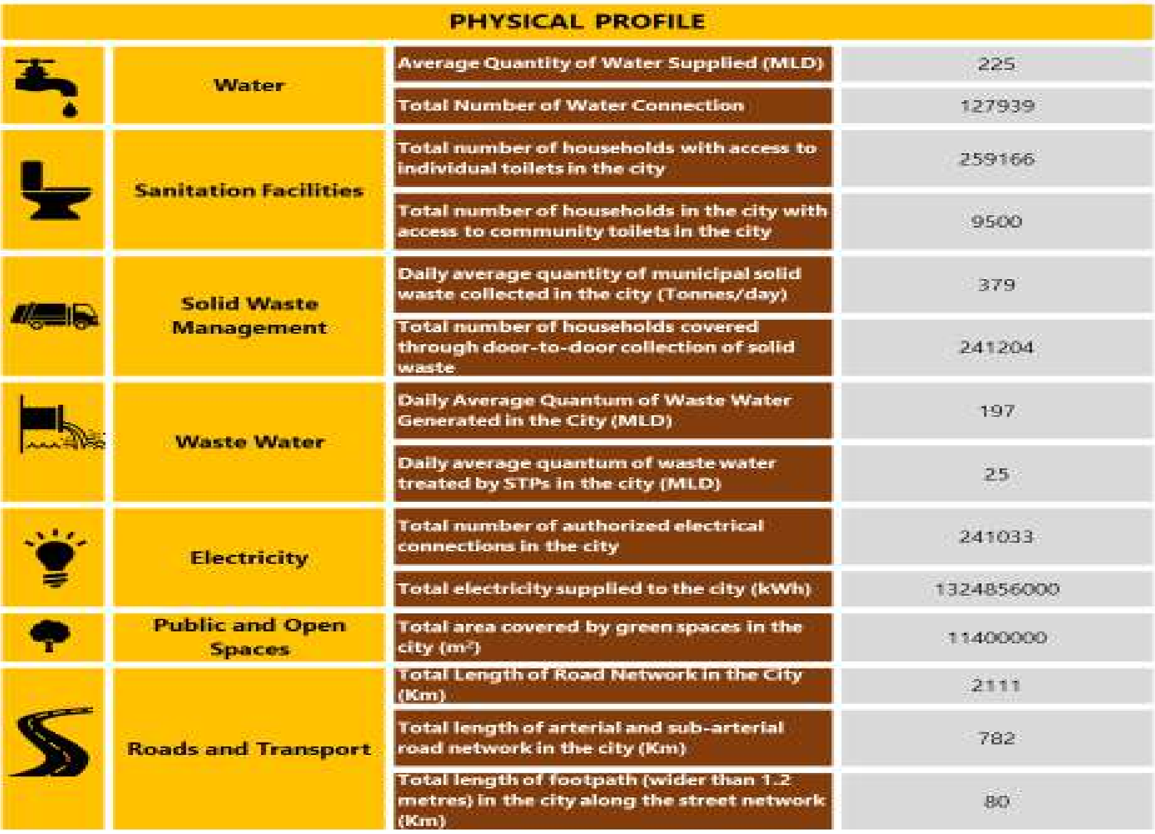
Total Population	1325932
Total Number of Households	277505

SOCIAL PROFILE

Education	Total Number of Schools	1341
	Total Enrolment (Class 1 to 5)	126395
Health	Total Number of In-patient Beds	11780
	Total Health Workforce	3092
Safety and Security	Total Strength of Police Force	1378
	Total Number of CCTV Cameras	2243
Heritage Sites	Total Number of Heritage Sites	11

ECONOMIC PROFILE

Total Population in Working Age Group	...
Total Number of Industries	535
Total Number of Commercial Enterprises	36301
Total Number of Hotels	36
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	29587.81
Total VAT Collection in FY 2016-17 (INR Lakhs)	5481.6



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	225
	Total Number of Water Connection	127939
Sanitation Facilities	Total number of households with access to individual toilets in the city	259166
	Total number of households in the city with access to community toilets in the city	9500
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	379
	Total number of households covered through door-to-door collection of solid waste	241204
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	197
	Daily average quantum of waste water treated by STPs in the city (MLD)	25
Electricity	Total number of authorized electrical connections in the city	241033
	Total electricity supplied to the city (kWh)	1324856000
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	11400000
Roads and Transport	Total Length of Road Network in the City (Km)	2111
	Total length of arterial and sub-arterial road network in the city (Km)	782
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	80

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year

Pillars of Comprehensive Development	Category	Indicators
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport

Pillars of Comprehensive Development	Category	Indicators
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.

100 marks

(Maximum overall score that any city can achieve)

25 marks (Maximum score that any city can achieve under **Institutional** Pillar)	25 marks (Maximum score that any city can achieve under **Social** Pillar)	5 marks (Maximum score that any city can achieve under **Economic** Pillar)	45 marks (Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and

development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Sub categories	Data owners at city level
Urban Local Body	Accounts	Accounts Section, Gwalior Municipal Corporation
	Park and Recreation	Garden Section, Gwalior Municipal Corporation
	Water Supply and Drainage	Public Health and Engineering Department
	Heritage sites	Gwalior Municipal Corporation
	Ecological sites	Zoo section, Gwalior Municipal Corporation
	Housing	Gwalior Municipal Corporation
	Building plan	Building Permission Section, Gwalior Municipal Corporation
	Roads	Roads section, Gwalior Municipal Corporation
	Solid waste management	Gwalior Municipal Corporation
	IT services	IT Section, Satna Municipal Corporation
	Vendor committee	Dukan Sansthan, Gwalior Municipal Corporation
	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Madhya Pradesh Pollution Control Board
Development Authority	Building Infrastructure	Gwalior Development Authority
	Construction planning	Gwalior Development Authority
	Green Building	Gwalior Development Authority
	Rain water harvesting	Gwalior Development Authority
	Universal Design Principle	Gwalior Development Authority
DISCOM/Electricity	Electrical Connection/ Grievance	Madhya Pradesh Madhya

Designated data owners	Sub categories	Data owners at city level
Board	Redressal/ Power supply	Kshetra Vidyut Vitaran Company limited
State Disaster management authority		District Disaster management Office
State Education Department		District Education Department
State Health Department	Health care professionals	Health Department
	Citizen Services	Health Department
	Disease Prevalence	Health Department
	Health Infrastructure	Health Department
State Renewable Energy Development Agency		Madhya Pradesh New and Renewable Energy Department
State Sales / Commercial Taxes Department		Department of Commercial Taxes
Town and Country Planning Department	Land Use	Town and country planning
Traffic and Police Department		Traffic and Police Department, Gwalior
Transport Authorities	Buses	Regional Transport Office
	Registered Vehicles	Madhya Pradesh Transport Department
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 117 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	7
State Education Department	4
DISCOM/Electricity Department	7
Traffic and Police Department	8
Development Authority	8
Pollution Control Board	10
State Renewable Energy Department	1
Town and Country Planning	4
State Health Department	4
Transport Authority	7
Disaster Management	0
Urban Local Body	57
Total	117

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

7. LA - Street Vendors
8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**88.76**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	0
	1.1d solid waste management	1
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	1
	1.1j information	0.538461538
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**2.38**
Description	Services integrated through an integrated or a singular operations command centre	0.5
Unit	Percentage	

Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**4.94**
Description		
Sub Indicators	1.3a Building plan	0.000385579
	1.3b Birth/Death Certificate	0.001889823
	1.3c water supply	0.000726113
	1.3d solid waste management	0.018513496
	1.3e property tax	0.054803817
	1.3f professional tax (RC)	0.013567387
	1.3g professional tax (EC)	0.000243502
	1.3h complaints/ grievance redressal	0.000633761
	1.3i information	0.031432446
	1.3j electricity	0.371851572
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.64**
Description		
Sub Indicators	1.4a water supply	2
	1.4b solid waste	0.5
	1.4c street lights	0
	1.4d sewerage	2
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**63.95**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	6557.52901
Denominator	Total demand raised for the year	10254.92468
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**26.86**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	1903.84053
Denominator	Total O&M cost for providing water supply services during the year	7089
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total**	**23.53**

	expenditure	
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	21039.58526
Denominator	Total expenditure (revenue and capital accounts) in the same year	89398.13318
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**90.91**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	60
Denominator	Total number of wards	66
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**36.36**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	4
Denominator	Total number of historic buildings/sites identified	11
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**32**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	8
Denominator	Total number of ecologically important sites identified in the city	25
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**13.57**
Description	Average Occupancy rate of Hotels	13.57142857
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.94**

Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	279.07692
Denominator	Total budget of the ULB (capital and revenue)	29587.81568
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**34**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	34
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**98.16**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	193991
Denominator	Total population in the age group of 6-14 years	197624
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**98.81**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	86684
Denominator	Total female population in the age group of 6-14 years	87731
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**71.41**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	126395
Denominator	Total number of teachers available for primary grades (public and private schools)	1770
Unit	Ratio	

Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**8.28**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	111
Denominator	Total number of schools	1341
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**89.18**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	89.17647811
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**91.88**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	498835422
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**111.72**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	11780
Denominator	Total population of the city	1054420
Unit	Number per 10,000 population	

Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**29.32**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	3092
Denominator	Total population of the city	1054420
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**20**
Description	Total response time for health-related distress calls received in the city	20
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**2.17**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	22913
Denominator	Total population of the city	1054420
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.09**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	903
Denominator	Total population of the city	1054420
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**106.25**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	2243
Denominator	Total length of road network in the city	2111
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**1222.57**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	12891
Denominator	Total population of the city	1054420
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**23.43**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	3020
Denominator	Total crimes recorded in the same year	12891
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**32.25**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	340
Denominator	Total population of the city	1054420
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**28.63**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	1220.23
Denominator	Total VAT/GST collection during preceding year	42.6137
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**10.19**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	143.31
Denominator	Total Professional Tax collection during preceding year	1405.87
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**2.44**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	23
Denominator	Number of construction permits during preceding year	9.41
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	136764
Denominator	Total labour force in the city	197624
Unit	Per 1000 persons	

Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	4942
Denominator	Total number of vendors in the city	4942
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**4.16**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	6370
Denominator	Total number of slum and EWS households in the city	1530.72
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0** 412360000
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**10.81**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	11400000
Denominator	Total population of the city	1054420

Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**3.31**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	3490091
Denominator	Total population of the city	1054420
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0.5**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	2120000
Denominator	Total area of the city (total area of all land uses)	423350000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1054420
Denominator	Area allocated for residential land use (in hectares)	64000000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**74.49**

Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	206713
Denominator	Total number of households in the city	277505
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	241033
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**26534**
Description	Total number of sustained electrical interruptions in a year	26534
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.65**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	806626
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	272
Denominator	Total energy consumption from all sources	1324856000

Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.2**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	3696676.917
Denominator	Total quantum of water and waste water handled during the period	7500
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.32**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	17456340
Denominator	Total number of street light installations	43335
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	3999
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.47**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1324856000
Denominator	Total population of the city	1054420
Unit	kWh per capita	

Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.16**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	110
Denominator	Total area of the city (sq.km)	423.35
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	25
Denominator	Total population of the city	1054420
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0.47**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	10
Denominator	Total length of road network in the city	2111
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	1
Denominator	Total number of major transport interchanges in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be**

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

		computed
Description	Mode share of non-motorised transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	41
Denominator	Total number of signalised intersections in the city	41
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**92.31**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	24
Denominator	Total available on-street parking spaces in the city	26
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**1.89**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	80
Denominator	Total length of road network in the city	4222
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**101.47**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	69
Denominator	Total number of junctions/ intersections on major roads in the city	68
Unit	Percentage	
Benchmark	100%	

Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	5
Denominator	Total number of public right-of-way areas in the city	785
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**46.1**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	127939
Denominator	Total number of households in the city	277505
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**213.39**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	225
Denominator	Total population of the city	1054420
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	1026
Denominator	Total number of samples tested for water quality	1037
Unit	Percentage	
Benchmark	100%	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Indicator No: 12.4	**Level of non-revenue water – NRW**	**58.09**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	130.7
Denominator	Quantum of water put into the distribution system (mld)	225
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**4.61**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	5900
Denominator	Total number of water connections in the city	127939
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**0.93**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	1
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	108
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**97.54**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	270682
Denominator	Total number of properties in the city	277505

Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**51.05**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	141666
Denominator	Total number of properties in the city	277505
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**70**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	137.9
Denominator	Total waste water generated in the city per day	197
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**711.6**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	177.9
Denominator	Total waste water received at treatment plants per day	25
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**2.13**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	45
Denominator	Total length of road network in the city	2111
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**88.43**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	277505
Denominator	Total number of households and establishments in the city	313806
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**92.89**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	379
Denominator	Total quantum of MSW generated in the city	408
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**19.87**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	2258.85
Denominator	Average MSW generated in the city (tons per month)	11370
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**11.65**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	11.65
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**16.35**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	16.35
Unit	µg/m3	

Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**112.5**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	112.5
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	79
Denominator	Total number of noise samples	1728
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	11
Denominator	Total number of samples tested	11
Unit	Percentage	
Benchmark	100%

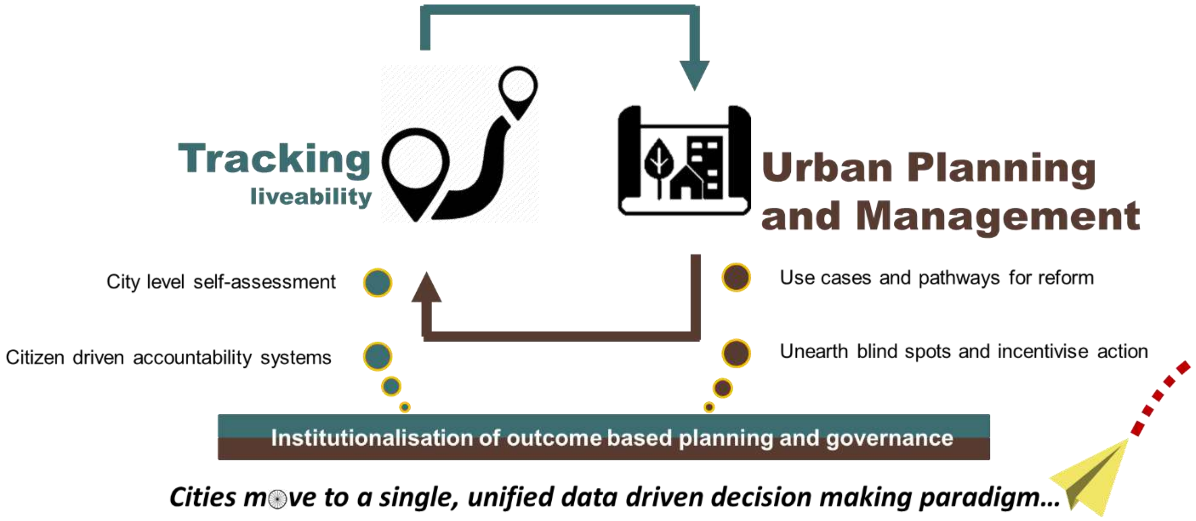
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking

Urban Planning and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

2.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed

Pillars of Comprehensive Development	Category	Indicators
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	2. Identity and Culture	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases

Pillars of Comprehensive Development	Category	Indicators
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	6. Economy and Employment	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	7. Housing and Inclusiveness	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year

Pillars of Comprehensive Development	Category	Indicators
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water

Pillars of Comprehensive Development	Category	Indicators
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

2.2 Scoring and Computing Category Indices of Liveability

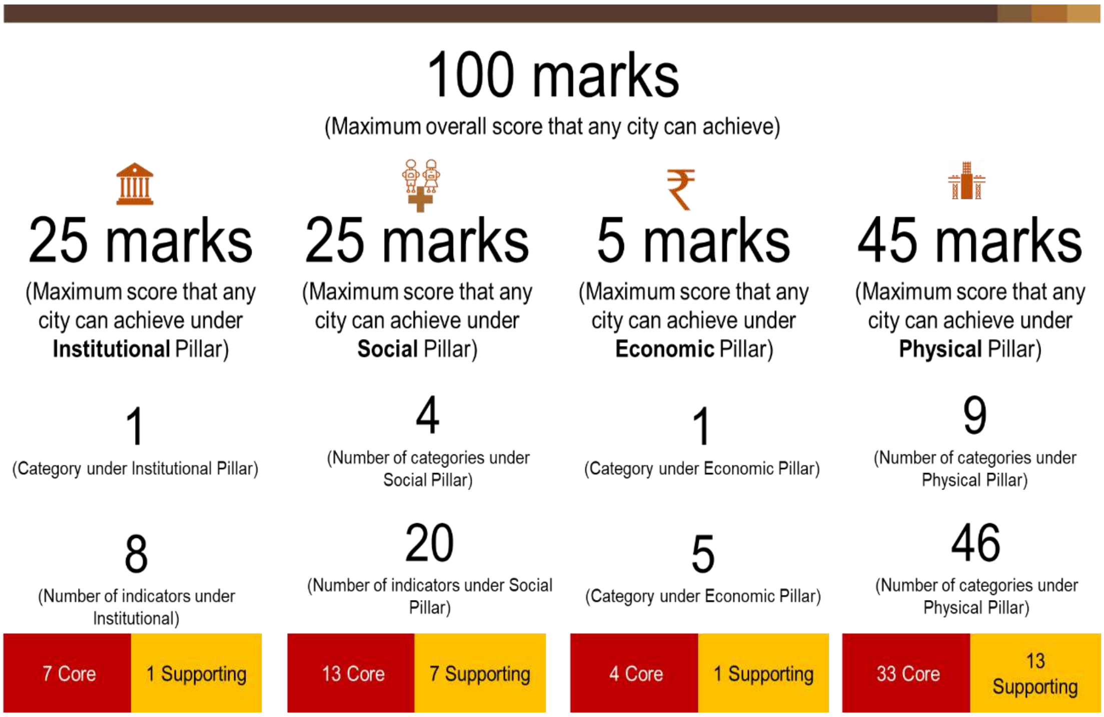
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

2.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core / 1 Supporting	13 Core / 7 Supporting	4 Core / 1 Supporting	33 Core / 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks

awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

2.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

3. City Reconnaissance Meetings:

State level workshop was necessary to make cities understand the importance and process of liveability assessment. City level assessments didn't happen as State level workshop could not be conducted despite several meetings and follow ups with Urban development department and SUDA at state level.

7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts Department, HDMC
Urban Local Body	For Park and Recreation Related Questions	Town Planning Department, HDMC
Urban Local Body	For Water Supply and Drainage related questions	KUWSDB, Hubballi Office (Water Board) & Engineering Department, HDMC
Urban Local Body	For Heritage sites related data	Town Planning Department, HDMC
Urban Local Body	For Ecological sites related data	Town Planning Department, HDMC
Urban Local Body	For Housing related data	Housing - Engineering Department, HDMC
Urban Local Body	For Building plan related data	Town Planning Department, HDMC
Urban Local Body	For Roads related data	Engineering Department, HDMC
Urban Local Body	For Solid waste management related data	SWM – Engineering Department, HDMC
Urban Local Body	For IT services related data	Information Technology Department, HDMC
Urban Local Body	For Vendor committee related data	Town Vending Committee, HDMC
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Professional Tax Department
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	State Pollution Control Board, Dharwad District Office.
Development Authority	Building Infrastructure	Town Planning Department, HDMC

Designated data owners	Subcategories	Data owners at city level
	Construction planning	Town Planning Department, HDMC
	Green Building	Town Planning Department, HDMC
	Rain water harvesting	Town Planning Department, HDMC
	Universal Design Principle	Town Planning Department, HDMC
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Hubli Electricity Supply Company Limited
State Disaster management authority		Engineering Department, HDMC
State Education Department		Education Department, Dharwad District Office.
State Health Department	Health care professionals	Health Department, Dharwad District Office.
	Citizen Services	Health Department, Dharwad District Office.
	Disease Prevalence	Health Department, Dharwad District Office.
	Health Infrastructure	Health Department, Dharwad District Office.
State Renewable Energy Development Agency	Renewable Energy	Hubli Electricity Supply Company Limited
State Sales / Commercial Taxes Department		Sales & Commercial Taxes Department, Dharwad District Office.
Town and Country Planning Department	Land Use	Hubballi Dharwad Urban Development Authority
Traffic and Police Department		Hubballi Dharwad Police Department.
Transport Authorities	Buses	North Western Karnataka Road Transport Corporation (NWKRTC), Hubli Division.
	Registered Vehicles	Regional Transport Office (RTO) – Navanagar Hubli Office KA 25 & Gabbur cross Hbl KA 63 Office.
	Sub urban rail transport	Not Applicable
	Mono Rail Authority	Not Applicable
	Tramways	Not Applicable
	Marine Transport Authority	Not Applicable

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 11 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	2
DISCOM/Electricity Department	0
Traffic and Police Department	1
Development Authority	1
Pollution Control Board	1
State Renewable Energy Department	0
Town and Country Planning	1
State Health Department	2
Transport Authority	1
Disaster Management	0
Urban Local Body	2
Total	11*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

8. LA - Universal Design Principles

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	Percentage of citizen services available online	**72.65**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	0.5
	1.1e water supply	0.333333333
	1.1f sewerage/drainage	0
	1.1g fogging	0.5
	1.1h property tax	1
	1.1i professional tax	1
	1.1j information	1
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.111111111
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	Percentage of services integrated through Command Centre	**21.43**
Description	Services integrated through an integrated or a singular operations command centre	4.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	Percentage of citizens using online services	**3.85**
Description		
Sub Indicators	1.3a Building plan	0.000517103
	1.3b Birth/Death Certificate	NA
	1.3c water supply	NA

	1.3d solid waste management	NA
	1.3e property tax	0.000359826
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	NA
	1.3i information	NA
	1.3j electricity	0.114648179
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	Average delay in grievance redressal	**0.57**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	4
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	Tax collected as percentage of tax billed	**89.81**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	5061.69
Denominator	Total demand raised for the year	5636.12
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	Extent of cost recovery (O&M) in water supply services	**81.16**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	1256.54

Denominator	Total O&M cost for providing water supply services during the year	1548.28
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	Capital spending as percentage of total expenditure	**57.12**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	78128.52
Denominator	Total expenditure (revenue and capital accounts) in the same year	136786.61
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	Percentage of population covered under Ward Committees/ Area *Sabhas*	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	67
Denominator	Total number of wards	67
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	Restoration and reuse of historic buildings	**40**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	2
Denominator	Total number of historic buildings/sites identified	5
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	Percentage of ecologically important areas covered through projects for restoration	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	NA
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	Hotel Occupancy	**65**

Description	Average Occupancy rate of Hotels	65
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	Percentage of budget allocated towards cultural/sports activities	**0.63**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	191.78
Denominator	Total budget of the ULB (capital and revenue)	30365.58
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	Number of cultural/sports events hosted by city	**146**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	146
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	Percentage of school-aged population enrolled in schools	**86.58**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	143196
Denominator	Total population in the age group of 6-14 years	165389
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	Percentage of female school-aged population enrolled in schools	**85.19**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	68427
Denominator	Total female population in the age group of 6-14 years	80321
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	Primary education student-teacher ratio	**23.86**
Formula:	*Numerator / Denominator*	

Numerator	Total number of students in primary grades (public and private)	90748
Denominator	Total number of teachers available for primary grades (public and private schools)	3804
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	Percentage of schools with access to digital education	**10.24**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	64
Denominator	Total number of schools	625
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	Percentage of students completing primary education	**105.53**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	105.5255055
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	Percentage of students completing secondary education	**101.2**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	299390520
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	Number of in-patient hospital beds per 10,000 population	**41.6**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	4359
Denominator	Total population of the city	1047838
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	Healthcare professionals per 10,000 population	**29.74**
Formula:	*Numerator / Denominator*	

Numerator	Total number of qualified healthcare professionals	3116
Denominator	Total population of the city	1047838
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	Average response time in case of health emergencies	**14**
Description	Total response time for health-related distress calls received in the city	14
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	Period prevalence of water borne diseases	**0.6**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	6269
Denominator	Total population of the city	1047838
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	Period prevalence of vector borne diseases	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	153
Denominator	Total population of the city	1047838
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	Total number of CCTV cameras installed in the city	**10.79**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	240
Denominator	Total length of road network in the city	2223.86
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	Number of recorded crimes per lakh population	**216.73**
Formula:	Numerator / Denominator	

Numerator	Total number of crimes recorded in a year	2271
Denominator	Total population of the city	1047838
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	Extent of crimes recorded against women, children and elderly per year	**12.42**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	282
Denominator	Total crimes recorded in the same year	2271
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	Transport-related fatality per lakh population	**8.88**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	93
Denominator	Total population of the city	1047838
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	Increase in VAT/GST collection	**11.12**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	12824.87
Denominator	Total VAT/GST collection during preceding year	1153.1449
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	Increase in collection of Professional Tax	**-87.1**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	-1245.59

Denominator	Total Professional Tax collection during preceding year	1430.13
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	Increase in issuance of Construction Permits	**349.54**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	1905
Denominator	Number of construction permits during preceding year	5.45
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	Unemployment Rate	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	2185
Denominator	Total labour force in the city	165389
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	Percentage of vendors registered and provided formal spaces	**125.74**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	5667
Denominator	Total number of vendors in the city	4507
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	Percentage of Slum/EWS households covered through formal/ housing	**5.53**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	4835

Denominator	Total number of slum and EWS households in the city	874.74
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	Percentage of slum areas covered through basic services	**0.96**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	509100321000
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.21**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	218477.66
Denominator	Total population of the city	1047838
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**1.58**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	1657134.26
Denominator	Total population of the city	1047838
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	Share of mixed land use area in overall city land use	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	202300000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 9.2	Net Density	**0.9**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1047838
Denominator	Area allocated for residential land use (in hectares)	1159500
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	Percentage of city population with authorized electrical service	**110.6**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	274835
Denominator	Total number of households in the city	248500
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	Percentage of electrical connections covered through smart meters	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	NA
Denominator	Total number of electricity connections in the city	351955
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	Average number of electrical interruptions per year	**16154**
Description	Total number of sustained electrical interruptions in a year	16154
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	Average length of electrical interruptions per year	**0.77**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	201824
Unit	Hours	

Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	Percentage of total energy derived from renewable sources	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	979
Denominator	Total energy consumption from all sources	492491861
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	Energy consumption per unit - water supply and sewerage	**0.31**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	381760.6667
Denominator	Total quantum of water and waste water handled during the period	3109.2
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	Energy consumption per unit – street lighting	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	12834988
Denominator	Total number of street light installations	51147
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	Percentage of new and redeveloped buildings following green building norms	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	314421
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	Total energy consumption per capita	**0.69**
Formula:	*Numerator / Denominator*	

Numerator	Total energy consumption (for all uses) in the city	492491861
Denominator	Total population of the city	1047838
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	Geographical coverage of public transport	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	1195.1
Denominator	Total area of the city (sq.km)	202.3
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	Availability of public transport	**0.4**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	414
Denominator	Total population of the city	1047838
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	Mode share of public transport	**To be computed**
Description	Mode share of public transport	33
Unit	Percentage	
Benchmark		
Indicator No: 11.4	Percentage of road network with dedicated bicycle tracks	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	2223.86
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	Percentage of interchanges with bicycle parking facilities	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with	NA

	bicycle parking facility (within 250m radius)	
Denominator	Total number of major transport interchanges in the city	6
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	Mode share of non-motorised transport[1]	**To be computed**
Description	Mode share of non-motorised transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.7	Availability of Passenger Information System	**81.83**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	491
Denominator	Total number of major interchanges in the city	6
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	Extent of signal synchronisation	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	34
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	Availability of paid parking spaces	**62.16**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	23
Denominator	Total available on-street parking spaces in the city	37
Unit		
Benchmark		
Indicator No: 11.10	Percentage coverage of footpaths – wider than 1.2m	**0.28**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	12.5
Denominator	Total length of road network in the city	4447.72
Unit	Percentage	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	>=75	
Indicator No: 11.11	Percentage of traffic intersections with pedestrian crossing facilities	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	Data Unavailable
Denominator	Total number of junctions/ intersections on major roads in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	Extent to which universal accessibility is incorporated in public rights-of-way	**231.38**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	553
Denominator	Total number of public right-of-way areas in the city	239
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	Household level coverage of direct water supply connections	**22.43**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	55744
Denominator	Total number of households in the city	248500
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	Per capita supply of water	**60.73**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	63.64
Denominator	Total population of the city	1047838
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	Quality of water supplied[2]	**To be computed**
Formula:	*Numerator / Denominator*	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Number of samples meeting or exceeding specified potable water standards	5734
Denominator	Total number of samples tested for water quality	6047
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	Level of non-revenue water – NRW	**7.33**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	4.665
Denominator	Quantum of water put into the distribution system (mld)	63.64
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	Percentage of water connections covered through meters	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	58416
Denominator	Total number of water connections in the city	58416
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	Percentage of plots with rainwater harvesting facility	**2.57**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	63
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	2450
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	Coverage of toilets	**98.82**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	245559

Denominator	Total number of properties in the city	248500
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	Coverage of sewerage network and/or septage	**57.06**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	141800
Denominator	Total number of properties in the city	248500
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	Collection efficiency of sewerage network	**66.67**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	40
Denominator	Total waste water generated in the city per day	60
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	Extent of reuse and recycling of waste water	**282.86**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	99
Denominator	Total waste water received at treatment plants per day	35
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	Coverage of storm water drains	**0.09**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	2
Denominator	Total length of road network in the city	2223.86
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	Household level coverage of municipal solid waste collection	**69.92**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	190000
Denominator	Total number of households and establishments in the city	271755

Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	Efficiency of collection of municipal solid waste	**90**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	360
Denominator	Total quantum of MSW generated in the city	400
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	Extent of municipal solid waste recovered through reuse	**1.39**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	150
Denominator	Average MSW generated in the city (tons per month)	10800
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**5**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	5
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**24**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	24
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**78**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	78
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	Data Unavailable

Denominator	Total number of noise samples	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**85.42**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	82
Denominator	Total number of samples tested	96
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT

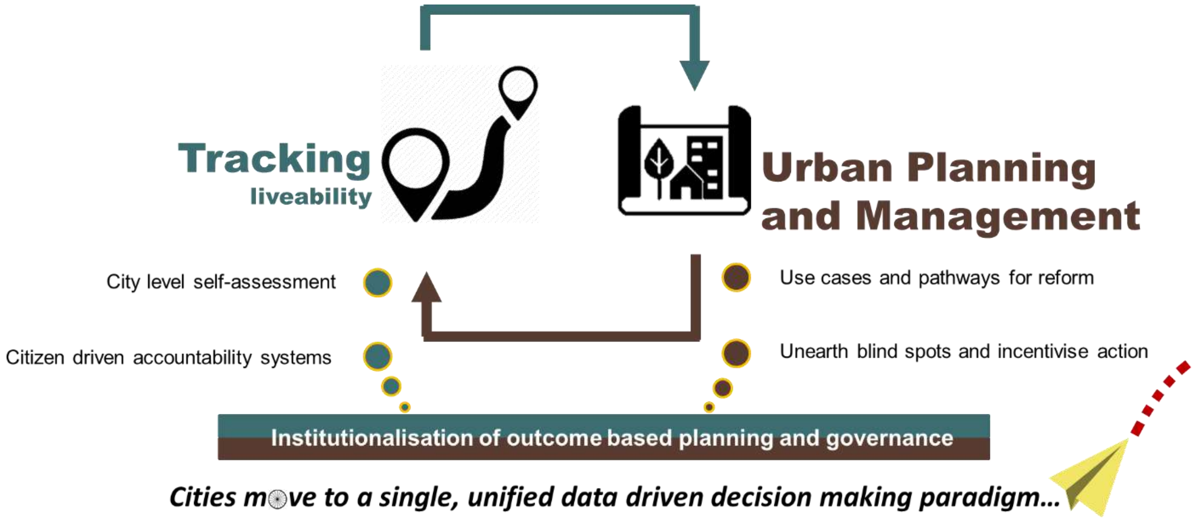
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

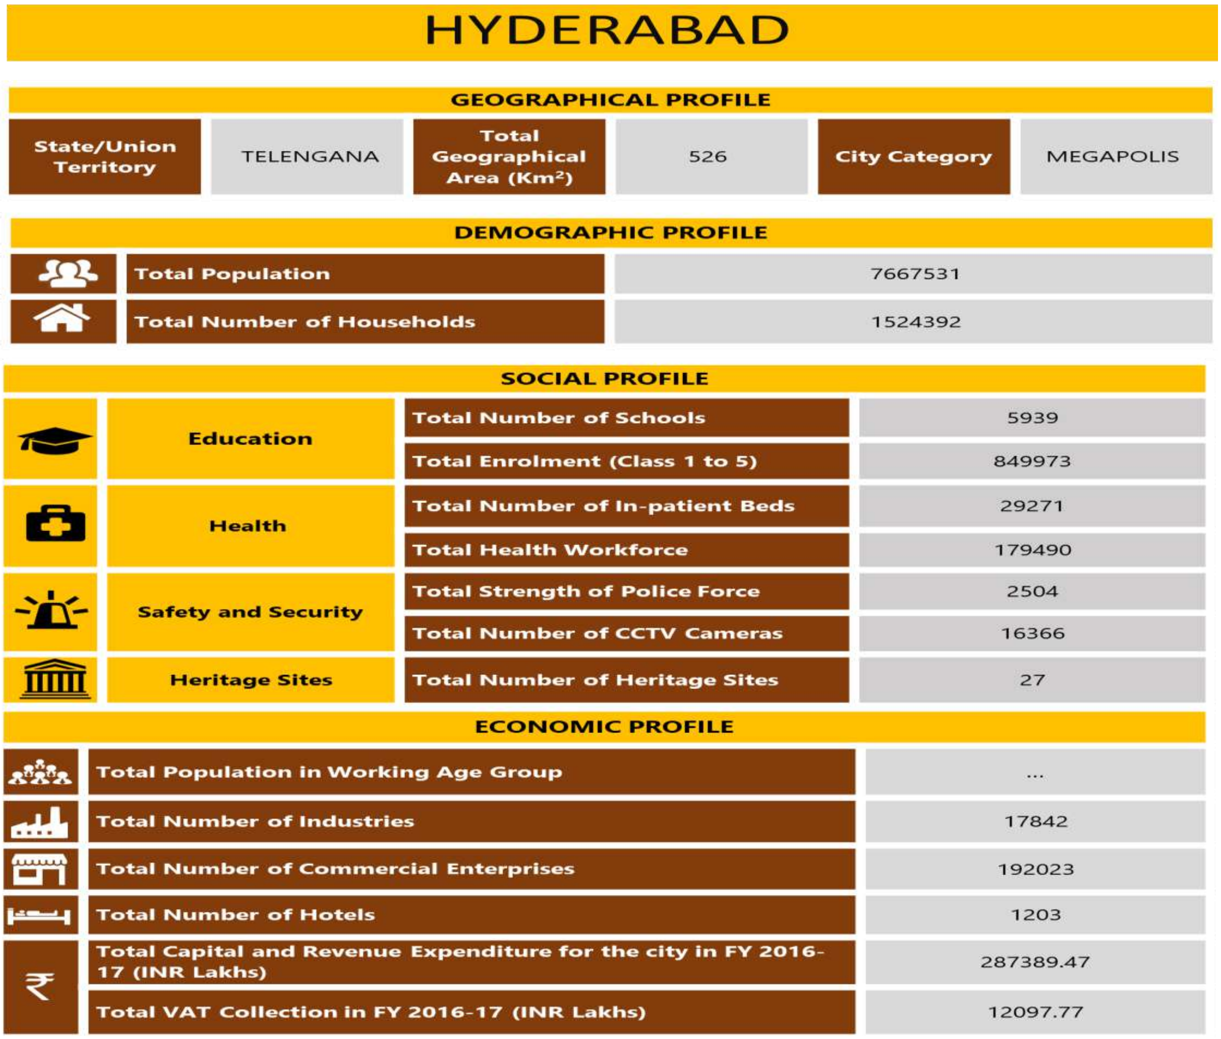
Cities move to a single, unified data driven decision making paradigm…

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



HYDERABAD

GEOGRAPHICAL PROFILE

State/Union Territory	TELENGANA	**Total Geographical Area (Km^2)**	526	**City Category**	MEGAPOLIS

DEMOGRAPHIC PROFILE

Total Population	7667531
Total Number of Households	1524392

SOCIAL PROFILE

Education	**Total Number of Schools**	5939
	Total Enrolment (Class 1 to 5)	849973
Health	**Total Number of In-patient Beds**	29271
	Total Health Workforce	179490
Safety and Security	**Total Strength of Police Force**	2504
	Total Number of CCTV Cameras	16366
Heritage Sites	**Total Number of Heritage Sites**	27

ECONOMIC PROFILE

Total Population in Working Age Group	...
Total Number of Industries	17842
Total Number of Commercial Enterprises	192023
Total Number of Hotels	1203
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	287389.47
Total VAT Collection in FY 2016-17 (INR Lakhs)	12097.77

PHYSICAL PROFILE		
Water	**Average Quantity of Water Supplied (MLD)**	1780
	Total Number of Water Connection	945453
Sanitation Facilities	**Total number of households with access to individual toilets in the city**	...
	Total number of households in the city with access to community toilets in the city	...
Solid Waste Management	**Daily average quantity of municipal solid waste collected in the city (Tonnes/day)**	4800
	Total number of households covered through door-to-door collection of solid waste	19.57
Waste Water	**Daily Average Quantum of Waste Water Generated in the City (MLD)**	1350
	Daily average quantum of waste water treated by STPs in the city (MLD)	700
Electricity	**Total number of authorized electrical connections in the city**	1912994
	Total electricity supplied to the city (kWh)	6612.52
Public and Open Spaces	**Total area covered by green spaces in the city (m^2)**	2662268
Roads and Transport	**Total Length of Road Network in the City (Km)**	9103.35
	Total length of arterial and sub-arterial road network in the city (Km)	345
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	335

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	2. Identity and Culture	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary

Pillars of Comprehensive Development	Category	Indicators
		education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	6. Economy and Employment	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	7. Housing and Inclusiveness	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian

Pillars of Comprehensive Development	Category	Indicators
		crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

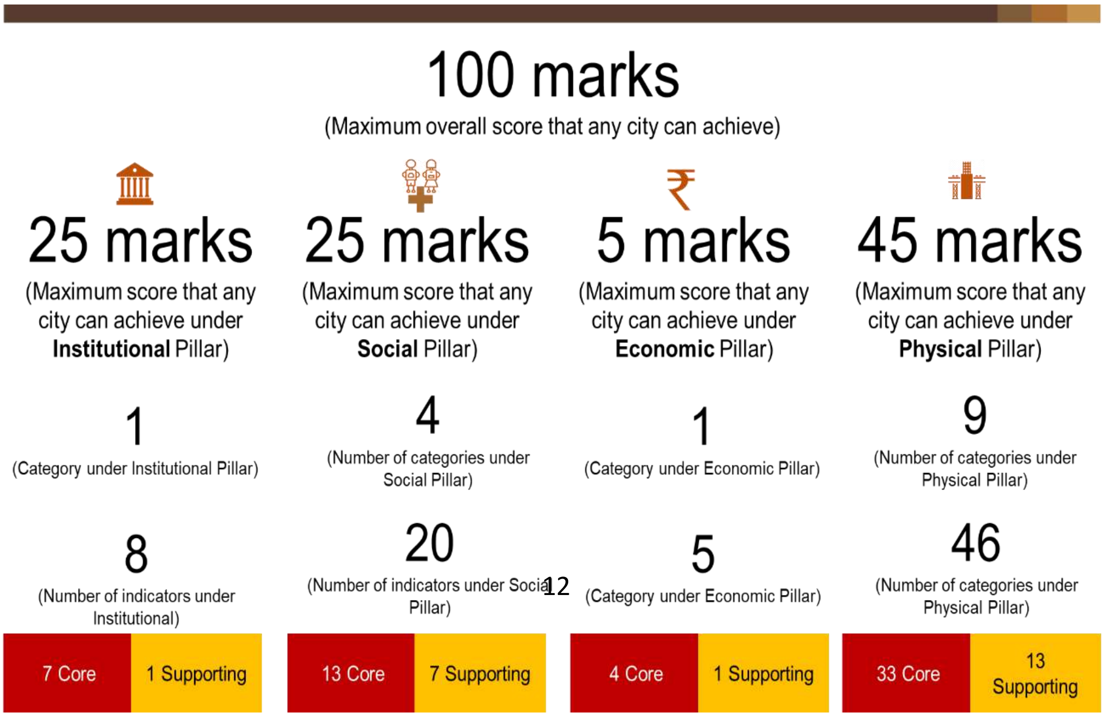
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry.

The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Finance Wing, Greater Hyderabad Municipal Corporation and Commercial Tax Department, Govt. of Telangana
Urban Local Body	For Park and Recreation Related Questions	Urban Biodiversity Wing, Greater Hyderabad Municipal Corporation
Urban Local Body	For Water Supply and Drainage related questions	Hyderabad Metro Water Supply and Sewage Board
Urban Local Body	For Heritage sites related data	Department of Archaeology, Telangana
Urban Local Body	For Ecological sites related data	Department of Archaeology, Telangana
Urban Local Body	For Housing related data	Housing Wing, Greater Hyderabad Municipal Corporation
Urban Local Body	For Building plan related data	Town Planning Wings of Greater Hyderabad Municipal Corporation and Hyderabad Metropolitan Development Authority
Urban Local Body	For Roads related data	Projects and Maintenance Wings of Greater Hyderabad Municipal Corporation
Urban Local Body	For Solid waste management related data	Solid Waste Management (SWM) Wing, Greater Hyderabad Municipal Corporation
Urban Local Body	For IT services related data	IT Wing, Greater Hyderabad Municipal Corporation and Information Technology,

Designated data owners	Subcategories	Data owners at city level
		Electronics and Communications Department, Govt of Telangana
Urban Local Body	For Vendor committee related data	Urban Community Development, Greater Hyderabad Municipal Corporation
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Sports Authority of Telangana,
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Telangana State Pollution Control Board
Development Authority	Building Infrastructure	Town Planning Wings of Greater Hyderabad Municipal Corporation and Hyderabad Metropolitan Development Authority
	Construction planning	Town Planning Wings of Greater Hyderabad Municipal Corporation and Hyderabad Metropolitan Development Authority
	Green Building	Town Planning Wings of Greater Hyderabad Municipal Corporation and Hyderabad Metropolitan Development Authority
	Rain water harvesting	Town Planning Wings of Greater Hyderabad Municipal Corporation and Hyderabad Metropolitan Development Authority
	Universal Design Principle	Town Planning Wings of Greater Hyderabad Municipal Corporation and Hyderabad
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Telangana Southern power distribution Company Limited
State Disaster management authority		State Disaster Management, Greater Hyderabad Municipal Corporation, tank Bund Hyderabad.
State Education Department		Commissioner and Directorate of school Education, Telangana
State Health Department	Health care professionals	NHM/health Department Telagana
	Citizen Services	NHM/health Department Telagana
	Disease Prevalence	Telangana State Health Department
	Health Infrastructure	Telangana State Health Department

Designated data owners	Subcategories	Data owners at city level
State Renewable Energy Development Agency	Renewable Energy	Telangana state renewable energy department
State Sales / Commercial Taxes Department		Government of Telangana Commercial Taxes Department
Town and Country Planning Department	Land Use	Town and country planning, GHMC, Telangana
Traffic and Police Department		Department of police, Telangana
Transport Authorities	Buses	Telangana State Road Transport Corporation
	Registered Vehicles	Road Transport Authority Telangana
	Sub urban rail transport	Indian railways
	Mono Rail Authority	Not applicable
	Tramways	Not applicable
	Marine Transport Authority	Not applicable

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 213 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	7
State Education Department	0
DISCOM/Electricity Department	1

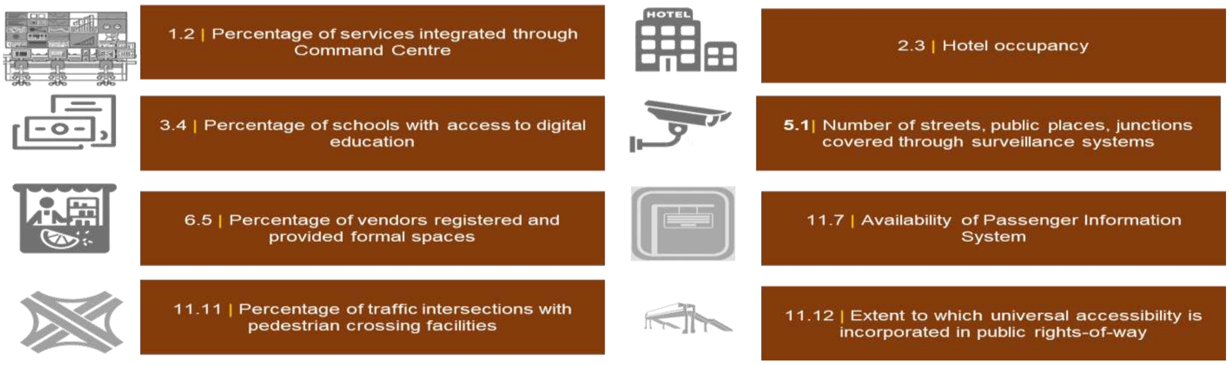
4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	Percentage of citizen services available online	**83.53**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	1
	1.1d solid waste management	0.5
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	0.5
	1.1j information	0.692307692
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.666666667
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	Percentage of services integrated through Command Centre	**83.33**
Description	Services integrated through an integrated or a singular operations command centre	17.5

Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	Percentage of citizens using online services	**30.01**
Description		
Sub Indicators	1.3a Building plan	0.083663604
	1.3b Birth/Death Certificate	0.146599577
	1.3c water supply	NA
	1.3d solid waste management	0.146637006
	1.3e property tax	0.874252967
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.000319045
	1.3i information	0.549222094
	1.3j electricity	NA
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	Average delay in grievance redressal	**3**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	18
	1.4d sewerage	0
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	Tax collected as percentage of tax billed	**89.16**
Formula:	*Numerator / Denominator*	

Numerator	Total tax collected in a year	120573
Denominator	Total demand raised for the year	135231
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	Extent of cost recovery (O&M) in water supply services	**114.25**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	105700
Denominator	Total O&M cost for providing water supply services during the year	92515.73
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	Capital spending as percentage of total expenditure	**33.58**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	283486.64
Denominator	Total expenditure (revenue and capital accounts) in the same year	844250.44
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	Percentage of population covered under Ward Committees/ Area *Sabhas*	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	150
Denominator	Total number of wards	150
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	Restoration and reuse of historic buildings	**55.56**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	15
Denominator	Total number of historic buildings/sites identified	27

Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	Percentage of ecologically important areas covered through projects for restoration	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	Hotel Occupancy	**42.4**
Description	Average Occupancy rate of Hotels	42.4
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	Percentage of budget allocated towards cultural/sports activities	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	1849
Denominator	Total budget of the ULB (capital and revenue)	287389.47
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	Number of cultural/sports events hosted by city	**61**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	61
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	Percentage of school-aged population enrolled in schools	**103.79**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public	1290785

	and private)	
Denominator	Total population in the age group of 6-14 years	1243610
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	Percentage of female school-aged population enrolled in schools	**104.24**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	626166
Denominator	Total female population in the age group of 6-14 years	600674
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	Primary education student-teacher ratio	**23.55**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	849973
Denominator	Total number of teachers available for primary grades (public and private schools)	36096
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	Percentage of schools with access to digital education	**9.45**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	561
Denominator	Total number of schools	5939
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	Percentage of students completing primary education	**661.14**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	661.1377317
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	Percentage of students completing secondary education	**250.08**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	21094112007

Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	Number of in-patient hospital beds per 10,000 population	**41.86**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	29271
Denominator	Total population of the city	6993262
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	Healthcare professionals per 10,000 population	**25.01**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	17490
Denominator	Total population of the city	6993262
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	Average response time in case of health emergencies	**15**
Description	Total response time for health-related distress calls received in the city	15
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	Period prevalence of water borne diseases	**1.06**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	74222
Denominator	Total population of the city	6993262
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	Period prevalence of vector borne diseases	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	2250

Denominator	Total population of the city	6993262
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	Total number of CCTV cameras installed in the city	**179.78**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	16366
Denominator	Total length of road network in the city	9103.35
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	Number of recorded crimes per lakh population	**314.57**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	21999
Denominator	Total population of the city	6993262
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	Extent of crimes recorded against women, children and elderly per year	**9.73**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	2141
Denominator	Total crimes recorded in the same year	21999
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	Transport-related fatality per lakh population	**5.63**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	394

Denominator	Total population of the city	6993262
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	Increase in VAT/GST collection	**19.25**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	1952.78
Denominator	Total VAT/GST collection during preceding year	101.4499
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	Increase in collection of Professional Tax	**-100**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	-2750
Denominator	Total Professional Tax collection during preceding year	2750
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	Increase in issuance of Construction Permits	**281.66**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	19657
Denominator	Number of construction permits during preceding year	69.79
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	Unemployment Rate	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	76185

Denominator	Total labour force in the city	1243610
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	Percentage of vendors registered and provided formal spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	Data Unavailable
Denominator	Total number of vendors in the city	31090.25
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	Percentage of Slum/EWS households covered through formal/ housing	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	0
Denominator	Total number of slum and EWS households in the city	4216.08
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	Percentage of slum areas covered through basic services	**41.27**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	30926942145868000
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.38**
Formula:	*Numerator / Denominator*	

Numerator	Total area of green space (sq.m.)	2662268
Denominator	Total population of the city	6993262
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	Data Unavailable
Denominator	Total population of the city	6993262
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	Share of mixed land use area in overall city land use	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	0
Denominator	Total area of the city (total area of all land uses)	526000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	Net Density	**13970.6**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	6993262
Denominator	Area allocated for residential land use (in hectares)	500.57
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	Percentage of city population with authorized electrical service	**400.63**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	6107179
Denominator	Total number of households in the city	1524392
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	Percentage of electrical connections covered through smart meters	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	1912994
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	Average number of electrical interruptions per year	**31189**
Description	Total number of sustained electrical interruptions in a year	31189
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	Average length of electrical interruptions per year	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	336.9527778
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	Percentage of total energy derived from renewable sources	**NC**
Formula:	*Numerator / Denominator*	

Numerator	Total installed capacity for generation of renewable energy in the city	NA
Denominator	Total energy consumption from all sources	6612.52
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	Energy consumption per unit - water supply and sewerage	**0**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	110000000
Denominator	Total quantum of water and waste water handled during the period	74400
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	Energy consumption per unit – street lighting	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	238
Denominator	Total number of street light installations	405000
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	Percentage of new and redeveloped buildings following green building norms	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	NA
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	138076
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	Total energy consumption per capita	**0.81**

Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	6612.52
Denominator	Total population of the city	6993262
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	Geographical coverage of public transport	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	17273
Denominator	Total area of the city (sq.km)	526
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	Availability of public transport	**1.21**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	8486
Denominator	Total population of the city	6993262
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	Mode share of public transport	**To be computed**
Description	Mode share of public transport	43.3
Unit	Percentage	
Benchmark		
Indicator No: 11.4	Percentage of road network with dedicated bicycle tracks	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	3
Denominator	Total length of road network in the city	9103.35
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	Percentage of interchanges with bicycle parking facilities	**23.33**
Formula:	*Numerator / Denominator*	

Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	21
Denominator	Total number of major transport interchanges in the city	90
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	Mode share of non-motorised transport[1]	**To be computed**
Description	Mode share of non-motorised transport	0.42
Unit	Percentage	
Benchmark		
Indicator No: 11.7	Availability of Passenger Information System	**1.48**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	133
Denominator	Total number of major interchanges in the city	90
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	Extent of signal synchronisation	**10**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	12
Denominator	Total number of signalised intersections in the city	120
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	Availability of paid parking spaces	**1000**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	800
Denominator	Total available on-street parking spaces in the city	80
Unit		
Benchmark		
Indicator No: 11.10	Percentage coverage of footpaths – wider than 1.2m	**1.84**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	335
Denominator	Total length of road network in the city	18206.7

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	Percentage of traffic intersections with pedestrian crossing facilities	**81.02**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	239
Denominator	Total number of junctions/ intersections on major roads in the city	295
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	Extent to which universal accessibility is incorporated in public rights-of-way	**33.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	318
Denominator	Total number of public right-of-way areas in the city	954
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	Household level coverage of direct water supply connections	**59.7**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	910068
Denominator	Total number of households in the city	1524392
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	Per capita supply of water	**254.53**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	1780
Denominator	Total population of the city	6993262
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	Quality of water supplied[2]	**To be computed**

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	1026288
Denominator	Total number of samples tested for water quality	1028367
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	Level of non-revenue water – NRW	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	1780
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	Percentage of water connections covered through meters	**25.84**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	244298
Denominator	Total number of water connections in the city	945453
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	Percentage of plots with rainwater harvesting facility	**13.43**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	1646
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	12256
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	Coverage of toilets	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	Total number of properties with access to individual and/or community toilets	Data Unavailable
Denominator	Total number of properties in the city	1443767
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	Coverage of sewerage network and/or septage	**65.5**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	945735
Denominator	Total number of properties in the city	1443767
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	Collection efficiency of sewerage network	**106.67**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	1440
Denominator	Total waste water generated in the city per day	1350
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	Extent of reuse and recycling of waste water	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	700
Denominator	Total waste water received at treatment plants per day	700
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	Coverage of storm water drains	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	0
Denominator	Total length of road network in the city	9103.35
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	Household level coverage of municipal solid waste collection	**0.06**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	1108.8

Denominator	Total number of households and establishments in the city	1716415
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	Efficiency of collection of municipal solid waste	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	4800
Denominator	Total quantum of MSW generated in the city	4800
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	Extent of municipal solid waste recovered through reuse	**7.07**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	10175
Denominator	Average MSW generated in the city (tons per month)	144000
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**5.9**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	5.9
Unit	μg/m3	
Benchmark	Annual mean concentration of 50 μg/m3 OR Mean concentration over 24 hours of 80 μg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**34.1**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	34.1
Unit	μg/m3	
Benchmark	Annual mean concentration of 40 μg/m3 OR Mean concentration over 24 hours of 80 μg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**123**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	123
Unit	μg/m3	
Benchmark	Annual mean concentration of 60 μg/m3 OR Mean concentration over 24 hours of 100 μg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**

Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	1319
Denominator	Total number of noise samples	5992
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	0
Denominator	Total number of samples tested	156
Unit	Percentage	
Benchmark	100%

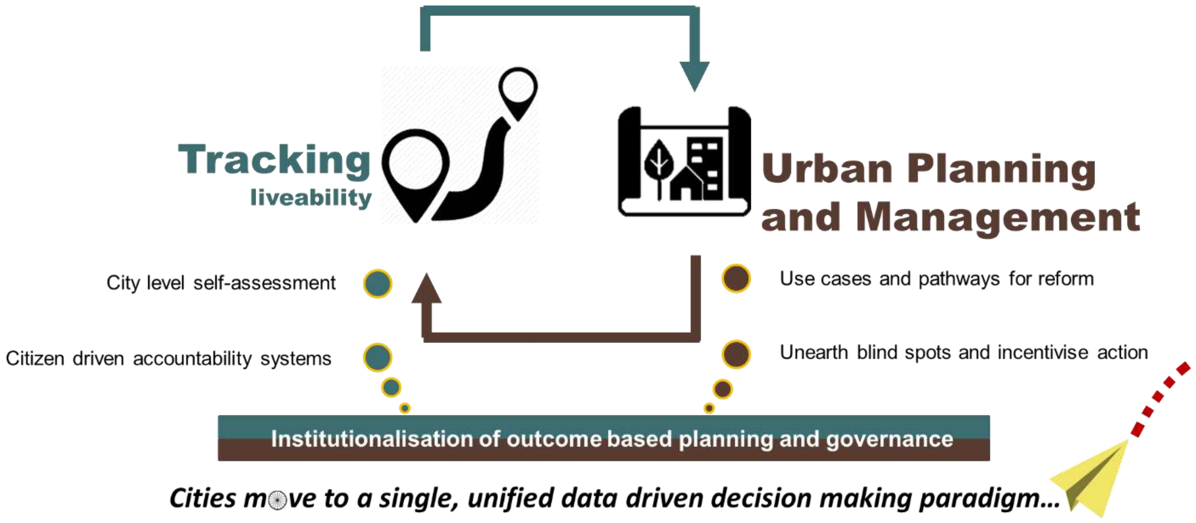
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

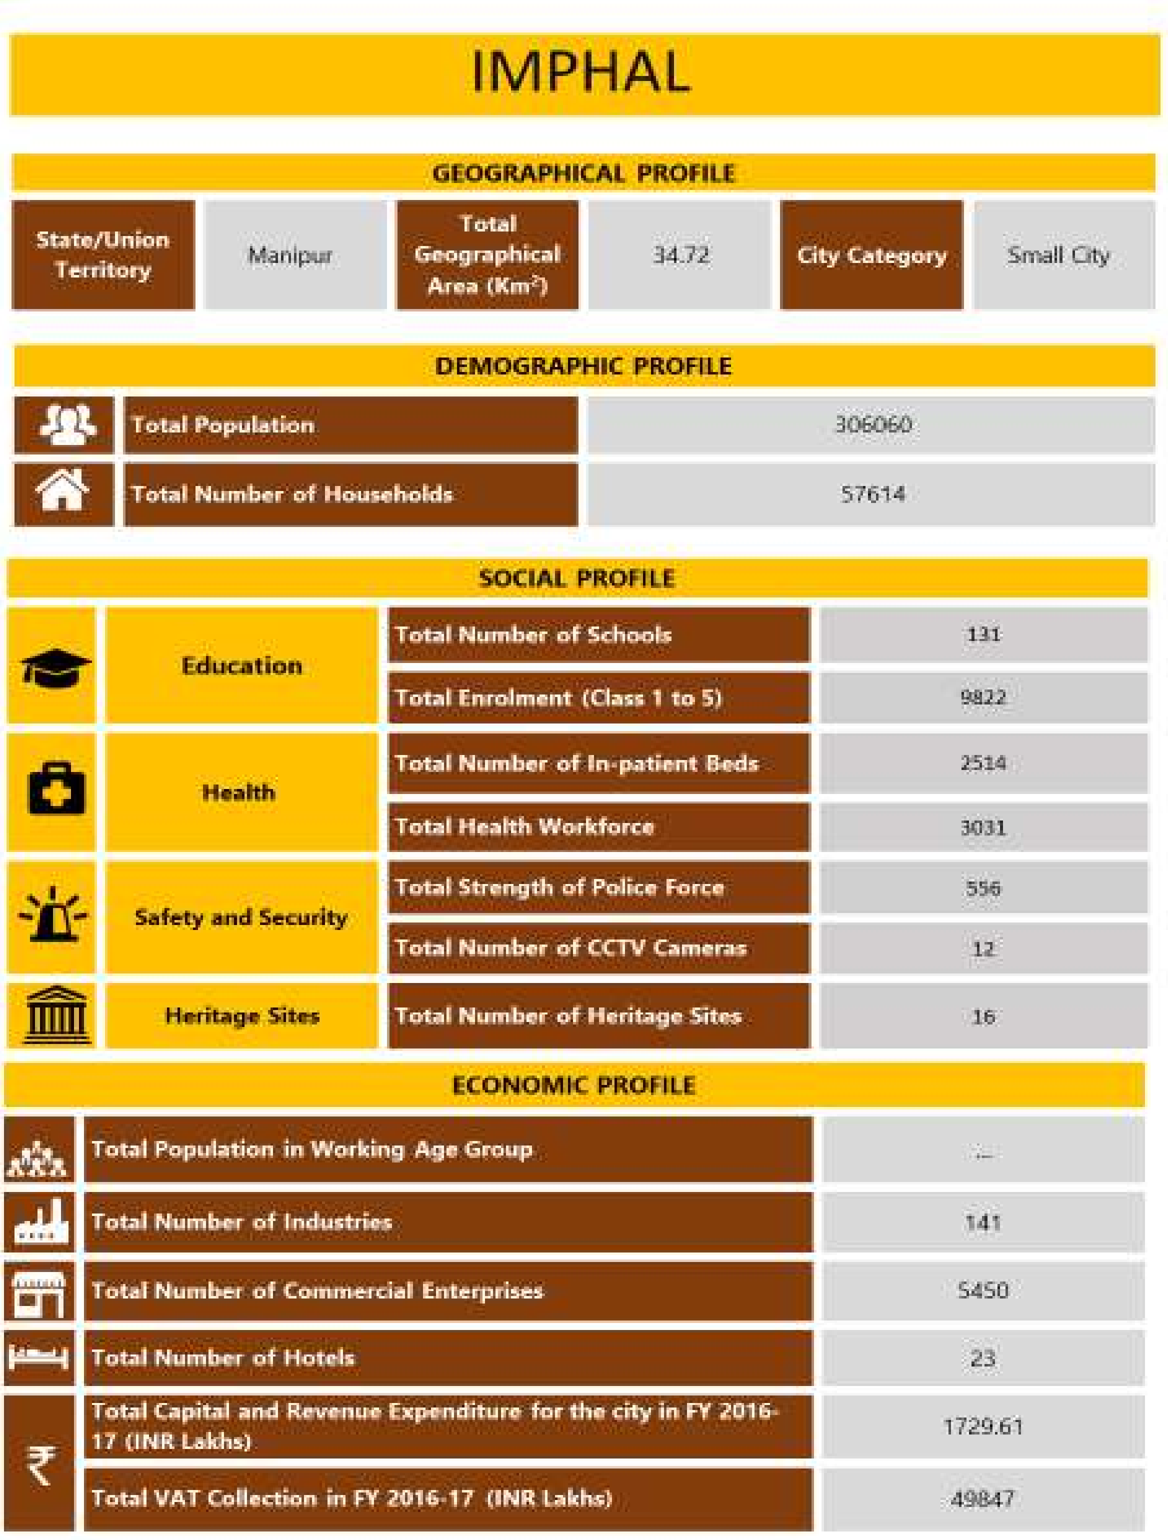
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including

smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



IMPHAL

GEOGRAPHICAL PROFILE

State/Union Territory	Manipur	**Total Geographical Area (Km²)**	34.72	**City Category**	Small City

DEMOGRAPHIC PROFILE

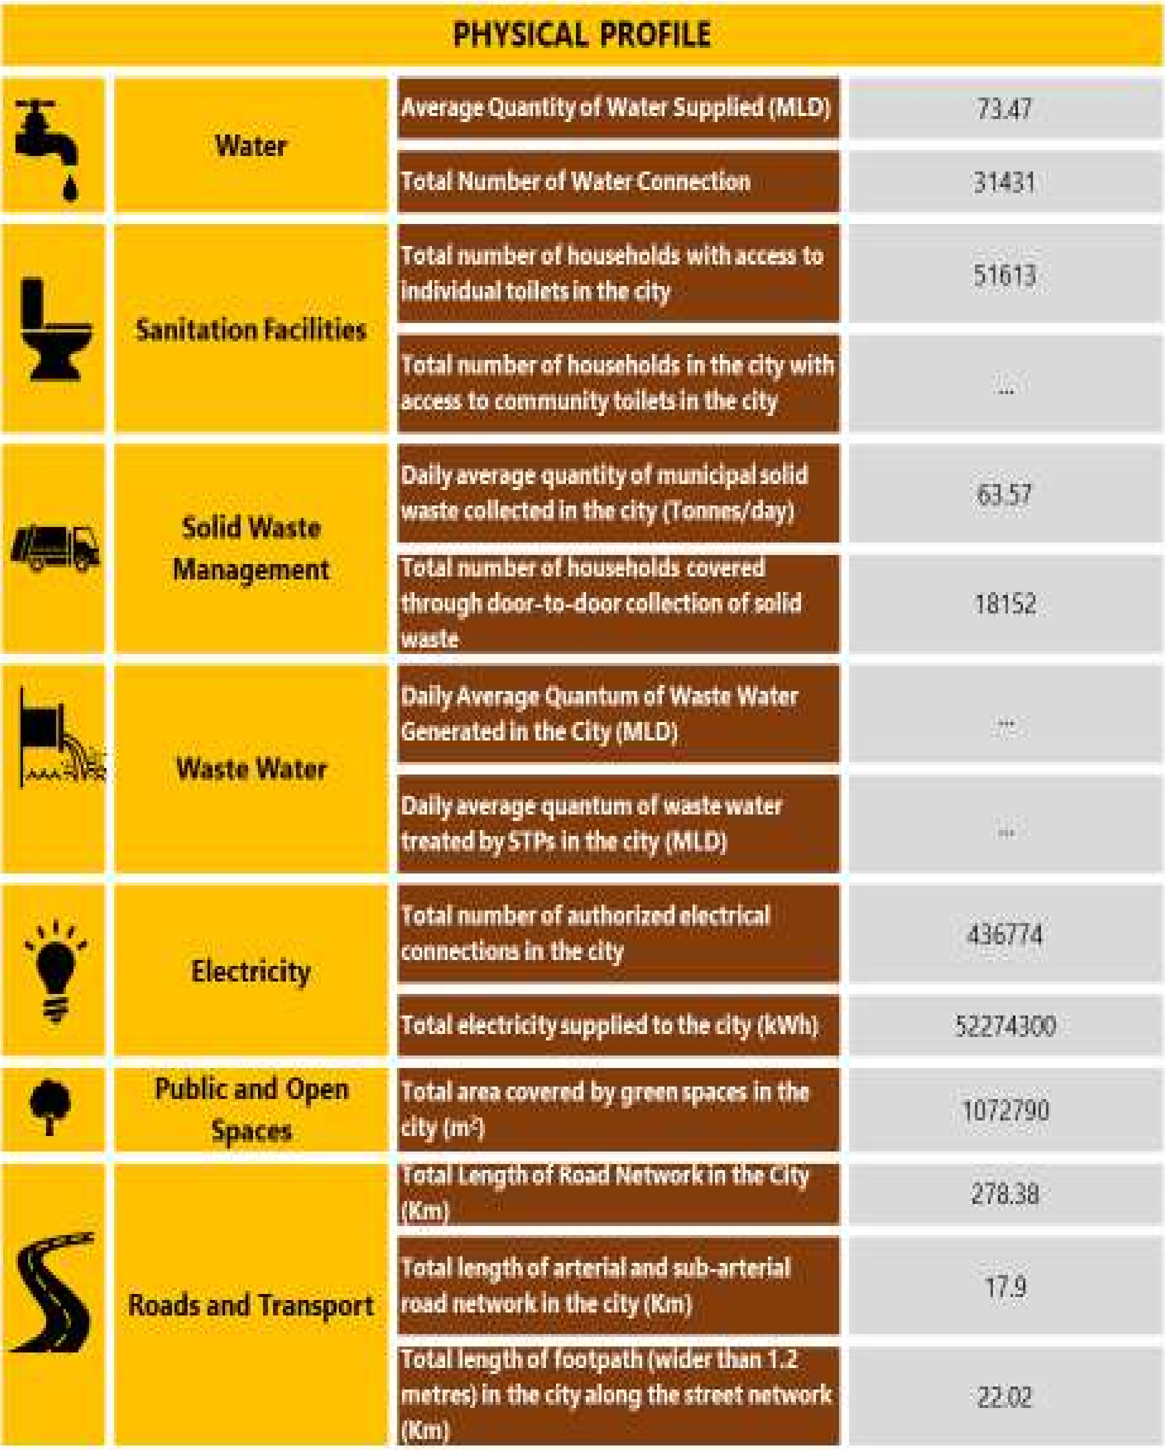
Total Population	306060
Total Number of Households	57614

SOCIAL PROFILE

Education	**Total Number of Schools**	131
	Total Enrolment (Class 1 to 5)	9822
Health	**Total Number of In-patient Beds**	2514
	Total Health Workforce	3031
Safety and Security	**Total Strength of Police Force**	556
	Total Number of CCTV Cameras	12
Heritage Sites	**Total Number of Heritage Sites**	16

ECONOMIC PROFILE

Total Population in Working Age Group	--
Total Number of Industries	141
Total Number of Commercial Enterprises	5450
Total Number of Hotels	23
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	1729.61
Total VAT Collection in FY 2016-17 (INR Lakhs)	49847



PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	73.47
	Total Number of Water Connection	31431
Sanitation Facilities	Total number of households with access to individual toilets in the city	51613
	Total number of households in the city with access to community toilets in the city	...
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	63.57
	Total number of households covered through door-to-door collection of solid waste	18152
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	...
	Daily average quantum of waste water treated by STPs in the city (MLD)	...
Electricity	Total number of authorized electrical connections in the city	436774
	Total electricity supplied to the city (kWh)	52274300
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	1072790
Roads and Transport	Total Length of Road Network in the City (Km)	278.38
	Total length of arterial and sub-arterial road network in the city (Km)	17.9
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	22.02

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population

Pillars of Comprehensive Development	Category	Indicators
		enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services

Pillars of Comprehensive Development	Category	Indicators
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting

Pillars of Comprehensive Development	Category	Indicators
		facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.

100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Imphal Municipal Corporation (IMC)
Urban Local Body	For Park and Recreation Related Questions	Imphal Municipal Corporation (IMC)
Urban Local Body	For Water Supply and Drainage related questions	PHED
Urban Local Body	For Heritage sites related data	Art & Culture
Urban Local Body	For Ecological sites related data	Dept. of Ecology & Environment
Urban Local Body	For Housing related data	Imphal Municipal Corporation (IMC)
Urban Local Body	For Building plan related data	Imphal Municipal Corporation (IMC)
Urban Local Body	For Roads related data	PWD
Urban Local Body	For Solid waste management related data	Imphal Municipal Corporation (IMC)
Urban Local Body	For IT services related data	Imphal Municipal Coorporation (IMC)
Urban Local Body	For Vendor committee related data	Imphal Municipal Corporation (IMC)
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	(1) PWD (2) PHED (3) Economics & Statistics Deptt. (4) Water Resources Deptt. (5) Commerce & industry (6) Tourism (7) Education (S) (8) Taxation (9) Arts & Culture (10) Youth Affairs & Sports (11) Employment Exchange (12)

Designated data owners	Subcategories	Data owners at city level
		Transport (13) Traffic (14) Town Planning (15) PDA (16) Manipur state pollution Control board (17) Manipur State power Development Corporation ltd. (MSPDCL) (18) Ecology 7 Environment (19) Medical & health Services
For questions under Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Manipur state pollution Control board
Development Authority	Building Infrastructure	IMC
	Construction planning	IMC
	Green Building	IMC
	Rain water harvesting	IMC
	Universal Design Principle	IMC
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	MSPDCL
State Disaster management authority		Relief & Disaster
State Education Department		Education (Schools)
State Health Department	Health care professionals	Medical & Health Services
State Health Department	Citizen Services	Medical & Health Services
State Health Department	Disease Prevalence	Medical & Health Services
State Health Department	Health Infrastructure	Medical & Health Services
State Renewable Energy Development Agency		MANIREDA
State Sales / Commercial Taxes Department		Taxation
Town and Country Planning Department	Land Use	Town Planning Deptt.
Traffic and Police Department		Home Dept.

Designated data owners	Subcategories	Data owners at city level
Transport Authorities	Buses	Transport Deptt.
Transport Authorities	Registered Vehicles	Transport Deptt.
Transport Authorities	Sub urban rail transport	N/A
Transport Authorities	Mono Rail Authority	N/A
Transport Authorities	Tramways	N/A
Transport Authorities	Marine Transport Authority	N/A

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 22 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	2
State Education Department	1
DISCOM/Electricity Department	1
Traffic and Police Department	1
Development Authority	0
Pollution Control Board	0
State Renewable Energy Department	1
Town and Country Planning	1
State Health Department	1
Transport Authority	1
Disaster Management	1
Urban Local Body	12
Total	22

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**15.68**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0
	1.1b death certificate	0
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	0
	1.1f sewerage/drainage	0

Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	193.38
Denominator	Total O&M cost for providing water supply services during the year	921.13
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**-39.21**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-665.25
Denominator	Total expenditure (revenue and capital accounts) in the same year	1696.69
Unit	Percentage	

Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	27
Denominator	Total number of wards	27
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**6.25**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	1
Denominator	Total number of historic buildings/sites identified	16
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	Data Unavailable
Denominator	Total number of ecologically important sites identified in the city	2
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**11960.86**
Description	Average Occupancy rate of Hotels	11960.85714
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**123.63**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	2138.38
Denominator	Total budget of the ULB (capital and revenue)	1729.61

Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**906**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	906
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**33.77**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	15296
Denominator	Total population in the age group of 6-14 years	45295
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**36.41**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	8101
Denominator	Total female population in the age group of 6-14 years	22249
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**10.27**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	9822
Denominator	Total number of teachers available for primary grades (public and private schools)	956
Unit	Ratio	
Benchmark	1 teacher for every 30 students	

Indicator No: 3.4	**Percentage of schools with access to digital education**	**19.08**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	25
Denominator	Total number of schools	131
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**90.53**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	90.52861042
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**96.85**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	3097985
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**90.69**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	2514
Denominator	Total population of the city	277196
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	

Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**109.35**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	3031
Denominator	Total population of the city	277196
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**20**
Description	Total response time for health-related distress calls received in the city	20
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**16.81**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	46594
Denominator	Total population of the city	277196
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.2**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	546
Denominator	Total population of the city	277196
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**4.31**
Formula:	*Numerator / Denominator*	

Numerator	Total number of CCTV cameras installed	12
Denominator	Total length of road network in the city	278.383
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**308.45**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	855
Denominator	Total population of the city	277196
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**3.51**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	30
Denominator	Total crimes recorded in the same year	855
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**3.97**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	11
Denominator	Total population of the city	277196
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**7.11**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	3307
Denominator	Total VAT/GST collection during preceding year	465.4
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	Data Unavailable
Denominator	Total Professional Tax collection during preceding year	2376
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**45.58**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	129
Denominator	Number of construction permits during preceding year	2.83
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	231288

Denominator	Total labour force in the city	45295
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	1132.375
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**135.35**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	21161
Denominator	Total number of slum and EWS households in the city	156.34
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Computable**
Formula:	*Numerator / Denominator*	NA
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**3.87**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	1072790
Denominator	Total population of the city	277196
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**11.11**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	3079999.25
Denominator	Total population of the city	277196
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	0
Denominator	Total area of the city (total area of all land uses)	34725100
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	277196
Denominator	Area allocated for residential land use (in hectares)	33530000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**418.12**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	240893
Denominator	Total number of households in the city	57614
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	436774
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**1585**
Description	Total number of sustained electrical interruptions in a year	1585

Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.8**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	7158
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	12876.12
Denominator	Total energy consumption from all sources	52274300
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	575761.3333
Denominator	Total quantum of water and waste water handled during the period	Data Unavailable
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	1344616
Denominator	Total number of street light installations	1851
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	Data Unavailable
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	1510.38
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	52274300
Denominator	Total population of the city	277196
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	Data Unavailable
Denominator	Total area of the city (sq.km)	34.7251
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	Data Unavailable
Denominator	Total population of the city	277196
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	Data Unavailable
Denominator	Total length of road network in the city	278.383
Unit	Percentage	
Benchmark	>=50	

Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	0
Unit	Percentage	
Benchmark	>=75	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	15
Denominator	Total available on-street parking spaces in the city	Data Unavailable
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**3.95**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	22.02
Denominator	Total length of road network in the city	556.766
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	11
Denominator	Total number of junctions/ intersections on major roads in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**33.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	9
Denominator	Total number of public right-of-way areas in the city	27
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**52.31**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	30137
Denominator	Total number of households in the city	57614
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**265.05**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	73.47
Denominator	Total population of the city	277196
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	48
Denominator	Total number of samples tested for water quality	552
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	73.47

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	0
Denominator	Total number of water connections in the city	31431
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	Data Unavailable
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	3
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	51640
Denominator	Total number of properties in the city	Data Unavailable

Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	Data Unavailable
Denominator	Total number of properties in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	Data Unavailable
Denominator	Total waste water generated in the city per day	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	Data Unavailable
Denominator	Total waste water received at treatment plants per day	Data Unavailable
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**9.83**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	27.36

Denominator	Total length of road network in the city	278.383
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**30.97**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	19529
Denominator	Total number of households and establishments in the city	63064
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**55.24**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	63.57
Denominator	Total quantum of MSW generated in the city	115.08
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**3.15**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	60
Denominator	Average MSW generated in the city (tons per month)	1907.1
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**31.34**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	31.34
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	0
Denominator	Total number of noise samples	100
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**16.67**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	6
Denominator	Total number of samples tested	36
Unit	Percentage	
Benchmark	100%

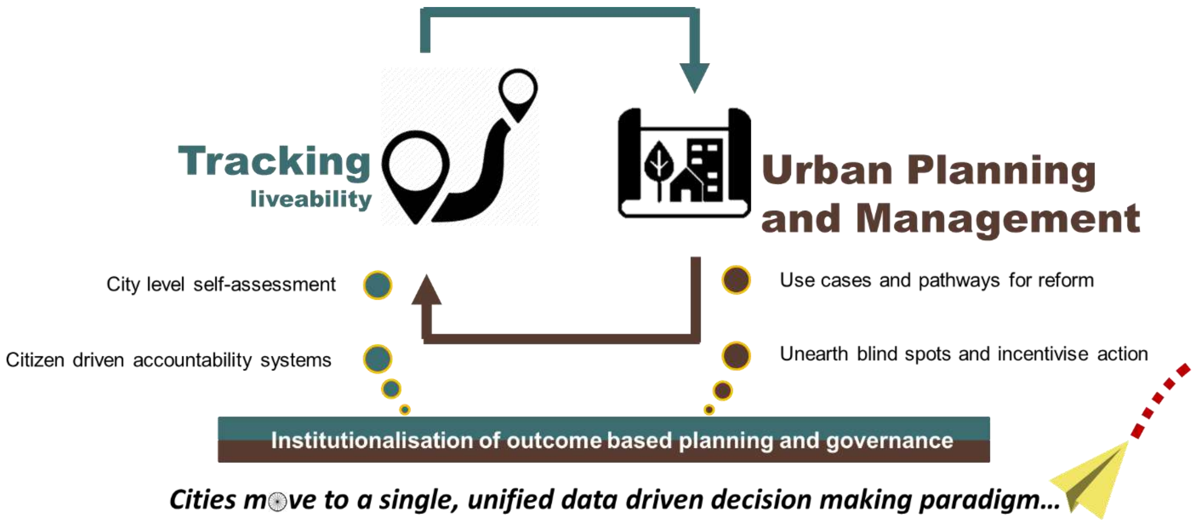
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

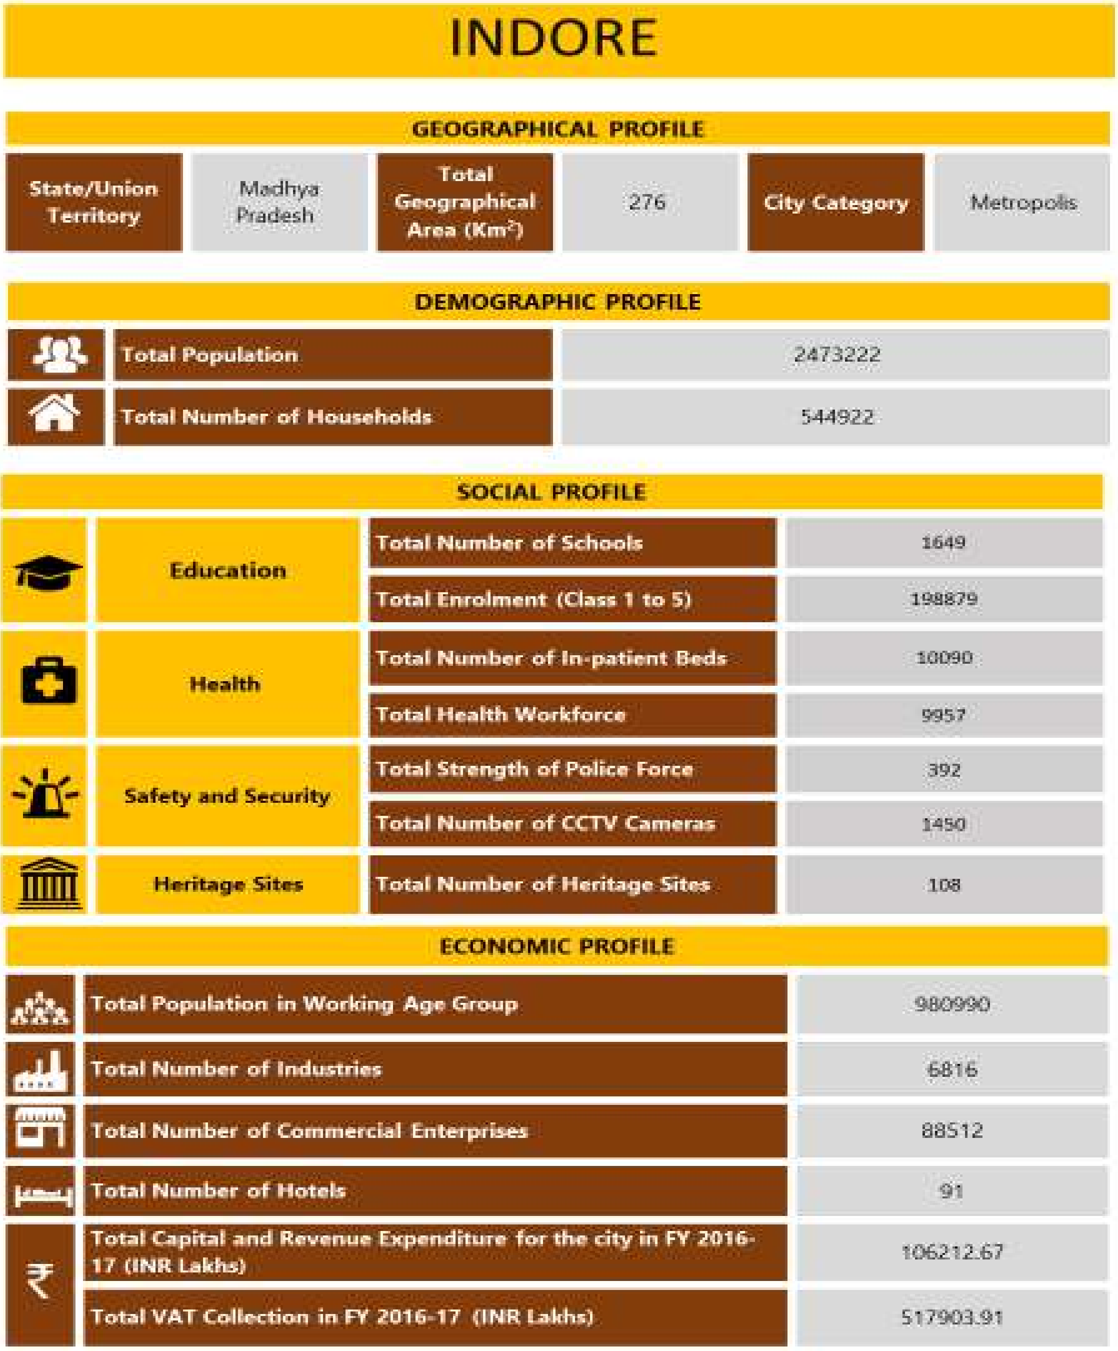


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



INDORE

GEOGRAPHICAL PROFILE

State/Union Territory	Madhya Pradesh	Total Geographical Area (Km²)	276	City Category	Metropolis

DEMOGRAPHIC PROFILE

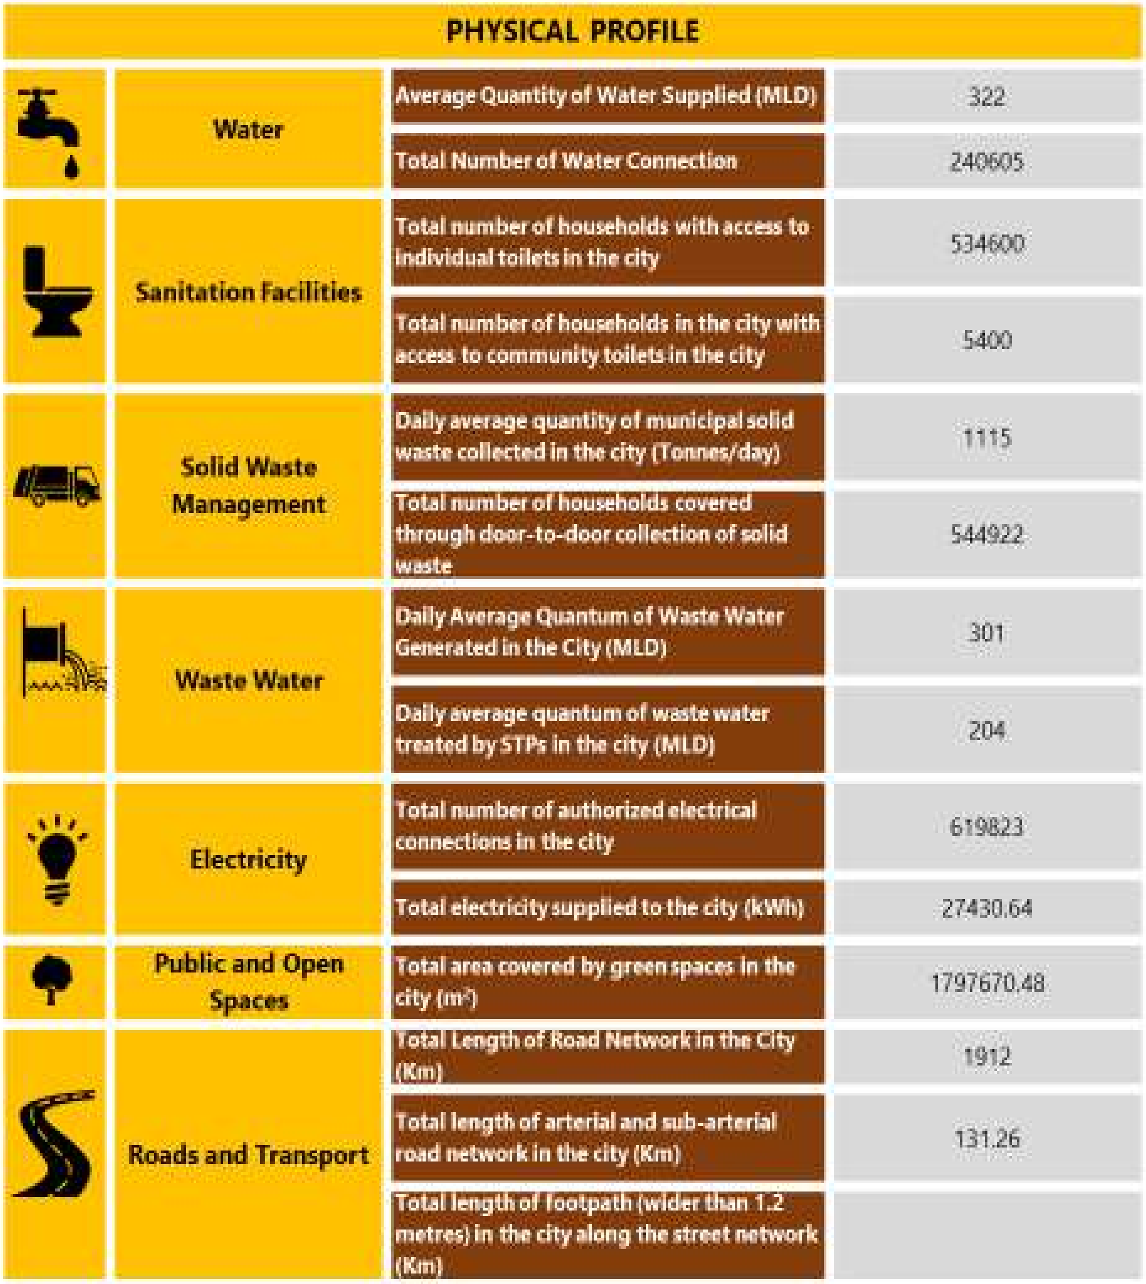
Total Population	2473222
Total Number of Households	544922

SOCIAL PROFILE

Education	Total Number of Schools	1649
	Total Enrolment (Class 1 to 5)	198879
Health	Total Number of In-patient Beds	10090
	Total Health Workforce	9957
Safety and Security	Total Strength of Police Force	392
	Total Number of CCTV Cameras	1450
Heritage Sites	Total Number of Heritage Sites	108

ECONOMIC PROFILE

Total Population in Working Age Group	980990
Total Number of Industries	6816
Total Number of Commercial Enterprises	88512
Total Number of Hotels	91
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	106212.67
Total VAT Collection in FY 2016-17 (INR Lakhs)	517903.91



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	322
	Total Number of Water Connection	240605
Sanitation Facilities	Total number of households with access to individual toilets in the city	534600
	Total number of households in the city with access to community toilets in the city	5400
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	1115
	Total number of households covered through door-to-door collection of solid waste	544922
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	301
	Daily average quantum of waste water treated by STPs in the city (MLD)	204
Electricity	Total number of authorized electrical connections in the city	619823
	Total electricity supplied to the city (kWh)	27430.64
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	1797670.48
Roads and Transport	Total Length of Road Network in the City (Km)	1912
	Total length of arterial and sub-arterial road network in the city (Km)	131.26
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population

Pillars of Comprehensive Development	Category	Indicators
		enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services

Pillars of Comprehensive Development	Category	Indicators
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting

Pillars of Comprehensive Development	Category	Indicators
		facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

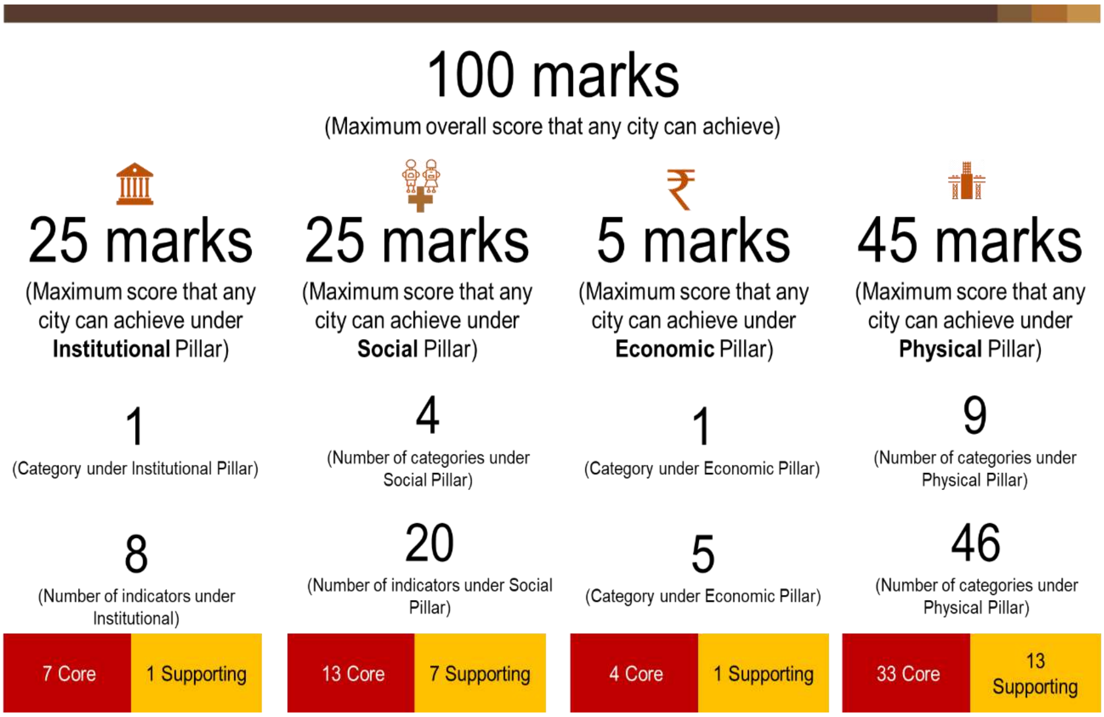
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark -\ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Sub categories	Data owners at city level
Urban Local Body	Accounts	Accounts Department, Indore Municipal Corporation
	Park and Recreation	Indore Municipal Corporation
	Water Supply and Drainage	Engineering Department, Indore Municipal Corporation
	Heritage sites	Indore Municipal Corporation
	Ecological sites	Indore Municipal Corporation
	Housing	Housing section, Indore Municipal Corporation
	Building plan	Indore Municipal Corporation
	Roads	Indore Municipal Corporation
	Solid waste management	Solid waste management, Indore Municipal Corporation
	IT services	IT Section, Indore Municipal Corporation
	Vendor committee	Indore Municipal Corporation
	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Madhya Pradesh Pollution Control Board
Development Authority	Building Infrastructure	Indore Development Authority
	Construction planning	Indore Development Authority
	Green Building	Indore Development Authority

Designated data owners	Sub categories	Data owners at city level
	Rain water harvesting	Indore Development Authority
	Universal Design Principle	Indore Development Authority
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Madhya Pradesh Paschim Kshetra Vidyut Vitaran Company limited
State Disaster management authority		District Disaster management Office
State Education Department		District Education Department
State Health Department	Health care professionals	Health Department
	Citizen Services	Health Department
	Disease Prevalence	Health Department
	Health Infrastructure	Health Department
State Renewable Energy Development Agency		Madhya Pradesh New and Renewable Energy Department
State Sales / Commercial Taxes Department		Department of Commercial Taxes
Town and Country Planning Department	Land Use	Town and country planning
Traffic and Police Department		Traffic and Police Department, Jabalpur
Transport Authorities	Buses	Regional Transport Office
	Registered Vehicles	Madhya Pradesh Transport Department
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 86 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	2
State Education Department	2
DISCOM/Electricity Department	2
Traffic and Police Department	11
Development Authority	3
Pollution Control Board	4
State Renewable Energy Department	0
Town and Country Planning	3
State Health Department	4
Transport Authority	8
Disaster Management	1
Urban Local Body	46
Total	86

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**73.5**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0
	1.1b death certificate	0
	1.1c trade license	1
	1.1d solid waste management	0
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	1
	1.1j information	1
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.555555556

Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	11.5
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**65.28**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	18566.91
Denominator	Total demand raised for the year	28441
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**27.22**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	4683
Denominator	Total O&M cost for providing water supply services during the year	17206
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**14.73**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	31816.38
Denominator	Total expenditure (revenue and capital accounts) in the same year	215983.94
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward**	**100**

	Committees/ Area *Sabhas*	
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	85
Denominator	Total number of wards	85
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**8.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	9
Denominator	Total number of historic buildings/sites identified	108
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	4
Denominator	Total number of ecologically important sites identified in the city	4
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**29.29**
Description	Average Occupancy rate of Hotels	29.28571429
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the	

	benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.54**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	576.00385
Denominator	Total budget of the ULB (capital and revenue)	106212.67
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**3293**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	3293
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**86.13**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	309120
Denominator	Total population in the age group of 6-14 years	358901
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**94.1**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	158002
Denominator	Total female population in the age group of 6-14 years	167909
Unit	Percentage	

Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**173.39**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	198879
Denominator	Total number of teachers available for primary grades (public and private schools)	1147
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**62.52**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	1031
Denominator	Total number of schools	1649
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**66.77**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	66.76558901
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**90.54**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	1294565930
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**50.59**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	10090
Denominator	Total population of the city	1994397
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**49.92**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	9957
Denominator	Total population of the city	1994397
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**25**
Description	Total response time for health-related distress calls received in the city	25
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**1.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	26620
Denominator	Total population of the city	1994397
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.11**

Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	2140
Denominator	Total population of the city	1994397
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**75.84**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	1450
Denominator	Total length of road network in the city	1912
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**1689.78**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	33701
Denominator	Total population of the city	1994397
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**14.09**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	4749
Denominator	Total crimes recorded in the same year	33701
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against	

	vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**19.6**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	391
Denominator	Total population of the city	1994397
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**10.75**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	50260.28
Denominator	Total VAT/GST collection during preceding year	4676.4363
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**14.34**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	659.52
Denominator	Total Professional Tax collection during preceding year	4598.39
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**10.07**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	447

Denominator	Number of construction permits during preceding year	44.41
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	31108
Denominator	Total labour force in the city	358901
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	14667
Denominator	Total number of vendors in the city	14667
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**3.59**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	10984
Denominator	Total number of slum and EWS households in the city	3063.21

Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**1.21** 74141532927000
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**0.9**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	1797670.48
Denominator	Total population of the city	1994397
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**3.22**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	6426251.6
Denominator	Total population of the city	1994397
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	276000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1994397
Denominator	Area allocated for residential land use (in hectares)	157950000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**91.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	495976
Denominator	Total number of households in the city	544922
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**3.76**
Formula:	*Numerator / Denominator*	

Numerator	Number of electrical connections (residential and commercial) with smart meters	23280
Denominator	Total number of electricity connections in the city	619823
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**24625**
Description	Total number of sustained electrical interruptions in a year	24625
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.71**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	499404
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.17**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	570
Denominator	Total energy consumption from all sources	27430.64
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0**
Formula:	*Numerator / Denominator*	

Numerator	Energy consumption on water supply and sewerage services	17999052.29
Denominator	Total quantum of water and waste water handled during the period	15780
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	96029.491
Denominator	Total number of street light installations	89161
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	89442.11
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	44455.1
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	27430.64
Denominator	Total population of the city	1994397
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	14
Denominator	Total area of the city (sq.km)	276
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.19**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	384
Denominator	Total population of the city	1994397
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	33.18
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**1.82**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	34.82
Denominator	Total length of road network in the city	1912
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	5
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0.13
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**13.4**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	67
Denominator	Total number of major interchanges in the city	5
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**27.91**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	12
Denominator	Total number of signalised intersections in the city	43
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	0

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**4.18**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	160
Denominator	Total length of road network in the city	3824
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**56.63**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	47
Denominator	Total number of junctions/ intersections on major roads in the city	83
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**11.38**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	219
Denominator	Total number of public right-of-way areas in the city	1925
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**37.53**
Formula:	*Numerator / Denominator*	

Numerator	Total number of households with direct water supply connection	204490
Denominator	Total number of households in the city	544922
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**161.45**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	322
Denominator	Total population of the city	1994397
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	199
Denominator	Total number of samples tested for water quality	12307
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**72.67**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	234
Denominator	Quantum of water put into the distribution system (mld)	322
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0.02**
Formula:	*Numerator / Denominator*	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Number of metered water connections	40
Denominator	Total number of water connections in the city	240605
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**4.72**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	202
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	4276
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**121.96**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	636972
Denominator	Total number of properties in the city	522268
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**89.96**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	469817
Denominator	Total number of properties in the city	522268

Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**39.87**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	120
Denominator	Total waste water generated in the city per day	301
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	204
Denominator	Total waste water received at treatment plants per day	204
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**7.85**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	150
Denominator	Total length of road network in the city	1912
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	633434
Denominator	Total number of households and establishments in the city	633434
Unit	Percentage	

Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	1115
Denominator	Total quantum of MSW generated in the city	1115
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**3.33**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	1115
Denominator	Average MSW generated in the city (tons per month)	33450
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**10.79**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	10.79
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**20.66**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	20.66
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**79.06**

Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	79.06
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	108
Denominator	Total number of noise samples	171
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	34
Denominator	Total number of samples tested	34
Unit	Percentage	
Benchmark	100%

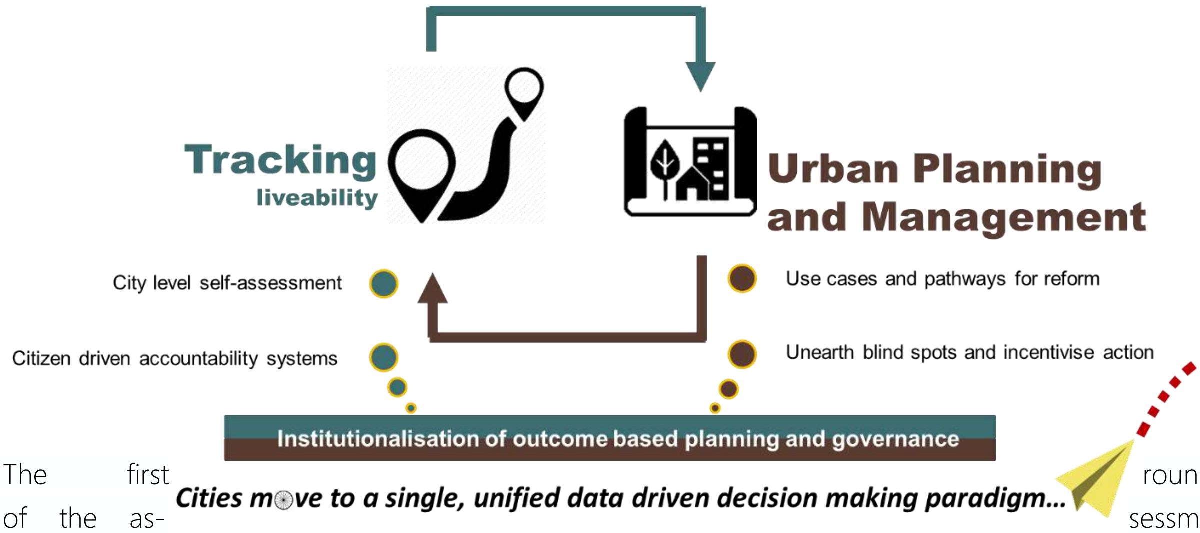
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



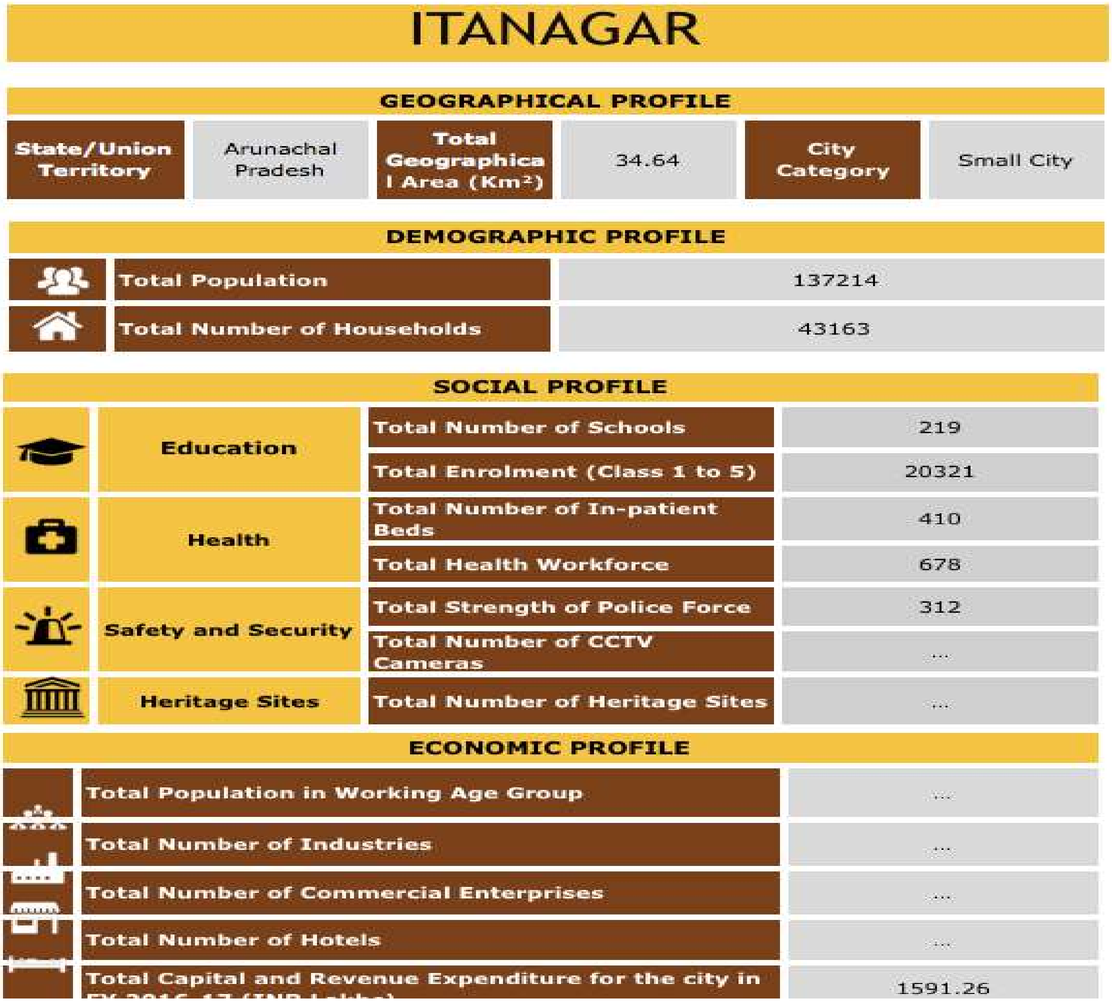
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment

commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



ITANAGAR

GEOGRAPHICAL PROFILE

State/Union Territory	Arunachal Pradesh	Total Geographical Area (Km²)	34.64	City Category	Small City

DEMOGRAPHIC PROFILE

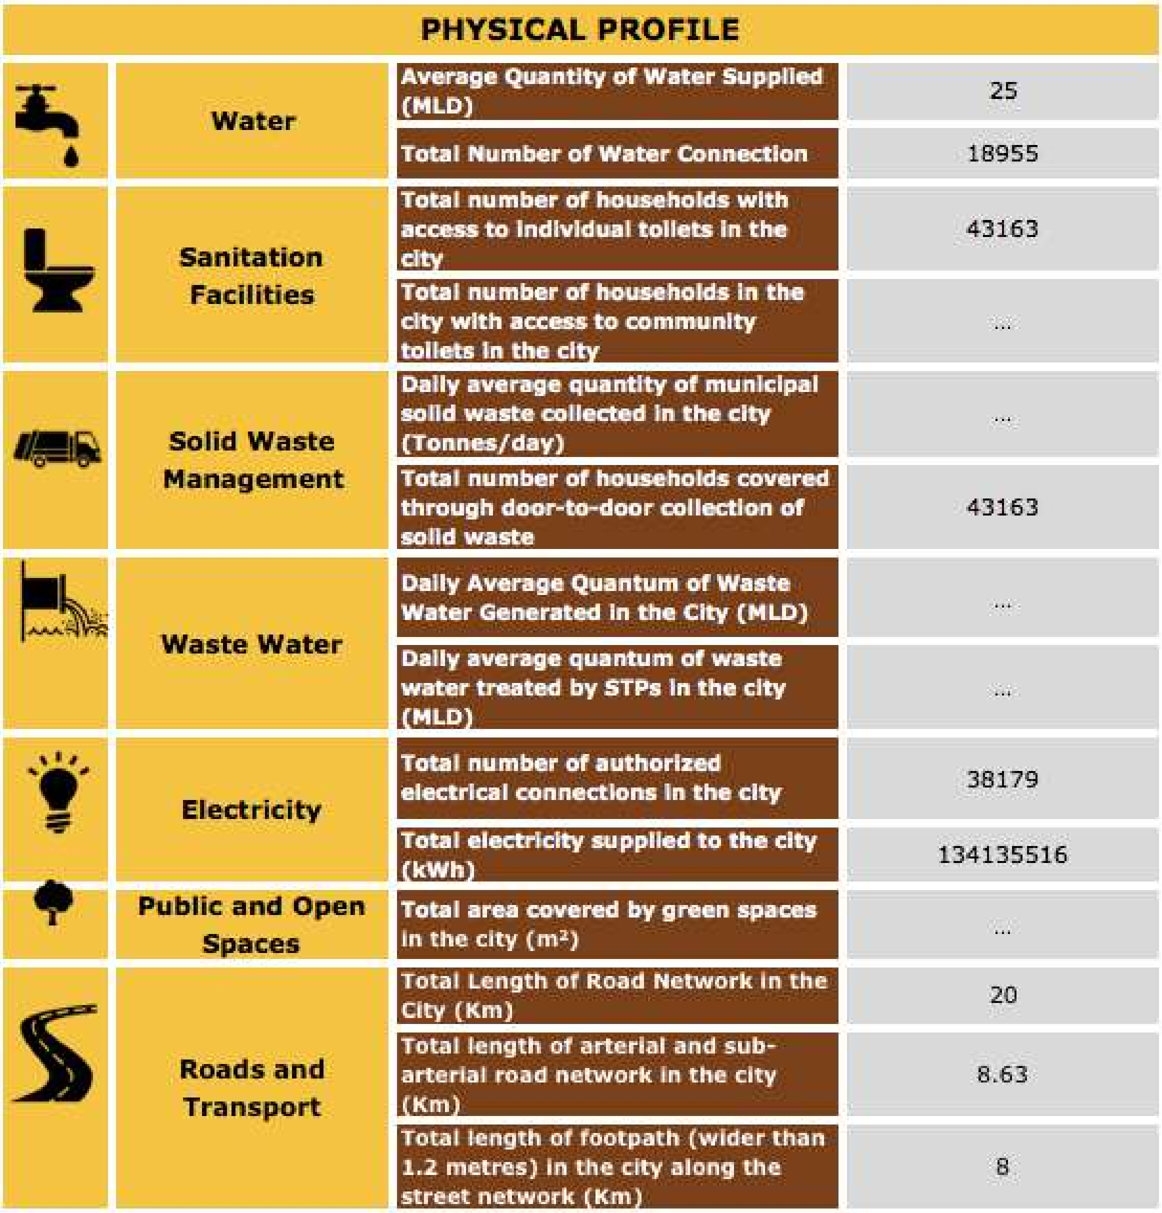
Total Population	137214
Total Number of Households	43163

SOCIAL PROFILE

Education	Total Number of Schools	219
	Total Enrolment (Class 1 to 5)	20321
Health	Total Number of In-patient Beds	410
	Total Health Workforce	678
Safety and Security	Total Strength of Police Force	312
	Total Number of CCTV Cameras	...
Heritage Sites	Total Number of Heritage Sites	...

ECONOMIC PROFILE

Total Population in Working Age Group	...
Total Number of Industries	...
Total Number of Commercial Enterprises	...
Total Number of Hotels	...
Total Capital and Revenue Expenditure for the city in	1591.26



PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	25
	Total Number of Water Connection	18955
Sanitation Facilities	Total number of households with access to individual toilets in the city	43163
	Total number of households in the city with access to community toilets in the city	...
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	...
	Total number of households covered through door-to-door collection of solid waste	43163
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	...
	Daily average quantum of waste water treated by STPs in the city (MLD)	...
Electricity	Total number of authorized electrical connections in the city	38179
	Total electricity supplied to the city (kWh)	134135516
Public and Open Spaces	Total area covered by green spaces in the city (m²)	...
Roads and Transport	Total Length of Road Network in the City (Km)	20
	Total length of arterial and sub-arterial road network in the city (Km)	8.63
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	8

Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

2.1. Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	**Category**	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	2. Identity and Culture	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in

Pillars of Comprehensive Development	**Category**	Indicators
		schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	6. Economy and	6.1 Increase in VAT/GST collection

Pillars of Comprehensive Development	Category	Indicators
	Employment	6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	7. Housing and Inclusiveness	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources

Pillars of Comprehensive Development	Category	Indicators
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities

Pillars of Comprehensive Development	**Category**	Indicators
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse

Pillars of Comprehensive Development	**Category**	Indicators
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

2.2. Scoring and Computing Category Indices of Liveability

The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

2.3. Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.

100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring

2.4. Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicatorvalueforthecity - indicatorvaluefortheworstperformingcity}{benchmark - indicatorvaluefortheworstperformingcity}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1. Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2. Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions

on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Itanagar Municipal Council
Urban Local Body	For Park and Recreation Related Questions	Itanagar Municipal Council
Urban Local Body	For Water Supply and Drainage related questions	Itanagar Municipal Council
Urban Local Body	For Heritage sites related data	Itanagar Municipal Council
Urban Local Body	For Ecological sites related data	Itanagar Municipal Council
Urban Local Body	For Housing related data	Itanagar Municipal Council
Urban Local Body	For Building plan related data	Itanagar Municipal Council
Urban Local Body	For Roads related data	Itanagar Municipal Council
Urban Local Body	For Solid waste management related data	Itanagar Municipal Council
Urban Local Body	For IT services related data	Itanagar Municipal Council
Urban Local Body	For Vendor committee related data	Itanagar Municipal Council
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Arunachal Pradesh State Pollution Control Board
Development Authority	Building Infrastructure	Urban Development Department, Itanagar
	Construction planning	Urban Development Department, Itanagar
	Green Building	Urban Development Department, Itanagar
	Rain water harvesting	Urban Development Department, Itanagar

Designated data owners	Subcategories	Data owners at city level
	Universal Design Principle	Urban Development Department, Itanagar
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Arunachal Pradesh power corporation private limited
State Disaster management authority		District Disaster management Office, Itanagar
State Education Department		District Education Department, Itanagar
State Health Department	Health care professionals	Health department, Itanagar
	Citizen Services	Health department, Itanagar
	Disease Prevalence	Health department, Itanagar
	Health Infrastructure	Health department, Itanagar
State Renewable Energy Development Agency		Tripura Renewable Energy Development Agency
State Sales / Commercial Taxes Department		Sales and Excise Department, Itanagar
Town and Country Planning Department	Land Use	Town planning department, Itanagar
Traffic and Police Department		Home Department
Transport Authorities	Buses	Arunachal Pradesh State Transport Department
	Registered Vehicles	Arunachal Pradesh State Transport Department
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3. List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 16 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	2
State Education Department	3
DISCOM/Electricity Department	2
Traffic and Police Department	1
Development Authority	0
Pollution Control Board	0
State Renewable Energy Department	0
Town and Country Planning	0
State Health Department	0
Transport Authority	2
Disaster Management	0
Urban Local Body	6
Total	16

* The count of documents is based on first round of submission.

4.4. Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

- 1.2 | Percentage of services integrated through Command Centre
- 2.3 | Hotel occupancy
- 3.4 | Percentage of schools with access to digital education
- **5.1** | Number of streets, public places, junctions covered through surveillance systems
- 6.5 | Percentage of vendors registered and provided formal spaces
- 11.7 | Availability of Passenger Information System
- 11.11 | Percentage of traffic intersections with pedestrian crossing facilities
- 11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

- 6.4 | Unemployment Rate
- 11.3 | Mode share of public transport
- 11.5 | Mode share of Non Motorized Transport
- 12.3 | Quality of Water Supplied
- 15.4 | Level of Noise Pollution

4.5. Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	Percentage of citizen services available online	**24.85**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0
	1.1i professional tax	0
	1.1j information	0.2307692307
	1.1k Grievance redressal	1
	1.1l electricity	0

	1.1m Building plan	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	Percentage of services integrated through Command Centre	**7.14**
Description	Services integrated through an integrated or a singular operations command centre	1.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	Percentage of citizens using online services	**2.14**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	NA
	1.3c water supply	NA
	1.3d solid waste management	0
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0
	1.3i information	NA
	1.3j electricity	NA
Unit	Percentage	
Benchmark	100%	

Indicator No. 1.4	Average delay in grievance redressal	**0.08**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0.5
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	NA
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	Tax collected as percentage of tax billed	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	NA
Denominator	Total demand raised for the year	NA
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	Extent of cost recovery (O&M) in water supply services	**46**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	138
Denominator	Total O&M cost for providing water supply services during the year	300
Unit	Percentage	

Benchmark	100%	
Indicator No: 1.7	Capital spending as percentage of total expenditure	**83.7**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	648.62226999 9999
Denominator	Total expenditure (revenue and capital accounts) in the same year	774.92205
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	Percentage of population covered under Ward Committees/ Area *Sabhas*	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	30
Denominator	Total number of wards	30
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	Restoration and reuse of historic buildings	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	0
Denominator	Total number of historic buildings/sites identified	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	Percentage of ecologically important areas covered	**Non-**

	through projects for restoration	**Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	Hotel Occupancy	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	Percentage of budget allocated towards cultural/sports activities	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	1591.26326
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	Number of cultural/sports events hosted by city	**Non-Computable**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	Data Unavailable
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	Percentage of school-aged population enrolled in schools	**148.65**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	32035
Denominator	Total population in the age group of 6-14 years	21550
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	Percentage of female school-aged population enrolled in schools	**146.39**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	16071
Denominator	Total female population in the age group of 6-14 years	10978
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	Primary education student-teacher ratio	**376.31**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	20321
Denominator	Total number of teachers available for primary grades (public and private schools)	54
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	Percentage of schools with access to digital education	**25.57**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	56

Denominator	Total number of schools	225
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	Percentage of students completing primary education	**49.27** 49.274944 3427296
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	Percentage of students completing secondary education	95.38
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	15135912
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	Number of in-patient hospital beds per 10,000 population	**68.92**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	410
Denominator	Total population of the city	59490
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	Healthcare professionals per 10,000 population	**113.97**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	678
Denominator	Total population of the city	59490

Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	Average response time in case of health emergencies	**Non-Computable**
Description	Total response time for health-related distress calls received in the city	Data Unavailable
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	Period prevalence of water borne diseases	**13.74**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	8171
Denominator	Total population of the city	
Unit	Percentage	59490
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	Period prevalence of vector borne diseases	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	25
Denominator	Total population of the city	59490
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	Total number of CCTV cameras installed in the city	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	Total number of CCTV cameras installed	Data Unavailable
Denominator	Total length of road network in the city	20
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	Number of recorded crimes per lakh population	**1292.65**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	769
Denominator	Total population of the city	59490
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	Extent of crimes recorded against women, children and elderly per year	**18.6**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	143
Denominator	Total crimes recorded in the same year	769
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	Transport-related fatality per lakh population	**121.03**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	72
Denominator	Total population of the city	59490
Unit	Fatality per lakh	

Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	Increase in VAT/GST collection	**58.09**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	6912.56
Denominator	Total VAT/GST collection during preceding year	118.9893
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	Increase in collection of Professional Tax	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	Increase in issuance of Construction Permits	**-33.72**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-29
Denominator	Number of construction permits during preceding year	0.86
Unit	Percentage	

Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	Unemployment Rate	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	Data Unavailable
Denominator	Total labour force in the city	65477
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	Percentage of vendors registered and provided formal spaces	**38.98**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	638
Denominator	Total number of vendors in the city	1636.925
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	Percentage of Slum/EWS households covered through formal/ housing	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	Data Unavailable

Denominator	Total number of slum and EWS households in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	Percentage of slum areas covered through basic services	**Non-Computable**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	Data Unavailable
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	Data Unavailable
Denominator	Total population of the city	59490
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	Data Unavailable
Denominator	Total population of the city	59490
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	Share of mixed land use area in overall city land use	**7.25**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	2510000
Denominator	Total area of the city (total area of all land uses)	34640000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	Net Density	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	59490
Denominator	Area allocated for residential land use (in hectares)	40700000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	Percentage of city population with authorized electrical service	**76.9**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	33191
Denominator	Total number of households in the city	43163
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	Percentage of electrical connections covered through smart meters	**Non-Computa**

Formula:	*Numerator / Denominator*	**ble**
Numerator	Number of electrical connections (residential and commercial) with smart meters	NA
Denominator	Total number of electricity connections in the city	38179
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	Average number of electrical interruptions per year	**1679**
Description	Total number of sustained electrical interruptions in a year	1679
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	Average length of electrical interruptions per year	**0.79**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	13136
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	Percentage of total energy derived from renewable sources	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	533477
Denominator	Total energy consumption from all sources	13423294 9
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	Energy consumption per unit - water supply and sewerage	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage ser-	0

	vices	
Denominator	Total quantum of water and waste water handled during the period	750
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	Energy consumption per unit – street lighting	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	Data Unavailable
Denominator	Total number of street light installations	Data Unavailable
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	Percentage of new and redeveloped buildings following green building norms	0
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	102262.124
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	Total energy consumption per capita	**0.73**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	134232949
Denominator	Total population of the city	59490
Unit	kWh per capita	

Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	Geographical coverage of public transport	**0.53**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	25
Denominator	Total area of the city (sq.km)	34.64
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	Availability of public transport	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	Data Unavailable
Denominator	Total population of the city	59490
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	Mode share of public transport	**To be computed**
Description	Mode share of public transport	20
Unit	Percentage	
Benchmark		
Indicator No: 11.4	Percentage of road network with dedicated bicycle tracks	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	20
Unit	Percentage	
Benchmark	>=50	

Indicator No: 11.5	Percentage of interchanges with bicycle parking facilities	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	Data Unavailable
Denominator	Total number of major transport interchanges in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	Mode share of non-motorised transport	**To be computed**
Description	Mode share of non-motorised transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.7	Availability of Passenger Information System	**Non-Computable**
Formula:	Numerator / Denominator	Data Unavailable
Numerator	Total number of major interchanges with PIS	Data Unavailable
Denominator	Total number of major interchanges in the city	
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	Extent of signal synchronisation	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	0
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	Availability of paid parking spaces	**Non-**

Formula:	*Numerator / Denominator*	**Computable**
Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	0
Unit		
Benchmark		
Indicator No: 11.10	Percentage coverage of footpaths – wider than 1.2m	**20**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	8
Denominator	Total length of road network in the city	40
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	Percentage of traffic intersections with pedestrian crossing facilities	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	5
Denominator	Total number of junctions/ intersections on major roads in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	Extent to which universal accessibility is incorporated in public rights-of-way	**26.32**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	5
Denominator	Total number of public right-of-way areas in the city	19
Unit	Percentage	

Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	Household level coverage of direct water supply connections	**40.48**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	17472
Denominator	Total number of households in the city	43163
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	Per capita supply of water	**420.24**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	25
Denominator	Total population of the city	59490
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	Quality of water supplied	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	Data Unavailable
Denominator	Total number of samples tested for water quality	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	Level of non-revenue water – NRW	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank

Denominator	Quantum of water put into the distribution system (mld)	25
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	Percentage of water connections covered through meters	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	0
Denominator	Total number of water connections in the city	18955
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	Percentage of plots with rainwater harvesting facility	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	Data Unavailable
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	58
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	Coverage of toilets	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	43163
Denominator	Total number of properties in the city	0
Unit	Percentage	

Benchmark	100%	
Indicator No: 13.2	Coverage of sewerage network and/or septage	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	Data Unavailable
Denominator	Total number of properties in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	Collection efficiency of sewerage network	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	0
Denominator	Total waste water generated in the city per day	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	Extent of reuse and recycling of waste water	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	0
Denominator	Total waste water received at treatment plants per day	0
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	Coverage of storm water drains	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	0
Denominator	Total length of road network in the city	20
Unit	Percentage	

Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	Household level coverage of municipal solid waste collection	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	43163
Denominator	Total number of households and establishments in the city	43163
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	Efficiency of collection of municipal solid waste	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	Data Unavailable
Denominator	Total quantum of MSW generated in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	Extent of municipal solid waste recovered through reuse	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	Data Unavailable
Denominator	Average MSW generated in the city (tons per month)	Data Unavailable
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**Non=Computab**

		le
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	Data Unavailable
Denominator	Total number of noise samples	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	Data Unavailable
Denominator	Total number of samples tested	Data Unavailable
Unit	Percentage	

Benchmark	100%

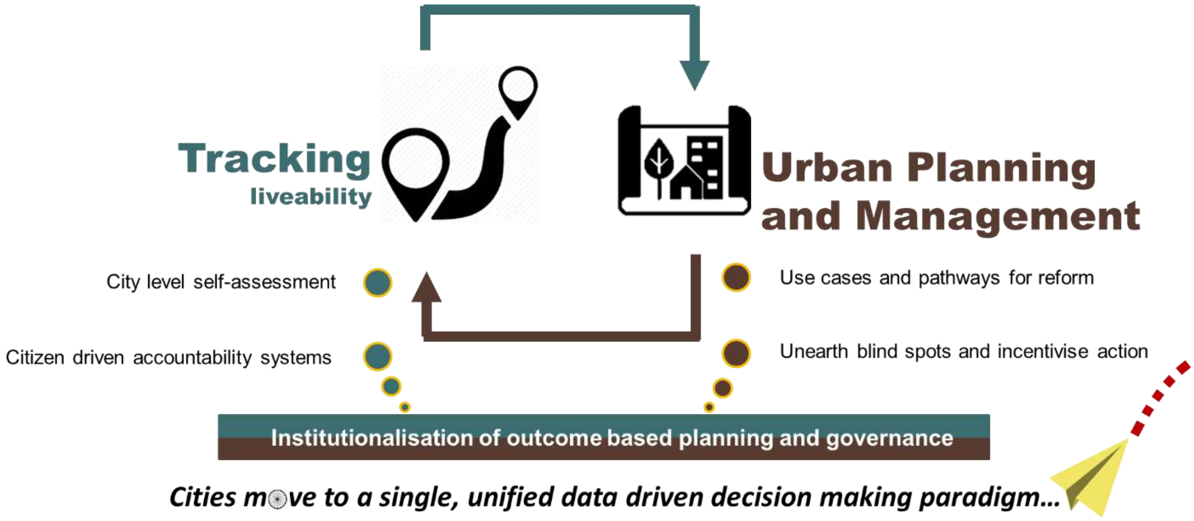
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

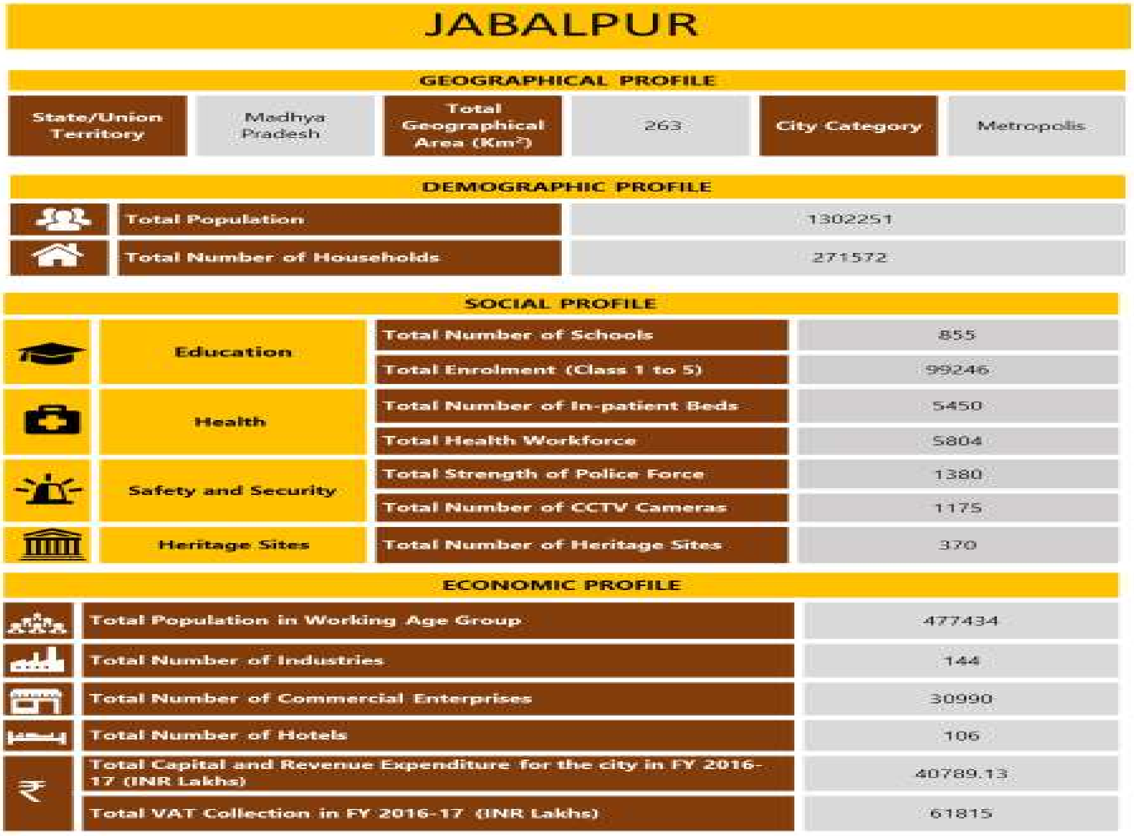
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including

smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



JABALPUR

GEOGRAPHICAL PROFILE

State/Union Territory	Madhya Pradesh	Total Geographical Area (Km²)	263	City Category	Metropolis

DEMOGRAPHIC PROFILE

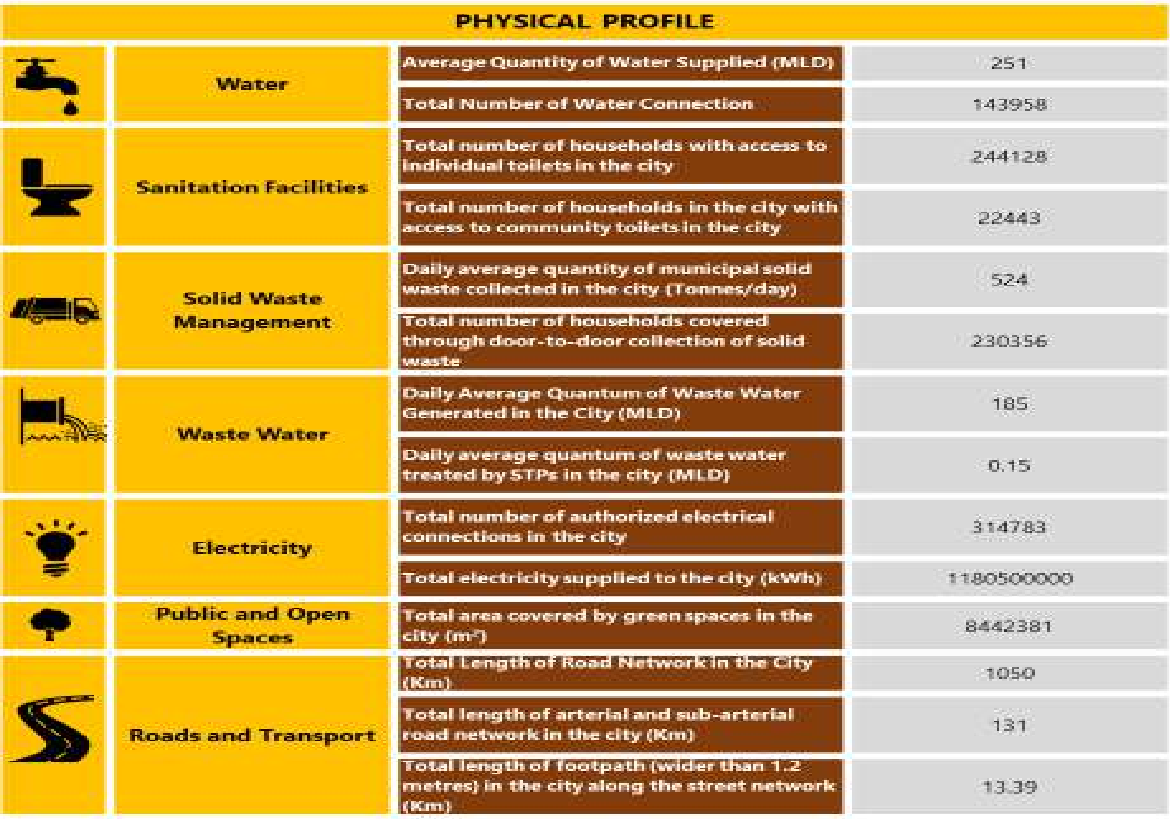
Total Population	1302251
Total Number of Households	271572

SOCIAL PROFILE

Education	Total Number of Schools	855
	Total Enrolment (Class 1 to 5)	99246
Health	Total Number of In-patient Beds	5450
	Total Health Workforce	5804
Safety and Security	Total Strength of Police Force	1380
	Total Number of CCTV Cameras	1175
Heritage Sites	Total Number of Heritage Sites	370

ECONOMIC PROFILE

Total Population in Working Age Group	477434
Total Number of Industries	144
Total Number of Commercial Enterprises	30990
Total Number of Hotels	106
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	40789.13
Total VAT Collection in FY 2016-17 (INR Lakhs)	61815



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	251
	Total Number of Water Connection	143958
Sanitation Facilities	Total number of households with access to individual toilets in the city	244128
	Total number of households in the city with access to community toilets in the city	22443
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	524
	Total number of households covered through door-to-door collection of solid waste	230356
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	185
	Daily average quantum of waste water treated by STPs in the city (MLD)	0.15
Electricity	Total number of authorized electrical connections in the city	314783
	Total electricity supplied to the city (kWh)	1180500000
Public and Open Spaces	Total area covered by green spaces in the city (m²)	8442381
Roads and Transport	Total Length of Road Network in the City (Km)	1050
	Total length of arterial and sub-arterial road network in the city (Km)	131
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	13.39

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education

Pillars of Comprehensive Development	Category	Indicators
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational

Pillars of Comprehensive Development	Category	Indicators
		places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System

Pillars of Comprehensive Development	Category	Indicators
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse

Pillars of Comprehensive Development	Category	Indicators
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

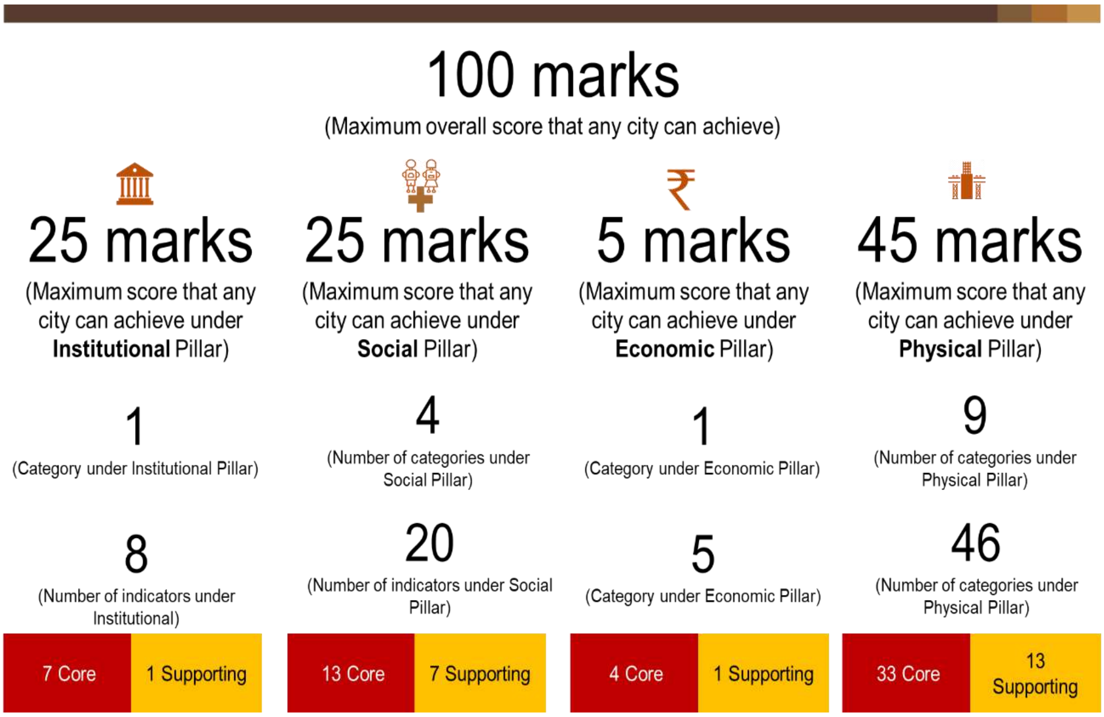
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under **Institutional** Pillar)
25 marks
(Maximum score that any city can achieve under **Social** Pillar)
5 marks
(Maximum score that any city can achieve under **Economic** Pillar)
45 marks
(Maximum score that any city can achieve under **Physical** Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and

development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Sub categories	Data owners at city level
Urban Local Body	Accounts	Accounts Department, Jabalpur Municipal Corporation
	Park and Recreation	Garden Section, Jabalpur Municipal Corporation
	Water Supply and Drainage	Water works and Water Head, Jabalpur Municipal Corporation
	Heritage sites	INTACH & Jabalpur Municipal corporation
	Ecological sites	Development Plan, Jabalpur Municipal Corporation
	Housing	Housing section, Jabalpur Municipal Corporation
	Building plan	Building Section and Colony Cell, Jabalpur Municipal Corporation
	Roads	Smart city corporation limited, Jabalpur city Transport Service Limited, PWD section, JMC
	Solid waste management	Health Section, Jabalpur Municipal Corporation
	IT services	IT Section, Jabalpur Municipal Corporation
	Vendor committee	Market Section, Jabalpur Municipal Corporation
	Any other departments involved in providing data for questions mentioned under Urban Local Body	Employment Exchange Census reports Archaeological Survey of India
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Madhya Pradesh Pollution Control Board

Designated data owners	Sub categories	Data owners at city level
Development Authority	Building Infrastructure	Building Section and Colony Cell, Jabalpur Municipal Corporation Jabalpur Development Authority
	Construction planning	Building Section and Colony Cell, Jabalpur Municipal Corporation Jabalpur Development Authority
	Green Building	Building Section and Colony Cell, Jabalpur Municipal Corporation Jabalpur Development Authority
	Rain water harvesting	Building Section and Colony Cell, Jabalpur Municipal Corporation Jabalpur Development Authority
	Universal Design Principle	Building Section and Colony Cell, Jabalpur Municipal Corporation Jabalpur Development Authority
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Madhya Pradesh Poorv Kshetra Vidyut Vitaran Company limited
State Disaster management authority		District Disaster management Office
State Education Department		District Education Department DPC Department
State Health Department	Health care professionals	Health Department
	Citizen Services	Health Department
	Disease Prevalence	Health Department
	Health Infrastructure	Health Department
State Renewable Energy Development Agency		Madhya Pradesh New and Renewable Energy Department (Urja Vikas Nigam)
State Sales / Commercial Taxes Department		Department of sales and Commercial Taxes
Town and Country Planning Department	Land Use	Town and country planning Department
Traffic and Police Department		Traffic and Police Department, Jabalpur

Designated data owners	Sub categories	Data owners at city level
Transport Authorities	Buses	Regional Transport Office Jabalpur city transport service limited
	Registered Vehicles	Madhya Pradesh Transport Department
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 162 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	8
State Education Department	7
DISCOM/Electricity Department	4
Traffic and Police Department	4
Development Authority	2
Pollution Control Board	5
State Renewable Energy Department	3
Town and Country Planning	3
State Health Department	17
Transport Authority	8
Disaster Management	4
Urban Local Body	97
Total	162

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

7. LA - Street Vendors
8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**87.28**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	0.5
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	0
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**28.57**
Description	Services integrated through an integrated or a singular operations command centre	6
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**3.49**
Description		

Sub Indicators	1.3a Building plan	0.005641189
	1.3b Birth/Death Certificate	0.00602814
	1.3c water supply	0.18098162
	1.3d solid waste management	0
	1.3e property tax	0.139646577
	1.3f professional tax (RC)	0
	1.3g professional tax (EC)	0
	1.3h complaints/ grievance redressal	0
	1.3i information	0
	1.3j electricity	0.016846526
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**65.88**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	12484.66
Denominator	Total demand raised for the year	18950.44

Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**43.48**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	2930
Denominator	Total O&M cost for providing water supply services during the year	6738.3
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**17.28**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	16157.82
Denominator	Total expenditure (revenue and capital accounts) in the same year	93501.05
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**189.87**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	150
Denominator	Total number of wards	79
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**67.57**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	250

Denominator	Total number of historic buildings/sites identified	370
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**33.33**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	10
Denominator	Total number of ecologically important sites identified in the city	30
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**50.13**
Description	Average Occupancy rate of Hotels	50.125
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.54**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	219.25
Denominator	Total budget of the ULB (capital and revenue)	40789.13
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**69**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	69
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**84.56**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	156078
Denominator	Total population in the age group of 6-14 years	184587
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**85.15**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	74426
Denominator	Total female population in the age group of 6-14 years	87410
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**26.77**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	99246
Denominator	Total number of teachers available for primary grades (public and private schools)	3708
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**16.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	137
Denominator	Total number of schools	855
Unit	Percentage	

Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**89.45**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	89.45143759
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**93.11**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	351591488
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**50.38**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	5450
Denominator	Total population of the city	1081677
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**53.66**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	5804
Denominator	Total population of the city	1081677
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	

Indicator No: 4.3	**Average response time in case of health emergencies**	**21.5**
Description	Total response time for health-related distress calls received in the city	21.5
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.42**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	4539
Denominator	Total population of the city	1081677
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.05**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	527
Denominator	Total population of the city	1081677
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**111.9**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	1175
Denominator	Total length of road network in the city	1050
Unit	Percentage	
Benchmark	100%	

Indicator No: 5.2	**Number of recorded crimes per lakh population**	**1696.25**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	18348
Denominator	Total population of the city	1081677
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**11.99**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	2200
Denominator	Total crimes recorded in the same year	18348
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**25.89**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	280
Denominator	Total population of the city	1081677
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**13.24**
Formula:	*Numerator / Denominator*	

Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	7229
Denominator	Total VAT/GST collection during preceding year	545.86
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**11.9**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	547.86
Denominator	Total Professional Tax collection during preceding year	4605.14
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**22.59**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	363
Denominator	Number of construction permits during preceding year	16.07
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	28663
Denominator	Total labour force in the city	184587
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**

Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	4614.675
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**2.67**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	4288
Denominator	Total number of slum and EWS households in the city	1606.29
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**13.32** 55790223309000
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**7.81**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	8442831

Denominator	Total population of the city	1081677
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**8.25**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	8928131.51
Denominator	Total population of the city	1081677
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	263000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1081677
Denominator	Area allocated for residential land use (in hectares)	47340000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**96.49**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	262050
Denominator	Total number of households in the city	271572
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	314783
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**2171**
Description	Total number of sustained electrical interruptions in a year	2171
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	886
Unit	Hours	

Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	15404.46
Denominator	Total energy consumption from all sources	1180503980
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.24**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	2625808.75
Denominator	Total quantum of water and waste water handled during the period	7534.5
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	1839990
Denominator	Total number of street light installations	43255
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.52**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1180503980
Denominator	Total population of the city	1081677
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.48**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	200
Denominator	Total area of the city (sq.km)	263
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.11**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	122
Denominator	Total population of the city	1081677
Unit	Number per 1000 persons	

Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	5
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0.59**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	6.2
Denominator	Total length of road network in the city	1050
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**40**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	2
Denominator	Total number of major transport interchanges in the city	5
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0.01
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**2.4**

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	12
Denominator	Total number of major interchanges in the city	5
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**58.82**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	10
Denominator	Total number of signalised intersections in the city	17
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	11800
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	13.39
Denominator	Total length of road network in the city	2100
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**37.7**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	23

Denominator	Total number of junctions/ intersections on major roads in the city	61
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**48**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	84
Denominator	Total number of public right-of-way areas in the city	175
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**50.33**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	136677
Denominator	Total number of households in the city	271572
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**232.05**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	251
Denominator	Total population of the city	1081677
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	

Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	19786
Denominator	Total number of samples tested for water quality	20075
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**40**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	100.4
Denominator	Quantum of water put into the distribution system (mld)	251
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**6.47**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	9308
Denominator	Total number of water connections in the city	143958
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**0.46**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	9
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	1970
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**112.72**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	275189
Denominator	Total number of properties in the city	244127
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**120.93**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	295228
Denominator	Total number of properties in the city	244127
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	0
Denominator	Total waste water generated in the city per day	185
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	0.15
Denominator	Total waste water received at treatment plants per day	0.15

Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**10.25**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	107.67
Denominator	Total length of road network in the city	1050
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**86.3**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	261110
Denominator	Total number of households and establishments in the city	302562
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	524
Denominator	Total quantum of MSW generated in the city	524
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**101.77**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	15998

Denominator	Average MSW generated in the city (tons per month)	15720
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**2**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	2
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**16.58**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	16.58
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**63.83**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	63.83
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	236
Denominator	Total number of noise samples	504
Unit	Percentage	
Benchmark		

Indicator No: 15.5	**Quality of water in public surface water bodies**	**43.64**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	48
Denominator	Total number of samples tested	110
Unit	Percentage	
Benchmark	100%

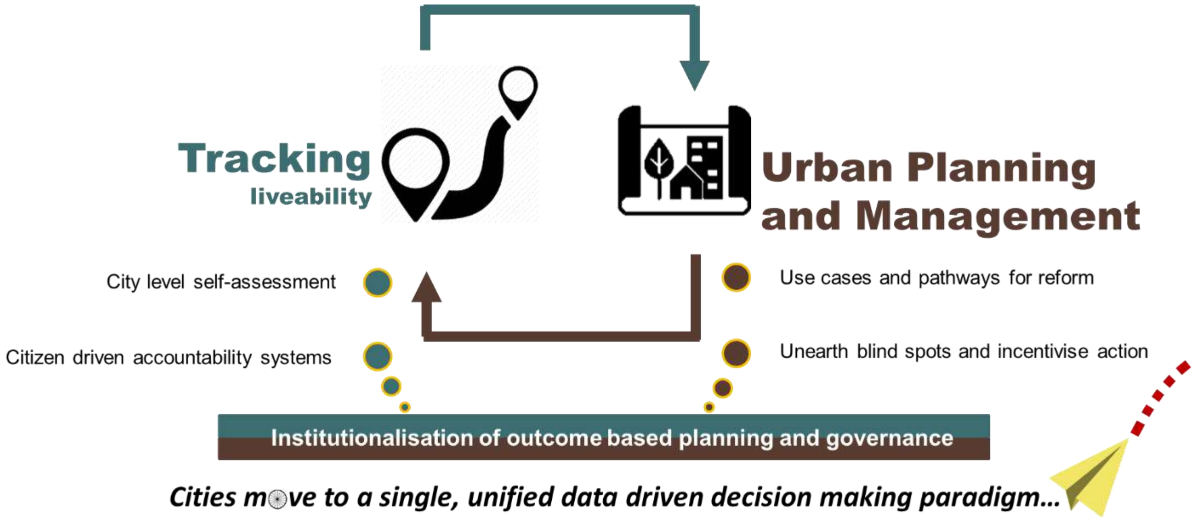
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



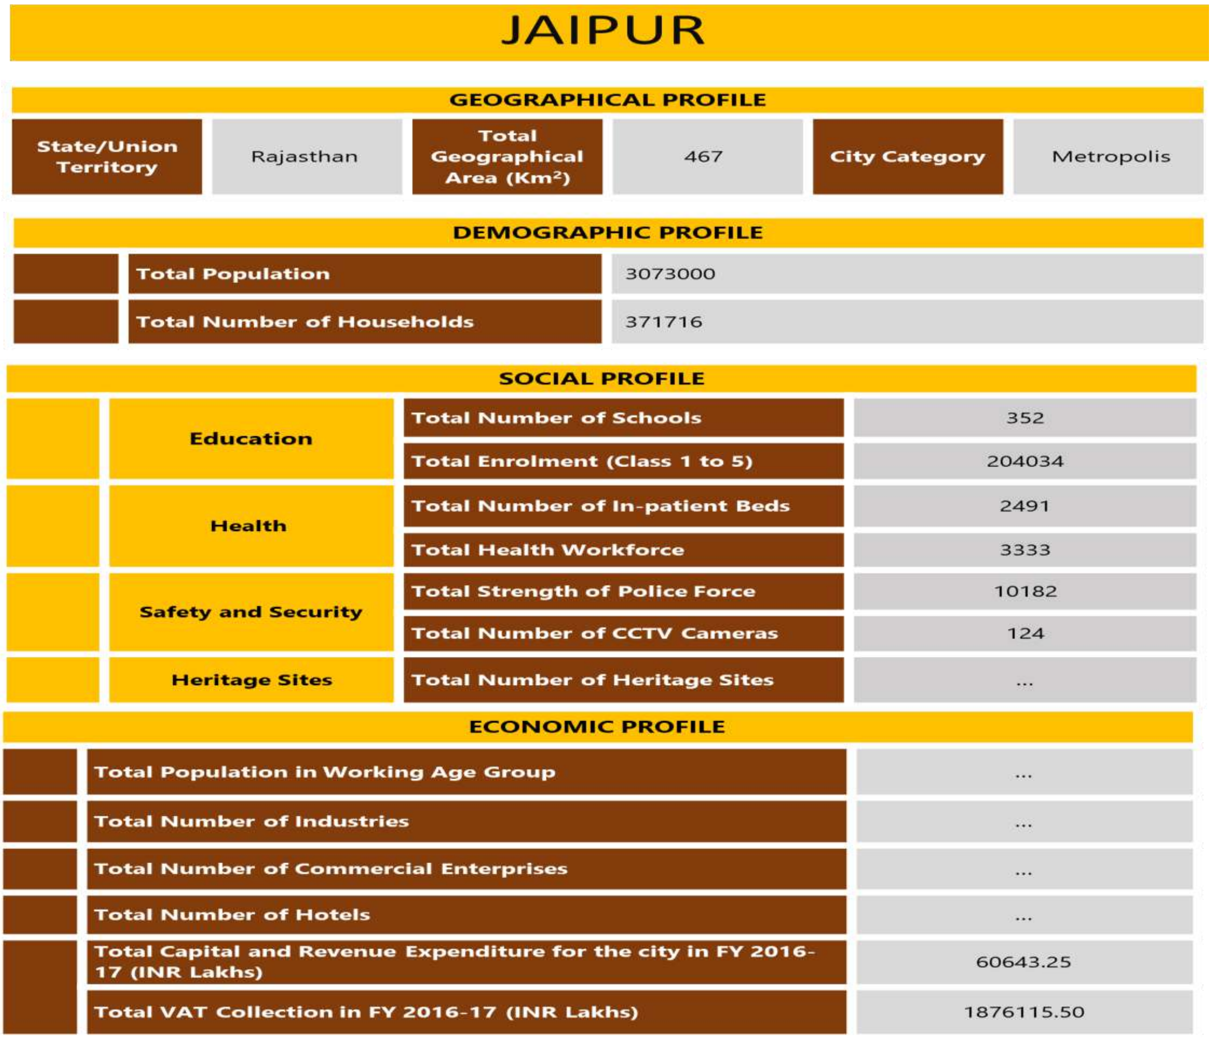
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



JAIPUR

GEOGRAPHICAL PROFILE

State/Union Territory	Rajasthan	**Total Geographical Area (Km^2)**	467	**City Category**	Metropolis

DEMOGRAPHIC PROFILE

	Total Population	3073000
	Total Number of Households	371716

SOCIAL PROFILE

	Education	**Total Number of Schools**	352
		Total Enrolment (Class 1 to 5)	204034
	Health	**Total Number of In-patient Beds**	2491
		Total Health Workforce	3333
	Safety and Security	**Total Strength of Police Force**	10182
		Total Number of CCTV Cameras	124
	Heritage Sites	**Total Number of Heritage Sites**	...

ECONOMIC PROFILE

	Total Population in Working Age Group	...
	Total Number of Industries	...
	Total Number of Commercial Enterprises	...
	Total Number of Hotels	...
	Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	60643.25
	Total VAT Collection in FY 2016-17 (INR Lakhs)	1876115.50

PHYSICAL PROFILE			
	Water	**Average Quantity of Water Supplied (MLD)**	50.6
		Total Number of Water Connection	471080
	Sanitation Facilities	**Total number of households with access to individual toilets in the city**	638982
		Total number of households in the city with access to community toilets in the city	...
	Solid Waste Management	**Daily average quantity of municipal solid waste collected in the city (Tonnes/day)**	1472.8
		Total number of households covered through door-to-door collection of solid waste	630091
	Waste Water	**Daily Average Quantum of Waste Water Generated in the City (MLD)**	264
		Daily average quantum of waste water treated by STPs in the city (MLD)	202
	Electricity	**Total number of authorized electrical connections in the city**	4131152
		Total electricity supplied to the city (kWh)	4189100000
	Public and Open Spaces	**Total area covered by green spaces in the city (m^2)**	...
	Roads and Transport	**Total Length of Road Network in the City (Km)**	6000
		Total length of arterial and sub-arterial road network in the city (Km)	2800
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	400

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	2. Identity and Culture	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary

Pillars of Comprehensive Development	Category	Indicators
		education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	6. Economy and Employment	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	7. Housing and Inclusiveness	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian

Pillars of Comprehensive Development	Category	Indicators
		crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

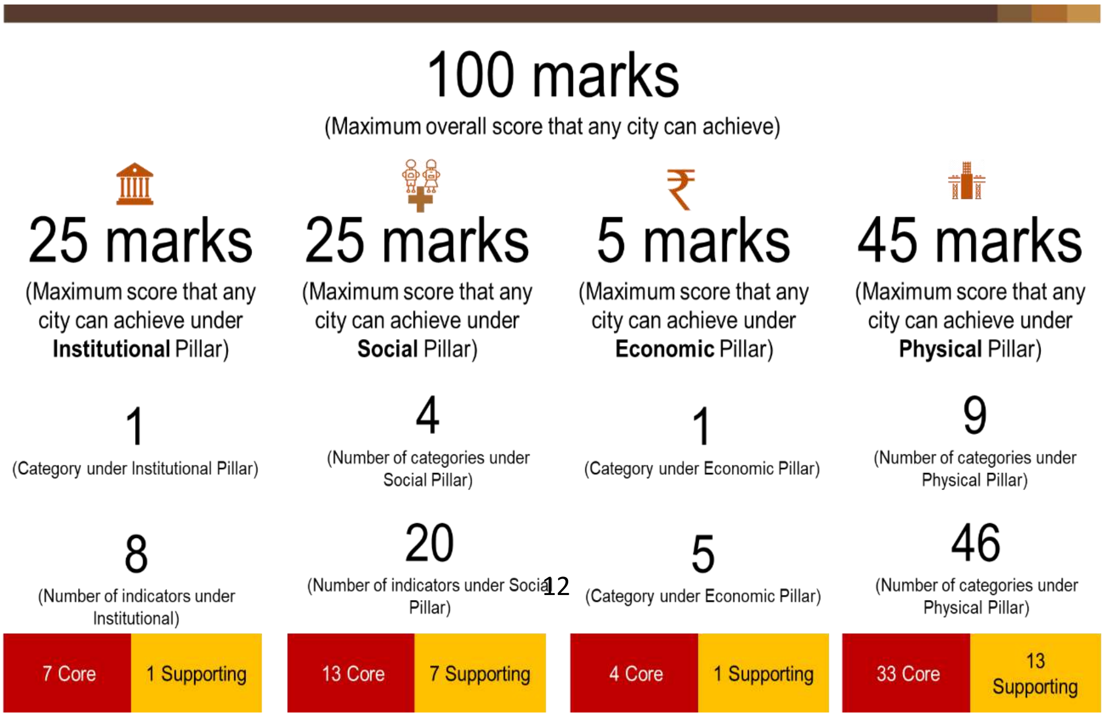
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)

25 marks (Maximum score that any city can achieve under **Institutional** Pillar)	25 marks (Maximum score that any city can achieve under **Social** Pillar)	5 marks (Maximum score that any city can achieve under **Economic** Pillar)	45 marks (Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core | 1 Supporting	13 Core | 7 Supporting	4 Core | 1 Supporting	33 Core | 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Municipal Corporation
Urban Local Body	For Park and Recreation Related Questions	Municipal Corporation
Urban Local Body	For Water Supply and Drainage related questions	Public Health Engineering Department
Urban Local Body	For Heritage sites related data	Not Identified
Urban Local Body	For Ecological sites related data	Municipal Corporation
Urban Local Body	For Housing related data	Municipal Corporation
Urban Local Body	For Building plan related data	Municipal Corporation
Urban Local Body	For Roads related data	Municipal Corporation
Urban Local Body	For Solid waste management related data	Municipal Corporation
Urban Local Body	For IT services related data	Municipal Corporation
Urban Local Body	For Vendor committee related data	Municipal Corporation
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Town & Country Planning
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Pollution Control Board
Development Authority	Building Infrastructure	Development Authority
	Construction planning	Development Authority
	Green Building	Development Authority
	Rain water harvesting	Not Identified
	Universal Design Principle	Not Identified

Designated data owners	Subcategories	Data owners at city level
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Jaipur Vidyut Vikas Nigam
State Disaster management authority		Disaster Management,Collectorate Jaipur
State Education Department		District Education Officer
State Health Department	Health care professionals	Director Health Department
	Citizen Services	Director Health Department
	Disease Prevalence	Director Health Department
	Health Infrastructure	Director Health Department
State Renewable Energy Development Agency		State Renewable Energy Department
State Sales / Commercial Taxes Department		Commissioner Commercial Tax
Town and Country Planning Department	Land Use	Town & Country Planning Department
Traffic and Police Department		ACP Traffic Office.Yaadgar,Jaipur
Transport Authorities	Buses	Transport Deoartment
	Registered Vehicles	Transport Department
	Sub urban rail transport	Not Applicable
	Mono Rail Authority	Not Applicable
	Tramways	Not Applicable
	Marine Transport Authority	Not Applicable

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 11 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

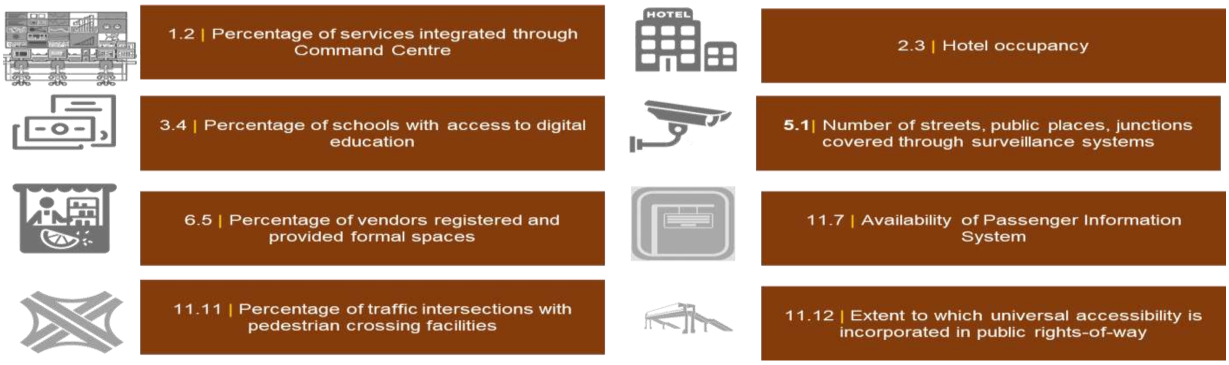
Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	0
DISCOM/Electricity Department	0
Traffic and Police Department	0
Development Authority	0
Pollution Control Board	0
State Renewable Energy Department	0
Town and Country Planning	0
State Health Department	4
Transport Authority	2
Disaster Management	0
Urban Local Body	5
Total	11*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were

found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate

Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	Percentage of citizen services available online	**64.1**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	0
	1.1e water supply	0.333333333
	1.1f sewerage/drainage	0
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	0
	1.1j information	1
	1.1k Grievance redressal	1

	1.1l electricity	1
	1.1m Building plan	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	Percentage of services integrated through Command Centre	**40.48**
Description	Services integrated through an integrated or a singular operations command centre	8.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	Percentage of citizens using online services	**4.52**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	0.003829955
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.000465066
	1.3i information	0.131312737
	1.3j electricity	NA
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	Average delay in grievance redressal	**NC**
Description		
Sub Indicators	1.4a water supply	NA
	1.4b solid waste	0

	1.4c street lights	0
	1.4d sewerage	NA
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	NA
Unit	Days	
Benchmark	0	
Indicator No: 1.5	Tax collected as percentage of tax billed	**39.62**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	6119.12
Denominator	Total demand raised for the year	15443.88
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	Extent of cost recovery (O&M) in water supply services	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	4755
Denominator	Total O&M cost for providing water supply services during the year	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	Capital spending as percentage of total expenditure	**-162.63**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-78135.82
Denominator	Total expenditure (revenue and capital accounts) in the same year	48046.6
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	Percentage of population covered under Ward Committees/ Area *Sabhas*	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	Number of Wards with notified ward committees	NA
Denominator	Total number of wards	91
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	Restoration and reuse of historic buildings	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	NA
Denominator	Total number of historic buildings/sites identified	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	Percentage of ecologically important areas covered through projects for restoration	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	NA
Denominator	Total number of ecologically important sites identified in the city	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	Hotel Occupancy	**0**
Description	Average Occupancy rate of Hotels	0
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	Percentage of budget allocated towards cultural/sports activities	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	8.22
Denominator	Total budget of the ULB (capital and revenue)	60643.25
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the	

	same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	Number of cultural/sports events hosted by city	**Non-Computable**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	NA
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	Percentage of school-aged population enrolled in schools	**57.05**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	346031
Denominator	Total population in the age group of 6-14 years	606520
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	Percentage of female school-aged population enrolled in schools	**39.2**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	109508
Denominator	Total female population in the age group of 6-14 years	279378
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	Primary education student-teacher ratio	**133.18**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	204034
Denominator	Total number of teachers available for primary grades (public and private schools)	1532
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	Percentage of schools with access to digital education	**26.14**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	92

Denominator	Total number of schools	352
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	Percentage of students completing primary education	**93877.92**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	93877.91866
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	Percentage of students completing secondary education	**102.76**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	2273612793
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	Number of in-patient hospital beds per 10,000 population	**8.18**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	2491
Denominator	Total population of the city	3046163
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	Healthcare professionals per 10,000 population	**10.94**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	3333
Denominator	Total population of the city	3046163
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	Average response time in case of health emergencies	**Non-Computable**

Description	Total response time for health-related distress calls received in the city	NA
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	Period prevalence of water borne diseases	**0.05**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	1675
Denominator	Total population of the city	3046163
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	Period prevalence of vector borne diseases	**0.08**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	2523
Denominator	Total population of the city	3046163
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	Total number of CCTV cameras installed in the city	**2.07**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	124
Denominator	Total length of road network in the city	6000
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	Number of recorded crimes per lakh population	**979.13**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	29826
Denominator	Total population of the city	3046163
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a	

	benchmark	
Indicator No: 5.3	Extent of crimes recorded against women, children and elderly per year	**6.43**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	1918
Denominator	Total crimes recorded in the same year	29826
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	Transport-related fatality per lakh population	**13.1**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	399
Denominator	Total population of the city	3046163
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	Increase in VAT/GST collection	**10.57**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	179281.32
Denominator	Total VAT/GST collection during preceding year	16968.3418
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	Increase in collection of Professional Tax	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 6.3	Increase in issuance of Construction Permits	**8.77**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	10
Denominator	Number of construction permits during preceding year	1.14
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	Unemployment Rate	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	NA
Denominator	Total labour force in the city	606520
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	Percentage of vendors registered and provided formal spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	NA
Denominator	Total number of vendors in the city	15163
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	Percentage of Slum/EWS households covered through formal/ housing	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	NA
Denominator	Total number of slum and EWS households in the city	NA
Unit	Percentage	

Benchmark	100%	
Indicator No: 7.2	Percentage of slum areas covered through basic services	**Non-Compuatble**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	NA
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	NA
Denominator	Total population of the city	3046163
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.85**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	2588300
Denominator	Total population of the city	3046163
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	Share of mixed land use area in overall city land use	**0.75**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	3500000
Denominator	Total area of the city (total area of all land uses)	467000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	Net Density	**0**

Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	3046163
Denominator	Area allocated for residential land use (in hectares)	1596000000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	Percentage of city population with authorized electrical service	**215.1**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	799563
Denominator	Total number of households in the city	371716
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	Percentage of electrical connections covered through smart meters	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	NA
Denominator	Total number of electricity connections in the city	4131152
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	Average number of electrical interruptions per year	**Non-Computable**
Description	Total number of sustained electrical interruptions in a year	NA
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	Average length of electrical interruptions per year	**NC**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	NA

Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	Percentage of total energy derived from renewable sources	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	13550
Denominator	Total energy consumption from all sources	4189100000
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	Energy consumption per unit - water supply and sewerage	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	0
Denominator	Total quantum of water and waste water handled during the period	7578
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	Energy consumption per unit – street lighting	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	85000000
Denominator	Total number of street light installations	285000
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	Percentage of new and redeveloped buildings following green building norms	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	NA
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	NA
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	Total energy consumption per capita	**0.44**

Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	4189100000
Denominator	Total population of the city	3046163
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	Geographical coverage of public transport	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	NA
Denominator	Total area of the city (sq.km)	467
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	Availability of public transport	**0.79**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	2401
Denominator	Total population of the city	3046163
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	Mode share of public transport	**To be computed**
Description	Mode share of public transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.4	Percentage of road network with dedicated bicycle tracks	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	NA
Denominator	Total length of road network in the city	6000
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	Percentage of interchanges with bicycle parking facilities	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	5
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	Mode share of non-motorised transport[1]	**To be computed**
Description	Mode share of non-motorised transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.7	Availability of Passenger Information System	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	5
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	Extent of signal synchronisation	**19.64**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	44
Denominator	Total number of signalised intersections in the city	224
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	Availability of paid parking spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	NA
Denominator	Total available on-street parking spaces in the city	NA
Unit		
Benchmark		
Indicator No: 11.10	Percentage coverage of footpaths – wider than 1.2m	**3.33**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	400

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total length of road network in the city	12000
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	Percentage of traffic intersections with pedestrian crossing facilities	**200**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	600
Denominator	Total number of junctions/ intersections on major roads in the city	300
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	Extent to which universal accessibility is incorporated in public rights-of-way	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	12
Denominator	Total number of public right-of-way areas in the city	NA
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	Household level coverage of direct water supply connections	**107.39**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	399194
Denominator	Total number of households in the city	371716
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	Per capita supply of water	**16.61**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	50.6
Denominator	Total population of the city	3046163
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	

Indicator No: 12.3	Quality of water supplied[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	NA
Denominator	Total number of samples tested for water quality	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	Level of non-revenue water – NRW	**349.8**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	177
Denominator	Quantum of water put into the distribution system (mld)	50.6
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	Percentage of water connections covered through meters	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	471080
Denominator	Total number of water connections in the city	471080
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	Percentage of plots with rainwater harvesting facility	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	NA
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	NA
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Category 13: Waste Water Management

Indicator No: 13.1	Coverage of toilets	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	638982
Denominator	Total number of properties in the city	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	Coverage of sewerage network and/or septage	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	90160
Denominator	Total number of properties in the city	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	Collection efficiency of sewerage network	**76.52**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	202
Denominator	Total waste water generated in the city per day	264
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	Extent of reuse and recycling of waste water	**86.63**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	175
Denominator	Total waste water received at treatment plants per day	202
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	Coverage of storm water drains	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	NA
Denominator	Total length of road network in the city	6000
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	Household level coverage of municipal solid waste collection	**170.64**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	634281
Denominator	Total number of households and establishments in the city	371716
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	Efficiency of collection of municipal solid waste	**99.92**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	1472.8
Denominator	Total quantum of MSW generated in the city	1474
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	Extent of municipal solid waste recovered through reuse	**16.97**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	7500
Denominator	Average MSW generated in the city (tons per month)	44184
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**Non=Computable**

Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	NA
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	1
Denominator	Total number of noise samples	72
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	12
Denominator	Total number of samples tested	12
Unit	Percentage	
Benchmark	100%

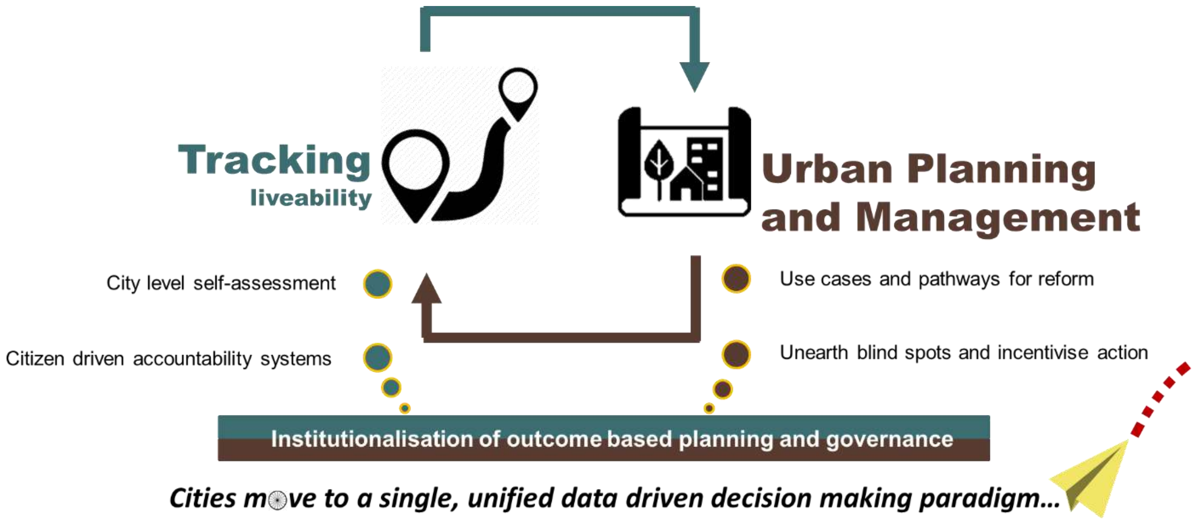
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



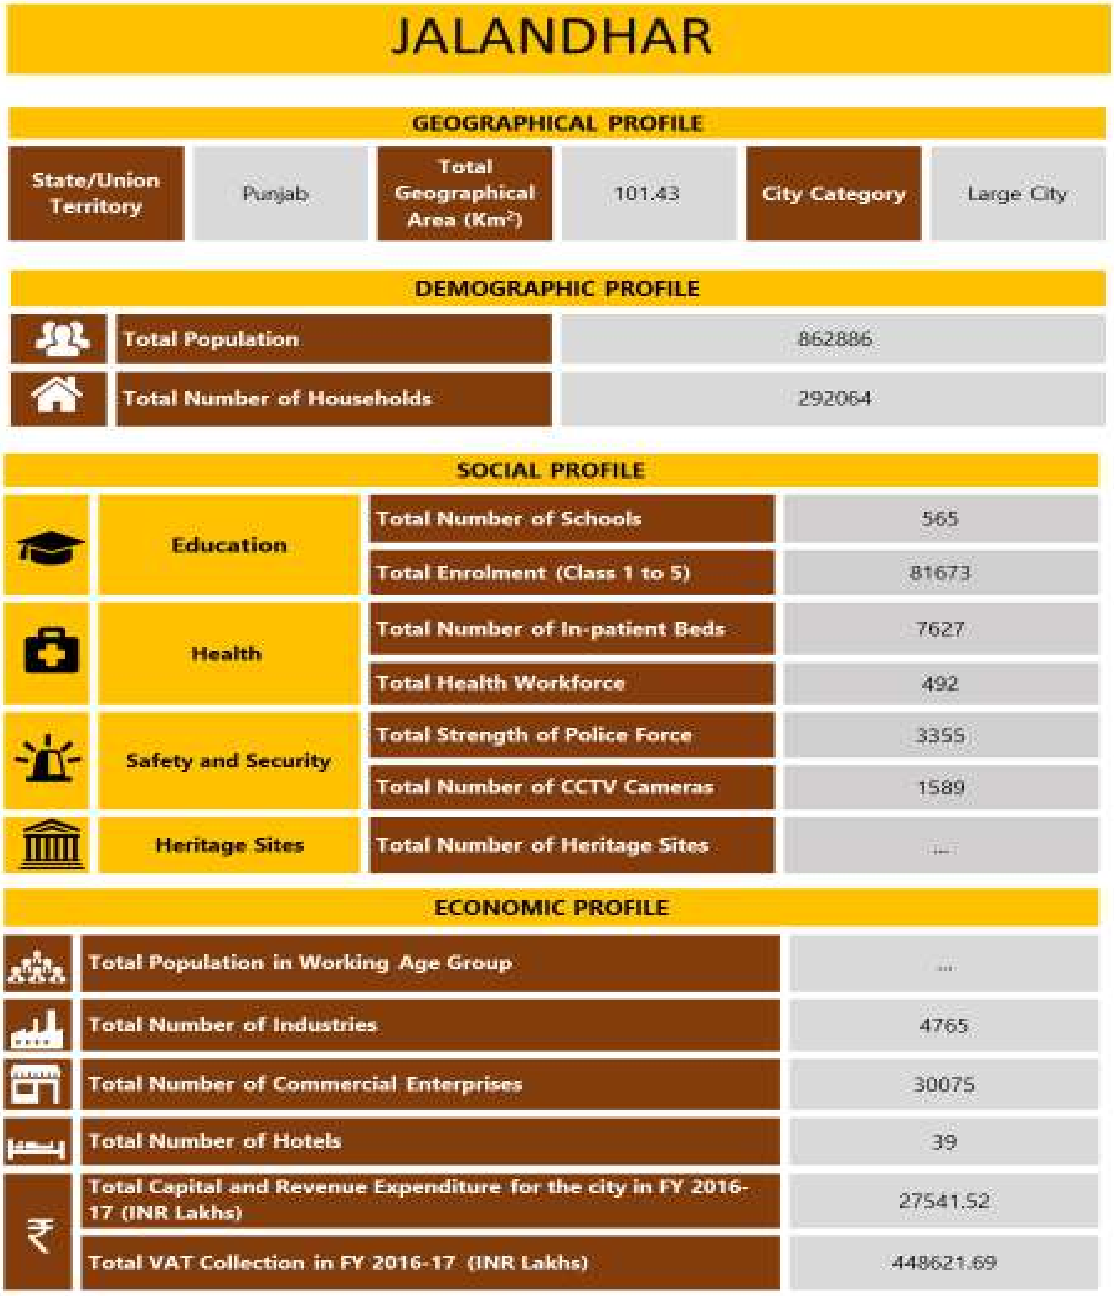
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



JALANDHAR

GEOGRAPHICAL PROFILE

State/Union Territory	Punjab	Total Geographical Area (Km²)	101.43	City Category	Large City

DEMOGRAPHIC PROFILE

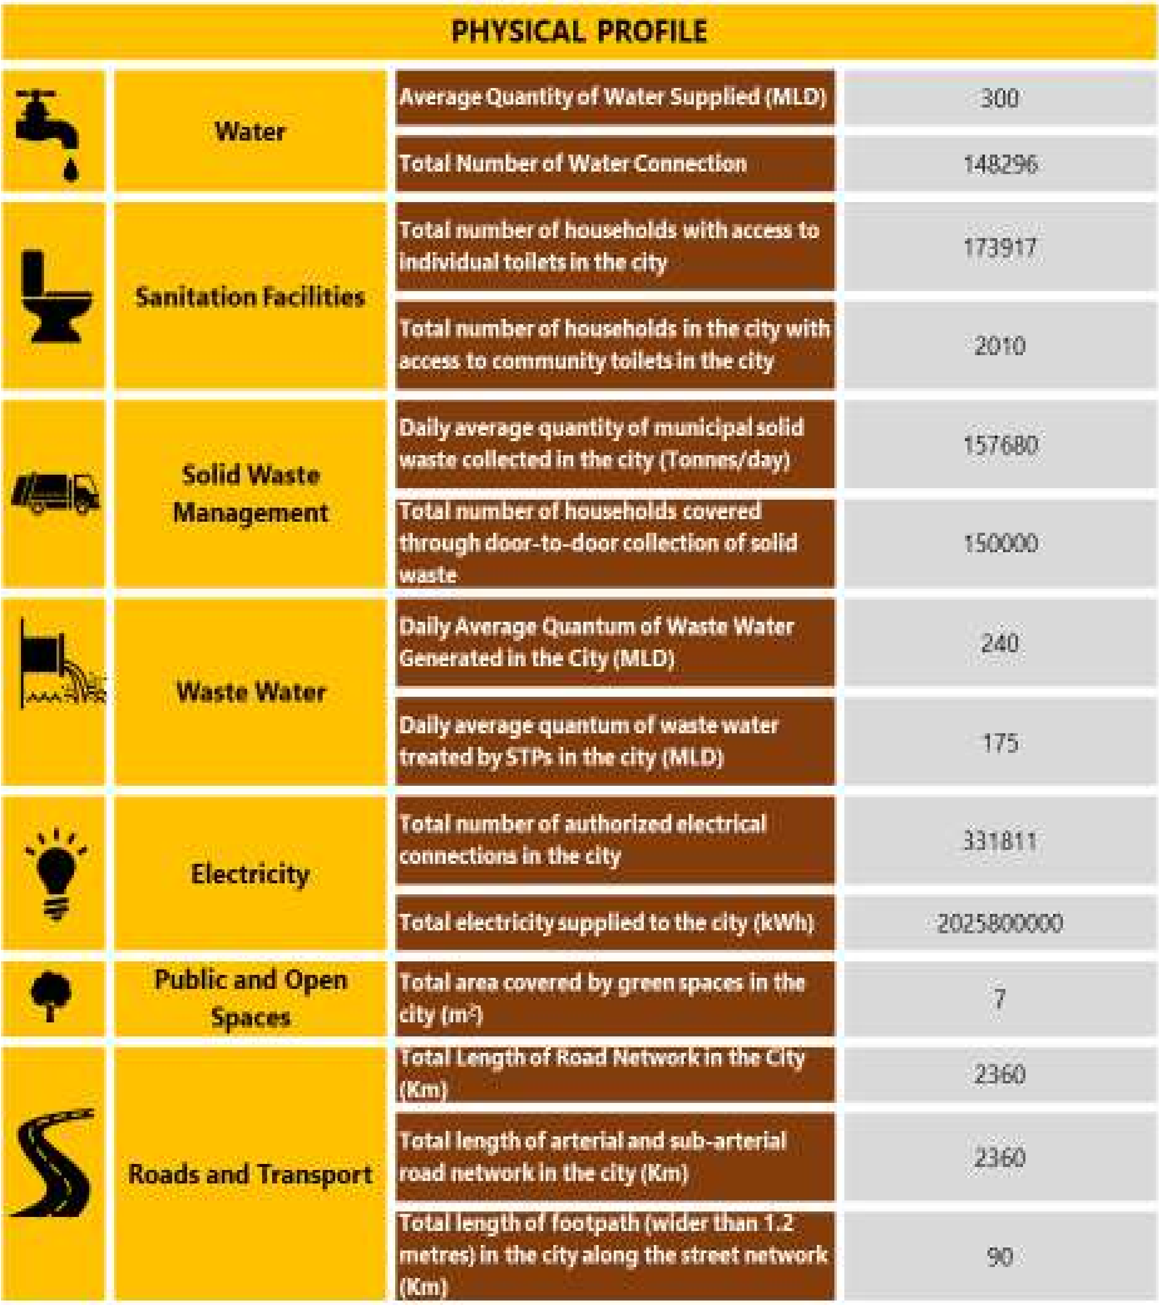
Total Population	862886
Total Number of Households	292064

SOCIAL PROFILE

Education	Total Number of Schools	565
	Total Enrolment (Class 1 to 5)	81673
Health	Total Number of In-patient Beds	7627
	Total Health Workforce	492
Safety and Security	Total Strength of Police Force	3355
	Total Number of CCTV Cameras	1589
Heritage Sites	Total Number of Heritage Sites	----

ECONOMIC PROFILE

Total Population in Working Age Group	....
Total Number of Industries	4765
Total Number of Commercial Enterprises	30075
Total Number of Hotels	39
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	27541.52
Total VAT Collection in FY 2016-17 (INR Lakhs)	448621.69



PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	300
	Total Number of Water Connection	148296
Sanitation Facilities	Total number of households with access to individual toilets in the city	173917
	Total number of households in the city with access to community toilets in the city	2010
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	157680
	Total number of households covered through door-to-door collection of solid waste	150000
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	240
	Daily average quantum of waste water treated by STPs in the city (MLD)	175
Electricity	Total number of authorized electrical connections in the city	331811
	Total electricity supplied to the city (kWh)	2025800000
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	7
Roads and Transport	Total Length of Road Network in the City (Km)	2360
	Total length of arterial and sub-arterial road network in the city (Km)	2360
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	90

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population

Pillars of Comprehensive Development	Category	Indicators
		enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services

Pillars of Comprehensive Development	Category	Indicators
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting

Pillars of Comprehensive Development	Category	Indicators
		facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

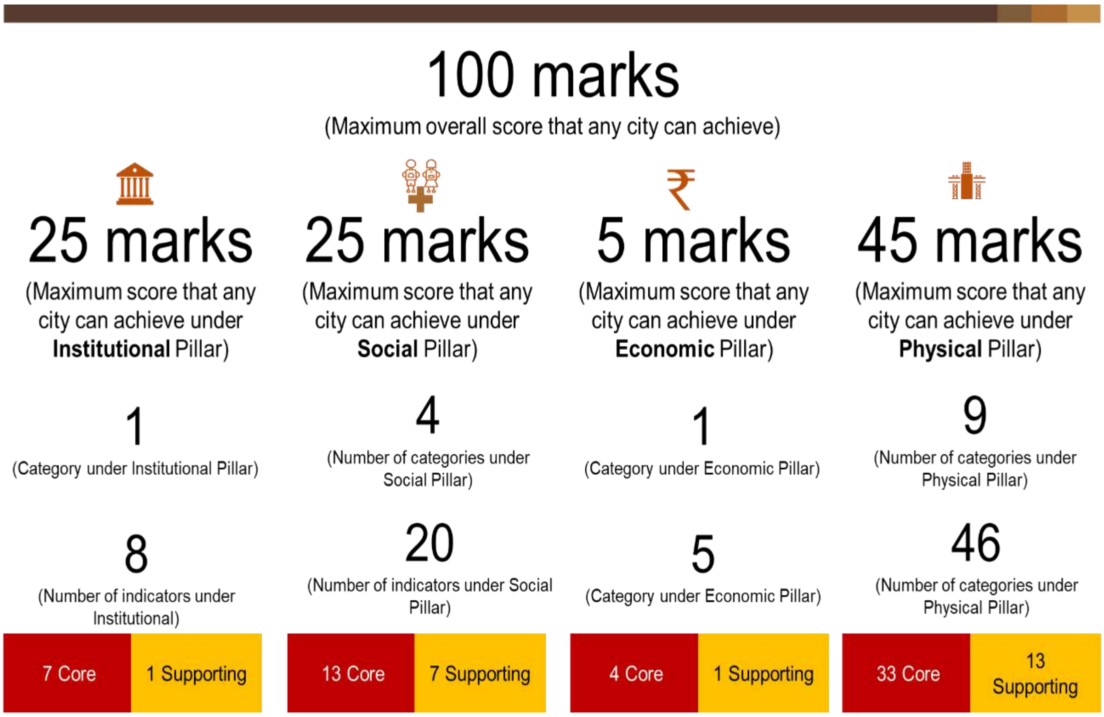
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)

25 marks (Maximum score that any city can achieve under **Institutional** Pillar)	25 marks (Maximum score that any city can achieve under **Social** Pillar)	5 marks (Maximum score that any city can achieve under **Economic** Pillar)	45 marks (Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Deputy Controller (Finance & Accounts)
Urban Local Body	For Park and Recreation Related Questions	Horticulture
Urban Local Body	For Water Supply and Drainage related questions	Operation & Maintenance
Urban Local Body	For Heritage sites related data	There are no Heritage sites in Jalandhar
Urban Local Body	For Ecological sites related data	There are no ecological sites in Jalandhar
Urban Local Body	For Housing related data	Housing Branch
Urban Local Body	For Building plan related data	Building Branch
Urban Local Body	For Roads related data	Buildings & Roads Branch
Urban Local Body	For Solid waste management related data	Medical Officer of Health
Urban Local Body	For IT services related data	Information Technology Department
Urban Local Body	For Vendor committee related data	Advertisement Department
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	District Sports Office District Employment Exchange District Transport Office
For questions under Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Punjab Pollution Control Board

Designated data owners	Subcategories	Data owners at city level
Development Authority	Building Infrastructure	Building Branch of the ULB
	Construction planning	Building Branch of the ULB
	Green Building	Building Branch of the ULB
	Rain water harvesting	Building Branch of the ULB
	Universal Design Principle	Building Branch of the ULB
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Building Branch of the ULB
State Disaster management authority		Revenue Department
State Education Department		State Education Department
State Health Department	Health care professionals	Chief Medical Office
State Health Department	Citizen Services	Chief Medical Office
State Health Department	Disease Prevalence	Chief Medical Office
State Health Department	Health Infrastructure	Indian Medical Association
State Renewable Energy Development Agency		Punjab Energy Development Agency
State Sales / Commercial Taxes Department		Sales / Commercial Taxes Department
Town and Country Planning Department	Land Use	District Town and Country Planning
Traffic and Police Department		Traffic Police Department
Transport Authorities	Buses	General Manager Roadways
Transport Authorities	Registered Vehicles	Regional Transport Authority
Transport Authorities	Sub urban rail transport	Not Applicable in Jalandhar
Transport Authorities	Mono Rail Authority	Not Applicable in Jalandhar
Transport Authorities	Tramways	Not Applicable in Jalandhar
Transport Authorities	Marine Transport Authority	Not Applicable in Jalandhar

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 101 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	1
DISCOM/Electricity Department	4
Traffic and Police Department	7
Development Authority	0
Pollution Control Board	4
State Renewable Energy Department	1
Town and Country Planning	5
State Health Department	11
Transport Authority	7
Disaster Management	1
Urban Local Body	59
Total	101

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the

field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	**Indicator title**
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**36**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.25
	1.1b death certificate	0.25

Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**90.47**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	57606
Denominator	Total female population in the age group of 6-14 years	63672
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**26.25**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	81673
Denominator	Total number of teachers available for primary grades (public and private schools)	3111
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**29.2**
Formula:	*Numerator / Denominator*	

Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	165
Denominator	Total number of schools	565
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**72.33** 72.33418084
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**3.6** 9329328
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**87.77**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	7627
Denominator	Total population of the city	868929
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**5.66**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	492
Denominator	Total population of the city	868929
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**20**

Description	Total response time for health-related distress calls received in the city	20
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**2.59**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	22499
Denominator	Total population of the city	868929
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.06**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	517
Denominator	Total population of the city	868929
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**67.33**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	1589
Denominator	Total length of road network in the city	2360
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**367.46**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	3193
Denominator	Total population of the city	868929
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**110.96**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	3543
Denominator	Total crimes recorded in the same year	3193
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**20.6**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	179
Denominator	Total population of the city	868929
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**13.5**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	53344.4
Denominator	Total VAT/GST collection during preceding year	3952.7729
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	

Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**535.21**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	2280
Denominator	Number of construction permits during preceding year	4.26
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	5031
Denominator	Total labour force in the city	142733
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	12014
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**4.13**
Formula:	*Numerator / Denominator*	

Numerator	Total number of slum and EWS households covered through formal/affordable housing	1636
Denominator	Total number of slum and EWS households in the city	395.91
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Computable** Data Unavailable
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	7
Denominator	Total population of the city	868929
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**3.76**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	3267419
Denominator	Total population of the city	868929
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	5.5786
Denominator	Total area of the city (total area of all land uses)	101430000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**3622.33**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	868929
Denominator	Area allocated for residential land use (in hectares)	239.8812
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**113.61**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	331811
Denominator	Total number of households in the city	292064
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0

Denominator	Total number of electricity connections in the city	331811
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**45959**
Description	Total number of sustained electrical interruptions in a year	45959
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.05**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	2196928
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	730
Denominator	Total energy consumption from all sources	2025800000
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	0
Denominator	Total quantum of water and waste water handled during the period	14250
Unit	kWh per million litres	

Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	Data Unavailable
Denominator	Total number of street light installations	65027
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	NA
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	69
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.41**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	2025800000
Denominator	Total population of the city	868929
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	NA

Denominator	Total area of the city (sq.km)	101.43
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	NA
Denominator	Total population of the city	868929
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	NA
Denominator	Total length of road network in the city	2360
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**200**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	2
Denominator	Total number of major transport interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport[1]**	**To be computed**
Description	Mode share of non-motorised transport	NA
Unit	Percentage	
Benchmark		

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	NA
Denominator	Total number of signalised intersections in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	12
Denominator	Total available on-street parking spaces in the city	12
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**1.91**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	90
Denominator	Total length of road network in the city	4720
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**68.75**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	11
Denominator	Total number of junctions/ intersections on major roads in the city	16
Unit	Percentage	
Benchmark	100%	

Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**26.83**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	44
Denominator	Total number of public right-of-way areas in the city	164
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**50.99**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	148926
Denominator	Total number of households in the city	292064
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**345.25**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	300
Denominator	Total population of the city	868929
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	126
Denominator	Total number of samples tested for water quality	422
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-**

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Formula:	*Numerator / Denominator*	**Computable**
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	300
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**5.27**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	7853
Denominator	Total number of water connections in the city	148926
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	Data Unavailable
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	1799
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**60.74**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	177400
Denominator	Total number of properties in the city	292064
Unit	Percentage	
Benchmark	100%	

Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	Data Unavailable
Denominator	Total number of properties in the city	292064
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	240
Denominator	Total waste water generated in the city per day	240
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	175
Denominator	Total waste water received at treatment plants per day	175
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**0.93**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	22
Denominator	Total length of road network in the city	2360
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**46.56**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	150000
Denominator	Total number of households and establishments in the city	322139

Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**90**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	157680
Denominator	Total quantum of MSW generated in the city	175200
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	0
Denominator	Average MSW generated in the city (tons per month)	4730400
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**12**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	12
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**21**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	21
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**154**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	154
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	

Numerator	Number of noise samples meeting acceptable noise levels	48
Denominator	Total number of noise samples	108
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	0
Denominator	Total number of samples tested	0
Unit	Percentage	
Benchmark	100%

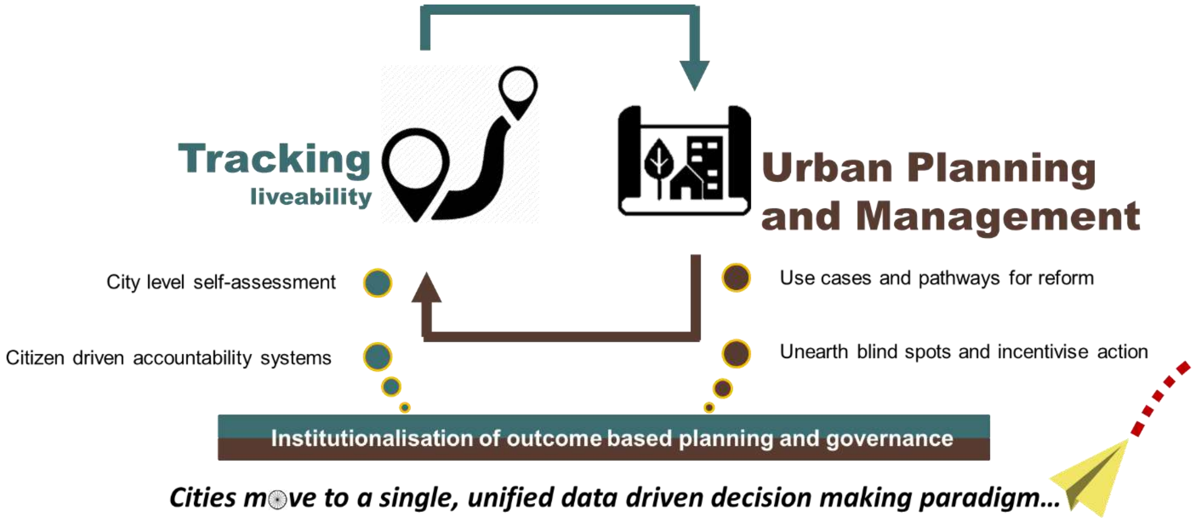
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).

JAMMU

GEOGRAPHICAL PROFILE

State/Union Territory	Jammu & Kashmir	**Total Geographical Area (Km^2)**	112	**City Category**	Large City

DEMOGRAPHIC PROFILE

Total Population	742188
Total Number of Households	150000

SOCIAL PROFILE

Education	**Total Number of Schools**	452
	Total Enrolment (Class 1 to 5)	46551
Health	**Total Number of In-patient Beds**	431
	Total Health Workforce	246
Safety and Security	**Total Strength of Police Force**	3214
	Total Number of CCTV Cameras	7
Heritage Sites	**Total Number of Heritage Sites**	5

ECONOMIC PROFILE

Total Population in Working Age Group	260455
Total Number of Industries	...
Total Number of Commercial Enterprises	86416
Total Number of Hotels	284
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	12441.19
Total VAT Collection in FY 2016-17 (INR Lakhs)	447042

PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	227.81
	Total Number of Water Connection	...
Sanitation Facilities	Total number of households with access to individual toilets in the city	140000
	Total number of households in the city with access to community toilets in the city	20000
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	350
	Total number of households covered through door-to-door collection of solid waste	32000
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	20
	Daily average quantum of waste water treated by STPs in the city (MLD)	30
Electricity	Total number of authorized electrical connections in the city	20114
	Total electricity supplied to the city (kWh)	...
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	65000000
Roads and Transport	Total Length of Road Network in the City (Km)	...
	Total length of arterial and sub-arterial road network in the city (Km)	...
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	...

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in

Pillars of Comprehensive Development	Category	Indicators
		schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through

Pillars of Comprehensive Development	Category	Indicators
		meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.

100 marks

(Maximum overall score that any city can achieve)

25 marks (Maximum score that any city can achieve under **Institutional** Pillar)	25 marks (Maximum score that any city can achieve under **Social** Pillar)	5 marks (Maximum score that any city can achieve under **Economic** Pillar)	45 marks (Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Department of Accounts
Urban Local Body	For Park and Recreation Related Questions	Jammu Muncipal Cooperation
Urban Local Body	For Water Supply and Drainage related questions	Public Health Engeenering Department (PHE)
Urban Local Body	For Heritage sites related data	Jammu Development Authority (JDA)
Urban Local Body	For Ecological sites related data	Jammu Development Authority (JDA)
Urban Local Body	For Housing related data	Jammu Development Authority (JDA)
Urban Local Body	For Building plan related data	Jammu Development Authority (JDA)
Urban Local Body	For Roads related data	Jammu Development Authority (JDA)
Urban Local Body	For Solid waste management related data	Jammu Pollution Control Board
Urban Local Body	For IT services related data	Department of Information Technology
Urban Local Body	For Vendor committee related data	
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Jammu Pollution Control Board

Designated data owners	Subcategories	Data owners at city level
Development Authority	Building Infrastructure	Jammu Development Authority
	Construction planning	Jammu Development Authority
	Green Building	Jammu Development Authority
	Rain water harvesting	Jammu Development Authority
	Universal Design Principle	Jammu Development Authority
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Power and works Department (PWD)
State Disaster management authority		Department of State Disaster Management
State Education Department		Education Department Jammu
State Health Department	Health care professionals	Jammu Health Department
	Citizen Services	Jammu Health Department
	Disease Prevalence	Jammu Health Department
	Health Infrastructure	Jammu Health Department
State Renewable Energy Development Agency		Jammu & Kashmir Energy Development AuthorityJKEDA
State Sales / Commercial Taxes Department		Jammu Sales Tax Department
Town and Country Planning Department	Land Use	Department of Town and country planning
Traffic and Police Department		Jammu Traffic Department Jammu Police Department
Transport Authorities	Buses	Jammu Transport department
	Registered Vehicles	Jammu Transport department
	Sub urban rail transport	Railway Department
	Mono Rail Authority	N/A
	Tramways	N/A
	Marine Transport Authority	N/A

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 06 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	0
DISCOM/Electricity Department	0
Traffic and Police Department	6
Development Authority	0
Pollution Control Board	0
State Renewable Energy Department	0
Town and Country Planning	0
State Health Department	0
Transport Authority	0
Disaster Management	0
Urban Local Body	0
Total	6*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**32.48**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.5
	1.1b death certificate	0
	1.1c trade license	0.5
	1.1d solid waste management	0
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0
	1.1i professional tax	0
	1.1j information	1
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.222222222
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**4.76**
Description	Services integrated through an integrated or a singular operations command centre	1
Unit	Percentage	
Benchmark	100%	

Indicator No. 1.3	**Percentage of citizens using online services**	**9.75**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	0.031025649
	1.3c water supply	NA
	1.3d solid waste management	0.000260327
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.000402639
	1.3i information	0.454704806
	1.3j electricity	0.001243076
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	

Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	3.94
Denominator	Total demand raised for the year	NA
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**25.06**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	1521.72
Denominator	Total O&M cost for providing water supply services during the year	6072.92
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**-3.12**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-1001.05
Denominator	Total expenditure (revenue and capital accounts) in the same year	32066.67
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	0
Denominator	Total number of wards	71
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**60**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	3
Denominator	Total number of historic buildings/sites identified	5
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	2
Denominator	Total number of ecologically important sites identified in the city	2
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	12441.19
Unit	Percentage	

Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**170**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	170
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**82.61**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	73206
Denominator	Total population in the age group of 6-14 years	88612
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**85.8**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	33719
Denominator	Total female population in the age group of 6-14 years	39298
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**15.81**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	46551
Denominator	Total number of teachers available for primary grades (public and private schools)	2945
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**13.05**

Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	59
Denominator	Total number of schools	452
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**77.23**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	**77.23**
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**87.55**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	**87.55**
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**7.48**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	431
Denominator	Total population of the city	576198
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**4.27**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	246
Denominator	Total population of the city	576198

Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**Non-Computable**
Description	Total response time for health-related distress calls received in the city	Data Unavailable
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**1.1**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	6317
Denominator	Total population of the city	576198
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.05**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	308
Denominator	Total population of the city	576198
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	7
Denominator	Total length of road network in the city	Data Unavailable

Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**367.06**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	2115
Denominator	Total population of the city	576198
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**7.94**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	168
Denominator	Total crimes recorded in the same year	2115
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**9.37**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	54
Denominator	Total population of the city	576198
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**13.75**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	54039
Denominator	Total VAT/GST collection during preceding year	3930.03

Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**-51.89**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	-4.25
Denominator	Total Professional Tax collection during preceding year	8.19
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	NC
Denominator	Number of construction permits during preceding year	NC
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	12150
Denominator	Total labour force in the city	88612
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**59.13**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	1310
Denominator	Total number of vendors in the city	2215.3
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**65.22**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	6482
Denominator	Total number of slum and EWS households in the city	99.38
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	**0**
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**112.81**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	65000000

Denominator	Total population of the city	576198
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	Data Unavailable
Denominator	Total population of the city	576198
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0.73**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	820000
Denominator	Total area of the city (total area of all land uses)	112000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 9.2	**Net Density**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	576198
Denominator	Area allocated for residential land use (in hectares)	900000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**109.67**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	164512
Denominator	Total number of households in the city	150000
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	201114
Unit	Percentage	

Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**Non-Computable**
Description	Total number of sustained electrical interruptions in a year	Data Unavailable
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**NC**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	Data Unavailable
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	288000
Denominator	Total energy consumption from all sources	Data Unavailable
Unit	Percentage	

Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	0
Denominator	Total quantum of water and waste water handled during the period	7734.3
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	13029120
Denominator	Total number of street light installations	37790
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	

Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	Data Unavailable
Denominator	Total population of the city	576198
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	Data Unavailable
Denominator	Total area of the city (sq.km)	112
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	Data Unavailable
Denominator	Total population of the city	576198
Unit	Number per 1000 persons	

Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport[1]**	**To be computed**
Description	Mode share of non-motorised transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	Data Unavailable
Denominator	Total number of signalised intersections in the city	40
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	Data Unavailable
Denominator	Total available on-street parking spaces in the city	Data Unavailable
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	Data Unavailable
Denominator	Total length of road network in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian	Data

	crossing facilities on major roads	Unavailable
Denominator	Total number of junctions/ intersections on major roads in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	NA
Denominator	Total number of public right-of-way areas in the city	54
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	Data Unavailable
Denominator	Total number of households in the city	150000
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**395.37**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	227.81
Denominator	Total population of the city	576198
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	

Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	Data Unavailable
Denominator	Total number of samples tested for water quality	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	227.81
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	3332
Denominator	Total number of water connections in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	0

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	NA
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	160000
Denominator	Total number of properties in the city	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	105000
Denominator	Total number of properties in the city	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	20
Denominator	Total waste water generated in the city per day	20
Unit	Percentage	

Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	0
Denominator	Total waste water received at treatment plants per day	20
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	Data Unavailable
Denominator	Total length of road network in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**14.87**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	35000
Denominator	Total number of households and establishments in the city	235416
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or	350

	private operator	
Denominator	Total quantum of MSW generated in the city	350
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	0
Denominator	Average MSW generated in the city (tons per month)	10500
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	

Numerator	Number of noise samples meeting acceptable noise levels	Data Unavailable
Denominator	Total number of noise samples	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	Data Unavailable
Denominator	Total number of samples tested	Data Unavailable
Unit	Percentage	
Benchmark	100%

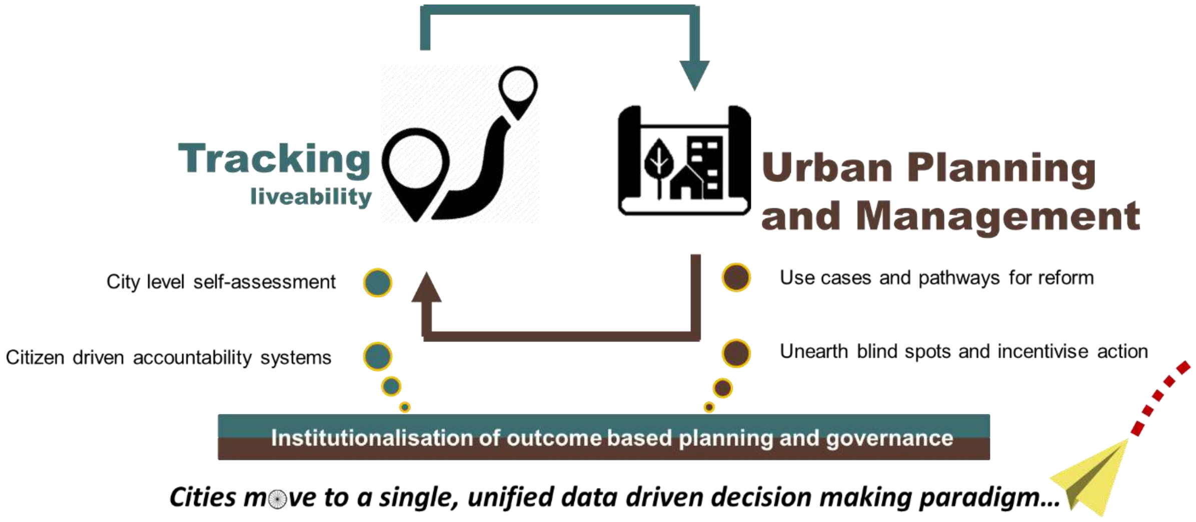
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).

JHANSI

GEOGRAPHICAL PROFILE

State/Union Territory	Uttar Pradesh	**Total Geographical Area (Km^2)**	152	**City Category**	Large City

DEMOGRAPHIC PROFILE

Total Population	644513
Total Number of Households	136000

SOCIAL PROFILE

Education	**Total Number of Schools**	754
	Total Enrolment (Class 1 to 5)	95992
Health	**Total Number of In-patient Beds**	2223
	Total Health Workforce	2382
Safety and Security	**Total Strength of Police Force**	479
	Total Number of CCTV Cameras	29
Heritage Sites	**Total Number of Heritage Sites**	5

ECONOMIC PROFILE

Total Population in Working Age Group	322853
Total Number of Industries	140
Total Number of Commercial Enterprises	2118
Total Number of Hotels	71
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	13092.20
Total VAT Collection in FY 2016-17 (INR Lakhs)	52242.88

PHYSICAL PROFILE

Water	**Average Quantity of Water Supplied (MLD)**	88
	Total Number of Water Connection	40443
Sanitation Facilities	**Total number of households with access to individual toilets in the city**	102000
	Total number of households in the city with access to community toilets in the city	15544
Solid Waste Management	**Daily average quantity of municipal solid waste collected in the city (Tonnes/day)**	250
	Total number of households covered through door-to-door collection of solid waste	136000
Waste Water	**Daily Average Quantum of Waste Water Generated in the City (MLD)**	66
	Daily average quantity of waste water treated by STPs in the city (MLD)	…
Electricity	**Total number of authorized electrical connections in the city**	109921
	Total electricity supplied to the city (kWh)	579534515
Public and Open Spaces	**Total area covered by green spaces in the city (m^2)**	857638.28
Roads and Transport	**Total Length of Road Network in the City (Km)**	599.45
	Total length of arterial and sub-arterial road network in the city (Km)	55
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	20

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population

Pillars of Comprehensive Development	Category	Indicators
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings

Pillars of Comprehensive Development	Category	Indicators
		following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through

Pillars of Comprehensive Development	Category	Indicators
		reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.

100 marks

(Maximum overall score that any city can achieve)

25 marks (Maximum score that any city can achieve under **Institutional** Pillar)	25 marks (Maximum score that any city can achieve under **Social** Pillar)	5 marks (Maximum score that any city can achieve under **Economic** Pillar)	45 marks (Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were

identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts department Nagar nigam Jhansi
Urban Local Body	For Park and Recreation Related Questions	Udyan vibhag Nagar nigam Jhansi
Urban Local Body	For Water Supply and Drainage related questions	Jal Nigam/Jalkal vibhag Nagar nigam Jhansi
Urban Local Body	For Heritage sites related data	Archeological survey of India /in charge in ULB
Urban Local Body	For Ecological sites related data	Forest Department Jhansi
Urban Local Body	For Housing related data	Jhansi Development Authority / Nirmaan Vibhag Nagar Nigam Jhansi
Urban Local Body	For Building plan related data	Jhansi Development Authority Jhansi
Urban Local Body	For Roads related data	Public Works Department / Nirmaan Vibhag Nagar Nigam Jhansi
Urban Local Body	For Solid waste management related data	Health Department Nagar Nigam Jhansi
Urban Local Body	For IT services related data	Computer Department. Nagar Nigam Jhansi
Urban Local Body	For Vendor committee related data	District Urban Development Agency(DUDA) Jhansi
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Public Works Department ,Employment Exchange, District urban development Agency Jhansi
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Uttar Pradesh pollution Control Board Jhansi
Development Authority	Building Infrastructure	Moradabad development Authority Jhansi
	Construction planning	Moradabad development Authority Jhansi
	Green Building	Moradabad development

Designated data owners	Subcategories	Data owners at city level
		Authority Jhansi
	Rain water harvesting	Moradabad development Authority Jhansi
	Universal Design Principle	Moradabad development Authority Jhansi
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Uttar Pradesh Power Corporation Ltd Jhansi
State Disaster management authority		State Disaster Management Jhansi[in UP ADM (FR]
State Education Department		Basic Shikcha Adhikari/district inspector of school Jhansi (DIOS)
State Health Department	Health care professionals	UP State Health Department Jhansi (CMO)
	Citizen Services	UP State Health Department Jhansi(CMO)
	Disease Prevalence	UP State Health Department Jhansi (CMO)
	Health Infrastructure	UP State Health Department Jhansi (CMO)
State Renewable Energy Development Agency	Renewable Energy	State Renewable Energy Develop. Agency(NEDA)
State Sales / Commercial Taxes Department		Commercial Taxes Department Jhansi
Town and Country Planning Department	Land Use	Town and Country Planning Department Jhansi
Traffic and Police Department		Traffic police, Civil police & Grand Railway police Jhansi
Transport Authorities	Buses	Uttar Pradesh State transport Corporation & Regional Transport Office Jhansi
	Registered Vehicles	Regional Transport Office Jhansi
	Sub urban rail transport	N A
	Mono Rail Authority	N A
	Tramways	N A
	Marine Transport Authority	N A

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 40 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**1**
State Education Department	**2**
DISCOM/Electricity Department	**1**
Traffic and Police Department	**2**
Development Authority	**1**
Pollution Control Board	**2**
State Renewable Energy Department	**1**
Town and Country Planning	**1**
State Health Department	**1**
Transport Authority	**1**
Disaster Management	**2**
Urban Local Body	**25**
Total	**40***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

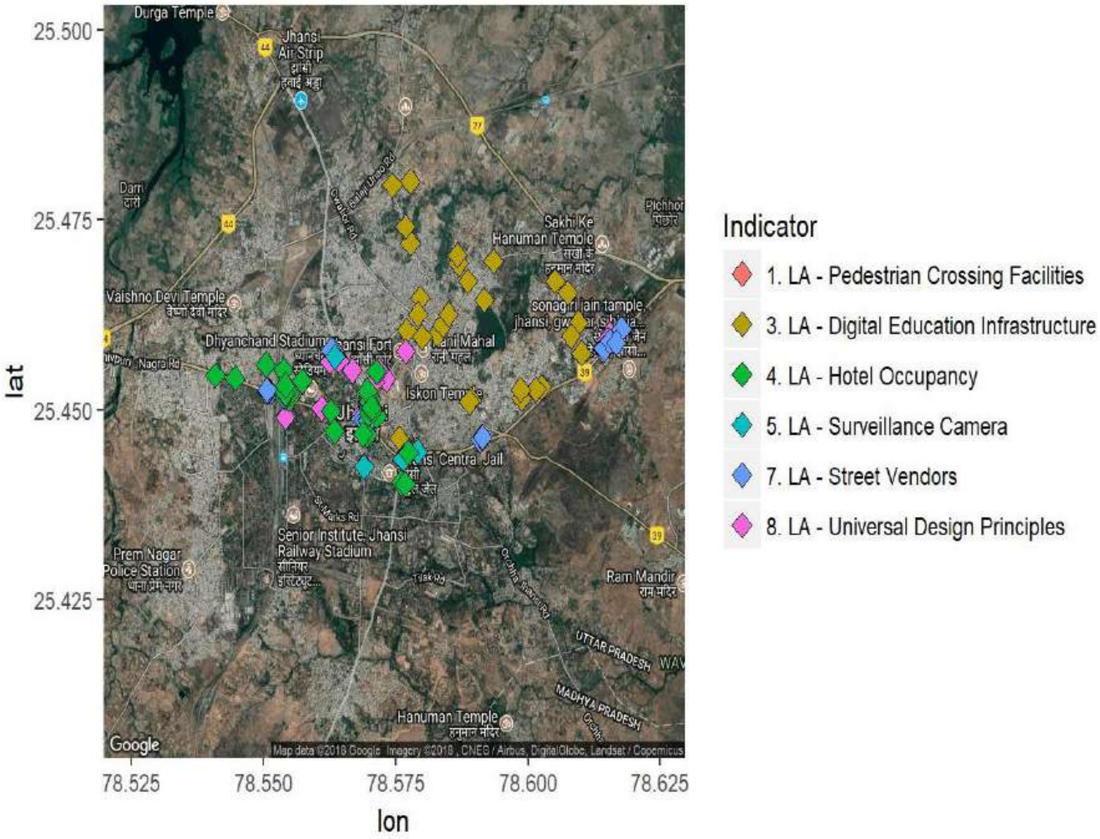
11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.



Durga Temple
Jhansi Air Strip
Sakhi Ke Hanuman Temple
Vaishno Devi Temple
Dhyanchand Stadium
Jhansi Fort
Rani Mahal
Iskon Temple
Jhansi Central Jail
Senior Institute, Jhansi Railway Stadium
Prem Nagar Police Station
Ram Mandir

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**51.38**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	1
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	1
	1.1i professional tax	0
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.333333333
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**0.14**

Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	0.002742606
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	0.000882031
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.000463061
	1.3i information	NA
	1.3j electricity	NA
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.4**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	2
	1.4d sewerage	NA
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**67.9**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	1461.1
Denominator	Total demand raised for the year	2151.88
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**43.7**

Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	779.73
Denominator	Total O&M cost for providing water supply services during the year	1784.47
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**34.79**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	9713.47
Denominator	Total expenditure (revenue and capital accounts) in the same year	27917.68
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	60
Denominator	Total number of wards	60
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	5
Denominator	Total number of historic buildings/sites identified	5
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	NA

Denominator	Total number of ecologically important sites identified in the city	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**10**
Description	Average Occupancy rate of Hotels	10
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	4.94
Denominator	Total budget of the ULB (capital and revenue)	13092.2
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**26**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	26
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**148.43**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	139266
Denominator	Total population in the age group of 6-14 years	93825
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**163.09**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	70470

Denominator	Total female population in the age group of 6-14 years	43209
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**6.12**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	95992
Denominator	Total number of teachers available for primary grades (public and private schools)	15677
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	0
Denominator	Total number of schools	754
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**185.32**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	185.3217087
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**184.42**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	206424300
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**43.96**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	2223
Denominator	Total population of the city	505693
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**47.1**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	2382
Denominator	Total population of the city	505693
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**Non-Computable**
Description	Total response time for health-related distress calls received in the city	Data Unavailable
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**3.49**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	17625
Denominator	Total population of the city	505693
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	96
Denominator	Total population of the city	505693
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**4.84**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	29
Denominator	Total length of road network in the city	599.45
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**479.74**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	2426
Denominator	Total population of the city	505693
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**7.21**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	175
Denominator	Total crimes recorded in the same year	2426
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**7.32**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	37
Denominator	Total population of the city	505693
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**8.45**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	4069.81
Denominator	Total VAT/GST collection during preceding year	481.7307
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-3.45**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-9
Denominator	Number of construction permits during preceding year	2.61
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	58567
Denominator	Total labour force in the city	93825
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	7638
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**11.81**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	6078
Denominator	Total number of slum and EWS households in the city	514.73
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**11.65**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	631703153983
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**1.7**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	857638.28
Denominator	Total population of the city	505693
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.23**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	116982.4

Denominator	Total population of the city	505693
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	152000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	505693
Denominator	Area allocated for residential land use (in hectares)	46372100
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**68.03**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	92514
Denominator	Total number of households in the city	136000
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	109921
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**Non-Computable**
Description	Total number of sustained electrical interruptions in a year	Data Unavailable
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**NC**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	Data Unavailable
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	214
Denominator	Total energy consumption from all sources	579534515
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	1608
Denominator	Total quantum of water and waste water handled during the period	NA
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be	

	treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.32**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	15726180
Denominator	Total number of street light installations	21427
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	929
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.61**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	579534515
Denominator	Total population of the city	505693
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	NA
Denominator	Total area of the city (sq.km)	152
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	NA

Denominator	Total population of the city	505693
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	63.19
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	NA
Denominator	Total length of road network in the city	599.45
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	Blank
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	9
Denominator	Total available on-street parking spaces in the city	9
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**1.67**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	20
Denominator	Total length of road network in the city	1198.9
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	10
Denominator	Total number of junctions/ intersections on major roads in the city	10
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0.8**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	7
Denominator	Total number of public right-of-way areas in the city	875
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply**	**29**

	connections	
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	39446
Denominator	Total number of households in the city	136000
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**174.02**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	88
Denominator	Total population of the city	505693
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	21852
Denominator	Total number of samples tested for water quality	21860
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**25.27**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	22.24
Denominator	Quantum of water put into the distribution system (mld)	88
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**86.05**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	34802
Denominator	Total number of water connections in the city	40443
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**0**

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	0
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	252
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**139.93**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	134714
Denominator	Total number of properties in the city	96274
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**226.44**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	218000
Denominator	Total number of properties in the city	96274
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	NA
Denominator	Total waste water generated in the city per day	66
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	NA
Denominator	Total waste water received at treatment plants per day	NA

Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**28.36**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	170
Denominator	Total length of road network in the city	599.45
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**110.77**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	153000
Denominator	Total number of households and establishments in the city	138118
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**83.33**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	250
Denominator	Total quantum of MSW generated in the city	300
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**70**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	5250
Denominator	Average MSW generated in the city (tons per month)	7500
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**6.57**

Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	6.57
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**19.32**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	19.32
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**112.94**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	112.94
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	12
Denominator	Total number of noise samples	96
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	12
Denominator	Total number of samples tested	12
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT

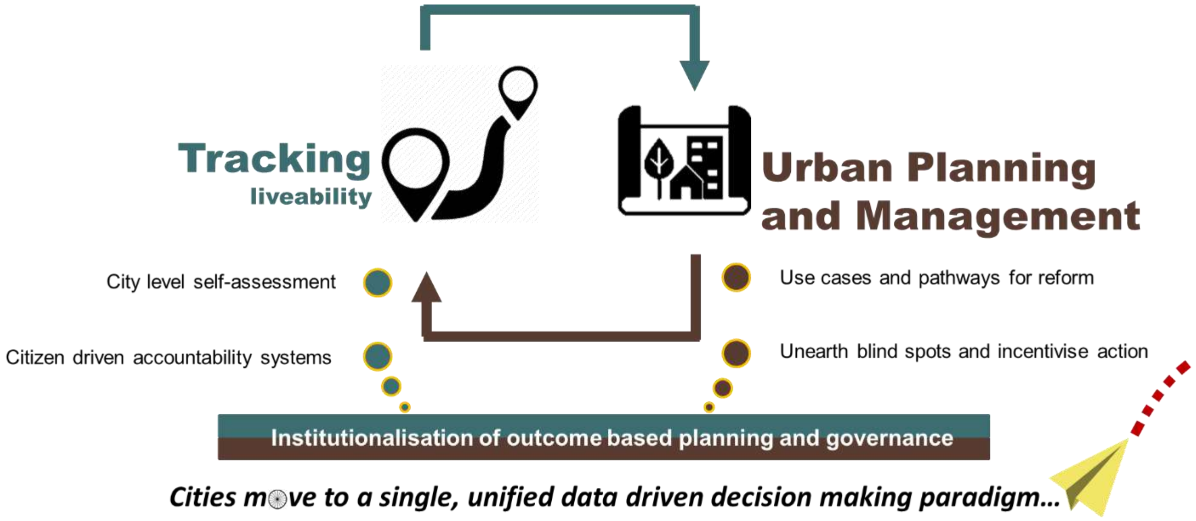
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



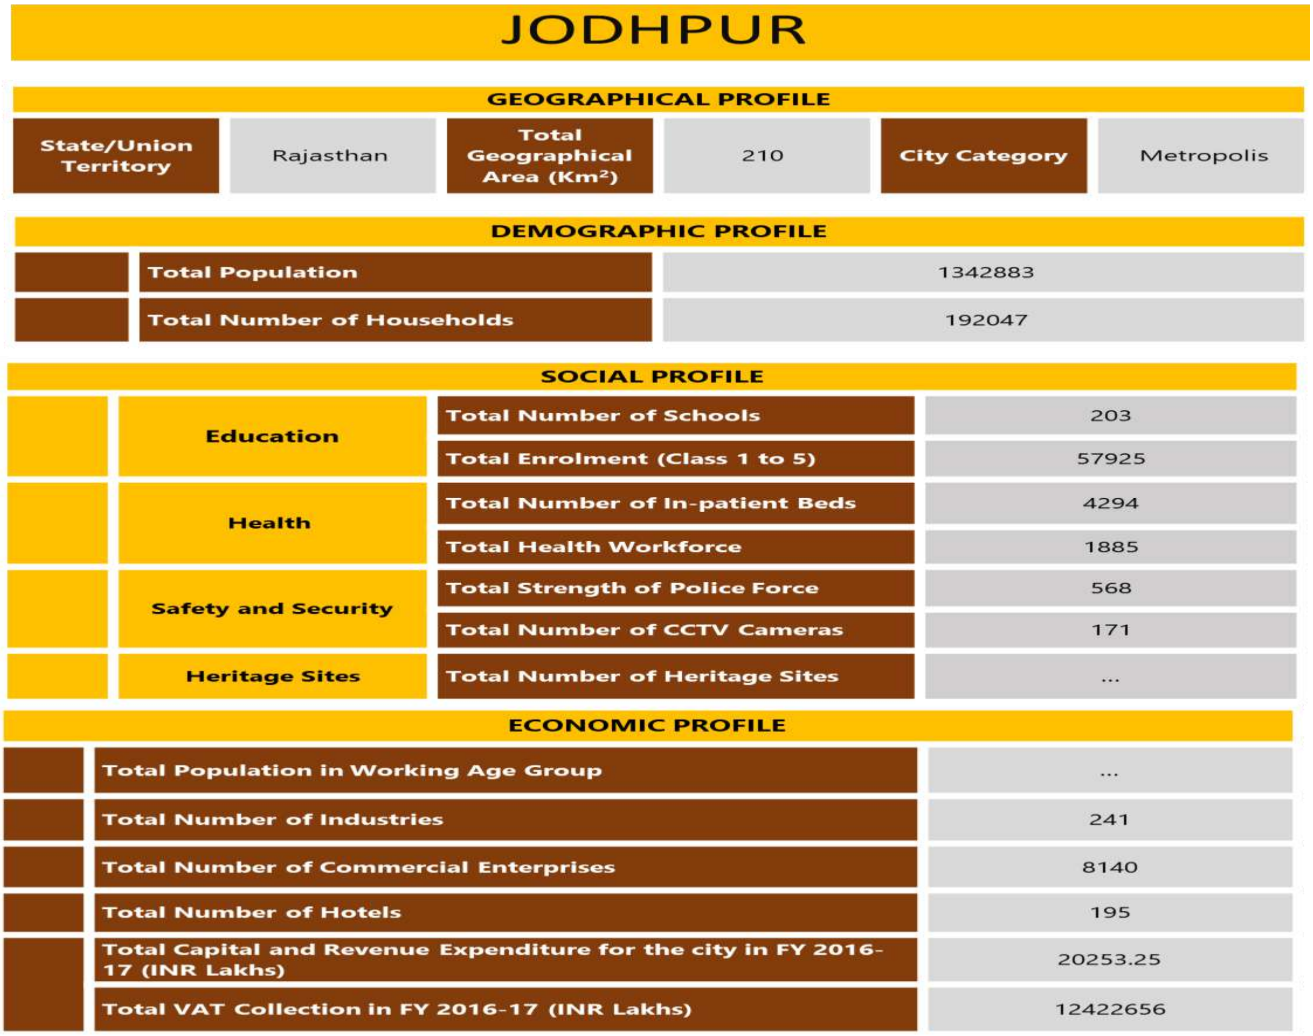
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



JODHPUR

GEOGRAPHICAL PROFILE

State/Union Territory	Rajasthan	**Total Geographical Area (Km^2)**	210	**City Category**	Metropolis

DEMOGRAPHIC PROFILE

	Total Population	1342883
	Total Number of Households	192047

SOCIAL PROFILE

	Education	**Total Number of Schools**	203
		Total Enrolment (Class 1 to 5)	57925
	Health	**Total Number of In-patient Beds**	4294
		Total Health Workforce	1885
	Safety and Security	**Total Strength of Police Force**	568
		Total Number of CCTV Cameras	171
	Heritage Sites	**Total Number of Heritage Sites**	...

ECONOMIC PROFILE

	Total Population in Working Age Group	...
	Total Number of Industries	241
	Total Number of Commercial Enterprises	8140
	Total Number of Hotels	195
	Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	20253.25
	Total VAT Collection in FY 2016-17 (INR Lakhs)	12422656

PHYSICAL PROFILE		
Water	**Average Quantity of Water Supplied (MLD)**	606.19
	Total Number of Water Connection	194170
Sanitation Facilities	**Total number of households with access to individual toilets in the city**	167024
	Total number of households in the city with access to community toilets in the city	6959
Solid Waste Management	**Daily average quantity of municipal solid waste collected in the city (Tonnes/day)**	500
	Total number of households covered through door-to-door collection of solid waste	14674
Waste Water	**Daily Average Quantum of Waste Water Generated in the City (MLD)**	108
	Daily average quantum of waste water treated by STPs in the city (MLD)	70
Electricity	**Total number of authorized electrical connections in the city**	239271
	Total electricity supplied to the city (kWh)	16541.51
Public and Open Spaces	**Total area covered by green spaces in the city (m^2)**	...
Roads and Transport	**Total Length of Road Network in the City (Km)**	1595
	Total length of arterial and sub-arterial road network in the city (Km)	...
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	...

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	2. Identity and Culture	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary

Pillars of Comprehensive Development	Category	Indicators
		education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	6. Economy and Employment	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	7. Housing and Inclusiveness	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian

Pillars of Comprehensive Development	Category	Indicators
		crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

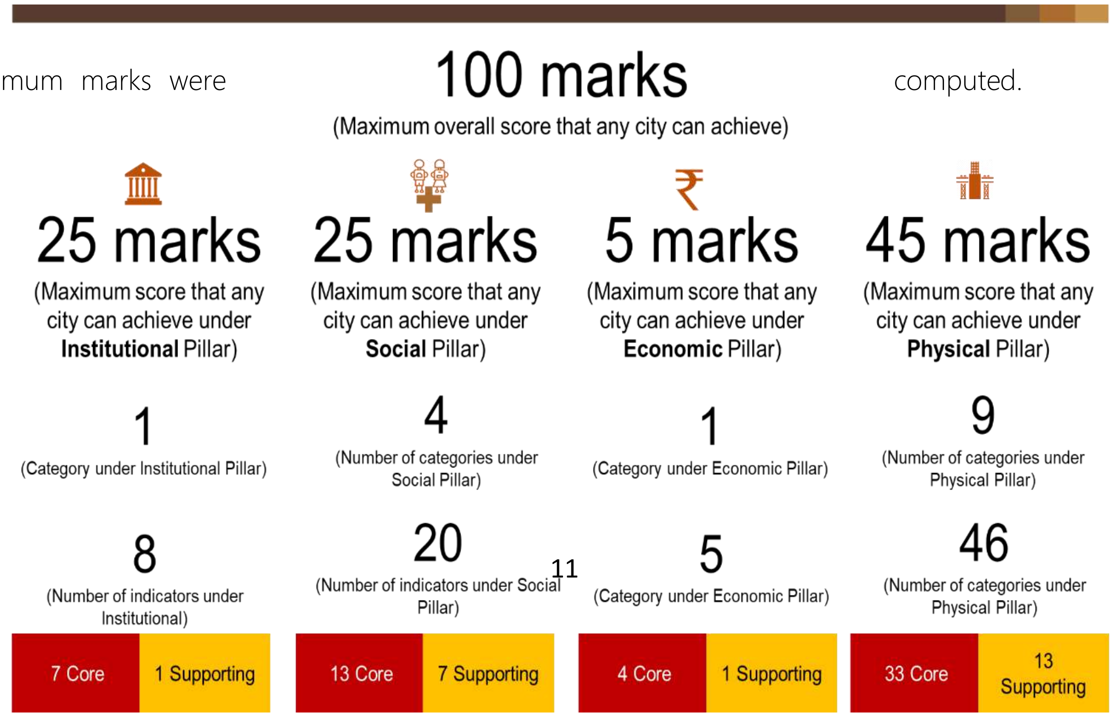
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken

down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts Section, Jodhpur Nagar Nigam
Urban Local Body	For Park and Recreation Related Questions	Town and Country Planning department
Urban Local Body	For Water Supply and Drainage related questions	Public Health and Engineering Department
Urban Local Body	For Heritage sites related data	Jodhpur Nagar Nigam
Urban Local Body	For Ecological sites related data	Jodhpur Nagar Nigam
Urban Local Body	For Housing related data	Jodhpur Nagar Nigam
Urban Local Body	For Building plan related data	Jodhpur Development Authority
Urban Local Body	For Roads related data	Jodhpur Nagar Nigam, Jodhpur Development Authority and Public Works Department
Urban Local Body	For Solid waste management related data	Jodhpur Nagar Nigam
Urban Local Body	For IT services related data	Oswal Data, Jodhpur Nagar Nigam
Urban Local Body	For Vendor committee related data	Jodhpur Nagar Nigam

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Jodhpur Nagar Nigam
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Central Pollution Control Board
Development Authority	Building Infrastructure	Jodhpur Development Authority
	Construction planning	Jodhpur Development Authority
	Green Building	Jodhpur Development Authority
	Rain water harvesting	Jodhpur Development Authority
	Universal Design Principle	Jodhpur Development Authority
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Jodhpur Vidyut Vibhag Nigam Limited
State Disaster management authority		Control Room, Collectorate
State Education Department		District Education Office
State Health Department	Health care professionals	Health Department & S.N. medical College
	Citizen Services	Health Department & S.N. medical College
	Disease Prevalence	Health Department & S.N. medical College
	Health Infrastructure	Health Department & S.N. medical College
State Renewable Energy Development Agency		Jodhpur Vidyut Vibhag Nigam Limited
State Sales / Commercial Taxes Department		Sales and Commercial Tax Department, Collectorate
Town and Country Planning Department	Land Use	Town and Country Planning Department
Traffic and Police Department		Traffic and Police Department
Transport Authorities	Buses	Transport Department
	Registered Vehicles	Transport Department
	Sub urban rail transport	Transport Department

Designated data owners	Subcategories	Data owners at city level
	Mono Rail Authority	Transport Department
	Tramways	Transport Department
	Marine Transport Authority	Transport Department

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 32 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	2
State Education Department	1
DISCOM/Electricity Department	1
Traffic and Police Department	1
Development Authority	0
Pollution Control Board	0
State Renewable Energy Department	0
Town and Country Planning	3
State Health Department	1
Transport Authority	9
Disaster Management	0
Urban Local Body	14
Total	32*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that

data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	Percentage of citizen services available online	**44.97**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75

	1.1c trade license	0
	1.1d solid waste management	0.25
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0.666666667
	1.1i professional tax	0.25
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.333333333
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	Percentage of services integrated through Command Centre	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	Percentage of citizens using online services	**21.13**
Description		
Sub Indicators	1.3a Building plan	0.000611429
	1.3b Birth/Death Certificate	0.003123725
	1.3c water supply	0.000785714
	1.3d solid waste management	NA
	1.3e property tax	0.648525238
	1.3f professional tax (RC)	NA

	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	NA
	1.3i information	NA
	1.3j electricity	0.40338988
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	Average delay in grievance redressal	**NC**
Description		
Sub Indicators	1.4a water supply	NA
	1.4b solid waste	NA
	1.4c street lights	0
	1.4d sewerage	NA
	1.4e professional tax	NA
	1.4f parks and recreational spaces	NA
	1.4g building plan	NA
Unit	Days	
Benchmark	0	
Indicator No: 1.5	Tax collected as percentage of tax billed	**16.81**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	230359051
Denominator	Total demand raised for the year	1370617501
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	Extent of cost recovery (O&M) in water supply services	**124.02**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	7639.29
Denominator	Total O&M cost for providing water supply services during the year	6159.81
Unit	Percentage	
Benchmark	100%	

Indicator No: 1.7	Capital spending as percentage of total expenditure	**-49.11**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-13511.89
Denominator	Total expenditure (revenue and capital accounts) in the same year	27511.94
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	Percentage of population covered under Ward Committees/ Area *Sabhas*	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	65
Denominator	Total number of wards	65
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	Restoration and reuse of historic buildings	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	4
Denominator	Total number of historic buildings/sites identified	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	Percentage of ecologically important areas covered through projects for restoration	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	Data Unavailable
Denominator	Total number of ecologically important sites identified in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	Hotel Occupancy	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	Percentage of budget allocated towards cultural/sports activities	**0.09**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	18.46
Denominator	Total budget of the ULB (capital and revenue)	20253.25
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	

Indicator No: 2.5	Number of cultural/sports events hosted by city	**0**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	0
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	Percentage of school-aged population enrolled in schools	**43.9**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	92344
Denominator	Total population in the age group of 6-14 years	210360
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	Percentage of female school-aged population enrolled in schools	**40.07**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	39493
Denominator	Total female population in the age group of 6-14 years	98566
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	Primary education student-teacher ratio	**20.5**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	57925
Denominator	Total number of teachers available for primary grades (public and private schools)	2825
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	Percentage of schools with access to digital education	**80.79**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	164
Denominator	Total number of schools	203

Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	Percentage of students completing primary education	**45.26**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	45.25744169
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	Percentage of students completing secondary education	**107.66**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	135548798
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	Number of in-patient hospital beds per 10,000 population	**40.66**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	4294
Denominator	Total population of the city	1056191
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	Healthcare professionals per 10,000 population	**17.85**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	1885
Denominator	Total population of the city	1056191
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	Average response time in case of health emergencies	**Non-Computable**
Description	Total response time for health-related distress calls received in the city	Data Unavailable
Unit	Minutes and seconds	

Benchmark	8 minutes	
Indicator No: 4.4	Period prevalence of water borne diseases	**4.86**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	51368
Denominator	Total population of the city	1056191
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	Period prevalence of vector borne diseases	**0.09**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	987
Denominator	Total population of the city	1056191
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	Total number of CCTV cameras installed in the city	**10.72**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	171
Denominator	Total length of road network in the city	1595
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	Number of recorded crimes per lakh population	**314.24**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	3319
Denominator	Total population of the city	1056191
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 5.3	Extent of crimes recorded against women, children and elderly per year	**12.84**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	426
Denominator	Total crimes recorded in the same year	3319
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	Transport-related fatality per lakh population	**9.94**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	105
Denominator	Total population of the city	1056191
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	Increase in VAT/GST collection	**6.12**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	716069
Denominator	Total VAT/GST collection during preceding year	117065.87
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	Increase in collection of Professional Tax	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 6.3	Increase in issuance of Construction Permits	**325.69**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	1407
Denominator	Number of construction permits during preceding year	4.32
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	Unemployment Rate	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	4274
Denominator	Total labour force in the city	210360
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	Percentage of vendors registered and provided formal spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	Data Unavailable
Denominator	Total number of vendors in the city	6231
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	Percentage of Slum/EWS households covered through formal/ housing	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	Data Unavailable
Denominator	Total number of slum and EWS households in the city	4.63

Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	Percentage of slum areas covered through basic services	**0.03**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	28117164000
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	Data Unavailable
Denominator	Total population of the city	1056191
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.39**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	410000
Denominator	Total population of the city	1056191
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	Share of mixed land use area in overall city land use	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	210000000

Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	Net Density	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1056191
Denominator	Area allocated for residential land use (in hectares)	133238700.9
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	Percentage of city population with authorized electrical service	**9.88**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	18971
Denominator	Total number of households in the city	192047
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	Percentage of electrical connections covered through smart meters	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	239271
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	Average number of electrical interruptions per year	**20987**
Description	Total number of sustained electrical interruptions in a year	20987
Unit	Number	

Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	Average length of electrical interruptions per year	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	53
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	Percentage of total energy derived from renewable sources	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	5224.32
Denominator	Total energy consumption from all sources	16541.51
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	Energy consumption per unit - water supply and sewerage	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	0
Denominator	Total quantum of water and waste water handled during the period	20285.7
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	Energy consumption per unit – street lighting	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	23637543
Denominator	Total number of street light installations	72000
Unit	kWh per light installation	

Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	Percentage of new and redeveloped buildings following green building norms	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	Data Unavailable
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	Data Unavailable
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	Total energy consumption per capita	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	16541.51
Denominator	Total population of the city	1056191
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	Geographical coverage of public transport	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	Data Unavailable
Denominator	Total area of the city (sq.km)	210
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	Availability of public transport	**0.78**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	823
Denominator	Total population of the city	1056191

Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	Mode share of public transport	**To be computed**
Description	Mode share of public transport	30
Unit	Percentage	
Benchmark		
Indicator No: 11.4	Percentage of road network with dedicated bicycle tracks	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	NA
Denominator	Total length of road network in the city	1595
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	Percentage of interchanges with bicycle parking facilities	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	Data Unavailable
Denominator	Total number of major transport interchanges in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	Mode share of non-motorised transport[1]	**To be computed**
Description	Mode share of non-motorised transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.7	Availability of Passenger Information System	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	Data Unavailable

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total number of major interchanges in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	Extent of signal synchronisation	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	6
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	Availability of paid parking spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	5
Denominator	Total available on-street parking spaces in the city	Data Unavailable
Unit		
Benchmark		
Indicator No: 11.10	Percentage coverage of footpaths – wider than 1.2m	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	Data Unavailable
Denominator	Total length of road network in the city	3190
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	Percentage of traffic intersections with pedestrian crossing facilities	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	Data Unavailable
Denominator	Total number of junctions/ intersections on major roads in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	

Indicator No: 11.12	Extent to which universal accessibility is incorporated in public rights-of-way	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	Data Unavailable
Denominator	Total number of public right-of-way areas in the city	304
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	Household level coverage of direct water supply connections	**91.09**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	174927
Denominator	Total number of households in the city	192047
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	Per capita supply of water	**573.94**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	606.19
Denominator	Total population of the city	1056191
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	Quality of water supplied[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	2922
Denominator	Total number of samples tested for water quality	2922
Unit	Percentage	
Benchmark	100%	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Indicator No: 12.4	Level of non-revenue water – NRW	**20**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	121.23
Denominator	Quantum of water put into the distribution system (mld)	606.19
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	Percentage of water connections covered through meters	**97.27**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	188873
Denominator	Total number of water connections in the city	194170
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	Percentage of plots with rainwater harvesting facility	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	Data Unavailable
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	Data Unavailable
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	Coverage of toilets	**99.42**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	173988
Denominator	Total number of properties in the city	175000
Unit	Percentage	
Benchmark	100%	

Indicator No: 13.2	Coverage of sewerage network and/or septage	**91.08**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	159385
Denominator	Total number of properties in the city	175000
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	Collection efficiency of sewerage network	**80**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	86.4
Denominator	Total waste water generated in the city per day	108
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	Extent of reuse and recycling of waste water	**98.59**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	70
Denominator	Total waste water received at treatment plants per day	71
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	Coverage of storm water drains	**3.2**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	51
Denominator	Total length of road network in the city	1595
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	Household level coverage of municipal solid waste collection	**7.79**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	15594

Denominator	Total number of households and establishments in the city	200187
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	Efficiency of collection of municipal solid waste	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	500
Denominator	Total quantum of MSW generated in the city	500
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	Extent of municipal solid waste recovered through reuse	**0**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	0
Denominator	Average MSW generated in the city (tons per month)	15000
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**6.12**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	6.12
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**22.86**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	22.86
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**192**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	192

Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	4
Denominator	Total number of noise samples	22
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	12
Denominator	Total number of samples tested	12
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT

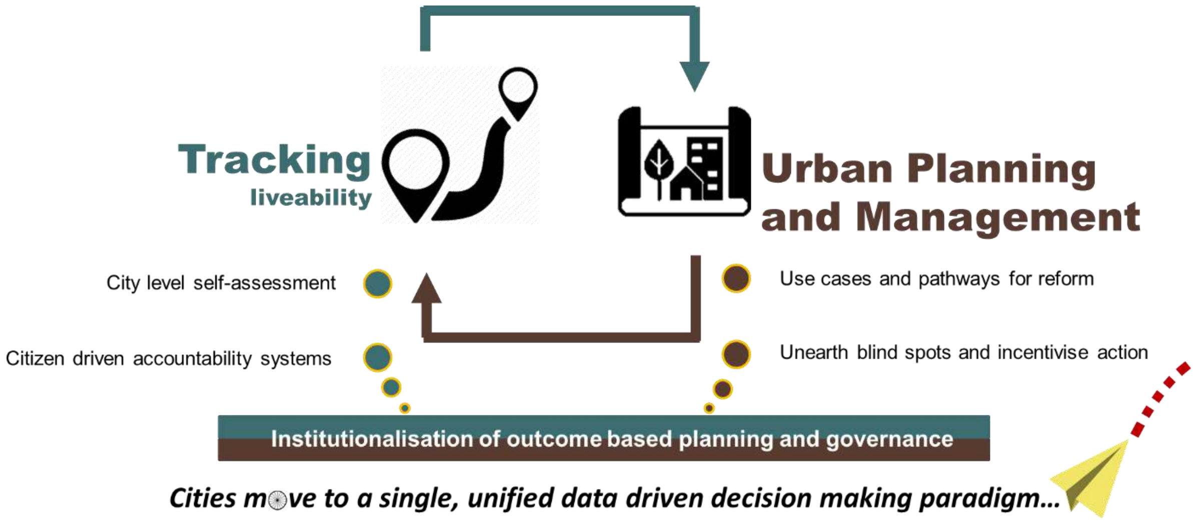
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

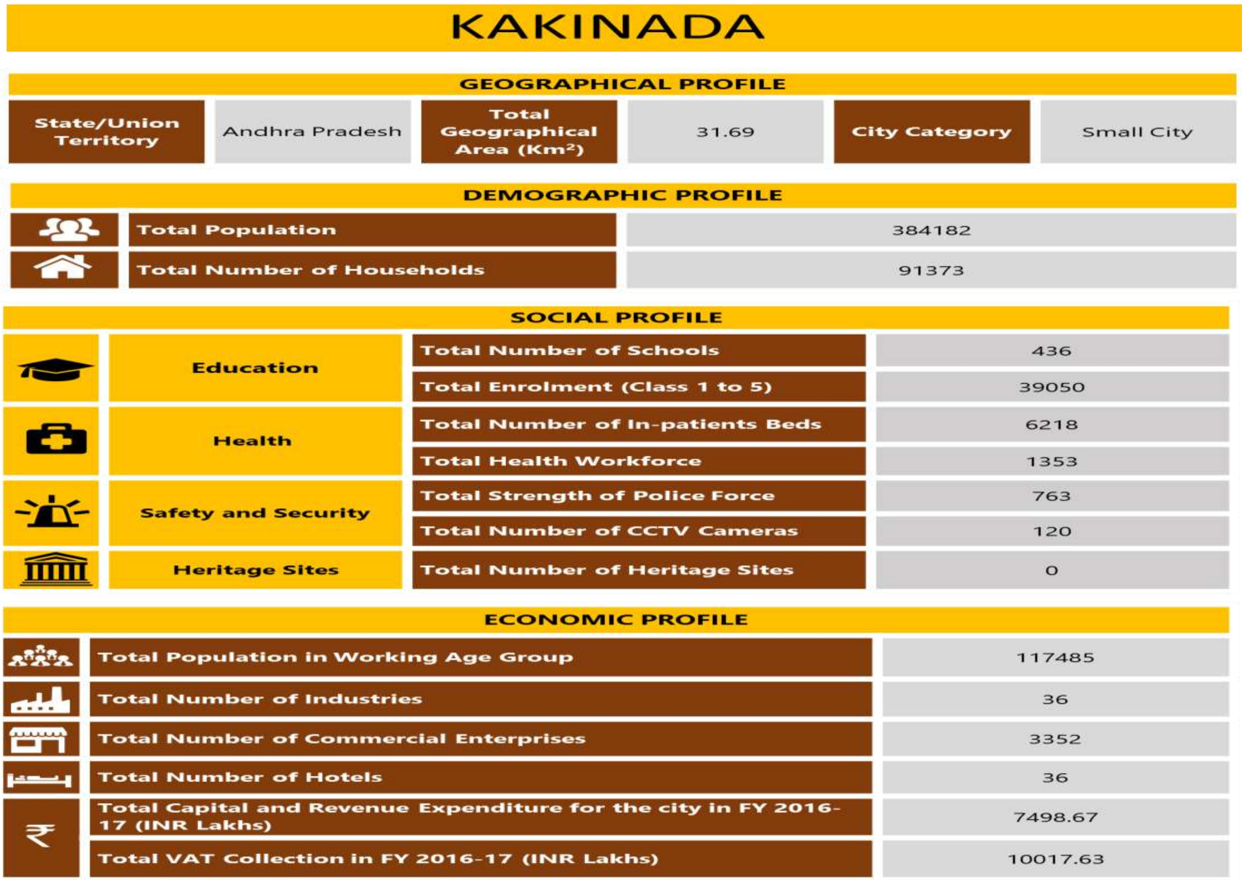


Tracking
liveability
Urban Planning and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



KAKINADA

GEOGRAPHICAL PROFILE

State/Union Territory	Andhra Pradesh	**Total Geographical Area (Km^2)**	31.69	**City Category**	Small City

DEMOGRAPHIC PROFILE

Total Population	384182
Total Number of Households	91373

SOCIAL PROFILE

Education	**Total Number of Schools**	436
	Total Enrolment (Class 1 to 5)	39050
Health	**Total Number of In-patients Beds**	6218
	Total Health Workforce	1353
Safety and Security	**Total Strength of Police Force**	763
	Total Number of CCTV Cameras	120
Heritage Sites	**Total Number of Heritage Sites**	0

ECONOMIC PROFILE

Total Population in Working Age Group	117485
Total Number of Industries	36
Total Number of Commercial Enterprises	3352
Total Number of Hotels	36
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	7498.67
Total VAT Collection in FY 2016-17 (INR Lakhs)	10017.63

PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	84.72
		Total Number of Water Connections	40365
	Sanitation Facilities	Total number of households with access to individual toilets in the city	82236
		Total number of households in the city with access to community toilets in the city	7690
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	169
		Total number of households covered through door-to-door collection of solid waste	91373
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	36
		Daily average quantum of waste water treated by STPs in the city (MLD)	0
	Electricity	Total number of authorized electrical connections in the city	168716
		Total electricity supplied to the city (kWh)	433.959
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	1518712
	Roads and Transport	Total Length of Road Network in the City (Km)	723
		Total length of arterial and sub-arterial road network in the city (Km)	8
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	9

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	2. Identity and Culture	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases

Pillars of Comprehensive Development	Category	Indicators
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	6. Economy and Employment	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	7. Housing and Inclusiveness	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport

Pillars of Comprehensive Development	Category	Indicators
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.

100 marks

(Maximum overall score that any city can achieve)

25 marks

(Maximum score that any city can achieve under **Institutional** Pillar)

1

(Category under Institutional Pillar)

8

(Number of indicators under Institutional)

7 Core | 1 Supporting

25 marks

(Maximum score that any city can achieve under **Social** Pillar)

4

(Number of categories under Social Pillar)

20

(Number of indicators under Social Pillar)

13 Core | 7 Supporting

5 marks

(Maximum score that any city can achieve under **Economic** Pillar)

1

(Category under Economic Pillar)

5

(Category under Economic Pillar)

4 Core | 1 Supporting

45 marks

(Maximum score that any city can achieve under **Physical** Pillar)

9

(Number of categories under Physical Pillar)

46

(Number of categories under Physical Pillar)

33 Core | 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{\textit{indicator value for the city} - \textit{indicator value for the worst performing city}}{\textit{benchmark} - \textit{indicator value for the worst performing city}}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission

of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Account Section
Urban Local Body	For Park and Recreation Related Questions	Town Planning Section/ Urban Planner (AMRUT)
Urban Local Body	For Water Supply and Drainage related questions	Engineering Section, Revenue and Accounts Sections for financial figures
Urban Local Body	For Heritage sites related data	Not applicable as there was no such sites
Urban Local Body	For Ecological sites related data	Not applicable as there was no such sites
Urban Local Body	For Housing related data	Town Planning Section
Urban Local Body	For Building plan related data	Town Planning Section
Urban Local Body	For Roads related data	Engineering Section
Urban Local Body	For Solid waste management related data	Public Health and Engineering Sections
Urban Local Body	For IT services related data	IT Cell
Urban Local Body	For Vendor committee related data	Town Planning and Urban Poverty Alleviation Sections
Urban Local Body	Any other departments	Administration and Revenue Sections, Urban

Designated data owners	Subcategories	Data owners at city level
	involved in providing data for questions mentioned under Urban Local Body	Planner (AMRUT)
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	District Pollution Control Board
Development Authority	Building Infrastructure	There is a Development Authority newly formed for the district of East Godavari. But all the items mentioned here are presently being dealt by ULB (Town Planning Section)
	Construction planning	Do
	Green Building	Do
	Rain water harvesting	Do
	Universal Design Principle	Do
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Eastern Power/DISCOM, Kakinada
State Disaster management authority		District Disaster management Authority AC[P]
State Education Department		District Education Office
State Health Department	Health care professionals	District Medical and Health Officer & GGH
	Citizen Services	Do
	Disease Prevalence	Do
	Health Infrastructure	Do
State Renewable Energy Development Agency	Renewable Energy	NEDCAP
State Sales / Commercial Taxes Department		Commercial Tax
Town and Country Planning Department	Land Use	Planning section
Traffic and Police Department		Superintendent of Police
Transport Authorities	Buses	Transport Department
	Registered Vehicles	RTO
	Sub urban rail transport	Do
	Mono Rail Authority	Do
	Tramways	Do
	Marine Transport Authority	Do

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 60 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	2
DISCOM/Electricity Department	9
Traffic and Police Department	2
Development Authority	0
Pollution Control Board	5
State Renewable Energy Department	1
Town and Country Planning	0
State Health Department	6
Transport Authority	4
Disaster Management	1
Urban Local Body	29
Total	60*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	Percentage of citizen services available online	**84.02**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	1
	1.1e water supply	1
	1.1f sewerage/drainage	0.333333333
	1.1g fogging	1

Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	Extent of cost recovery (O&M) in water supply services	**908.95**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	590.82
Denominator	Total O&M cost for providing water supply services during the year	65
Unit	Percentage	
Benchmark	100%	

Indicator No: 1.7	Capital spending as percentage of total expenditure	**100.73**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-1246784
Denominator	Total expenditure (revenue and capital accounts) in the same year	-1237775.53
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	Percentage of population covered under Ward Committees/ Area *Sabhas*	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	0
Denominator	Total number of wards	50
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	Restoration and reuse of historic buildings	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	NA
Denominator	Total number of historic buildings/sites identified	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	Percentage of ecologically important areas covered through projects for restoration	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	NA
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	Hotel Occupancy	**58.5**
Description	Average Occupancy rate of Hotels	58.5
Unit	Percentage	

Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	Percentage of budget allocated towards cultural/sports activities	**2.91**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	218.4
Denominator	Total budget of the ULB (capital and revenue)	7498.67
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	Number of cultural/sports events hosted by city	**47**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	47
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	Percentage of school-aged population enrolled in schools	**101.38**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	63695
Denominator	Total population in the age group of 6-14 years	62831
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	Percentage of female school-aged population enrolled in schools	**98.79**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	30952
Denominator	Total female population in the age group of 6-14 years	31330
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	Primary education student-teacher ratio	**22.1**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	39050
Denominator	Total number of teachers available for primary grades (public and private schools)	1767

Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	Percentage of schools with access to digital education	**1.83**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	8
Denominator	Total number of schools	436
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	Percentage of students completing primary education	**110.69**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	110.6935085
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	Percentage of students completing secondary education	**103.47**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	68665026
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	Number of in-patient hospital beds per 10,000 population	**161.85**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	6218
Denominator	Total population of the city	384182
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	Healthcare professionals per 10,000 population	**35.22**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	1353
Denominator	Total population of the city	384182
Unit	Number per 10,000 population	

Benchmark	23 beds per 10000 population	
Indicator No: 4.3	Average response time in case of health emergencies	**0**
Description	Total response time for health-related distress calls received in the city	0
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	Period prevalence of water borne diseases	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	3104
Denominator	Total population of the city	384182
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	Period prevalence of vector borne diseases	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	37
Denominator	Total population of the city	384182
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	Total number of CCTV cameras installed in the city	**16.6**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	120
Denominator	Total length of road network in the city	723
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	Number of recorded crimes per lakh population	**453.43**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	1742
Denominator	Total population of the city	384182
Unit	Crimes per lakh	

Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	Extent of crimes recorded against women, children and elderly per year	**19.29**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	336
Denominator	Total crimes recorded in the same year	1742
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	Transport-related fatality per lakh population	**8.33**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	32
Denominator	Total population of the city	384182
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	Increase in VAT/GST collection	**-3.72**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	-387.28
Denominator	Total VAT/GST collection during preceding year	104.0491
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	Increase in collection of Professional Tax	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated	

	as a benchmark	
Indicator No: 6.3	Increase in issuance of Construction Permits	**-55.57**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-424
Denominator	Number of construction permits during preceding year	7.63
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	Unemployment Rate	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	7248
Denominator	Total labour force in the city	62831
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	Percentage of vendors registered and provided formal spaces	**39.66**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	623
Denominator	Total number of vendors in the city	1570.775
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	Percentage of Slum/EWS households covered through formal/ housing	**13.18**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	9347
Denominator	Total number of slum and EWS households in the city	709.03
Unit	Percentage	
Benchmark	100%	

Indicator No: 7.2	Percentage of slum areas covered through basic services	**0**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	999277380
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**3.95**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	1518712
Denominator	Total population of the city	384182
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.94**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	360046.55
Denominator	Total population of the city	384182
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	Share of mixed land use area in overall city land use	**6**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	1900643
Denominator	Total area of the city (total area of all land uses)	31690000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	Net Density	**0.06**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	384182

Denominator	Area allocated for residential land use (in hectares)	6342898
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	Percentage of city population with authorized electrical service	**159.27**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	145534
Denominator	Total number of households in the city	91373
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	Percentage of electrical connections covered through smart meters	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	168716
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	Average number of electrical interruptions per year	**456**
Description	Total number of sustained electrical interruptions in a year	456
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	Average length of electrical interruptions per year	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	404
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	Percentage of total energy derived from renewable	**0.81**

	sources	
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	243
Denominator	Total energy consumption from all sources	433.959
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	Energy consumption per unit - water supply and sewerage	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	216615.5
Denominator	Total quantum of water and waste water handled during the period	2541.6
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	Energy consumption per unit – street lighting	**0.3**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	1915265
Denominator	Total number of street light installations	868
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	Percentage of new and redeveloped buildings following green building norms	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	28810
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	Total energy consumption per capita	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	433.959
Denominator	Total population of the city	384182
Unit	kWh per capita	

Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	Geographical coverage of public transport	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	NA
Denominator	Total area of the city (sq.km)	31.69
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	Availability of public transport	**0.09**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	36
Denominator	Total population of the city	384182
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	Mode share of public transport	**To be computed**
Description	Mode share of public transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.4	Percentage of road network with dedicated bicycle tracks	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	723
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	Percentage of interchanges with bicycle parking facilities	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	Data Unavailable
Denominator	Total number of major transport interchanges in the city	Data Unavailable

Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	Mode share of non-motorised transport[1]	**To be computed**
Description	Mode share of non-motorised transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.7	Availability of Passenger Information System	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	Data Unavailable
Denominator	Total number of major interchanges in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	Extent of signal synchronisation	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	12
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	Availability of paid parking spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	0
Unit		
Benchmark		
Indicator No: 11.10	Percentage coverage of footpaths – wider than 1.2m	**0.62**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	9
Denominator	Total length of road network in the city	1446

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	Percentage of traffic intersections with pedestrian crossing facilities	**104**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	130
Denominator	Total number of junctions/ intersections on major roads in the city	125
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	Extent to which universal accessibility is incorporated in public rights-of-way	**33.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	55
Denominator	Total number of public right-of-way areas in the city	165
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	Household level coverage of direct water supply connections	**72.4**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	66153
Denominator	Total number of households in the city	91373
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	Per capita supply of water	**220.52**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	84.72
Denominator	Total population of the city	384182
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	Quality of water supplied[2]	**To be computed**
Formula:	*Numerator / Denominator*	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Number of samples meeting or exceeding specified potable water standards	1
Denominator	Total number of samples tested for water quality	260
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	Level of non-revenue water – NRW	**52.79**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	44.72
Denominator	Quantum of water put into the distribution system (mld)	84.72
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	Percentage of water connections covered through meters	**4.14**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	1672
Denominator	Total number of water connections in the city	40365
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	Percentage of plots with rainwater harvesting facility	**41.04**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	126
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	307
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	Coverage of toilets	**131.44**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	93686

Denominator	Total number of properties in the city	71279
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	Coverage of sewerage network and/or septage	**100.16**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	71391
Denominator	Total number of properties in the city	71279
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	Collection efficiency of sewerage network	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	0
Denominator	Total waste water generated in the city per day	36
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	Extent of reuse and recycling of waste water	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	NA
Denominator	Total waste water received at treatment plants per day	NA
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	Coverage of storm water drains	**4.43**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	32
Denominator	Total length of road network in the city	723
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	Household level coverage of municipal solid waste collection	**101.95**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	96573
Denominator	Total number of households and establishments in the city	94725

Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	Efficiency of collection of municipal solid waste	**97.69**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	169
Denominator	Total quantum of MSW generated in the city	173
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	Extent of municipal solid waste recovered through reuse	**61.81**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	3134
Denominator	Average MSW generated in the city (tons per month)	5070
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**7.8**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	7.8
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**17.4**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	17.4
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**62.8**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	62.8
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	0

Denominator	Total number of noise samples	24
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	NA
Denominator	Total number of samples tested	0
Unit	Percentage	
Benchmark	100%

1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

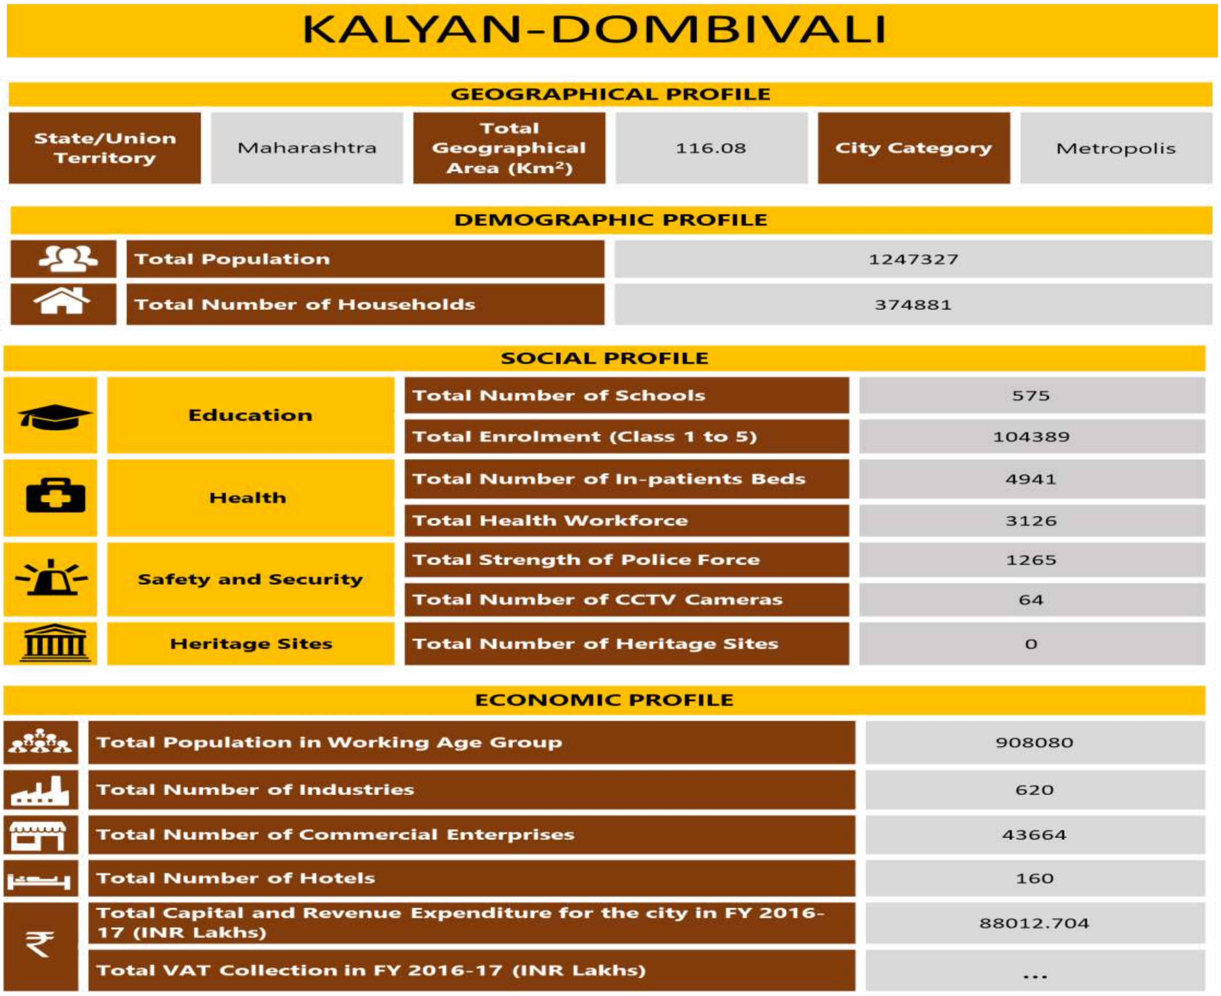
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



KALYAN-DOMBIVALI

GEOGRAPHICAL PROFILE

State/Union Territory	Maharashtra	**Total Geographical Area (Km²)**	116.08	**City Category**	Metropolis

DEMOGRAPHIC PROFILE

Total Population	1247327
Total Number of Households	374881

SOCIAL PROFILE

Education	**Total Number of Schools**	575
	Total Enrolment (Class 1 to 5)	104389
Health	**Total Number of In-patients Beds**	4941
	Total Health Workforce	3126
Safety and Security	**Total Strength of Police Force**	1265
	Total Number of CCTV Cameras	64
Heritage Sites	**Total Number of Heritage Sites**	0

ECONOMIC PROFILE

	Total Population in Working Age Group	908080
	Total Number of Industries	620
	Total Number of Commercial Enterprises	43664
	Total Number of Hotels	160
₹	**Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)**	88012.704
	Total VAT Collection in FY 2016-17 (INR Lakhs)	...

PHYSICAL PROFILE			
	Water	**Average Quantity of Water Supplied (MLD)**	310
		Total Number of Water Connections	105016
	Sanitation Facilities	**Total number of households with access to individual toilets in the city**	132500
		Total number of households in the city with access to community toilets in the city	383
	Solid Waste Management	**Daily average quantity of municipal solid waste collected in the city (Tonnes/day)**	650
		Total number of households covered through door-to-door collection of solid waste	310881
	Waste Water	**Daily Average Quantum of Waste Water Generated in the City (MLD)**	216
		Daily average quantum of waste water treated by STPs in the city (MLD)	44
	Electricity	**Total number of authorized electrical connections in the city**	595697
		Total electricity supplied to the city (kWh)	1768520000
	Public and Open Spaces	**Total area covered by green spaces in the city (m^2)**	0
	Roads and Transport	**Total Length of Road Network in the City (Km)**	488
		Total length of arterial and sub-arterial road network in the city (Km)	42
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	412

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	2. Identity and Culture	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary

Pillars of Comprehensive Development	Category	Indicators
		education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	6. Economy and Employment	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	7. Housing and Inclusiveness	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian

Pillars of Comprehensive Development	Category	Indicators
		crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution

Pillars of Comprehensive Development	Category	Indicators
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

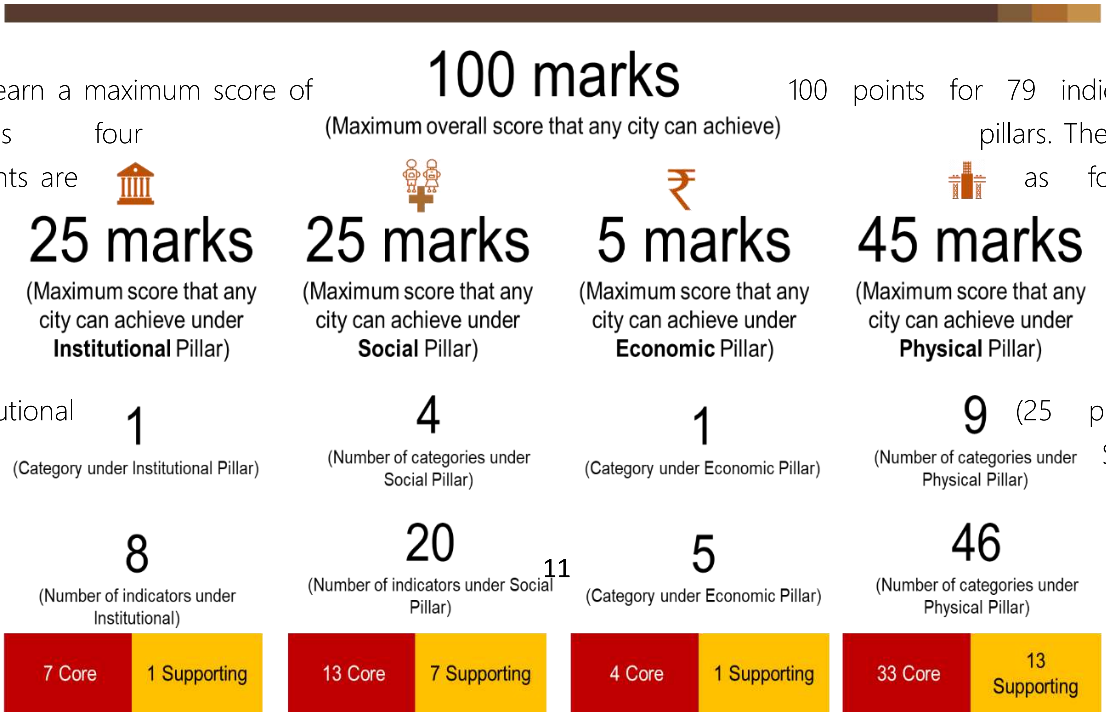
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under Institutional Pillar)
25 marks
(Maximum score that any city can achieve under Social Pillar)
5 marks
(Maximum score that any city can achieve under Economic Pillar)
45 marks
(Maximum score that any city can achieve under Physical Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{\textit{indicator value for the city} - \textit{indicator value for the worst performing city}}{\textit{benchmark} - \textit{indicator value for the worst performing city}}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4 Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts
Urban Local Body	For Park and Recreation Related Questions	Solide Waste Management
Urban Local Body	For Water Supply and Drainage related questions	Water Supply and Drainage

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Heritage sites related data	
Urban Local Body	For Ecological sites related data	
Urban Local Body	For Housing related data	Town Planning
Urban Local Body	For Building plan related data	Town Planning
Urban Local Body	For Roads related data	Town Planning
Urban Local Body	For Solid waste management related data	Solid waste management
Urban Local Body	For IT services related data	Citizen Facilitation Centre
Urban Local Body	For Vendor committee related data	Solide Waste Management
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Account,Tax, IT,Health Dept
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Pollution Control Board
Development Authority	Building Infrastructure	Town Planning
	Construction planning	Town Planning
	Green Building	Town Planning
	Rain water harvesting	Town Planning
	Universal Design Principle	Town Planning
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	DISCOM
State Disaster management authority		Disaster management
State Education Department		Education Department
State Health Department	Health care professionals	Health Department
	Citizen Services	Health Department
	Disease Prevalence	Health Department
	Health Infrastructure	Health Department
State Renewable Energy Development Agency		DISCOM
State Sales / Commercial Taxes Department		Sales / Commercial Taxes Department
Town and Country Planning Department	Land Use	Town Planning
Traffic and Police Department		Traffic and Police Department
Transport Authorities	Buses	MSRTC

Designated data owners	Subcategories	Data owners at city level
	Registered Vehicles	Traffic
	Sub urban rail transport	Railway Dept
	Mono Rail Authority	Railway Dept
	Tramways	Railway Dept
	Marine Transport Authority	Railway Dept

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 80 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	9
DISCOM/Electricity Department	4
Traffic and Police Department	5
Development Authority	7
Pollution Control Board	2
State Renewable Energy Department	1
Town and Country Planning	3
State Health Department	7
Transport Authority	7
Disaster Management	1
Urban Local Body	33
Total	80*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	Percentage of citizen services available online	**83.43**
Description	Average citizen services available online	

Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	1
	1.1e water supply	1
	1.1f sewerage/drainage	0.333333333
	1.1g fogging	1
	1.1h property tax	0.666666667
	1.1i professional tax	0
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	Percentage of services integrated through Command Centre	**7.14**
Description	Services integrated through an integrated or a singular operations command centre	1.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	Percentage of citizens using online services	**0.25**
Description		
Sub Indicators	1.3a Building plan	2.96576E-05
	1.3b Birth/Death Certificate	6.07967E-06
	1.3c water supply	0.00727051
	1.3d solid waste management	0
	1.3e property tax	0.007368637
	1.3f professional tax (RC)	NA

	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	7.015E-05
	1.3i information	NA
	1.3j electricity	NA

Benchmark	100%	
Indicator No. 1.4	Average delay in grievance redressal	**NC**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	Tax collected as percentage of tax billed	**73.9**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	29325.32
Denominator	Total demand raised for the year	39683.06
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	Extent of cost recovery (O&M) in water supply services	**1874.27**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	5322
Denominator	Total O&M cost for providing water supply services during the year	283.95
Unit	Percentage	
Benchmark	100%	

Indicator No: 1.7	Capital spending as percentage of total expenditure	**35.89**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	85089.374
Denominator	Total expenditure (revenue and capital accounts) in the same year	237109.004
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	Percentage of population covered under Ward Committees/ Area *Sabhas*	**8.2**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	10
Denominator	Total number of wards	122
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	Restoration and reuse of historic buildings	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	0
Denominator	Total number of historic buildings/sites identified	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	Percentage of ecologically important areas covered through projects for restoration	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	Hotel Occupancy	**25**

Description	Average Occupancy rate of Hotels	25
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	Percentage of budget allocated towards cultural/sports activities	**0.07**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	62.18
Denominator	Total budget of the ULB (capital and revenue)	88012.704
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	Number of cultural/sports events hosted by city	**59**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	59
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	Percentage of school-aged population enrolled in schools	**88.75**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	167687
Denominator	Total population in the age group of 6-14 years	188950
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	Percentage of female school-aged population enrolled in schools	**88.5**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	79277
Denominator	Total female population in the age group of 6-14 years	89574
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	Primary education student-teacher ratio	**148.7**

Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	104389
Denominator	Total number of teachers available for primary grades (public and private schools)	702
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	Percentage of schools with access to digital education	**49.04**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	282
Denominator	Total number of schools	575
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	Percentage of students completing primary education	**108.19**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	108.1884099
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	Percentage of students completing secondary education	**99.37**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	434427622
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	Number of in-patient hospital beds per 10,000 population	**39.61**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	4941
Denominator	Total population of the city	1247327
Unit	Number per 10,000 population	

Benchmark	25 beds per 10000 population	
Indicator No: 4.2	Healthcare professionals per 10,000 population	**25.06**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	3126
Denominator	Total population of the city	1247327
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	Average response time in case of health emergencies	**Non-Computable**
Description	Total response time for health-related distress calls received in the city	Data Unavailable
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	Period prevalence of water borne diseases	**0.13**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	1678
Denominator	Total population of the city	1247327
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	Period prevalence of vector borne diseases	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	251
Denominator	Total population of the city	1247327
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	Total number of CCTV cameras installed in the city	**13.11**
Formula:	*Numerator / Denominator*	

Numerator	Total number of CCTV cameras installed	64
Denominator	Total length of road network in the city	488
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	Number of recorded crimes per lakh population	**316.68**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	3950
Denominator	Total population of the city	1247327
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	Extent of crimes recorded against women, children and elderly per year	**14.46**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	571
Denominator	Total crimes recorded in the same year	3950
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	Transport-related fatality per lakh population	**24.85**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	310
Denominator	Total population of the city	1247327
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	Increase in VAT/GST collection	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	NC

Denominator	Total VAT/GST collection during preceding year	NC
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	Increase in collection of Professional Tax	**3.61**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	31.57
Denominator	Total Professional Tax collection during preceding year	875.02
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	Increase in issuance of Construction Permits	**4088.89**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	368
Denominator	Number of construction permits during preceding year	0.09
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	Unemployment Rate	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	Data Unavailable
Denominator	Total labour force in the city	188950
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	Percentage of vendors registered and provided formal spaces	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0

Denominator	Total number of vendors in the city	9531
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	Percentage of Slum/EWS households covered through formal/ housing	**11.16**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	2680
Denominator	Total number of slum and EWS households in the city	240.18
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	Percentage of slum areas covered through basic services	**Non-Compuatble**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	Data Unavailable
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	0
Denominator	Total population of the city	1247327
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.66**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	826299

Denominator	Total population of the city	1247327
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	Share of mixed land use area in overall city land use	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	0
Denominator	Total area of the city (total area of all land uses)	116080000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	Net Density	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1247327
Denominator	Area allocated for residential land use (in hectares)	38239000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	Percentage of city population with authorized electrical service	**143.79**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	539023
Denominator	Total number of households in the city	374881

Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	Percentage of electrical connections covered through smart meters	**0.11**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	643
Denominator	Total number of electricity connections in the city	595697
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	Average number of electrical interruptions per year	**91**
Description	Total number of sustained electrical interruptions in a year	91
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	Average length of electrical interruptions per year	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	2175
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	Percentage of total energy derived from renewable sources	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	264166908
Denominator	Total energy consumption from all sources	1768520000
Unit	Percentage	
Benchmark	10%	

Indicator No: 10.6	Energy consumption per unit - water supply and sewerage	**0.25**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	3483975.75
Denominator	Total quantum of water and waste water handled during the period	10620
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	Energy consumption per unit – street lighting	**0.31**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	21566008
Denominator	Total number of street light installations	33015
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	Percentage of new and redeveloped buildings following green building norms	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	199
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	Total energy consumption per capita	**0.43**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1768520000
Denominator	Total population of the city	1247327
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	Geographical coverage of public transport	**0.77**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	222.5
Denominator	Total area of the city (sq.km)	116.08
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	Availability of public transport	**16.43**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	20499
Denominator	Total population of the city	1247327
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	Mode share of public transport	**To be computed**
Description	Mode share of public transport	74
Unit	Percentage	
Benchmark		
Indicator No: 11.4	Percentage of road network with dedicated bicycle tracks	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	488
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	Percentage of interchanges with bicycle parking facilities	**320**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	32
Denominator	Total number of major transport interchanges in the city	10
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	Mode share of non-motorised transport[1]	**To be**

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

		computed
Description	Mode share of non-motorised transport	8
Unit	Percentage	
Benchmark		
Indicator No: 11.7	Availability of Passenger Information System	**1.6**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	16
Denominator	Total number of major interchanges in the city	10
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	Extent of signal synchronisation	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	0
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	Availability of paid parking spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	0
Unit		
Benchmark		
Indicator No: 11.10	Percentage coverage of footpaths – wider than 1.2m	**42.21**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	412
Denominator	Total length of road network in the city	976
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	Percentage of traffic intersections with pedestrian crossing facilities	**153.41**
Formula:	*Numerator / Denominator*	

Numerator	Total number of intersections with pedestrian crossing facilities on major roads	135
Denominator	Total number of junctions/ intersections on major roads in the city	88
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	Extent to which universal accessibility is incorporated in public rights-of-way	**36.53**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	61
Denominator	Total number of public right-of-way areas in the city	167
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	Household level coverage of direct water supply connections	**105.88**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	396942
Denominator	Total number of households in the city	374881
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	Per capita supply of water	**248.53**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	310
Denominator	Total population of the city	1247327
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	Quality of water supplied[2]	**To be computed**
Formula:	*Numerator / Denominator*	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Number of samples meeting or exceeding specified potable water standards	3106
Denominator	Total number of samples tested for water quality	3113
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	Level of non-revenue water – NRW	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	310
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	Percentage of water connections covered through meters	**24.62**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	25853
Denominator	Total number of water connections in the city	105016
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	Percentage of plots with rainwater harvesting facility	**85.89**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	140
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	163
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	Coverage of toilets	**39.06**

Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	177804
Denominator	Total number of properties in the city	455195
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	Coverage of sewerage network and/or septage	**60.75**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	276521
Denominator	Total number of properties in the city	455195
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	Collection efficiency of sewerage network	**20.37**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	44
Denominator	Total waste water generated in the city per day	216
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	Extent of reuse and recycling of waste water	**105**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	46.2
Denominator	Total waste water received at treatment plants per day	44
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	Coverage of storm water drains	**44.44**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	216.89
Denominator	Total length of road network in the city	488
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	Household level coverage of municipal solid waste collection	**84.71**

Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	354545
Denominator	Total number of households and establishments in the city	418545
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	Efficiency of collection of municipal solid waste	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	650
Denominator	Total quantum of MSW generated in the city	650
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	Extent of municipal solid waste recovered through reuse	**3.12**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	608
Denominator	Average MSW generated in the city (tons per month)	19500
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**26.95**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	26.95
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**64.72**
Description	Annual mean concentration OR Mean concentration	64.72

	over 24 hours of NO2	
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	Data Unavailable
Denominator	Total number of noise samples	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**75**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	18
Denominator	Total number of samples tested	24
Unit	Percentage	
Benchmark	100%

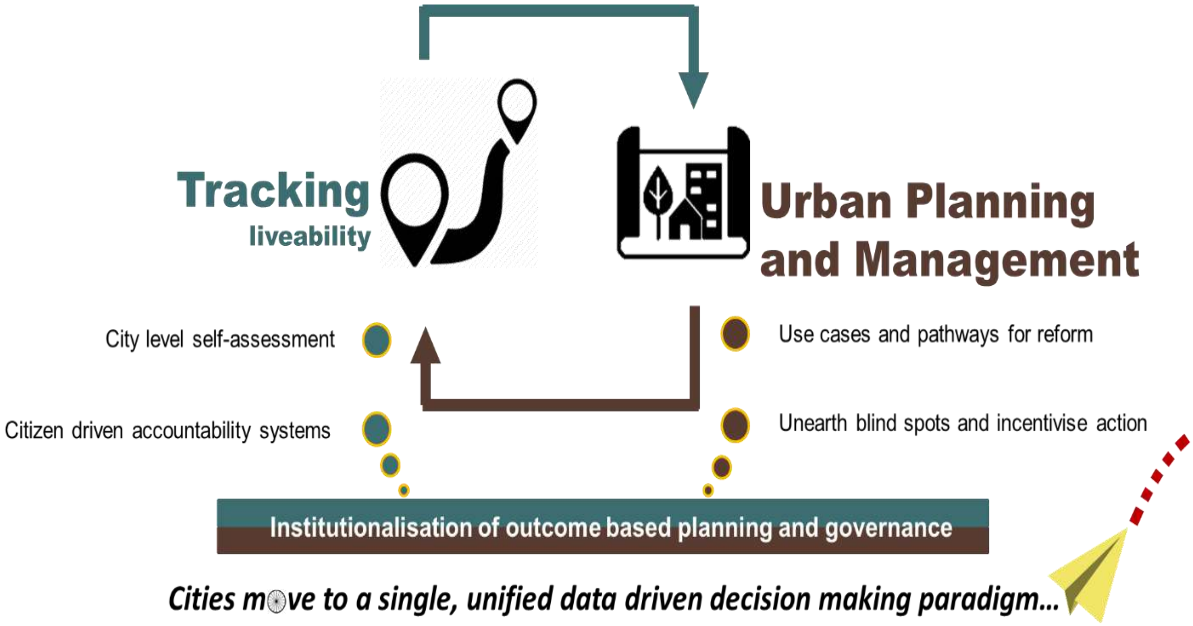
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).

KANPUR

GEOGRAPHICAL PROFILE

State/Union Territory	Uttar Pradesh	**Total Geographical Area (Km^2)**	260	**City Category**	Metropolis

DEMOGRAPHIC PROFILE

Total Population	2931269
Total Number of Households	528347

SOCIAL PROFILE

Education	**Total Number of Schools**	5314
	Total Enrolment (Class 1 to 5)	435112
Health	**Total Number of In-patient Beds**	16121
	Total Health Workforce	3194
Safety and Security	**Total Strength of Police Force**	2308
	Total Number of CCTV Cameras	50
Heritage Sites	**Total Number of Heritage Sites**	6

ECONOMIC PROFILE

Total Population in Working Age Group	804433
Total Number of Industries	3237
Total Number of Commercial Enterprises	65664
Total Number of Hotels	88
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	58390
Total VAT Collection in FY 2016-17 (INR Lakhs)	378474.38

PHYSICAL PROFILE

Water	**Average Quantity of Water Supplied (MLD)**	430
	Total Number of Water Connection	196650
Sanitation Facilities	**Total number of households with access to individual toilets in the city**	472320
	Total number of households in the city with access to community toilets in the city	32302
Solid Waste Management	**Daily average quantity of municipal solid waste collected in the city (Tonnes/day)**	1200
	Total number of households covered through door-to-door collection of solid waste	322260
Waste Water	**Daily Average Quantum of Waste Water Generated in the City (MLD)**	301
	Daily average quantum of waste water treated by STPs in the city (MLD)	185
Electricity	**Total number of authorized electrical connections in the city**	583266
	Total electricity supplied to the city (kWh)	3657804000
Public and Open Spaces	**Total area covered by green spaces in the city (m^2)**	...
Roads and Transport	**Total Length of Road Network in the City (Km)**	4636.31
	Total length of arterial and sub-arterial road network in the city (Km)	146.31
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	32

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies

Pillars of Comprehensive Development	Category	Indicators
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita

Pillars of Comprehensive Development	Category	Indicators
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced	15.1 Concentration of SO2- air pollution

Pillars of Comprehensive Development	Category	Indicators
	Pollution	15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.

100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning

department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts department Nagar Nigam Kanpur Nagar
Urban Local Body	For Park and Recreation Related Questions	Udyan vibhag Nagar nigam Kanpur Nagar
Urban Local Body	For Water Supply and Drainage related questions	Jal Nigam/Jalkal vibhag Nagar Nigam Kanpur Nagar Nagar
Urban Local Body	For Heritage sites related data	Archeological survey of India /in charge in ULB Kanpur Nagar
Urban Local Body	For Ecological sites related data	Forest Department Kanpur Nagar
Urban Local Body	For Housing related data	Kanpur Development Authority / Nirmaan Vibhag Nagar Nigam Kanpur/ DUDA Kanpur Nagar
Urban Local Body	For Building plan related data	Kanpur Development Authority Kanpur Nagar
Urban Local Body	For Roads related data	Public Works Department / Nirmaan Vibhag Nagar Nigam Kanpur
Urban Local Body	For Solid waste management related data	Health Department Nagar Nigam Kanpur
Urban Local Body	For IT services related data	GIS/ IT / Computer Department. Nagar Nigam Kanpur
Urban Local Body	For Vendor committee related data	District Urban Development Agency(DUDA) Kanpur Nagar
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Public Works Department ,Employment Exchange, District Urban Development Agency Kanpur Nagar
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Uttar Pradesh pollution Control Board Kanpur Nagar
Development Authority	Building Infrastructure	Kanpur Development Authority Kanpur
	Construction planning	Kanpur Development Authority Kanpur

Designated data owners	Subcategories	Data owners at city level
	Green Building	Kanpur Development Authority Kanpur
	Rain water harvesting	Kanpur Development Authority Kanpur
	Universal Design Principle	Kanpur Development Authority Kanpur
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	KESCO Kanpur Nagar / Uttar Pradesh Power Corporation Ltd Kanpur Nagar
State Disaster management authority		State Disaster Management Kanpur Nagar [ADM(FR]
State Education Department		Basic Siksha Adhikari / District Inspector of School Kanpur Nagar (DIOS)
State Health Department	Health care professionals	UP State Health Department Kanpur Nagar (CMO)
	Citizen Services	UP State Health Department Kanpur Nagar (CMO)
	Disease Prevalence	UP State Health Department Kanpur Nagar (CMO)
	Health Infrastructure	UP State Health Department Kanpur Nagar (CMO)
State Renewable Energy Development Agency	Renewable Energy	State Renewable Energy Develop. Agency(NEDA) Kanpur Nagar
State Sales / Commercial Taxes Department		Commercial Taxes Department Kanpur Nagar
Town and Country Planning Department	Land Use	Town and Country Planning Department Kanpur Nagar
Traffic and Police Department		Traffic police, Civil police Kanpur Nagar
Transport Authorities	Buses	Uttar Pradesh State Roadways Transport Corporation & Regional Transport Office Kanpur Nagar
	Registered Vehicles	Regional Transport Office Kanpur Nagar
	Sub urban rail transport	N A
	Mono Rail Authority	N A
	Tramways	N A
	Marine Transport Authority	N A

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 39 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**1**
State Education Department	**1**
DISCOM/Electricity Department	**1**
Traffic and Police Department	**1**
Development Authority	**1**
Pollution Control Board	**1**
State Renewable Energy Department	**1**
Town and Country Planning	**1**
State Health Department	**1**
Transport Authority	**1**
Disaster Management	**1**
Urban Local Body	**1**
Total	**39***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

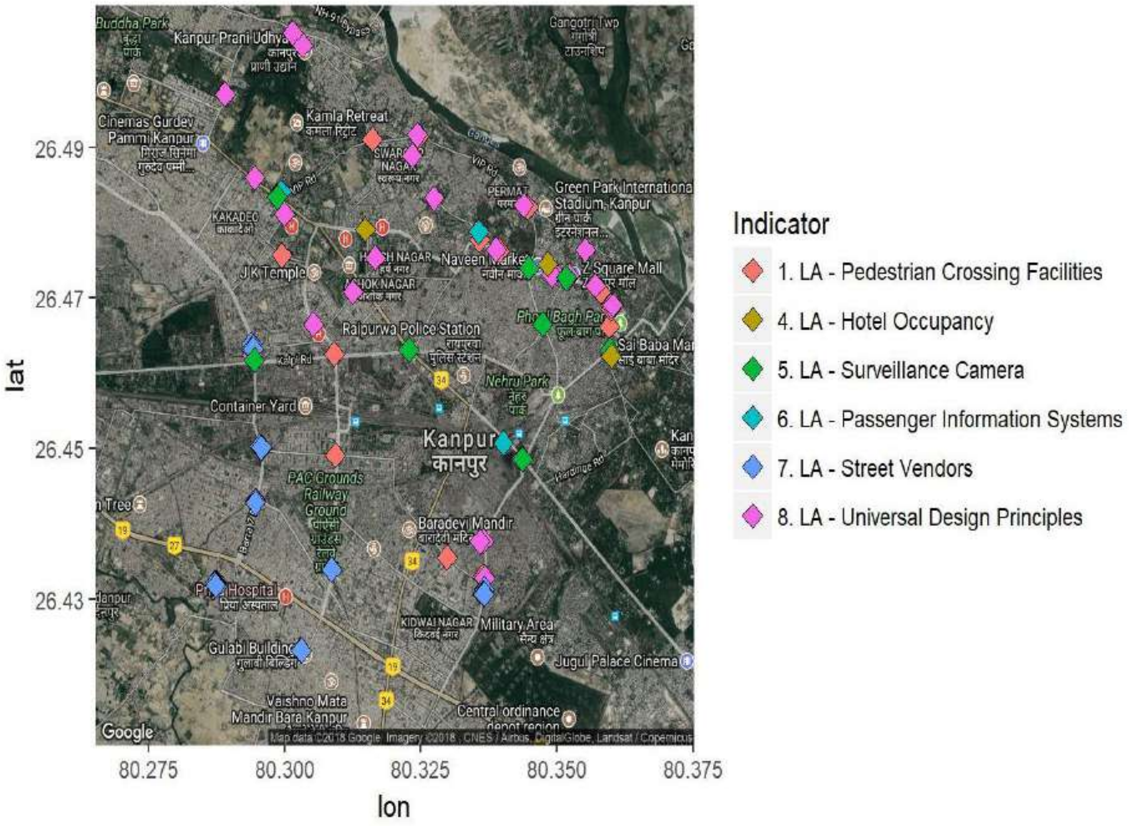
1.2 | Percentage of services integrated through Command Centre
2.3 | Hotel occupancy
3.4 | Percentage of schools with access to digital education
5.1 | Number of streets, public places, junctions covered through surveillance systems
6.5 | Percentage of vendors registered and provided formal spaces
11.7 | Availability of Passenger Information System
11.11 | Percentage of traffic intersections with pedestrian crossing facilities
11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate
11.3 | Mode share of public transport
11.5 | Mode share of Non Motorized Transport
12.3 | Quality of Water Supplied
15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.



Buddha Park
Kanpur Prani Udhyan
Cinemas Gurdev Pammi Kanpur
Kamla Retreat
SWARUP NAGAR
Green Park International Stadium, Kanpur
KAKADEO
J K Temple

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**53.94**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	0.333333333
	1.1f sewerage/drainage	0
	1.1g fogging	1
	1.1h property tax	0.666666667
	1.1i professional tax	0
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.666666667
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**0.47**
Description		

Sub Indicators	1.3a Building plan	0
	1.3b Birth/Death Certificate	0.000628871
	1.3c water supply	0
	1.3d solid waste management	0
	1.3e property tax	0.001275917
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	3.61264E-05
	1.3i information	0.001445057
	1.3j electricity	0.034289672
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.64**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0.5
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	4
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**75.67**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	9988.23
Denominator	Total demand raised for the year	13200.55
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	Total collection of user charges in water supply in a year	Data Unavailable
Denominator	Total O&M cost for providing water supply services during the year	9755.77
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**2.93**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	4208.86
Denominator	Total expenditure (revenue and capital accounts) in the same year	143673.69
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	Data Unavailable
Denominator	Total number of wards	110
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	6
Denominator	Total number of historic buildings/sites identified	6
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	NA
Denominator	Total number of ecologically important sites identified in the city	NA

Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**23.57**
Description	Average Occupancy rate of Hotels	23.57142857
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	20.32
Denominator	Total budget of the ULB (capital and revenue)	58390.9
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**Non-Computable**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	Data Unavailable
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**141.45**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	704978
Denominator	Total population in the age group of 6-14 years	498400
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**141.89**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	326313

Denominator	Total female population in the age group of 6-14 years	229969
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**38.43**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	435112
Denominator	Total number of teachers available for primary grades (public and private schools)	11321
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**3.76**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	200
Denominator	Total number of schools	5314
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**44.12**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	44.12466386
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**161.94**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	8775118670
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**58.24**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	16121
Denominator	Total population of the city	2768057
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**11.54**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	3194
Denominator	Total population of the city	2768057
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**25**
Description	Total response time for health-related distress calls received in the city	25
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.29**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	7917
Denominator	Total population of the city	2768057
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.26**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	7265
Denominator	Total population of the city	2768057
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**1.08**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	50
Denominator	Total length of road network in the city	4636.31
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**288.25**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	7979
Denominator	Total population of the city	2768057
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**20.75**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	1656
Denominator	Total crimes recorded in the same year	7979
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**24.82**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	687
Denominator	Total population of the city	2768057
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**6.12**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	21815.68
Denominator	Total VAT/GST collection during preceding year	3566.587
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	0
Denominator	Total Professional Tax collection during preceding year	0
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-7.12**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-22
Denominator	Number of construction permits during preceding year	3.09
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	132518
Denominator	Total labour force in the city	498400
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	14494
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**15.15**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	68074
Denominator	Total number of slum and EWS households in the city	4493.9
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Compuatble**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	Data Unavailable
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	Data Unavailable
Denominator	Total population of the city	2768057
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.74**
Formula:	*Numerator / Denominator*	

Numerator	Total area of public and recreational places (sq.m.)	2051128
Denominator	Total population of the city	2768057
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	260000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	2768057
Denominator	Area allocated for residential land use (in hectares)	129480000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**92.87**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	490692
Denominator	Total number of households in the city	528347
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**

Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	583266
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**40464**
Description	Total number of sustained electrical interruptions in a year	40464
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.79**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	119040
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	1732526
Denominator	Total energy consumption from all sources	3657804000
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.3**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	3049158.417
Denominator	Total quantum of water and waste water handled during the period	18450
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	223510.23
Denominator	Total number of street light installations	91935
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.45**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	3657804000
Denominator	Total population of the city	2768057
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	1318
Denominator	Total area of the city (sq.km)	260
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.21**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	575
Denominator	Total population of the city	2768057
Unit	Number per 1000 persons	

Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	46
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0.28**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	12.75
Denominator	Total length of road network in the city	4636.31
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	22
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	10
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**5.77**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	127
Denominator	Total number of major interchanges in the city	22
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**100**
Formula:	*Numerator / Denominator*	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Total number of signalised intersections that are synchronised	68
Denominator	Total number of signalised intersections in the city	68
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	74
Denominator	Total available on-street parking spaces in the city	74
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	32
Denominator	Total length of road network in the city	9272.62
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**83.33**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	20
Denominator	Total number of junctions/ intersections on major roads in the city	24
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**2423.35**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	12456
Denominator	Total number of public right-of-way areas in the city	514
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**35.03**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	185072
Denominator	Total number of households in the city	528347
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**155.34**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	430
Denominator	Total population of the city	2768057
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	385
Denominator	Total number of samples tested for water quality	12533
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**30.7**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	132
Denominator	Quantum of water put into the distribution system (mld)	430
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	NA
Denominator	Total number of water connections in the city	196650
Unit	Percentage	
Benchmark	100%	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	0
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	0
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**136.42**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	522036
Denominator	Total number of properties in the city	382666
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**110.42**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	422522
Denominator	Total number of properties in the city	382666
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**61.46**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	185
Denominator	Total waste water generated in the city per day	301
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**173.51**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	321

Denominator	Total waste water received at treatment plants per day	185
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**3.33**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	154.2
Denominator	Total length of road network in the city	4636.31
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**58.93**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	350032
Denominator	Total number of households and establishments in the city	594011
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**91.95**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	1200
Denominator	Total quantum of MSW generated in the city	1305
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**80**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	28800
Denominator	Average MSW generated in the city (tons per month)	36000
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**8**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	8
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**50**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	50
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**237**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	237
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	0
Denominator	Total number of noise samples	77
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**27.26**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	205
Denominator	Total number of samples tested	752
Unit	Percentage	
Benchmark	100%

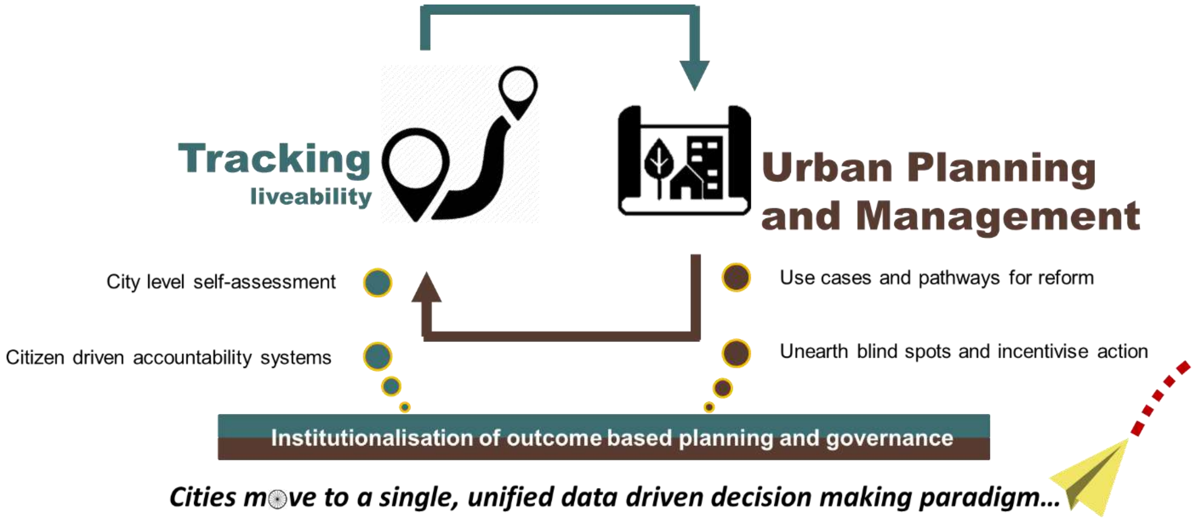
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

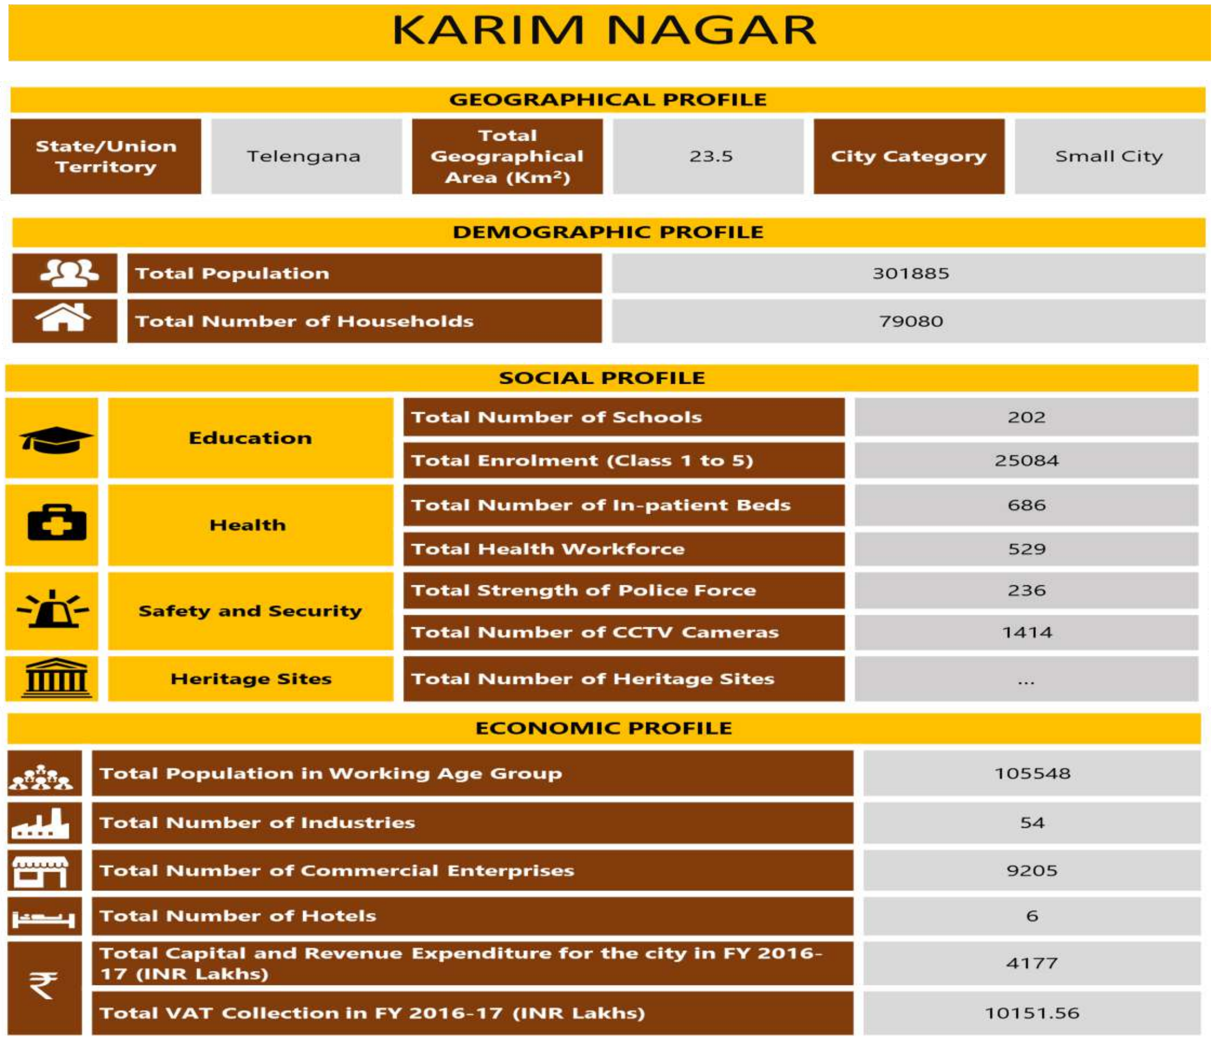
Cities move to a single, unified data driven decision making paradigm…

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



KARIM NAGAR

GEOGRAPHICAL PROFILE

State/Union Territory	Telengana	**Total Geographical Area (Km²)**	23.5	**City Category**	Small City

DEMOGRAPHIC PROFILE

Total Population	301885
Total Number of Households	79080

SOCIAL PROFILE

Education	**Total Number of Schools**	202
	Total Enrolment (Class 1 to 5)	25084
Health	**Total Number of In-patient Beds**	686
	Total Health Workforce	529
Safety and Security	**Total Strength of Police Force**	236
	Total Number of CCTV Cameras	1414
Heritage Sites	**Total Number of Heritage Sites**	...

ECONOMIC PROFILE

Total Population in Working Age Group	105548
Total Number of Industries	54
Total Number of Commercial Enterprises	9205
Total Number of Hotels	6
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	4177
Total VAT Collection in FY 2016-17 (INR Lakhs)	10151.56

PHYSICAL PROFILE

Water	**Average Quantity of Water Supplied (MLD)**	37
	Total Number of Water Connection	42237
Sanitation Facilities	**Total number of households with access to individual toilets in the city**	28697
	Total number of households in the city with access to community toilets in the city	120
Solid Waste Management	**Daily average quantity of municipal solid waste collected in the city (Tonnes/day)**	120
	Total number of households covered through door-to-door collection of solid waste	79880
Waste Water	**Daily Average Quantum of Waste Water Generated in the City (MLD)**	38
	Daily average quantum of waste water treated by STPs in the city (MLD)	2
Electricity	**Total number of authorized electrical connections in the city**	131685
	Total electricity supplied to the city (kWh)	224633933
Public and Open Spaces	**Total area covered by green spaces in the city (m^2)**	182753
Roads and Transport	**Total Length of Road Network in the City (Km)**	579
	Total length of arterial and sub-arterial road network in the city (Km)	8.39
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	4.95

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	2. Identity and Culture	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary

Pillars of Comprehensive Development	Category	Indicators
		education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	6. Economy and Employment	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	7. Housing and Inclusiveness	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian

Pillars of Comprehensive Development	Category	Indicators
		crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

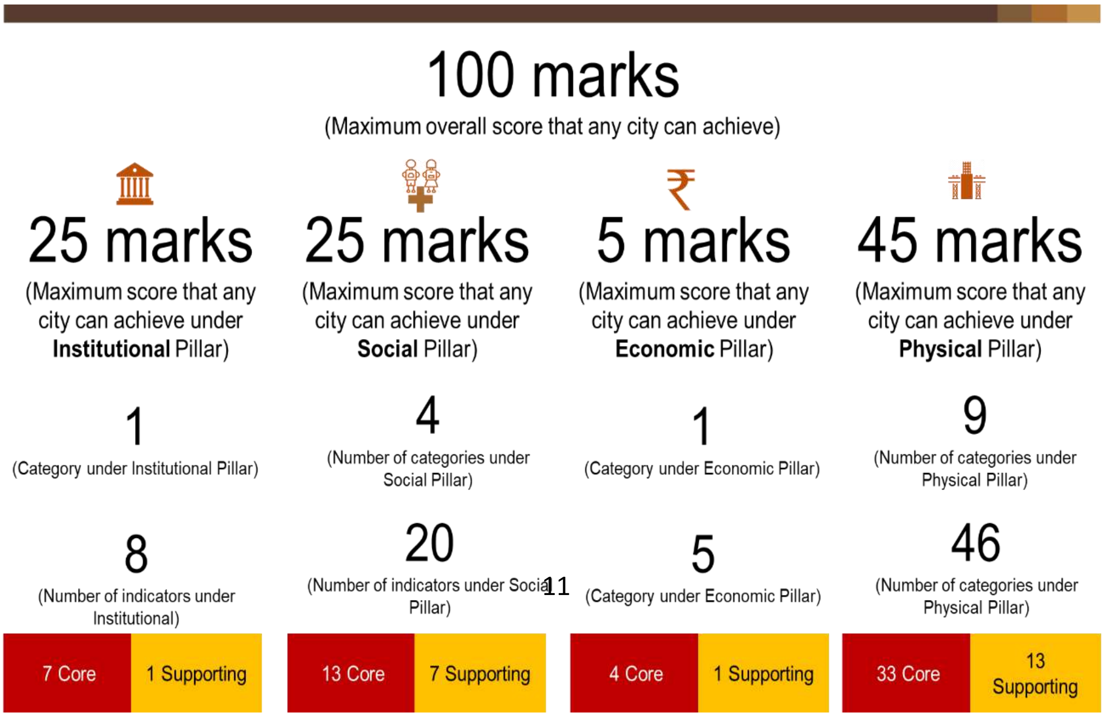
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)

25 marks
(Maximum score that any city can achieve under **Institutional** Pillar)
1
(Category under Institutional Pillar)
8
(Number of indicators under Institutional)
7 Core | 1 Supporting

25 marks
(Maximum score that any city can achieve under **Social** Pillar)
4
(Number of categories under Social Pillar)
20
(Number of indicators under Social Pillar)
13 Core | 7 Supporting

5 marks
(Maximum score that any city can achieve under **Economic** Pillar)
1
(Category under Economic Pillar)
5
(Category under Economic Pillar)
4 Core | 1 Supporting

45 marks
(Maximum score that any city can achieve under **Physical** Pillar)
9
(Number of categories under Physical Pillar)
46
(Number of categories under Physical Pillar)
33 Core | 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken

down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts Section
Urban Local Body	For Park and Recreation Related Questions	Town Planning Section
Urban Local Body	For Water Supply and Drainage related questions	Engineering Section
Urban Local Body	For Heritage sites related data	Tourism Department
Urban Local Body	For Ecological sites related data	Tourism Department
Urban Local Body	For Housing related data	Sanitation Section
Urban Local Body	For Building plan related data	Town Planning Section
Urban Local Body	For Roads related data	Town Planning Section
Urban Local Body	For Solid waste management related data	Sanitation Section
Urban Local Body	For IT services related data	Revenue, Engineering, Birth & Death, Town Planning, Sanitation Sections.
Urban Local Body	For Vendor committee related data	Town Planning Section

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Office of District Employment Exchange
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Pollution control Board
Development Authority	Building Infrastructure	Town Planning Section
	Construction planning	Town Planning Section
	Green Building	
	Rain water harvesting	Town Planning Section
	Universal Design Principle	
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Telangana Northern Power Distribution Company Limited
State Disaster management authority		District Collectorate
State Education Department		District Medical and Health Office
State Health Department	Health care professionals	District Medical and Health Office
	Citizen Services	District Medical and Health Office
	Disease Prevalence	District Medical and Health Office
	Health Infrastructure	District Medical and Health Office
State Renewable Energy Development Agency	Renewable Energy	Telangana Northern Power Distribution Company Limited
State Sales / Commercial Taxes Department		Commercial Tax Office
Town and Country Planning Department	Land Use	Town Planning Section
Traffic and Police Department		Police Commissionerate
Transport Authorities	Buses	Telangana State Road Transport Corporation
	Registered Vehicles	Road Transport Authority
	Sub urban rail transport	Not applicable as the facility is not there in the city
	Mono Rail Authority	Not applicable as the facility is not there in the city
	Tramways	Not applicable as the facility is not there in the city

Designated data owners	Subcategories	Data owners at city level
	Marine Transport Authority	Not applicable as the facility is not there in the city

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 196 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	1
DISCOM/Electricity Department	8
Traffic and Police Department	3
Development Authority	13
Pollution Control Board	2
State Renewable Energy Department	1
Town and Country Planning	4
State Health Department	3
Transport Authority	3
Disaster Management	0
Urban Local Body	157
Total	196*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that

data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	Percentage of citizen services available online	**83.43**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1

	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	1
	1.1e water supply	1
	1.1f sewerage/drainage	0
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	0
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	Percentage of services integrated through Command Centre	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	Percentage of citizens using online services	**0.65**
Description		
Sub Indicators	1.3a Building plan	5.89593E-05
	1.3b Birth/Death Certificate	0.004953632
	1.3c water supply	0.000286829
	1.3d solid waste management	5.52065E-05
	1.3e property tax	0.000836584
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA

	1.3h complaints/ grievance redressal	0.000172808
	1.3i information	0.001035122
	1.3j electricity	0.044253332
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	Average delay in grievance redressal	**0.1**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0.5
	1.4c street lights	0
	1.4d sewerage	NA
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	Tax collected as percentage of tax billed	**75.77**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	1392
Denominator	Total demand raised for the year	1837.11
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	Extent of cost recovery (O&M) in water supply services	**60.07**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	352
Denominator	Total O&M cost for providing water supply services during the year	586
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	Capital spending as percentage of total expenditure	**23.63**

Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	2474
Denominator	Total expenditure (revenue and capital accounts) in the same year	10468
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	Percentage of population covered under Ward Committees/ Area *Sabhas*	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	50
Denominator	Total number of wards	50
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	Restoration and reuse of historic buildings	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	NA
Denominator	Total number of historic buildings/sites identified	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	Percentage of ecologically important areas covered through projects for restoration	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	NA
Denominator	Total number of ecologically important sites identified in the city	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	Hotel Occupancy	**57.5**
Description	Average Occupancy rate of Hotels	57.5
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	Percentage of budget allocated towards cultural/sports activities	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	4177
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	Number of cultural/sports events hosted by city	**85**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	85

Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	Percentage of school-aged population enrolled in schools	**81**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	39487
Denominator	Total population in the age group of 6-14 years	48747
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	Percentage of female school-aged population enrolled in schools	**79.12**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	18671
Denominator	Total female population in the age group of 6-14 years	23599
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	Primary education student-teacher ratio	**17.73**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	25084
Denominator	Total number of teachers available for primary grades (public and private schools)	1415
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	Percentage of schools with access to digital education	**31.19**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	63
Denominator	Total number of schools	202
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	Percentage of students completing primary education	**71.81**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	71.80982762

Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	Percentage of students completing secondary education	**88.63**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	23239994
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	Number of in-patient hospital beds per 10,000 population	**23.67**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	686
Denominator	Total population of the city	289821
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	Healthcare professionals per 10,000 population	**18.25**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	529
Denominator	Total population of the city	289821
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	Average response time in case of health emergencies	**30**
Description	Total response time for health-related distress calls received in the city	30
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	Period prevalence of water borne diseases	**0.53**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	1536
Denominator	Total population of the city	289821

Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	Period prevalence of vector borne diseases	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	85
Denominator	Total population of the city	289821
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	Total number of CCTV cameras installed in the city	**244.21**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	1414
Denominator	Total length of road network in the city	579
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	Number of recorded crimes per lakh population	**463.39**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	1343
Denominator	Total population of the city	289821
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	Extent of crimes recorded against women, children and elderly per year	**16.46**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	221
Denominator	Total crimes recorded in the same year	1343
Unit	Percentage	

Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	Transport-related fatality per lakh population	**3.45**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	10
Denominator	Total population of the city	289821
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	Increase in VAT/GST collection	**-19.28**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	-2425.13
Denominator	Total VAT/GST collection during preceding year	125.7669
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	Increase in collection of Professional Tax	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	Increase in issuance of Construction Permits	**32.31**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	283
Denominator	Number of construction permits during preceding year	8.76
Unit	Percentage	

Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	Unemployment Rate	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	41735
Denominator	Total labour force in the city	48747
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	Percentage of vendors registered and provided formal spaces	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	1728
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	Percentage of Slum/EWS households covered through formal/ housing	**17.03**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	6985
Denominator	Total number of slum and EWS households in the city	410.18
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	Percentage of slum areas covered through basic services	**Non-Compuatble**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	NA
Unit	Percentage	

Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.63**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	182753
Denominator	Total population of the city	289821
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**2.74**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	793143.36
Denominator	Total population of the city	289821
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	Share of mixed land use area in overall city land use	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	23500000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	Net Density	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	289821
Denominator	Area allocated for residential land use (in hectares)	90000000
Unit		

Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	Percentage of city population with authorized electrical service	**140.17**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	110844
Denominator	Total number of households in the city	79080
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	Percentage of electrical connections covered through smart meters	**0.16**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	207
Denominator	Total number of electricity connections in the city	131685
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	Average number of electrical interruptions per year	**5492**
Description	Total number of sustained electrical interruptions in a year	5492
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	Average length of electrical interruptions per year	**0.59**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	126146
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.5	Percentage of total energy derived from renewable sources	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	235
Denominator	Total energy consumption from all sources	224633933
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	Energy consumption per unit - water supply and sewerage	**0.32**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	416939.5833
Denominator	Total quantum of water and waste water handled during the period	1170
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	Energy consumption per unit – street lighting	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	4632967
Denominator	Total number of street light installations	14735
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	Percentage of new and redeveloped buildings following green building norms	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	NA
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	9966.84
Unit	Percentage	

Benchmark	80%	
Indicator No: 10.9	Total energy consumption per capita	**0.79**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	224633933
Denominator	Total population of the city	289821
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	Geographical coverage of public transport	**0.77**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	58
Denominator	Total area of the city (sq.km)	23.5
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	Availability of public transport	**0.08**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	24
Denominator	Total population of the city	289821
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	Mode share of public transport	**To be computed**
Description	Mode share of public transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.4	Percentage of road network with dedicated bicycle tracks	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	579

Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	Percentage of interchanges with bicycle parking facilities	**150**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	3
Denominator	Total number of major transport interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	Mode share of non-motorised transport[1]	**To be computed**
Description	Mode share of non-motorised transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.7	Availability of Passenger Information System	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	Extent of signal synchronisation	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	NA
Denominator	Total number of signalised intersections in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	Availability of paid parking spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	0
Unit		
Benchmark		
Indicator No: 11.10	Percentage coverage of footpaths – wider than 1.2m	**0.43**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	4.95
Denominator	Total length of road network in the city	1158
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	Percentage of traffic intersections with pedestrian crossing facilities	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	NA
Denominator	Total number of junctions/ intersections on major roads in the city	28
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	Extent to which universal accessibility is incorporated in public rights-of-way	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	NA
Denominator	Total number of public right-of-way areas in the city	415
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	Household level coverage of direct water supply connections	**69.55**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	55000
Denominator	Total number of households in the city	79080

Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	Per capita supply of water	**127.67**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	37
Denominator	Total population of the city	289821
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	Quality of water supplied[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	13140
Denominator	Total number of samples tested for water quality	13140
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	Level of non-revenue water – NRW	**16.14**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	5.97
Denominator	Quantum of water put into the distribution system (mld)	37
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	Percentage of water connections covered through meters	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	3
Denominator	Total number of water connections in the city	42237
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	Percentage of plots with rainwater harvesting facility	**50.91**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	590

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	1159
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	Coverage of toilets	**160.56**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	83966
Denominator	Total number of properties in the city	52296
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	Coverage of sewerage network and/or septage	**104.8**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	54806
Denominator	Total number of properties in the city	52296
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	Collection efficiency of sewerage network	**5.26**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	2
Denominator	Total waste water generated in the city per day	38
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	Extent of reuse and recycling of waste water	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	2
Denominator	Total waste water received at treatment plants per day	2
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	Coverage of storm water drains	**4.32**
Formula:	*Numerator / Denominator*	

Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	25
Denominator	Total length of road network in the city	579
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	Household level coverage of municipal solid waste collection	**95.34**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	84174
Denominator	Total number of households and establishments in the city	88285
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	Efficiency of collection of municipal solid waste	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	120
Denominator	Total quantum of MSW generated in the city	120
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	Extent of municipal solid waste recovered through reuse	**12.94**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	466
Denominator	Average MSW generated in the city (tons per month)	3600
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	Concentration of SO2 - air pollution	7.7
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	7.7
Unit	μg/m3	
Benchmark	Annual mean concentration of 50 μg/m3 OR Mean concentration over 24 hours of 80 μg/m3	

Indicator No: 15.2	Concentration of NO2 - air pollution	25.9
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	25.9
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	Concentration of PM10 - air pollution	76.2
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	76.2
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	Level of noise pollution	To be computed
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	3
Denominator	Total number of noise samples	3
Unit	Percentage	
Benchmark		
Indicator No: 15.5	Quality of water in public surface water bodies	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	NA
Denominator	Total number of samples tested	NA
Unit	Percentage	
Benchmark	100%

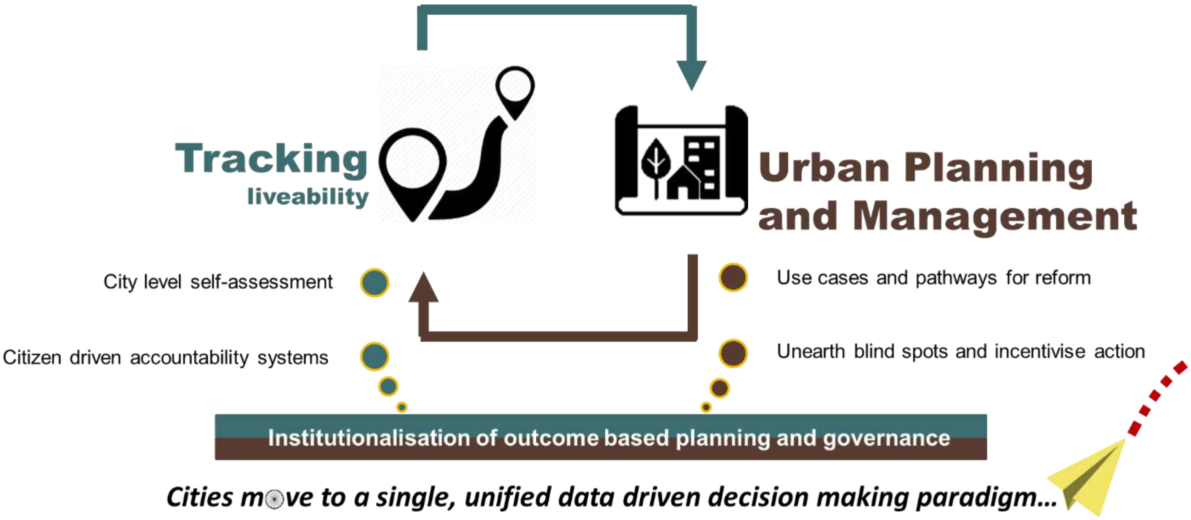
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm…

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).

KARNAL

GEOGRAPHICAL PROFILE

State/Union Territory	Haryana	**Total Geographical Area (Km^2)**	87	**City Category**	Small City

DEMOGRAPHIC PROFILE

Total Population	397000
Total Number of Households	77668

SOCIAL PROFILE

Education	**Total Number of Schools**	194
	Total Enrolment (Class 1 to 5)	36362
Health	**Total Number of In-patient Beds**	3402
	Total Health Workforce	1791
Safety and Security	**Total Strength of Police Force**	283
	Total Number of CCTV Cameras	129
Heritage Sites	**Total Number of Heritage Sites**	25

ECONOMIC PROFILE

Total Population in Working Age Group	...
Total Number of Industries	955
Total Number of Commercial Enterprises	21061
Total Number of Hotels	34
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	6932.51
Total VAT Collection in FY 2016-17 (INR Lakhs)	100659.39

PHYSICAL PROFILE

Water	**Average Quantity of Water Supplied (MLD)**	85.97
	Total Number of Water Connection	37524
Sanitation Facilities	**Total number of households with access to individual toilets in the city**	77028
	Total number of households in the city with access to community toilets in the city	640
Solid Waste Management	**Daily average quantity of municipal solid waste collected in the city (Tonnes/day)**	140
	Total number of households covered through door-to-door collection of solid waste	77668
Waste Water	**Daily Average Quantum of Waste Water Generated in the City (MLD)**	63.5
	Daily average quantum of waste water treated by STPs in the city (MLD)	55
Electricity	**Total number of authorized electrical connections in the city**	99726
	Total electricity supplied to the city (kWh)	4389.25
Public and Open Spaces	**Total area covered by green spaces in the city (m^2)**	5000
Roads and Transport	**Total Length of Road Network in the City (Km)**	691.38
	Total length of arterial and sub-arterial road network in the city (Km)	19.4
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	34.3

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population

Pillars of Comprehensive Development	Category	Indicators
		enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services

Pillars of Comprehensive Development	Category	Indicators
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting

Pillars of Comprehensive Development	Category	Indicators
		facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.

100 marks

(Maximum overall score that any city can achieve)

25 marks (Maximum score that any city can achieve under **Institutional** Pillar)		25 marks (Maximum score that any city can achieve under **Social** Pillar)		5 marks (Maximum score that any city can achieve under **Economic** Pillar)		45 marks (Maximum score that any city can achieve under **Physical** Pillar)	
1 (Category under Institutional Pillar)		4 (Number of categories under Social Pillar)		1 (Category under Economic Pillar)		9 (Number of categories under Physical Pillar)	
8 (Number of indicators under Institutional)		20 (Number of indicators under Social Pillar)		5 (Category under Economic Pillar)		46 (Number of categories under Physical Pillar)	
7 Core	1 Supporting	13 Core	7 Supporting	4 Core	1 Supporting	33 Core	13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark -\ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Municipal Corporation Karnal
Urban Local Body	For Park and Recreation Related Questions	Municipal Corporation Karnal
Urban Local Body	For Water Supply and Drainage related questions	Municipal Corporation Karnal
Urban Local Body	For Heritage sites related data	Municipal Corporation Karnal
Urban Local Body	For Ecological sites related data	Municipal Corporation Karnal
Urban Local Body	For Housing related data	Municipal Corporation Karnal
Urban Local Body	For Building plan related data	Municipal Corporation Karnal
Urban Local Body	For Roads related data	Municipal Corporation Karnal
Urban Local Body	For Solid waste management related data	Municipal Corporation Karnal
Urban Local Body	For IT services related data	Municipal Corporation Karnal
Urban Local Body	For Vendor committee related data	Municipal Corporation Karnal
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban	Municipal Corporation Karnal

Designated data owners	Subcategories	Data owners at city level
	Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Haryana State Pollution Control Board
Development Authority	Building Infrastructure	Haryana Urban Development Authority
	Construction planning	Haryana Urban Development Authority
	Green Building	Haryana Urban Development Authority
	Rain water harvesting	Haryana Urban Development Authority
	Universal Design Principle	Haryana Urban Development Authority

Traffic and Police Department		Haryana Police
Transport Authorities	Buses	Haryana Roadways
	Registered Vehicles	Transport Authority
	Sub urban rail transport	
	Mono Rail Authority	
	Tramways	

Designated data owners	Subcategories	Data owners at city level
	Marine Transport Authority	

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 6 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	2
DISCOM/Electricity Department	0
Traffic and Police Department	0
Development Authority	0
Pollution Control Board	0
State Renewable Energy Department	0
Town and Country Planning	0
State Health Department	3
Transport Authority	0
Disaster Management	1
Urban Local Body	0
Total	6*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of

data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**55.65**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	0.75
	1.1d solid waste management	0.25
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0.333333333
	1.1i professional tax	1
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.555555556
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**2.38**
Description	Services integrated through an integrated or a singular operations command centre	0.5
Unit	Percentage	
Benchmark	100%	

Indicator No. 1.3	**Percentage of citizens using online services**	**14**
Description		
Sub Indicators	1.3a Building plan	4.93526E-07
	1.3b Birth/Death Certificate	0.014557269
	1.3c water supply	0.0007166
	1.3d solid waste management	0.000800953
	1.3e property tax	0.01641714
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.001246387
	1.3i information	0.043493083
	1.3j electricity	1.042927622
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.33**
Description		
Sub Indicators	1.4a water supply	1
	1.4b solid waste	0
	1.4c street lights	1
	1.4d sewerage	0
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**50.63**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	1324

Denominator	Total demand raised for the year	2615
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**81.7**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	592.94
Denominator	Total O&M cost for providing water supply services during the year	725.77
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**15.19**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	2018.22
Denominator	Total expenditure (revenue and capital accounts) in the same year	13289.21
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	0
Denominator	Total number of wards	20
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**12**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	3
Denominator	Total number of historic buildings/sites identified	25
Unit	Percentage	

Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	NA
Denominator	Total number of ecologically important sites identified in the city	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**14.29**
Description	Average Occupancy rate of Hotels	14.28571429
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0.927
Denominator	Total budget of the ULB (capital and revenue)	6932.51
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**184**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	184
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**107.51**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	56513
Denominator	Total population in the age group of 6-14 years	52566

Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**108.79**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	24949
Denominator	Total female population in the age group of 6-14 years	22933
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**22.38**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	36362
Denominator	Total number of teachers available for primary grades (public and private schools)	1625
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**28.35**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	55
Denominator	Total number of schools	194
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**112.43**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	112.4314363
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**101.33**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	43043572
Numerator	Percentage	

Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**112.6**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	3402
Denominator	Total population of the city	302140
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**59.28**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	1791
Denominator	Total population of the city	302140
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**19**
Description	Total response time for health-related distress calls received in the city	19
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.27**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	814
Denominator	Total population of the city	302140
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.05**
Formula:	*Numerator / Denominator*	

Numerator	Number of cases of persons affected by vector borne diseases in a year	137
Denominator	Total population of the city	302140
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**18.66**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	129
Denominator	Total length of road network in the city	691.38
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**800.29**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	2418
Denominator	Total population of the city	302140
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**6.29**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	152
Denominator	Total crimes recorded in the same year	2418
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**274.38**
Formula:	*Numerator / Denominator*	

Numerator	Total number of fatalities recorded in road accidents in a year	829
Denominator	Total population of the city	302140
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**1.5**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	1490
Denominator	Total VAT/GST collection during preceding year	991.6939
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**29.67**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	54
Denominator	Number of construction permits during preceding year	1.82
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	

Numerator	Number of unemployed persons (seeking or available for work)	34463
Denominator	Total labour force in the city	52566
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	8852
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	0
Denominator	Total number of slum and EWS households in the city	92.13
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**12.82**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	153165960
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.02**

Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	5000
Denominator	Total population of the city	302140
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**4.02**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	1214257.08
Denominator	Total population of the city	302140
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	87000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	302140
Denominator	Area allocated for residential land use (in hectares)	30480000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**99.81**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	77519
Denominator	Total number of households in the city	77668
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	99726
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**4275**
Description	Total number of sustained electrical interruptions in a year	4275
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	1765
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.81**
Formula:	*Numerator / Denominator*	

Numerator	Total installed capacity for generation of renewable energy in the city	770
Denominator	Total energy consumption from all sources	4389.25
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	97.16666667
Denominator	Total quantum of water and waste water handled during the period	4229.1
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	2635
Denominator	Total number of street light installations	18986
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	NA
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	45960
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**

Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	4389.25
Denominator	Total population of the city	302140
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	1022
Denominator	Total area of the city (sq.km)	87
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	6
Denominator	Total population of the city	302140
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0.22**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	1.5
Denominator	Total length of road network in the city	691.38
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**100**
Formula:	*Numerator / Denominator*	

Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	1
Denominator	Total number of major transport interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**40**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	40
Denominator	Total number of major interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	8
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	5
Unit		
Benchmark		

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**2.48**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	34.3
Denominator	Total length of road network in the city	1382.76
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**79.38**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	127
Denominator	Total number of junctions/ intersections on major roads in the city	160
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**48.5**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	129
Denominator	Total number of public right-of-way areas in the city	266
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**65.33**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	50740
Denominator	Total number of households in the city	77668
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**284.54**
Formula:	*Numerator / Denominator*	

Numerator	Total quantity of water supplied into the distribution system	85.97
Denominator	Total population of the city	302140
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	63
Denominator	Total number of samples tested for water quality	615
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	85.97
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**69.5**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	26078
Denominator	Total number of water connections in the city	37524
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**12.66**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	97
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	766

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**59.26**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	100063
Denominator	Total number of properties in the city	168853
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**44.8**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	75647
Denominator	Total number of properties in the city	168853
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	63.5
Denominator	Total waste water generated in the city per day	63.5
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**115.45**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	63.5
Denominator	Total waste water received at treatment plants per day	55
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**117.17**
Formula:	*Numerator / Denominator*	

Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	810.06
Denominator	Total length of road network in the city	691.38
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	98729
Denominator	Total number of households and establishments in the city	98729
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**93.33**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	140
Denominator	Total quantum of MSW generated in the city	150
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**80.95**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	3400
Denominator	Average MSW generated in the city (tons per month)	4200
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**13**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	13
Unit	µg/m3	

Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**13**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	13
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**13**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	13
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	6
Denominator	Total number of noise samples	6
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	21
Denominator	Total number of samples tested	21
Unit	Percentage	
Benchmark	100%

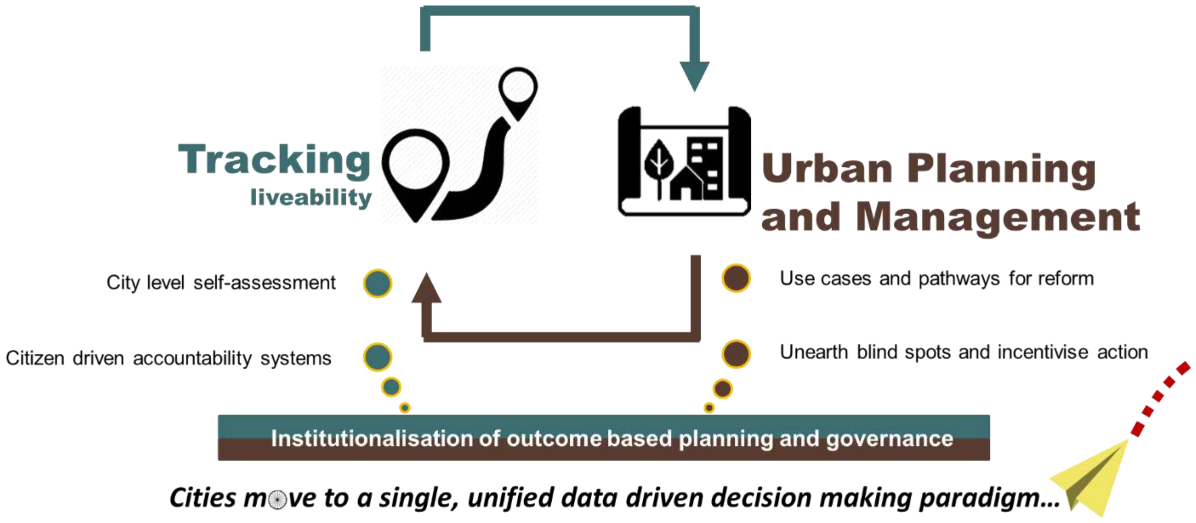
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

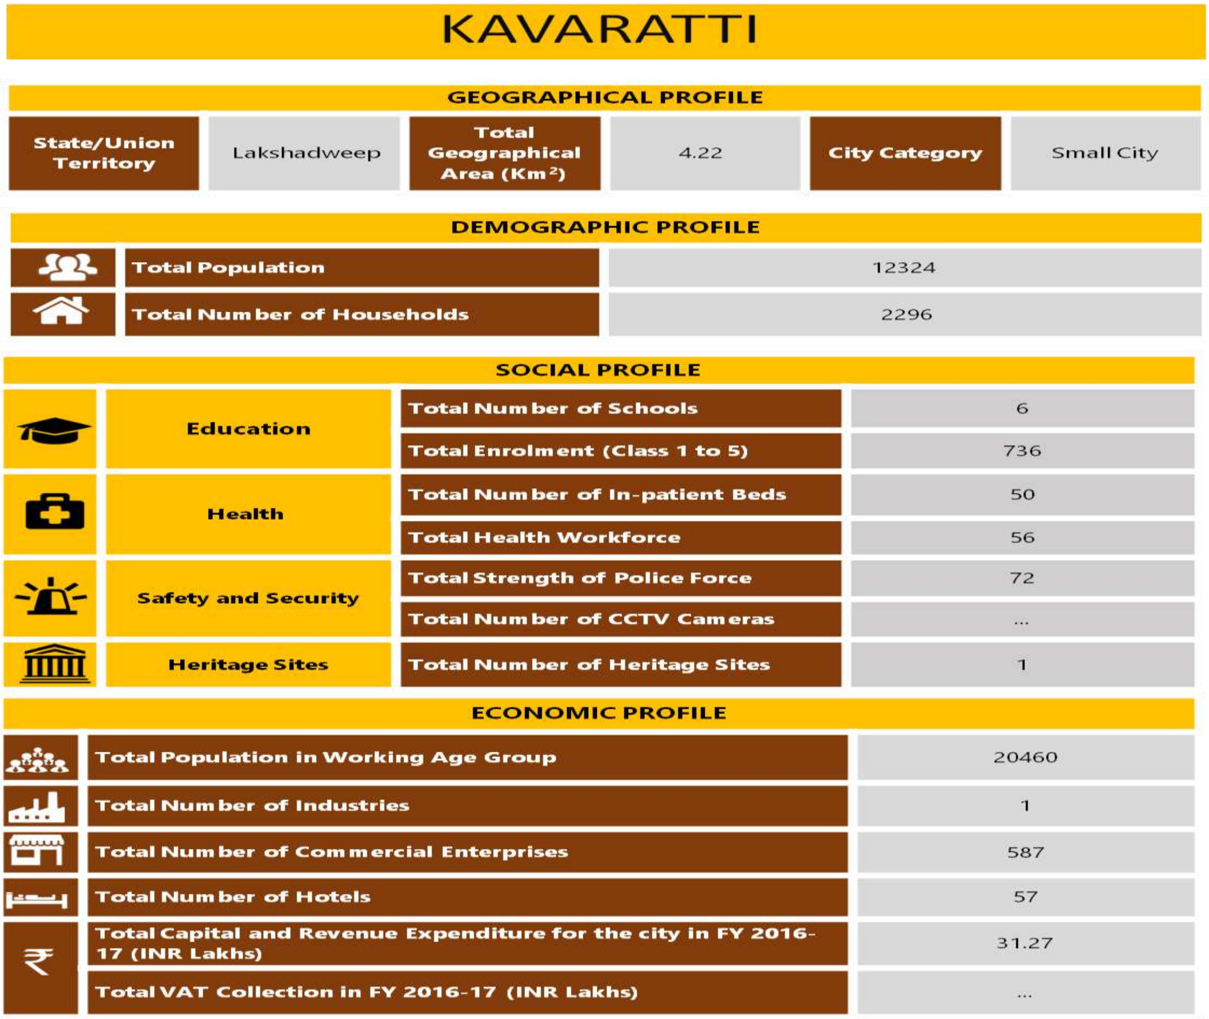


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm…

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



KAVARATTI

GEOGRAPHICAL PROFILE

State/Union Territory	Lakshadweep	**Total Geographical Area (Km²)**	4.22	**City Category**	Small City

DEMOGRAPHIC PROFILE

Total Population	12324
Total Number of Households	2296

SOCIAL PROFILE

Education	**Total Number of Schools**	6
	Total Enrolment (Class 1 to 5)	736
Health	**Total Number of In-patient Beds**	50
	Total Health Workforce	56
Safety and Security	**Total Strength of Police Force**	72
	Total Number of CCTV Cameras	...
Heritage Sites	**Total Number of Heritage Sites**	1

ECONOMIC PROFILE

Total Population in Working Age Group	20460
Total Number of Industries	1
Total Number of Commercial Enterprises	587
Total Number of Hotels	57
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	31.27
Total VAT Collection in FY 2016-17 (INR Lakhs)	...

PHYSICAL PROFILE		
Water	**Average Quantity of Water Supplied (MLD)**	0.945
	Total Number of Water Connection	630
Sanitation Facilities	**Total number of households with access to individual toilets in the city**	2296
	Total number of households in the city with access to community toilets in the city	...
Solid Waste Management	**Daily average quantity of municipal solid waste collected in the city (Tonnes/day)**	0.491
	Total number of households covered through door-to-door collection of solid waste	2246
Waste Water	**Daily Average Quantum of Waste Water Generated in the City (MLD)**	1.1
	Daily average quantum of waste water treated by STPs in the city (MLD)	...
Electricity	**Total number of authorized electrical connections in the city**	4562
	Total electricity supplied to the city (kWh)	12029822
Public and Open Spaces	**Total area covered by green spaces in the city (m^2)**	4130000
Roads and Transport	**Total Length of Road Network in the City (Km)**	36
	Total length of arterial and sub-arterial road network in the city (Km)	...
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	...

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	2. Identity and Culture	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary

Pillars of Comprehensive Development	Category	Indicators
		education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	6. Economy and Employment	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	7. Housing and Inclusiveness	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian

Pillars of Comprehensive Development	Category	Indicators
		crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.

100 marks

(Maximum overall score that any city can achieve)

25 marks (Maximum score that any city can achieve under **Institutional** Pillar)	25 marks (Maximum score that any city can achieve under **Social** Pillar)	5 marks (Maximum score that any city can achieve under **Economic** Pillar)	45 marks (Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry.

The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	District administration
Urban Local Body	For Park and Recreation Related Questions	PWD - Public works department
Urban Local Body	For Water Supply and Drainage related questions	PWD
Urban Local Body	For Heritage sites related data	Science and Technology
Urban Local Body	For Ecological sites related data	Science and Technology
Urban Local Body	For Housing related data	PWD
Urban Local Body	For Building plan related data	PWD
Urban Local Body	For Roads related data	Transport department
Urban Local Body	For Solid waste management related data	PWD and Forest department
Urban Local Body	For IT services related data	PWD
Urban Local Body	For Vendor committee related data	Kavaratti Panchayat
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	PWD, Pollution control department
Development Authority	Building Infrastructure	PWD
	Construction planning	PWD

Designated data owners	Subcategories	Data owners at city level
	Green Building	PWD
	Rain water harvesting	PWD
	Universal Design Principle	PWD
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Electricity department
State Disaster management authority		PWD
State Education Department		Directorate of education
State Health Department	Health care professionals	Directorate of Health services
	Citizen Services	Directorate of Health services
	Disease Prevalence	Directorate of Health services
	Health Infrastructure	Directorate of Health services
State Renewable Energy Development Agency		Electricity department
State Sales / Commercial Taxes Department		NA
Town and Country Planning Department	Land Use	PWD
Traffic and Police Department		Police department
Transport Authorities	Buses	NA
	Registered Vehicles	Transport department
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	Marine transport department

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 37 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	2
DISCOM/Electricity Department	3
Traffic and Police Department	3
Development Authority	0
Pollution Control Board	2
State Renewable Energy Department	0
Town and Country Planning	0
State Health Department	3
Transport Authority	4
Disaster Management	2
Urban Local Body	17
Total	37*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water

Indicator No. 15.4 Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	Percentage of citizen services available online	7.69
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0
	1.1b death certificate	0
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0
	1.1i professional tax	0
	1.1j information	0
	1.1k Grievance redressal	0
	1.1l electricity	1
	1.1m Building plan	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	Percentage of services integrated through Command Centre	4.76
Description	Services integrated through an integrated or a singular operations command centre	1

Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	Percentage of citizens using online services	54.8
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	NA
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	NA
	1.3i information	NA
	1.3j electricity	0.548005261
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	Average delay in grievance redressal	0.67
Description		
Sub Indicators	1.4a water supply	2
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	NA
	1.4e professional tax	NA
	1.4f parks and recreational spaces	NA

Unit	Days	
Benchmark	0	
Indicator No: 1.5	Tax collected as percentage of tax billed	Non-

Formula:	*Numerator / Denominator*	Computable
Numerator	Total tax collected in a year	NA
Denominator	Total demand raised for the year	NA
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	Extent of cost recovery (O&M) in water supply services	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	NA
Denominator	Total O&M cost for providing water supply services during the year	107.5
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	Capital spending as percentage of total expenditure	99
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	5160
Denominator	Total expenditure (revenue and capital accounts) in the same year	5212.27
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	Percentage of population covered under Ward Committees/ Area *Sabhas*	100
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	12
Denominator	Total number of wards	12
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	Restoration and reuse of historic buildings	0
Formula:	*Numerator / Denominator*	

Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	0
Denominator	Total number of historic buildings/sites identified	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	Percentage of ecologically important areas covered through projects for restoration	0
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	Hotel Occupancy	10
Description	Average Occupancy rate of Hotels	10
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	Percentage of budget allocated towards cultural/sports activities	639.59
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	200
Denominator	Total budget of the ULB (capital and revenue)	31.27
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	Number of cultural/sports events hosted by city	5
Description	Number of cultural/sports events hosted by the city authority in the preceding year	5
Unit		

Benchmark		

Category 3: School Education

Indicator No: 3.1	Percentage of school-aged population enrolled in schools	15.03
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	1297
Denominator	Total population in the age group of 6-14 years	8632
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	Percentage of female school-aged population enrolled in schools	13.74
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	599
Denominator	Total female population in the age group of 6-14 years	4358
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	Primary education student-teacher ratio	13.63
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	736
Denominator	Total number of teachers available for primary grades (public and private schools)	54
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	Percentage of schools with access to digital education	33.33
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	2
Denominator	Total number of schools	6
Unit	Percentage	
Benchmark	100%	

Indicator No: 3.5	Percentage of students completing primary education	88.25
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	88.24786325
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	Percentage of students completing secondary education	106.44
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	35820
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	Number of in-patient hospital beds per 10,000 population	44.6
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	50
Denominator	Total population of the city	11210
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	Healthcare professionals per 10,000 population	49.96
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	56
Denominator	Total population of the city	11210
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	Average response time in case of health emergencies	15
Description	Total response time for health-related distress calls received in the city	15
Unit	Minutes and seconds	

Benchmark	8 minutes	
Indicator No: 4.4	Period prevalence of water borne diseases	1.16
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	130
Denominator	Total population of the city	11210
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	Period prevalence of vector borne diseases	1.28
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	144
Denominator	Total population of the city	11210
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	Total number of CCTV cameras installed in the city	0
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	0
Denominator	Total length of road network in the city	36
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	Number of recorded crimes per lakh population	240.86
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	27
Denominator	Total population of the city	11210
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a	

	benchmark	
Indicator No: 5.3	Extent of crimes recorded against women, children and elderly per year	14.81
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	4
Denominator	Total crimes recorded in the same year	27
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	Transport-related fatality per lakh population	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	#VALUE!
Denominator	Total population of the city	11210
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	Increase in VAT/GST collection	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	0
Denominator	Total VAT/GST collection during preceding year	0
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	Increase in collection of Professional Tax	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA

Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	Increase in issuance of Construction Permits	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	NC
Denominator	Number of construction permits during preceding year	NC
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	Unemployment Rate	To be computed
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	20419
Denominator	Total labour force in the city	35233
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	Percentage of vendors registered and provided formal spaces	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	NA
Denominator	Total number of vendors in the city	880.825
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	Percentage of Slum/EWS households covered through formal/ housing	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	0
Denominator	Total number of slum and EWS households in the city	0.02
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	Percentage of slum areas covered through basic services	**Non-Computable** NA
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	368.42
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	4130000
Denominator	Total population of the city	11210
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	4.97
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	55670

Denominator	Total population of the city	11210
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	Share of mixed land use area in overall city land use	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	4220000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	Net Density	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	11210
Denominator	Area allocated for residential land use (in hectares)	NA
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	Percentage of city population with authorized electrical service	**166.77**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	3829
Denominator	Total number of households in the city	2296
Unit	Percentage	

Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	Percentage of electrical connections covered through smart meters	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	4562
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	Average number of electrical interruptions per year	**2883**
Description	Total number of sustained electrical interruptions in a year	2883
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	Average length of electrical interruptions per year	**NC**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	Data Unavailable
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	Percentage of total energy derived from renewable sources	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	760
Denominator	Total energy consumption from all sources	12033022
Unit	Percentage	
Benchmark	10%	

Indicator No: 10.6	Energy consumption per unit - water supply and sewerage	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	37635.25
Denominator	Total quantum of water and waste water handled during the period	NA
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	Energy consumption per unit – street lighting	**0.14**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	113160
Denominator	Total number of street light installations	203
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	Percentage of new and redeveloped buildings following green building norms	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	NA
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	Total energy consumption per capita	**0.23**
Formula:	*Numerator / Denominator*	

Numerator	Total energy consumption (for all uses) in the city	12033022
Denominator	Total population of the city	11210
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	Geographical coverage of public transport	0
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	NA
Denominator	Total area of the city (sq.km)	4.22
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	Availability of public transport	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	NA
Denominator	Total population of the city	11210
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	Mode share of public transport	To be computed
Description	Mode share of public transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.4	Percentage of road network with dedicated bicycle tracks	0
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	36

Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	Percentage of interchanges with bicycle parking facilities	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	Mode share of non-motorised transport[1]	To be computed
Description	Mode share of non-motorised transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.7	Availability of Passenger Information System	Non-Computable
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	Extent of signal synchronisation	0
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	5

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	Availability of paid parking spaces	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	NA
Denominator	Total available on-street parking spaces in the city	NA
Unit		
Benchmark		
Indicator No: 11.10	Percentage coverage of footpaths – wider than 1.2m	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	NA
Denominator	Total length of road network in the city	72
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	Percentage of traffic intersections with pedestrian crossing facilities	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	NA
Denominator	Total number of junctions/ intersections on major roads in the city	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	Extent to which universal accessibility is incorporated in public rights-of-way	100
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	719
Denominator	Total number of public right-of-way areas in the city	719

Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	Household level coverage of direct water supply connections	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	Data Unavailable
Denominator	Total number of households in the city	2296
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	Per capita supply of water	84.3
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	0.945
Denominator	Total population of the city	11210
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	Quality of water supplied[2]	To be computed
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	782
Denominator	Total number of samples tested for water quality	1516
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	Level of non-revenue water – NRW	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Quantum of water put into the distribution system (mld)	0.945
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	Percentage of water connections covered through meters	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	NA
Denominator	Total number of water connections in the city	630
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	Percentage of plots with rainwater harvesting facility	1066.67
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	64
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	6
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	Coverage of toilets	80.79
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	2957
Denominator	Total number of properties in the city	3660
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	Coverage of sewerage network and/or septage	99.97
Formula:	*Numerator / Denominator*	

Numerator	Total number of properties with connection to waste water management systems	3659
Denominator	Total number of properties in the city	3660
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	Collection efficiency of sewerage network	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	NA
Denominator	Total waste water generated in the city per day	1.1
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	Extent of reuse and recycling of waste water	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	NA
Denominator	Total waste water received at treatment plants per day	NA
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	Coverage of storm water drains	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	NA
Denominator	Total length of road network in the city	36
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	Household level coverage of municipal solid waste collection	81.13
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	2339

Denominator	Total number of households and establishments in the city	2883
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	Efficiency of collection of municipal solid waste	100
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	1200
Denominator	Total quantum of MSW generated in the city	1200
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	Extent of municipal solid waste recovered through reuse	8.1
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	2917
Denominator	Average MSW generated in the city (tons per month)	36000
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	Concentration of SO2 - air pollution	Non=Computable
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	Concentration of NO2 - air pollution	Non=Computable
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	

Indicator No: 15.3	Concentration of PM10 - air pollution	33.13
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	33.13
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	Level of noise pollution	To be computed
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	Data Unavailable
Denominator	Total number of noise samples	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 15.5	Quality of water in public surface water bodies	Non-Computable
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	NA
Denominator	Total number of samples tested	NA
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT DRAFT REPORT

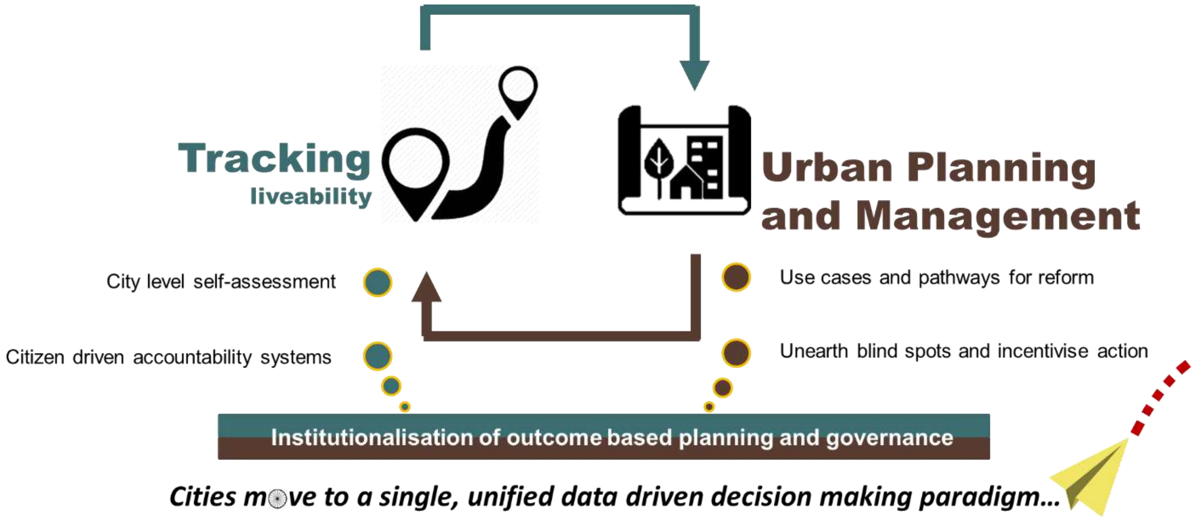
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

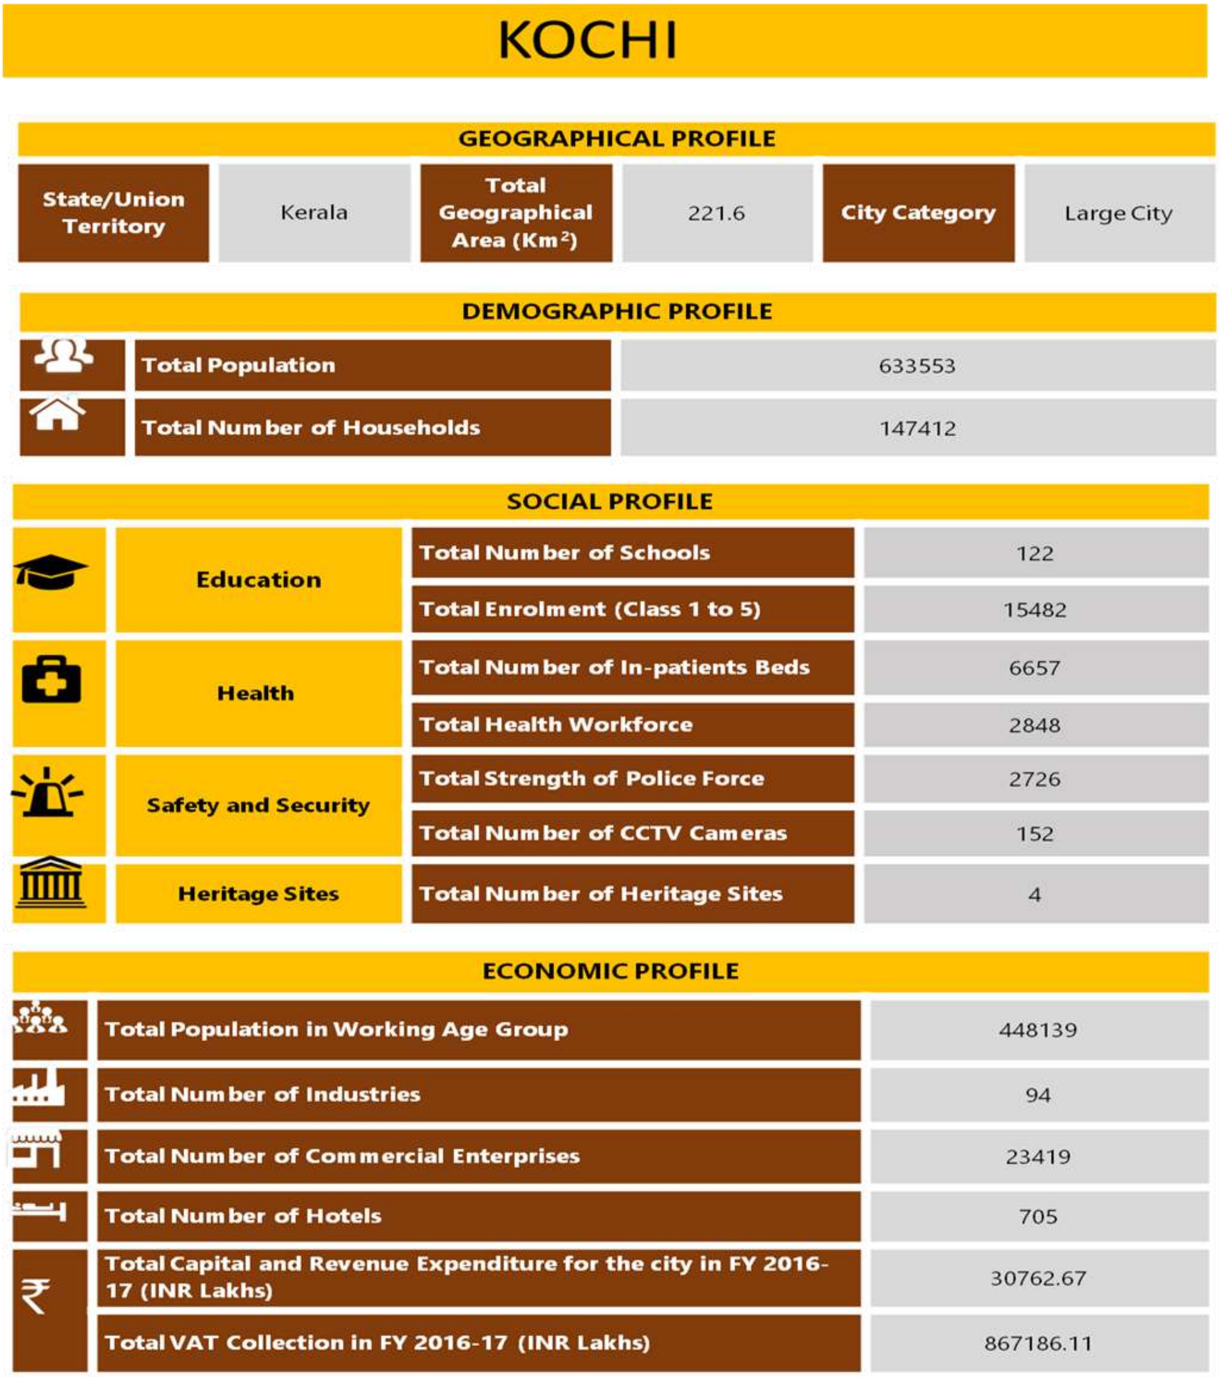


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



KOCHI

GEOGRAPHICAL PROFILE

State/Union Territory	Kerala	**Total Geographical Area (Km²)**	221.6	**City Category**	Large City

DEMOGRAPHIC PROFILE

Total Population	633553
Total Number of Households	147412

SOCIAL PROFILE

Education	**Total Number of Schools**	122
	Total Enrolment (Class 1 to 5)	15482
Health	**Total Number of In-patients Beds**	6657
	Total Health Workforce	2848
Safety and Security	**Total Strength of Police Force**	2726
	Total Number of CCTV Cameras	152
Heritage Sites	**Total Number of Heritage Sites**	4

ECONOMIC PROFILE

Total Population in Working Age Group	448139
Total Number of Industries	94
Total Number of Commercial Enterprises	23419
Total Number of Hotels	705
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	30762.67
Total VAT Collection in FY 2016-17 (INR Lakhs)	867186.11

PHYSICAL PROFILE		
Water	**Average Quantity of Water Supplied (MLD)**	185
	Total Number of Water Connections	149030
Sanitation Facilities	**Total number of households with access to individual toilets in the city**	..
	Total number of households in the city with access to community toilets in the city	1207
Solid Waste Management	**Daily average quantity of municipal solid waste collected in the city (Tonnes/day)**	278
	Total number of households covered through door-to-door collection of solid waste	140000
Waste Water	**Daily Average Quantum of Waste Water Generated in the City (MLD)**	73
	Daily average quantum of waste water treated by STPs in the city (MLD)	30
Electricity	**Total number of authorized electrical connections in the city**	283657
	Total electricity supplied to the city (kWh)	694900000
Public and Open Spaces	**Total area covered by green spaces in the city (m^2)**	25447.84
Roads and Transport	**Total Length of Road Network in the City (Km)**	1135.733
	Total length of arterial and sub-arterial road network in the city (Km)	197.1882
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	29.455

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies

Pillars of Comprehensive Development	Category	Indicators
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita

Pillars of Comprehensive Development	Category	Indicators
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced	15.1 Concentration of SO2- air pollution

Pillars of Comprehensive Development	Category	Indicators
	Pollution	15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

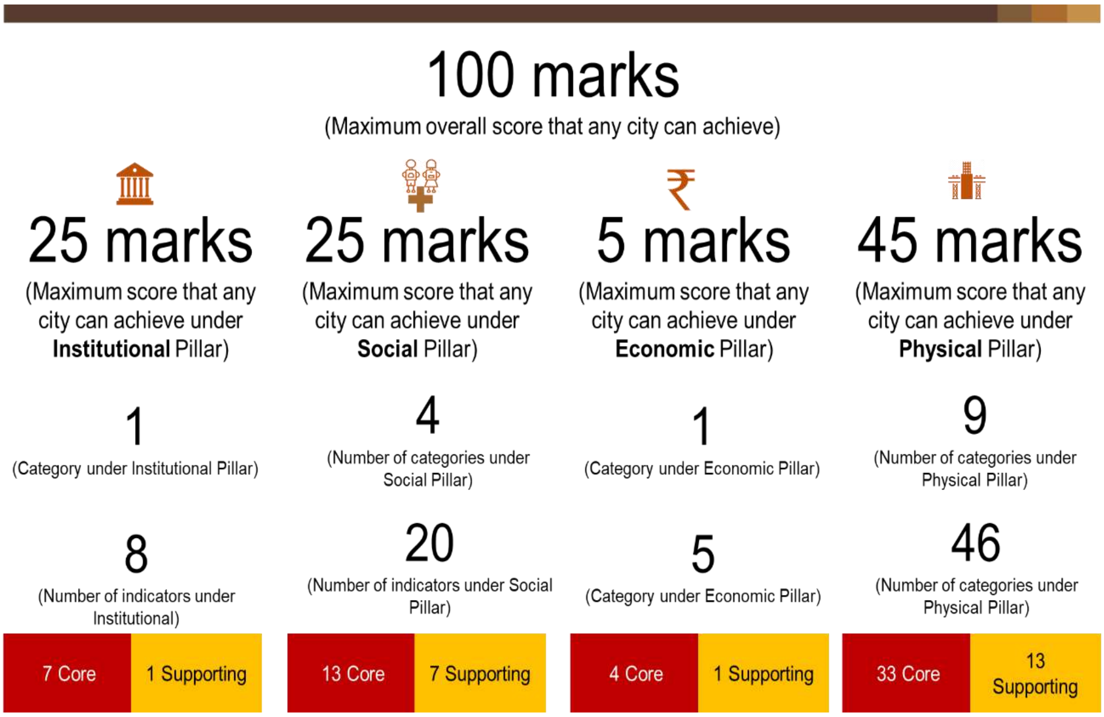
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning

department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Revenue Officer, Accounts Officer
Urban Local Body	For Park and Recreation Related Questions	Executive Engineer, Engineering Department
Urban Local Body	For Water Supply and Drainage related questions	Executive Engineer, P.H.Division, Kerala Water Authority, Thevara, Ernakulam (Separate Department not ULB)
Urban Local Body	For Heritage sites related data	Executive Engineer, Engineering Department
Urban Local Body	For Ecological sites related data	Executive Engineer, Engineering Department
Urban Local Body	For Housing related data	Manager, PMAY
Urban Local Body	For Building plan related data	Executive Engineer, Engineering Department
Urban Local Body	For Roads related data	Executive Engineer, Engineering Department
Urban Local Body	For Solid waste management related data	Health Officer
Urban Local Body	For IT services related data	Project Manager-TCS ***Not Direct staff of Kochi Corporation. All IT and Online services are done by TCS which is housed at Kochi Municipal Corporation.***
Urban Local Body	For Vendor committee related data	Manager, NULM
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	**Ward Sabha Details**-Superintendent, Planning cell **Offline Grievances**- Superintendent, General Section **Population Details**-Senior Clerk,

Designated data owners	Subcategories	Data owners at city level
		Census Department **Unemployment Data Source :(Not ULB)** 1.District Employment Officer, District Employment Office, Ernakulam 2. Divisional Employment Officer, Professional & Executive Exchange, Ernakulam **Online Service** Project Manager-TCS **Sewerage Services :** Environment Engineer under Engineering Department **Transport & City Mobility Plan Details** Kochi Smart City Mission
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Kerala State Pollution Control Board, Regional Office, Ernakulam
Development Authority	Building Infrastructure	Executive Engineer, Engineering Department of ULB. In Kerala scenario this aspect comes under ULB
	Construction planning	Executive Engineer, Engineering Department of ULB. In Kerala scenario this aspect comes under ULB
	Green Building	Executive Engineer, Engineering Department of ULB. In Kerala scenario this aspect comes under ULB
	Rain water harvesting	Executive Engineer, Engineering Department of ULB. In Kerala scenario this aspect comes under ULB
	Universal Design Principle	Executive Engineer, Engineering Department of ULB. In Kerala scenario this aspect comes under ULB
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Deputy Chief Engineer, Kerala State Electricity Board Ltd, Electrical Circle, Ernakulam
State Disaster management authority		District Disaster Management Authority, Civil Station, Kakkanad
State Education Department		District Education Officer, Ernakulam

Designated data owners	Subcategories	Data owners at city level
State Health Department	Health care professionals	District Medical Office (Health), Ernakulam
	Citizen Services	District Medical Office (Health), Ernakulam
	Disease Prevalence	District Medical Office (Health), Ernakulam
	Health Infrastructure	District Medical Office (Health), Ernakulam
State Renewable Energy Development Agency		ANERT, Kakkanad
State Sales / Commercial Taxes Department		1.Deputy Commissioner, Deputy Commissioner Office, Sales and Commercial Tax Department, Thevara, Ernakulam 2. Deputy Commissioner, Deputy Commissioner Office, Sales and Commercial Tax Department, Mattancherry, Ernakulam
Town and Country Planning Department	Land Use	Senior Town Planner, Town and Country Planning Department, Civil Station, Kakkanad
Traffic and Police Department		City Police Commissioner, Kochi City
Transport Authorities	Buses	Regional Transport Office, Civil Station, Kakkanad
	Registered Vehicles	Regional Transport Office, Civil Station, Kakkanad
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	Senior Superintendent, Regional Office, Water Transport, Ernakulam

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 36 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**2**
State Education Department	**1**
DISCOM/Electricity Department	**0**
Traffic and Police Department	**4**
Development Authority	**0**
Pollution Control Board	**0**
State Renewable Energy Department	**0**
Town and Country Planning	**0**
State Health Department	**2**
Transport Authority	**1**
Disaster Management	**0**
Urban Local Body	**26**
Total	**36***

* The count of documents is based on first round of submission

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**41.58**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	0
	1.1e water supply	0.333333333
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0
	1.1i professional tax	0
	1.1j information	0.461538462
	1.1k Grievance redressal	0.5
	1.1l electricity	1
	1.1m Building plan	0.111111111
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**7.14**
Description	Services integrated through an integrated or a singular operations command centre	1.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**1.74**
Description		

Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	0.002945557
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	NA
	1.3i information	0.013179639
	1.3j electricity	0.036112276
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.4**
Description		
Sub Indicators	1.4a water supply	1
	1.4b solid waste	1
	1.4c street lights	0
	1.4d sewerage	NA
	1.4e professional tax	0
	1.4f parks and recreational spaces	NA
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**91.71**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	10660.59
Denominator	Total demand raised for the year	11624.28
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**558.33**

Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	6700
Denominator	Total O&M cost for providing water supply services during the year	1200
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**45.82**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	43759.03
Denominator	Total expenditure (revenue and capital accounts) in the same year	95492.74
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	74
Denominator	Total number of wards	74
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	Data Unavailable
Denominator	Total number of historic buildings/sites identified	4
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**33.33**
Formula:	*Numerator / Denominator*	

Numerator	Ecologically important sites covered through projects for restoration	1
Denominator	Total number of ecologically important sites identified in the city	3
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	107.25
Denominator	Total budget of the ULB (capital and revenue)	30762.67
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**20**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	20
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**33.9**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	30473
Denominator	Total population in the age group of 6-14 years	89885

Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**37.96**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	16709
Denominator	Total female population in the age group of 6-14 years	44022
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**19.04**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	15482
Denominator	Total number of teachers available for primary grades (public and private schools)	813
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**40.16**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	49
Denominator	Total number of schools	122
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**144.89**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	144.8881504
Numerator	Percentage	
Unit	Percentage	

Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**251.16**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	26784948
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**105.07**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	6657
Denominator	Total population of the city	633553
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**44.95**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	2848
Denominator	Total population of the city	633553
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**Non-Computable**
Description	Total response time for health-related distress calls received in the city	Data Unavailable
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**1.14**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	7198
Denominator	Total population of the city	633553

Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	112
Denominator	Total population of the city	633553
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**13.38**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	152
Denominator	Total length of road network in the city	1135.733
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**9871.63**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	62542
Denominator	Total population of the city	633553
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**1.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	829
Denominator	Total crimes recorded in the same year	62542

Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**395.39**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	2505
Denominator	Total population of the city	633553
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**8.5**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	67961.16
Denominator	Total VAT/GST collection during preceding year	7992.2495
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**10.75**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	272.85
Denominator	Total Professional Tax collection during preceding year	2536.99
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**24.18**
Formula:	*Numerator / Denominator*	

Numerator	(Number of permits issued during the year – Number of permits during preceding year)	990
Denominator	Number of construction permits during preceding year	40.94
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	75467
Denominator	Total labour force in the city	89885
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	2247.125
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**13.04**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	5840
Denominator	Total number of slum and EWS households in the city	447.95
Unit	Percentage	

Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Computable** Data Unavailable
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	25447.84
Denominator	Total population of the city	633553
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**1.7**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	1075378.8
Denominator	Total population of the city	633553
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**14.04**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	31111465

Denominator	Total area of the city (total area of all land uses)	221600000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	633553
Denominator	Area allocated for residential land use (in hectares)	56179273
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**146.75**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	216324
Denominator	Total number of households in the city	147412
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	283657
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**17000**
Description	Total number of sustained electrical interruptions in a	17000

	year	
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.77**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	124188
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	2003.855
Denominator	Total energy consumption from all sources	694900000
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	0
Denominator	Total quantum of water and waste water handled during the period	6450
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	21716776
Denominator	Total number of street light installations	49873
Unit	kWh per light installation	

Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	295524.54
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.62**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	694900000
Denominator	Total population of the city	633553
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	13.638
Denominator	Total area of the city (sq.km)	221.6
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**1.25**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	789
Denominator	Total population of the city	633553
Unit	Number per 1000 persons	
Benchmark	>=0.6	

Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	42
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0.18**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	2
Denominator	Total length of road network in the city	1135.733
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**27.27**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	6
Denominator	Total number of major transport interchanges in the city	22
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0.15
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.36**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	8
Denominator	Total number of major interchanges in the city	22

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	Data Unavailable
Denominator	Total number of signalised intersections in the city	30
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**25**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	1
Denominator	Total available on-street parking spaces in the city	4
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**1.3**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	29.455
Denominator	Total length of road network in the city	2271.466
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**125.93**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	34
Denominator	Total number of junctions/ intersections on major roads in the city	27
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is**	**1.01**

	incorporated in public rights-of-way	
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	3
Denominator	Total number of public right-of-way areas in the city	297
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**88.19**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	130000
Denominator	Total number of households in the city	147412
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**292**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	185
Denominator	Total population of the city	633553
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	Data Unavailable
Denominator	Total number of samples tested for water quality	Data Unavailable
Unit	Percentage	
Benchmark	100%	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	185
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**102.91**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	153364
Denominator	Total number of water connections in the city	149030
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	Data Unavailable
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	Data Unavailable
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	1207
Denominator	Total number of properties in the city	Data Unavailable

Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	7200
Denominator	Total number of properties in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**6.85**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	5
Denominator	Total waste water generated in the city per day	73
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	Data Unavailable
Denominator	Total waste water received at treatment plants per day	5
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**44.02**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	500
Denominator	Total length of road network in the city	1135.733
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**95.66**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	163419
Denominator	Total number of households and establishments in the city	170831
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	278
Denominator	Total quantum of MSW generated in the city	278
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**200**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	16680
Denominator	Average MSW generated in the city (tons per month)	8340
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**2.53**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	2.53
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**13.62**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	13.62

Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**50.89**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	50.886
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	0
Denominator	Total number of noise samples	0
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	480
Denominator	Total number of samples tested	480
Unit	Percentage	
Benchmark	100%

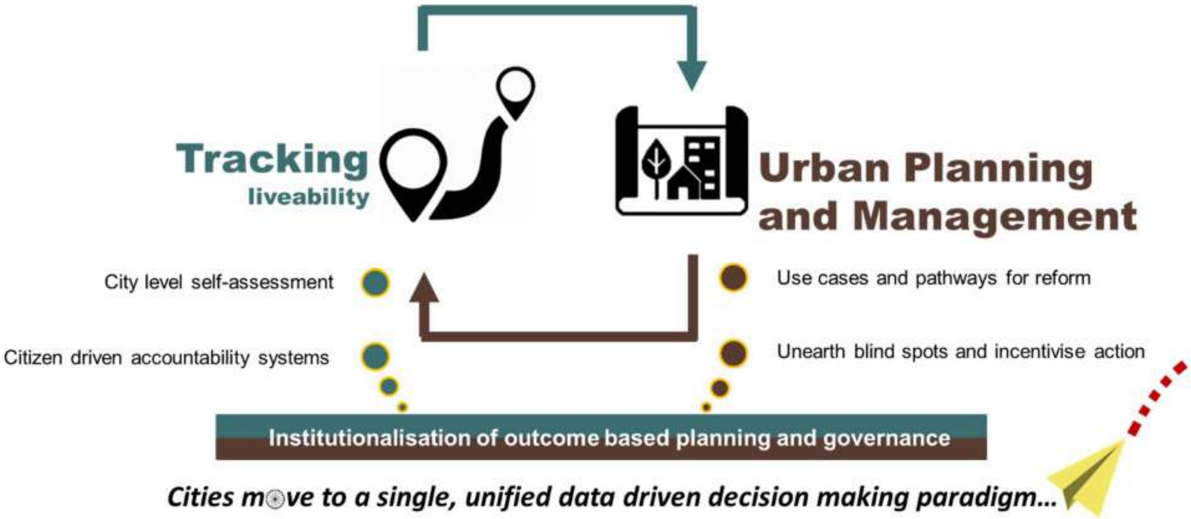
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



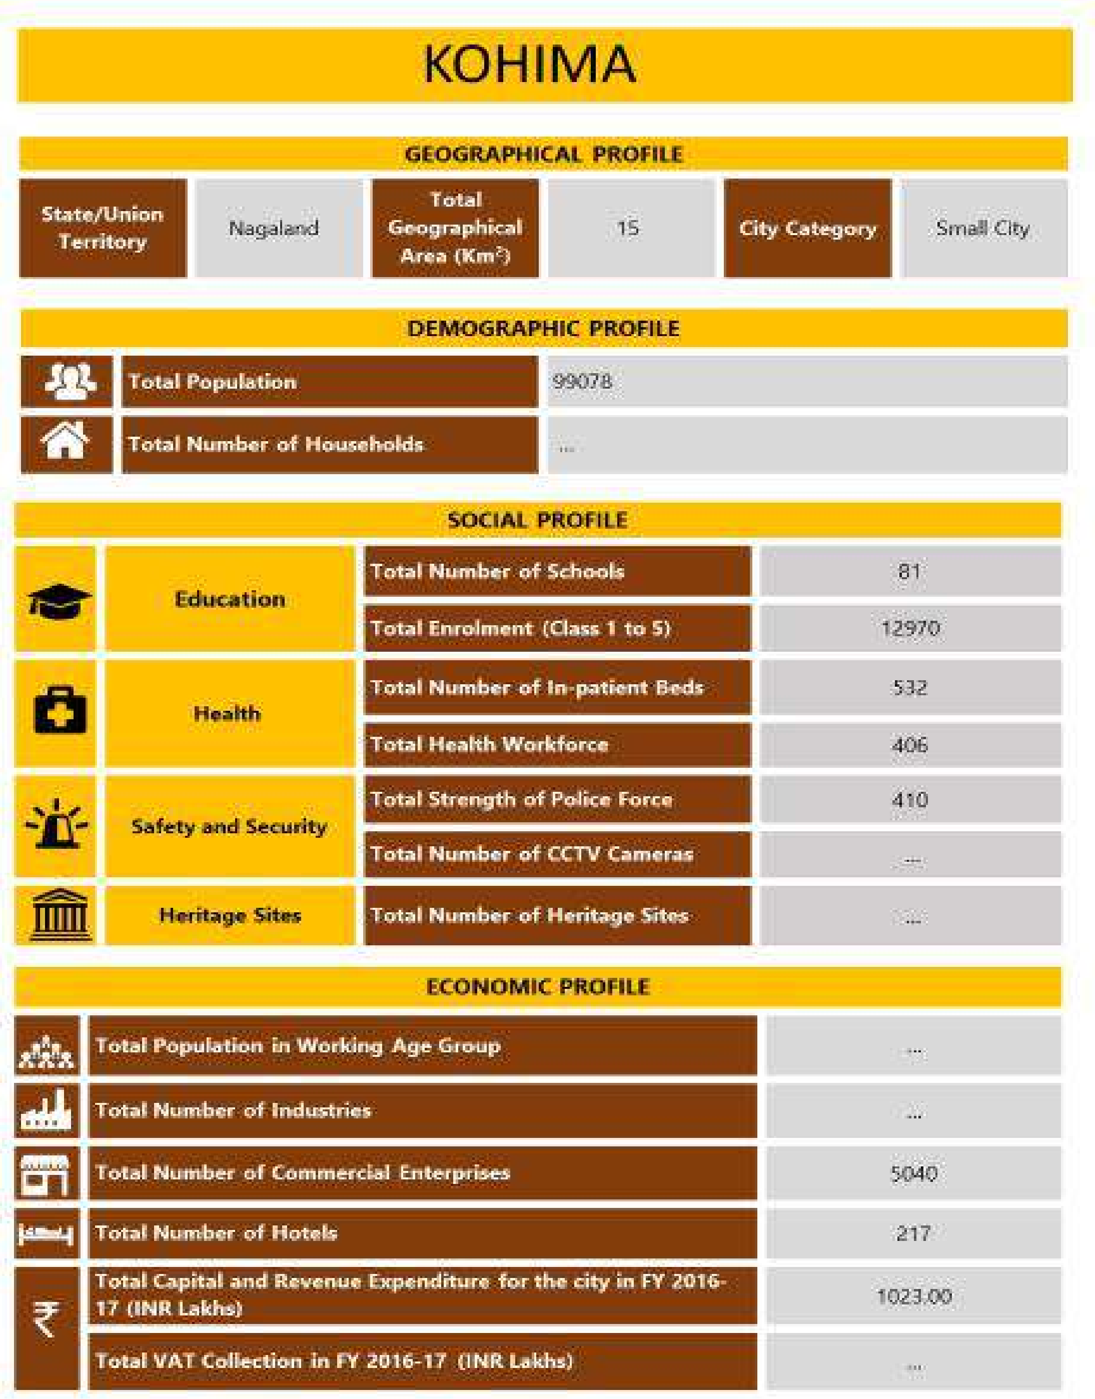
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including

smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



KOHIMA

GEOGRAPHICAL PROFILE

State/Union Territory	Nagaland	Total Geographical Area (Km^2)	15	City Category	Small City

DEMOGRAPHIC PROFILE

Total Population	99078
Total Number of Households	...

SOCIAL PROFILE

Education	Total Number of Schools	81
	Total Enrolment (Class 1 to 5)	12970
Health	Total Number of In-patient Beds	532
	Total Health Workforce	406
Safety and Security	Total Strength of Police Force	410
	Total Number of CCTV Cameras	...

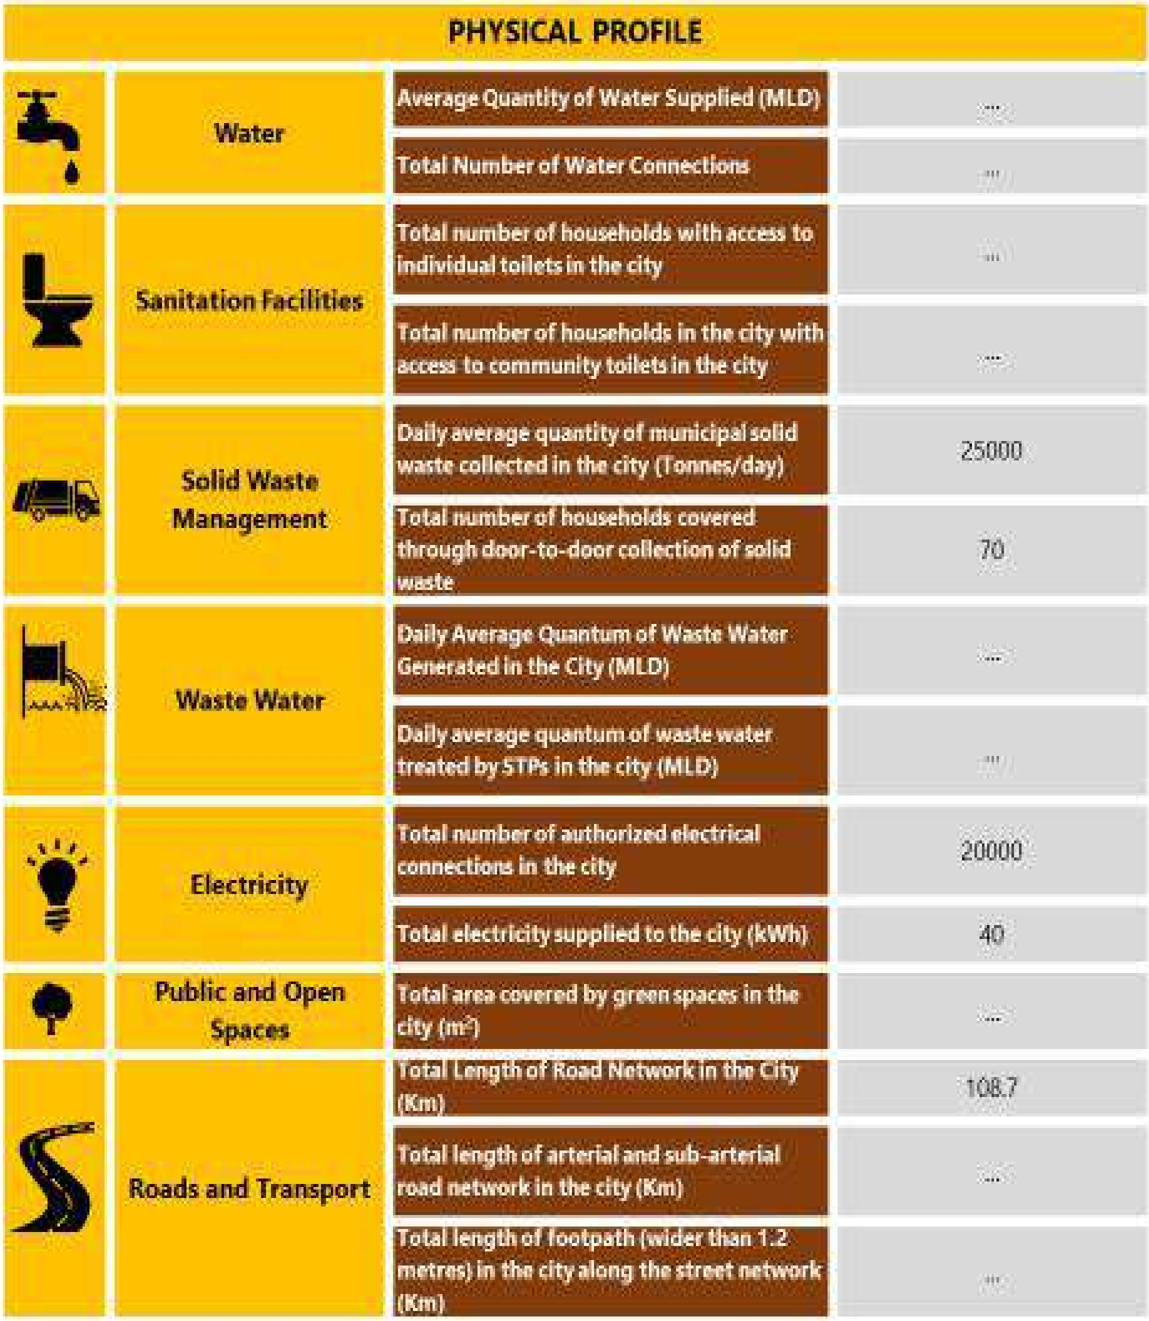
Total VAT Collection in FY 2016-17 (INR Lakhs)	...



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	...
	Total Number of Water Connections	...
Sanitation Facilities	Total number of households with access to individual toilets in the city	...
	Total number of households in the city with access to community toilets in the city	...
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	25000
	Total number of households covered through door-to-door collection of solid waste	70
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	...
	Daily average quantum of waste water treated by STPs in the city (MLD)	...
Electricity	Total number of authorized electrical connections in the city	20000
	Total electricity supplied to the city (kWh)	40
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	...
Roads and Transport	Total Length of Road Network in the City (Km)	108.7
	Total length of arterial and sub-arterial road network in the city (Km)	...
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	...

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration

Pillars of Comprehensive Development	Category	Indicators
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and**	6.1 Increase in VAT/GST collection

Pillars of Comprehensive Development	Category	Indicators
	Employment	6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms

Pillars of Comprehensive Development	Category	Indicators
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility

Pillars of Comprehensive Development	Category	Indicators
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

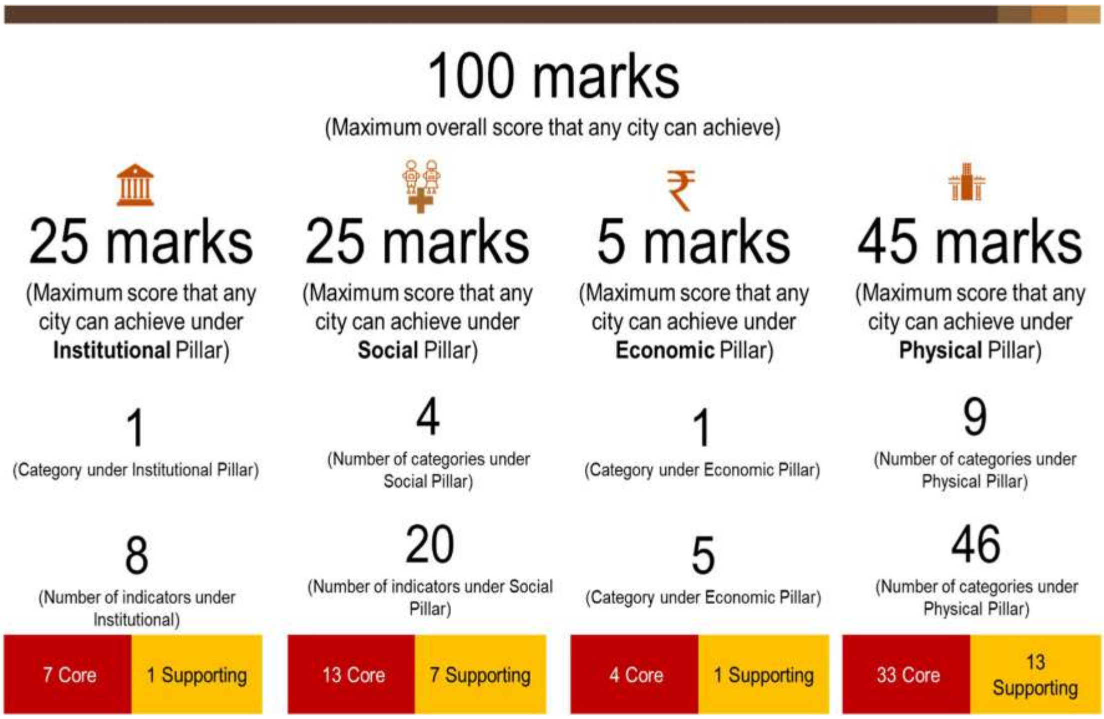
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Municipal Council
Urban Local Body	For Park and Recreation Related Questions	
Urban Local Body	For Water Supply and Drainage related questions	Public Health Engineering
Urban Local Body	For Heritage sites related data	Tourism
Urban Local Body	For Ecological sites related data	Tourism
Urban Local Body	For Housing related data	Department of Housing
Urban Local Body	For Building plan related data	
Urban Local Body	For Roads related data	Public Works Department
Urban Local Body	For Solid waste management related data	Municipal Council
Urban Local Body	For IT services related data	Department of Information and Technology
Urban Local Body	For Vendor committee related data	Municipal Council
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
For questions under Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	

Designated data owners	Subcategories	Data owners at city level
Development Authority	Building Infrastructure	
	Construction planning	
	Green Building	
	Rain water harvesting	
	Universal Design Principle	
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Department of Power
State Disaster management authority	Disaster management	Disaster management
State Education Department		
State Health Department	Health care professionals	Department of Health and Family Welfare
State Health Department	Citizen Services	Department of Health and Family Welfare
State Health Department	Disease Prevalence	Department of Health and Family Welfare
State Health Department	Health Infrastructure	Department of Health and Family Welfare
State Renewable Energy Development Agency		
State Sales / Commercial Taxes Department		Department of Taxes
Town and Country Planning Department	Land Use	
Traffic and Police Department		
Transport Authorities	Buses	Nagaland State Transport
Transport Authorities	Registered Vehicles	Nagaland State Transport
Transport Authorities	Sub urban rail transport	NA
Transport Authorities	Mono Rail Authority	NA
Transport Authorities	Tramways	NA
Transport Authorities	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 9 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register,

signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

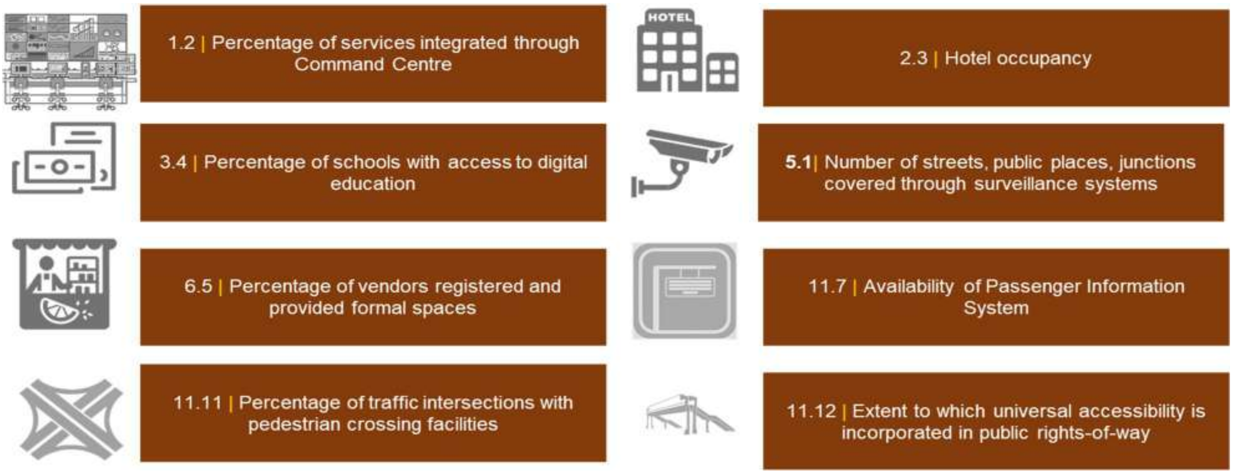
Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	1
DISCOM/Electricity Department	0
Traffic and Police Department	0
Development Authority	0
Pollution Control Board	2
State Renewable Energy Department	1
Town and Country Planning	1
State Health Department	1
Transport Authority	1
Disaster Management	0
Urban Local Body	2
Total	9

* The count of documents is based on first round of submission.

4.4 Data Verification

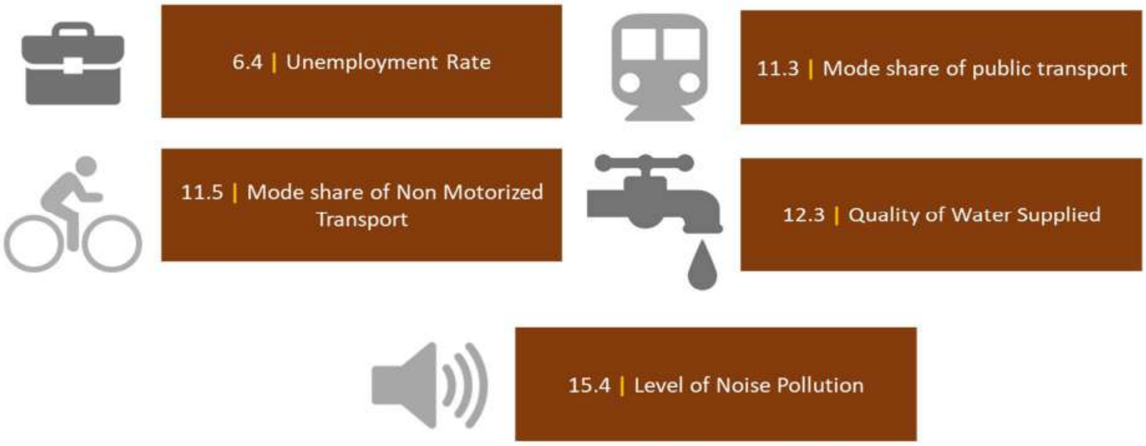
A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre
HOTEL
2.3 | Hotel occupancy
3.4 | Percentage of schools with access to digital education
5.1 | Number of streets, public places, junctions covered through surveillance systems
6.5 | Percentage of vendors registered and provided formal spaces
11.7 | Availability of Passenger Information System
11.11 | Percentage of traffic intersections with pedestrian crossing facilities
11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



6.4 | Unemployment Rate
11.3 | Mode share of public transport
11.5 | Mode share of Non Motorized Transport
12.3 | Quality of Water Supplied
15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**7**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0
	1.1b death certificate	0
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	0.333333333
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0
	1.1i professional tax	0
	1.1j information	0.076923077
	1.1k Grievance redressal	0
	1.1l electricity	0.5
	1.1m Building plan	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**Non-Computable**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	NA
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	NA
	1.3i information	NA
	1.3j electricity	NA
Unit	Percentage	

Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**NC**
Description		
Sub Indicators	1.4a water supply	NA
	1.4b solid waste	NA
	1.4c street lights	NA
	1.4d sewerage	NA
	1.4e professional tax	NA
	1.4f parks and recreational spaces	NA
	1.4g building plan	NA
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	Data Unavailable
Denominator	Total demand raised for the year	Data Unavailable
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**141.4**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	119.79
Denominator	Total O&M cost for providing water supply services during the year	84.72
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**50**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	144121829
Denominator	Total expenditure (revenue and capital accounts) in the same year	288243658
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	Data Unavailable
Denominator	Total number of wards	19
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	Data Unavailable
Denominator	Total number of historic buildings/sites identified	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	Data Unavailable
Denominator	Total number of ecologically important sites identified in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**3**
Description	Average Occupancy rate of Hotels	3

Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	Data Unavailable
Denominator	Total budget of the ULB (capital and revenue)	102300000
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**Non-Computable**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	Data Unavailable
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**82.59**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	21363
Denominator	Total population in the age group of 6-14 years	25865
Unit	Percentage	
Benchmark	100%	

Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**84.06**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	10802
Denominator	Total female population in the age group of 6-14 years	12850
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**19.98**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	12970
Denominator	Total number of teachers available for primary grades (public and private schools)	649
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**98.77**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	80
Denominator	Total number of schools	81
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**112.58**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	112.5811688
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Indicator No: 3.6	**Percentage of students completing secondary education**	**98.3** 7753368
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**53.72**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	532
Denominator	Total population of the city	99039
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**40.99**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	406
Denominator	Total population of the city	99039
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**Non-Computable**
Description	Total response time for health-related distress calls received in the city	Data Unavailable
Unit	Minutes and seconds	
Benchmark	8 minutes	

Indicator No: 4.4	**Period prevalence of water borne diseases**	**3.8**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	3765
Denominator	Total population of the city	99039
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	15
Denominator	Total population of the city	99039
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	Data Unavailable
Denominator	Total length of road network in the city	108.7
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**12.12**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	12

Denominator	Total population of the city	99039
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**200**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	24
Denominator	Total crimes recorded in the same year	12
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**7.07**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	7
Denominator	Total population of the city	99039
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	NC
Denominator	Total VAT/GST collection during preceding year	NC
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	Data Unavailable
Denominator	Total Professional Tax collection during preceding year	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	NC
Denominator	Number of construction permits during preceding year	NC
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	Data Unavailable
Denominator	Total labour force in the city	82583
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	Data Unavailable
Denominator	Total number of vendors in the city	2064.575
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	Data Unavailable
Denominator	Total number of slum and EWS households in the city	13.47
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Computable** Data Unavailable
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	Data Unavailable
Denominator	Total population of the city	99039
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**15.35**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	1520000
Denominator	Total population of the city	99039
Unit	Square metres (sq.m.)	

Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**40.93**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	6140000
Denominator	Total area of the city (total area of all land uses)	15000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	99039
Denominator	Area allocated for residential land use (in hectares)	41290000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	15000
Denominator	Total number of households in the city	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	20000
Denominator	Total number of electricity connections in the city	20000
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**250**
Description	Total number of sustained electrical interruptions in a year	250
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	60
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	Data Unavailable
Denominator	Total energy consumption from all sources	40
Unit	Percentage	
Benchmark	10%	

Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	0
Denominator	Total quantum of water and waste water handled during the period	Data Unavailable
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	Data Unavailable
Denominator	Total number of street light installations	Data Unavailable
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	Data Unavailable
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	Data Unavailable
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	40
Denominator	Total population of the city	99039

Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.43**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	11
Denominator	Total area of the city (sq.km)	15
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**1.16**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	115
Denominator	Total population of the city	99039
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	Data Unavailable
Denominator	Total length of road network in the city	108.7
Unit	Percentage	

Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	Data Unavailable
Denominator	Total number of major transport interchanges in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	Data Unavailable
Denominator	Total number of major interchanges in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronization**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	Data

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

		Unavailable
Denominator	Total number of signalised intersections in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	3
Denominator	Total available on-street parking spaces in the city	Data Unavailable
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	Data Unavailable
Denominator	Total length of road network in the city	217.4
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	Data Unavailable
Denominator	Total number of junctions/ intersections on major roads in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	

Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	Data Unavailable
Denominator	Total number of public right-of-way areas in the city	1
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	552
Denominator	Total number of households in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	Data Unavailable
Denominator	Total population of the city	99039
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	2
Denominator	Total number of samples tested for water quality	10

Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	Data Unavailable
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	Data Unavailable
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	Data Unavailable
Denominator	Total number of properties in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	Data Unavailable
Denominator	Total number of properties in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	Data Unavailable
Denominator	Total waste water generated in the city per day	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	Data Unavailable
Denominator	Total waste water received at treatment plants per day	Data Unavailable
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**Non-**

Formula:	*Numerator / Denominator*	**Computable**
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	Data Unavailable
Denominator	Total length of road network in the city	108.7
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**1.39**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	70
Denominator	Total number of households and establishments in the city	5040
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**35714.29**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	25000
Denominator	Total quantum of MSW generated in the city	70
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	Data Unavailable
Denominator	Average MSW generated in the city (tons per month)	750000
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**0.19**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	0.19
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**4.58**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	4.58
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**114**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	114
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	Data Unavailable
Denominator	Total number of noise samples	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**55.88**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	38
Denominator	Total number of samples tested	68

1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

2.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed

Pillars of Comprehensive Development	Category	Indicators
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases

Pillars of Comprehensive Development	Category	Indicators
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year

Pillars of Comprehensive Development	Category	Indicators
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water

Pillars of Comprehensive Development	Category	Indicators
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

2.2 Scoring and Computing Category Indices of Liveability

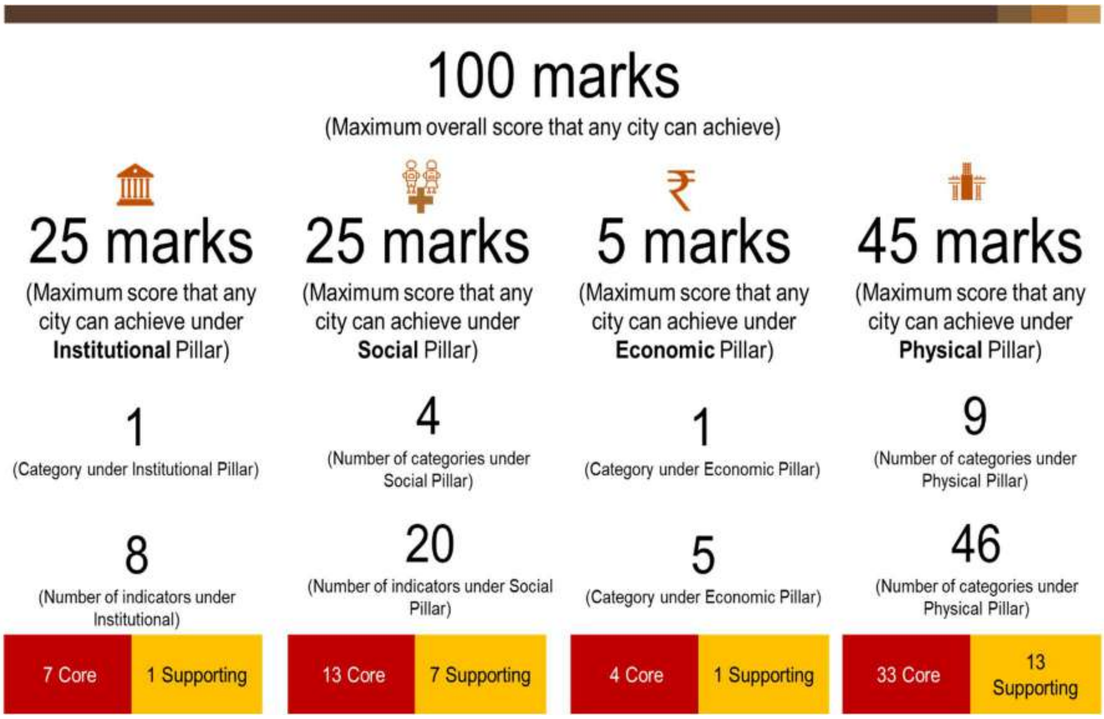
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

2.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under Institutional Pillar)
25 marks
(Maximum score that any city can achieve under Social Pillar)
5 marks
(Maximum score that any city can achieve under Economic Pillar)
45 marks
(Maximum score that any city can achieve under Physical Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks

awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

2.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

3. City Reconnaissance Meetings:

Date	Departments	Key Discussions
07 March 2018 09 March 2018 12 March 2018 13 March 2018	PA to Principal secretary (UD) Joint Secretary Urban Development Department Government of West Bengal	State Workshop schedule
13 March 2018	Additional Director, State Urban Development Agency, West Bengal	State Workshop for liveability Assessment City login
15 March 2018 16 March 2018	PA to Chief Secretary, Office of Chief Secretary	Permission for state workshop Appointing SUDA as nodal agency for liveability assessment
19 March 2018	Director, SUDA, West Bengal	Discussion on whether SUDA has got any intimation from PS/CS office to act as nodal agency
21 March 2018	Principal Secretary (UD) office	Understand the scope of assessment process in WB
22 March 2018	Principal Secretary (UD) Director, SUDA Chief Manager, Planning and Monitoring (SUDA)	Schedule meeting to discuss the Workshop and subsequent requirements for the Liveability Assessment study
23 March 2018	Director, Additional Director and Chief Manager, SUDA	SUDA officials shared that March month was not convenient to organise workshop and 4th April 2018 was scheduled as attentive date for workshop. Files forwarded to Principal Secretary to approve list of participants

Date	Departments	Key Discussions
26 March 2018 27 March 2018 28 March 2018	Director, Additional Director and Chief Manager, SUDA	Follow up to know the Progress on workshop date and assessment process
29 March 2018	Director, SUDA	Inclusion of New Town Kolkata in assessment process
30 March 2018 31 March 2018 2 April 2018	SUDA office	Follow up to initiate assessment process
3 April 2018 (From Consortium Ms. Sujaya Rathi travelled to Kolkata to discuss on liveability assessment process)	Chief Manager, SUDA	Brief note on liveability index was faxed to CS office to expedite the process
4 April 2018 5 April 2018	CS Office , WB PS (UD) office, WB	Follow up to initiate assessment process
6 April 2018	PS Office, WB	SUDA file was marked to Minister of State, Mr Firhad Hakim
7 April 2018 to 15 April 2018	PS (UD) office and SUDA, West Bengal	Follow up to initiate assessment process

State level workshop was necessary to make cities understand the importance and process of liveability assessment. City level assessments didn't happen as State level workshop could not be conducted despite several meetings and follow ups with Urban development department and SUDA at state level.

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary

Pillars of Comprehensive Development	Category	Indicators
		education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian

Pillars of Comprehensive Development	Category	Indicators
		crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

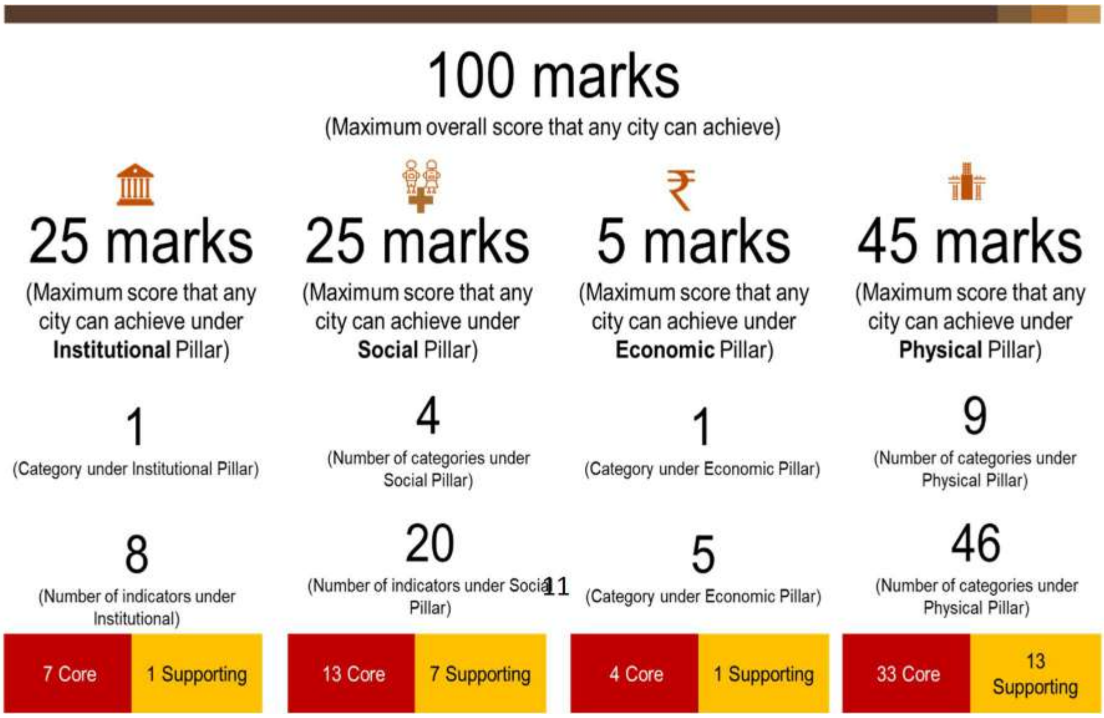
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks

(Maximum score that any city can achieve under **Institutional** Pillar)

1

(Category under Institutional Pillar)

8

(Number of indicators under Institutional)

7 Core | 1 Supporting

25 marks

(Maximum score that any city can achieve under **Social** Pillar)

4

(Number of categories under Social Pillar)

20

(Number of indicators under Social Pillar)

13 Core | 7 Supporting

5 marks

(Maximum score that any city can achieve under **Economic** Pillar)

1

(Category under Economic Pillar)

5

(Category under Economic Pillar)

4 Core | 1 Supporting

45 marks

(Maximum score that any city can achieve under **Physical** Pillar)

9

(Number of categories under Physical Pillar)

46

(Number of categories under Physical Pillar)

33 Core | 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark -\ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled

in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Account department
Urban Local Body	For Park and Recreation Related Questions	Chief Medical And Health Officer
Urban Local Body	For Water Supply and Drainage related questions	Public Health and Engineering Department
Urban Local Body	For Heritage sites related data	Urban Improvement Trust
Urban Local Body	For Ecological sites related data	Tourism department
Urban Local Body	For Housing related data	Town Plan Department
Urban Local Body	For Building plan related data	Town Plan Department
Urban Local Body	For Roads related data	Regional Transport Office
Urban Local Body	For Solid waste management related data	Urban Local Body
Urban Local Body	For IT services related data	Urban Local Body
Urban Local Body	For Vendor committee related data	Urban Local Body
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	NO
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Pollution control board
Development Authority	Building Infrastructure	Town Plan Department
	Construction planning	Town Plan Department
	Green Building	Urban Improvement Trust

Designated data owners	Subcategories	Data owners at city level
	Rain water harvesting	Urban Local Body
	Universal Design Principle	Urban Local Body
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	KDEL department (JVVNL)
State Disaster management authority		Fire brigade
State Education Department		District Education Officer
State Health Department	Health care professionals	Chief Medical And Health Officer
	Citizen Services	Chief Medical And Health Officer
	Disease Prevalence	Chief Medical And Health Officer
	Health Infrastructure	Chief Medical And Health Officer
State Renewable Energy Development Agency		Rajasthan Renewable energy corporation
State Sales / Commercial Taxes Department		Office Joint Commissioner State Commissioner of commerce, Kota
Town and Country Planning Department	Land Use	Town Plan Department
Traffic and Police Department		City SP
Transport Authorities	Buses	Central Bus Stand
	Registered Vehicles	Regional Transport Office
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 21 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**0**
State Education Department	**1**
DISCOM/Electricity Department	**1**
Traffic and Police Department	**1**
Development Authority	**0**
Pollution Control Board	**0**
State Renewable Energy Department	**0**
Town and Country Planning	**0**
State Health Department	**3**
Transport Authority	**3**
Disaster Management	**0**
Urban Local Body	**12**
Total	**21***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

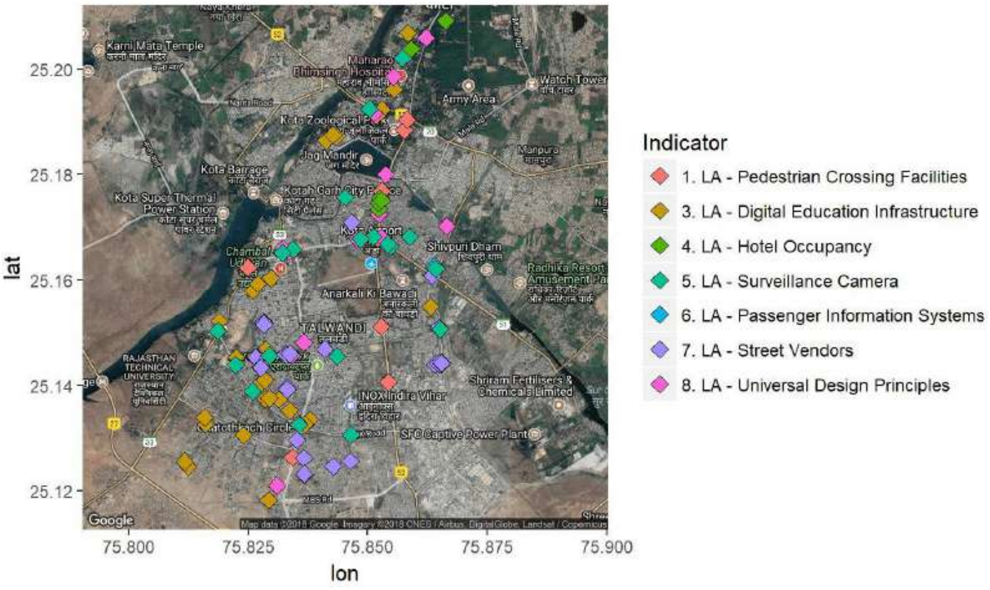
11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.



lat

75.900
Indicator
1. LA - Pedestrian Crossing Facilities
3. LA - Digital Education Infrastructure
4. LA - Hotel Occupancy
5. LA - Surveillance Camera
6. LA - Passenger Information Systems
7. LA - Street Vendors
8. LA - Universal Design Principles

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title

Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**53.52**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	1
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	1
	1.1i professional tax	0
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.111111111

Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**19.05**
Description	Services integrated through an integrated or a singular operations command centre	4
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**5.89**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	NA
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	NA
	1.3i information	NA
	1.3j electricity	0.058935401
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**NC**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0

	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	NA
Denominator	Total demand raised for the year	NA
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**918.39**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	2746
Denominator	Total O&M cost for providing water supply services during the year	299
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**49.23**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	61215
Denominator	Total expenditure (revenue and capital accounts) in the same year	124342
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	Data Unavailable
Denominator	Total number of wards	65

Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	4
Denominator	Total number of historic buildings/sites identified	4
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	Data Unavailable
Denominator	Total number of ecologically important sites identified in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.82**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	355
Denominator	Total budget of the ULB (capital and revenue)	43400
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	

Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**2**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	2
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**82.37**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	151766
Denominator	Total population in the age group of 6-14 years	184252
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**60.73**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	51826
Denominator	Total female population in the age group of 6-14 years	85340
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**23.69**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	98401
Denominator	Total number of teachers available for primary grades (public and private schools)	4153
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**16.08**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	133
Denominator	Total number of schools	827

Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**914.72**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	914.7229836
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**98.53**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	309723912
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**22.87**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	2291
Denominator	Total population of the city	1001694
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**2.14**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	214
Denominator	Total population of the city	1001694
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**30**
Description	Total response time for health-related distress calls received in the city	30
Unit	Minutes and seconds	
Benchmark	8 minutes	

Indicator No: 4.4	**Period prevalence of water borne diseases**	**9.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	93484
Denominator	Total population of the city	1001694
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.17**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	1733
Denominator	Total population of the city	1001694
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	9
Denominator	Total length of road network in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**783.77**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	7851
Denominator	Total population of the city	1001694
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**11.85**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	930
Denominator	Total crimes recorded in the same year	7851
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**9.28**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	93
Denominator	Total population of the city	1001694
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**10.15**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	6820
Denominator	Total VAT/GST collection during preceding year	672.04
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 6.3	**Increase in issuance of Construction Permits**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	NC
Denominator	Number of construction permits during preceding year	6.21
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	Data Unavailable
Denominator	Total labour force in the city	184252
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	Data Unavailable
Denominator	Total number of vendors in the city	4606.3
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**3.29**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	3554
Denominator	Total number of slum and EWS households in the city	1081.43

Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Compuatble**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	Data Unavailable
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	Data Unavailable
Denominator	Total population of the city	1001694
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	Data Unavailable
Denominator	Total population of the city	1001694
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	0
Denominator	Total area of the city (total area of all land uses)	12436000000

Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1001694
Denominator	Area allocated for residential land use (in hectares)	123850472
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**80.47**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	163362
Denominator	Total number of households in the city	203000
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**15.9**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	30471
Denominator	Total number of electricity connections in the city	191659
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**1651**
Description	Total number of sustained electrical interruptions in a year	1651
Unit	Number	

Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	97
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	1000
Denominator	Total energy consumption from all sources	1202110000
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	0
Denominator	Total quantum of water and waste water handled during the period	8430
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	Data Unavailable
Denominator	Total number of street light installations	Data Unavailable

Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	Data Unavailable
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.49**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1202110000
Denominator	Total population of the city	1001694
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	787
Denominator	Total area of the city (sq.km)	12436
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.77**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	769
Denominator	Total population of the city	1001694
Unit	Number per 1000 persons	
Benchmark	>=0.6	

Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	20
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	NA
Denominator	Total length of road network in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	Data Unavailable
Denominator	Total number of major transport interchanges in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	NA
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	Data Unavailable
Denominator	Total number of major interchanges in the city	Data Unavailable

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**50**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	3
Denominator	Total number of signalised intersections in the city	6
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	Data Unavailable
Denominator	Total available on-street parking spaces in the city	Data Unavailable
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	Data Unavailable
Denominator	Total length of road network in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	Data Unavailable
Denominator	Total number of junctions/ intersections on major roads in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	

Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**30**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	3
Denominator	Total number of public right-of-way areas in the city	10
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**68.74**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	139547
Denominator	Total number of households in the city	203000
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**270.54**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	271
Denominator	Total population of the city	1001694
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied[2]**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	9223
Denominator	Total number of samples tested for water quality	9266
Unit	Percentage	
Benchmark	100%	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	NA
Denominator	Quantum of water put into the distribution system (mld)	271
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	148150
Denominator	Total number of water connections in the city	148150
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	Data Unavailable
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	637
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	5619
Denominator	Total number of properties in the city	Data Unavailable

Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	10000
Denominator	Total number of properties in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**18.52**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	20
Denominator	Total waste water generated in the city per day	108
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	10
Denominator	Total waste water received at treatment plants per day	10
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	Data Unavailable
Denominator	Total length of road network in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**113.3**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	230000
Denominator	Total number of households and establishments in the city	203000
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	600
Denominator	Total quantum of MSW generated in the city	600
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**10**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	1800
Denominator	Average MSW generated in the city (tons per month)	18000
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**8**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	8
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**27**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	27
Unit	µg/m3	

Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**130**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	130
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	26
Denominator	Total number of noise samples	26
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	40
Denominator	Total number of samples tested	40
Unit	Percentage	
Benchmark	100%

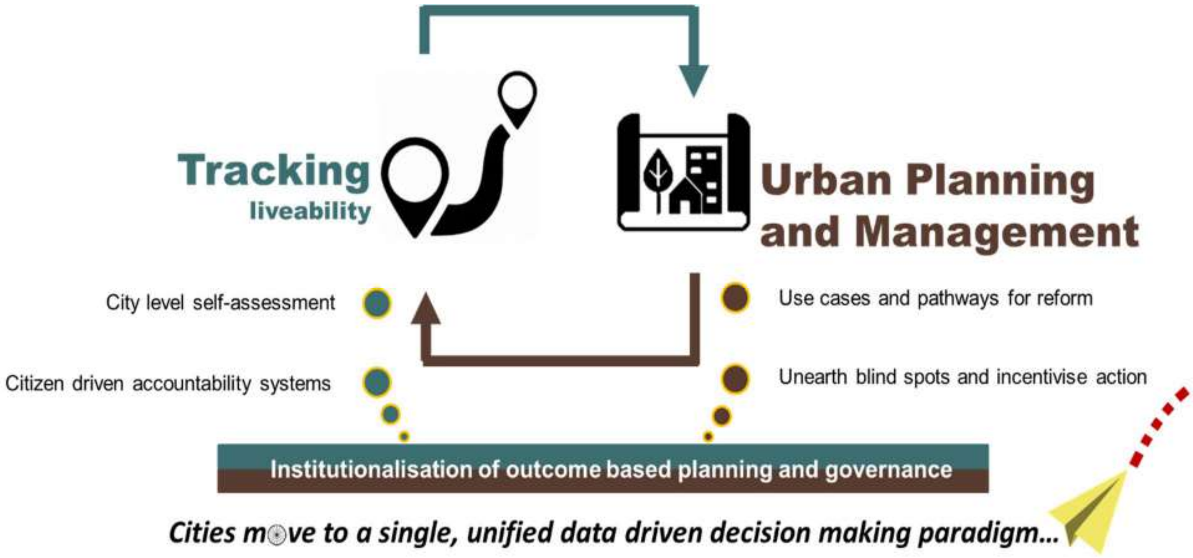
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

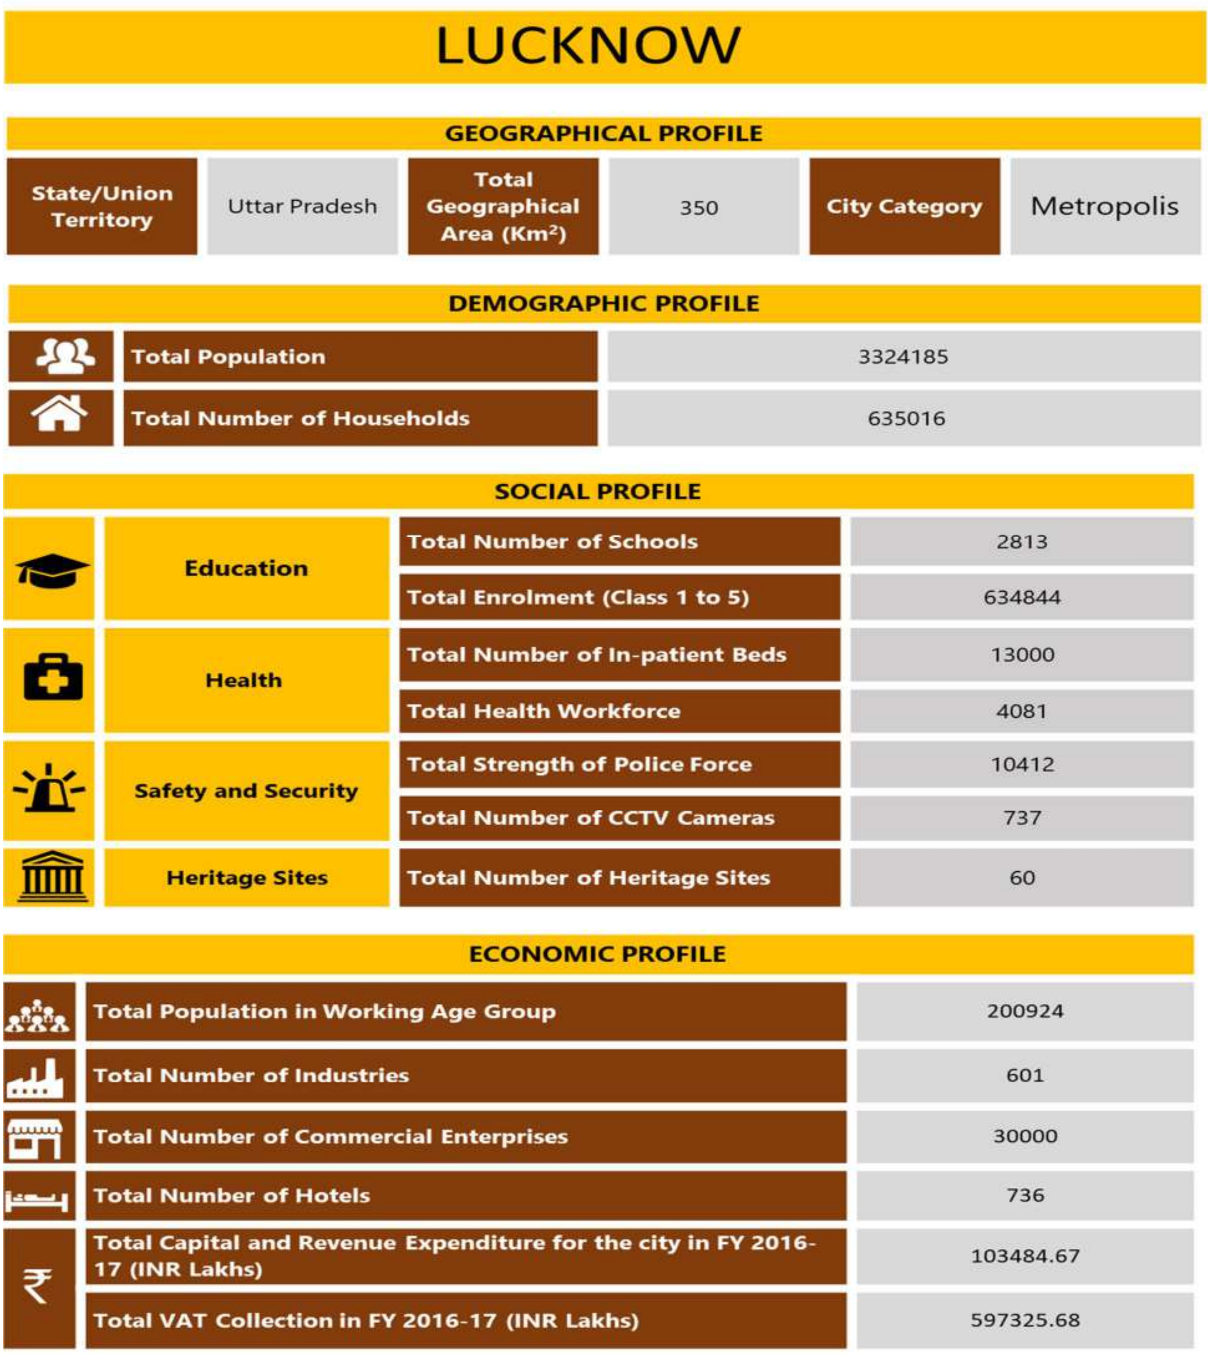


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



LUCKNOW

GEOGRAPHICAL PROFILE

State/Union Territory	Uttar Pradesh	Total Geographical Area (Km²)	350	City Category	Metropolis

DEMOGRAPHIC PROFILE

Total Population	3324185
Total Number of Households	635016

SOCIAL PROFILE

Education	Total Number of Schools	2813
	Total Enrolment (Class 1 to 5)	634844
Health	Total Number of In-patient Beds	13000
	Total Health Workforce	4081
Safety and Security	Total Strength of Police Force	10412
	Total Number of CCTV Cameras	737
Heritage Sites	Total Number of Heritage Sites	60

ECONOMIC PROFILE

Total Population in Working Age Group	200924
Total Number of Industries	601
Total Number of Commercial Enterprises	30000
Total Number of Hotels	736
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	103484.67
Total VAT Collection in FY 2016-17 (INR Lakhs)	597325.68

PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	691
	Total Number of Water Connections	374141
Sanitation Facilities	Total number of households with access to individual toilets in the city	572784
	Total number of households in the city with access to community toilets in the city	15240
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	868
	Total number of households covered through door-to-door collection of solid waste	576719
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	720
	Daily average quantum of waste water treated by STPs in the city (MLD)	401
Electricity	Total number of authorized electrical connections in the city	794709
	Total electricity supplied to the city (kWh)	6170479000
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	5995103.69
Roads and Transport	Total Length of Road Network in the City (Km)	3700.26
	Total length of arterial and sub-arterial road network in the city (Km)	3700.26
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	351

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies

Pillars of Comprehensive Development	Category	Indicators
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita

Pillars of Comprehensive Development	Category	Indicators
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced	15.1 Concentration of SO2- air pollution

Pillars of Comprehensive Development	Category	Indicators
	Pollution	15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

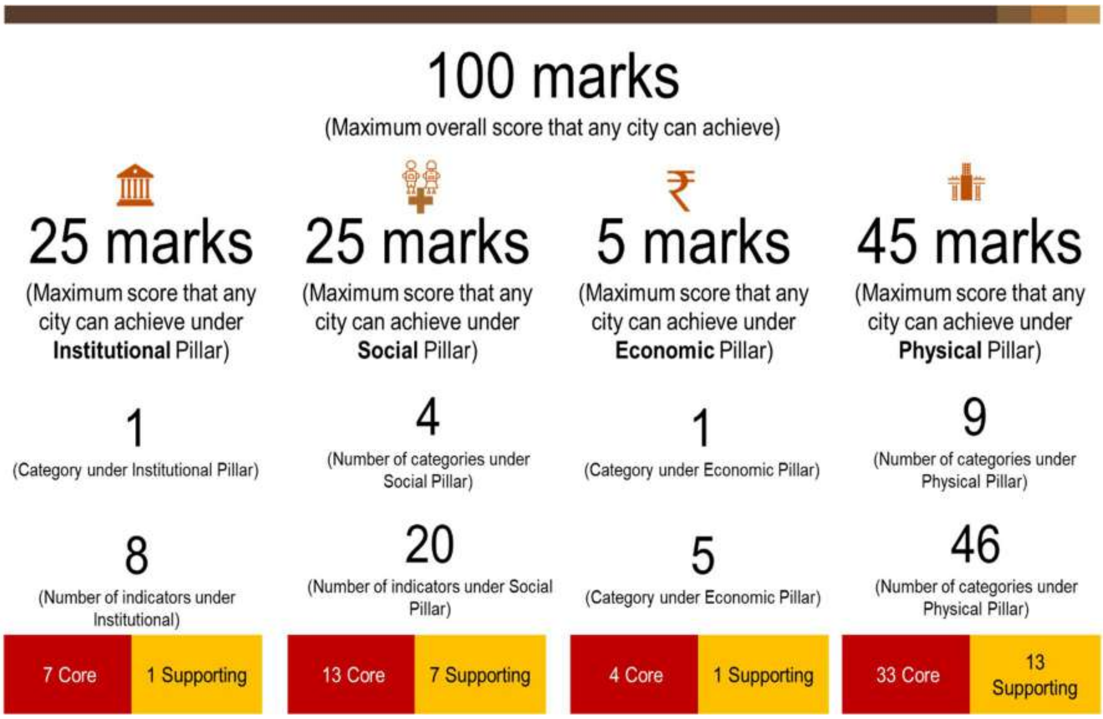
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring. The list of benchmarks is presented in Annexure 1.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning

department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	MFO, Lucknow Nagar Nigam
Urban Local Body	For Park and Recreation Related Questions	Garden Drpartment, Lucknow Nagar Nigam
Urban Local Body	For Water Supply and Drainage related questions	GPCU
Urban Local Body	For Heritage sites related data	Uttar Pradesh State Archeological Department
Urban Local Body	For Ecological sites related data	Lucknow Nagar Nigam
Urban Local Body	For Housing related data	DUDA
Urban Local Body	For Building plan related data	Lucknow Development Authority
Urban Local Body	For Roads related data	Engineering Department, Lucknow Nagar Nigam
Urban Local Body	For Solid waste management related data	Lucknow Nagar Nigam
Urban Local Body	For IT services related data	Lucknow Nagar Nigam
Urban Local Body	For Vendor committee related data	Lucknow Nagar Nigam
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	DUDA, LDA, Water works deptt.
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Uttar Pradesh Pollution Control Board
Development Authority	Building Infrastructure	Lucknow Development Authority

Designated data owners	Subcategories	Data owners at city level
	Construction planning	Lucknow Development Authority
	Green Building	Lucknow Development Authority
	Rain water harvesting	Lucknow Development Authority
	Universal Design Principle	Lucknow Development Authority
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Lucknow Electricity Supply Administration
State Disaster management authority		Nodal Officer/ADM
State Education Department		Basic Education Department Lucknow
State Health Department	Health care professionals	CMO Office
	Citizen Services	CMO Office
	Disease Prevalence	CMO Office
	Health Infrastructure	CMO Office
State Renewable Energy Development Agency	Renewable Energy	UP New energy Development Agency
State Sales / Commercial Taxes Department		Commercial Tax Department
Town and Country Planning Department	Land Use	Town and Country Planning
Traffic and Police Department		DCRB
Transport Authorities	Buses	Lucknow City Transport Service Limited
	Registered Vehicles	RTO office
	Sub urban rail transport	N.A
	Mono Rail Authority	N.A
	Tramways	N.A
	Marine Transport Authority	N.A

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 50 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**1**
State Education Department	**1**
DISCOM/Electricity Department	**3**
Traffic and Police Department	**7**
Development Authority	**1**
Pollution Control Board	**2**
State Renewable Energy Department	**0**
Town and Country Planning	**1**
State Health Department	**1**
Transport Authority	**8**
Disaster Management	**0**
Urban Local Body	**25**
Total	**50***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

7. LA - Street Vendors
8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**55.23**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	0
	1.1d solid waste management	0.5
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	0
	1.1j information	0.846153846
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.333333333
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**21.43**
Description	Services integrated through an integrated or a singular operations command centre	4.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**0.81**

Description		
Sub Indicators	1.3a Building plan	5.06736E-05
	1.3b Birth/Death Certificate	0.002773119
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	0.029092193
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.002611842
	1.3i information	0.00574029
	1.3j electricity	NA
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**3.42**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	20.5
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**75.85**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	20099.58
Denominator	Total demand raised for the year	26500
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**3717.66**

Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	11947.43
Denominator	Total O&M cost for providing water supply services during the year	321.37
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**-375.58**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-93518.56
Denominator	Total expenditure (revenue and capital accounts) in the same year	24899.55
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	110
Denominator	Total number of wards	110
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**28.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	17
Denominator	Total number of historic buildings/sites identified	60
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0

Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**56.83**
Description	Average Occupancy rate of Hotels	56.83333333
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	8.5
Denominator	Total budget of the ULB (capital and revenue)	103484.67
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**18**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	18
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**170.71**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	879055
Denominator	Total population in the age group of 6-14 years	514931
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**180.45**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	439608

Denominator	Total female population in the age group of 6-14 years	243619
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**140.83**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	634844
Denominator	Total number of teachers available for primary grades (public and private schools)	4508
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	1
Denominator	Total number of schools	2813
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**128.78**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	128.779004
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**132.27**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	6400435536
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**46.15**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	13000
Denominator	Total population of the city	2817105
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**14.49**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	4081
Denominator	Total population of the city	2817105
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**Non-Computable**
Description	Total response time for health-related distress calls received in the city	Data Unavailable
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**5.75**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	161962
Denominator	Total population of the city	2817105
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.11**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	3163
Denominator	Total population of the city	2817105

Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**19.92**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	737
Denominator	Total length of road network in the city	3700.26
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**934.97**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	26339
Denominator	Total population of the city	2817105
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**16.17**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	4259
Denominator	Total crimes recorded in the same year	26339
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**18.17**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	512
Denominator	Total population of the city	2817105
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**18.82**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	94612.52
Denominator	Total VAT/GST collection during preceding year	5027.1316
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-11.87**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-211
Denominator	Number of construction permits during preceding year	17.78
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	11278
Denominator	Total labour force in the city	514931
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**1.55**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	205
Denominator	Total number of vendors in the city	13235
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**11.18**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	16736
Denominator	Total number of slum and EWS households in the city	1497.55
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**3.5**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	113640759782000
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**2.13**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	5995103.69
Denominator	Total population of the city	2817105
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**4.14**
Formula:	*Numerator / Denominator*	

Numerator	Total area of public and recreational places (sq.m.)	11651815.6
Denominator	Total population of the city	2817105
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**2.85**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	9984800
Denominator	Total area of the city (total area of all land uses)	350000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	2817105
Denominator	Area allocated for residential land use (in hectares)	333950000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**108.23**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	687253
Denominator	Total number of households in the city	635016
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**

Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	794709
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**148**
Description	Total number of sustained electrical interruptions in a year	148
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	5442
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	2714
Denominator	Total energy consumption from all sources	6170479000
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	51.6525
Denominator	Total quantum of water and waste water handled during the period	32760
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.3**

Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	88767360
Denominator	Total number of street light installations	117607
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.22**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	6170479000
Denominator	Total population of the city	2817105
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	1075.5
Denominator	Total area of the city (sq.km)	350
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.18**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	502
Denominator	Total population of the city	2817105
Unit	Number per 1000 persons	
Benchmark	>=0.6	

Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	4
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**1.6**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	59.21
Denominator	Total length of road network in the city	3700.26
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**58.33**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	7
Denominator	Total number of major transport interchanges in the city	12
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	34.38
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.83**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	10
Denominator	Total number of major interchanges in the city	12
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are	0

[1] The data for this indicator will be computed based on the primary data which is currently being collected

	synchronised	
Denominator	Total number of signalised intersections in the city	65
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**0.42**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	36
Denominator	Total available on-street parking spaces in the city	8640
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**4.74**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	351
Denominator	Total length of road network in the city	7400.52
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**106.86**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	109
Denominator	Total number of junctions/ intersections on major roads in the city	102
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**17.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	160
Denominator	Total number of public right-of-way areas in the city	940
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**58.92**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	374141
Denominator	Total number of households in the city	635016
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**245.29**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	691
Denominator	Total population of the city	2817105
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	3047
Denominator	Total number of samples tested for water quality	3191
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**21.27**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	147
Denominator	Quantum of water put into the distribution system (mld)	691
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	0
Denominator	Total number of water connections in the city	374141
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	Data Unavailable
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	3
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**111.29**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	618625
Denominator	Total number of properties in the city	555845
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**100.01**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	555876
Denominator	Total number of properties in the city	555845
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**55.69**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	401
Denominator	Total waste water generated in the city per day	720
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	401

Denominator	Total waste water received at treatment plants per day	401
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**3.13**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	116
Denominator	Total length of road network in the city	3700.26
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**92.74**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	616719
Denominator	Total number of households and establishments in the city	665016
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	868
Denominator	Total quantum of MSW generated in the city	868
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**4.97**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	1294
Denominator	Average MSW generated in the city (tons per month)	26040
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**8.64**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	8.64
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**43.79**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	43.79
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**205.6**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	205.6
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	NA
Denominator	Total number of noise samples	7100
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	24
Denominator	Total number of samples tested	24
Unit	Percentage	
Benchmark	100%

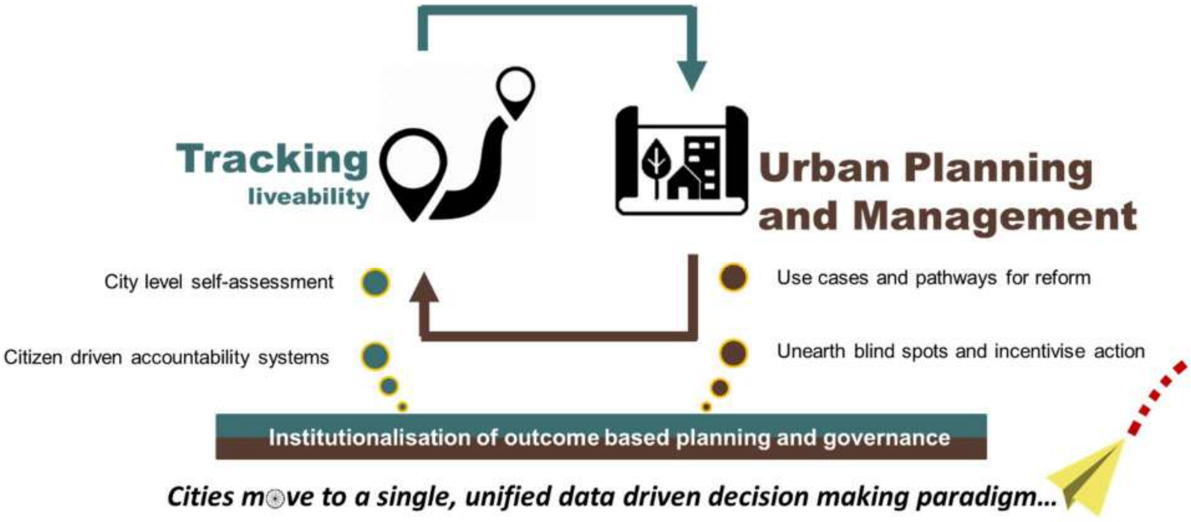
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

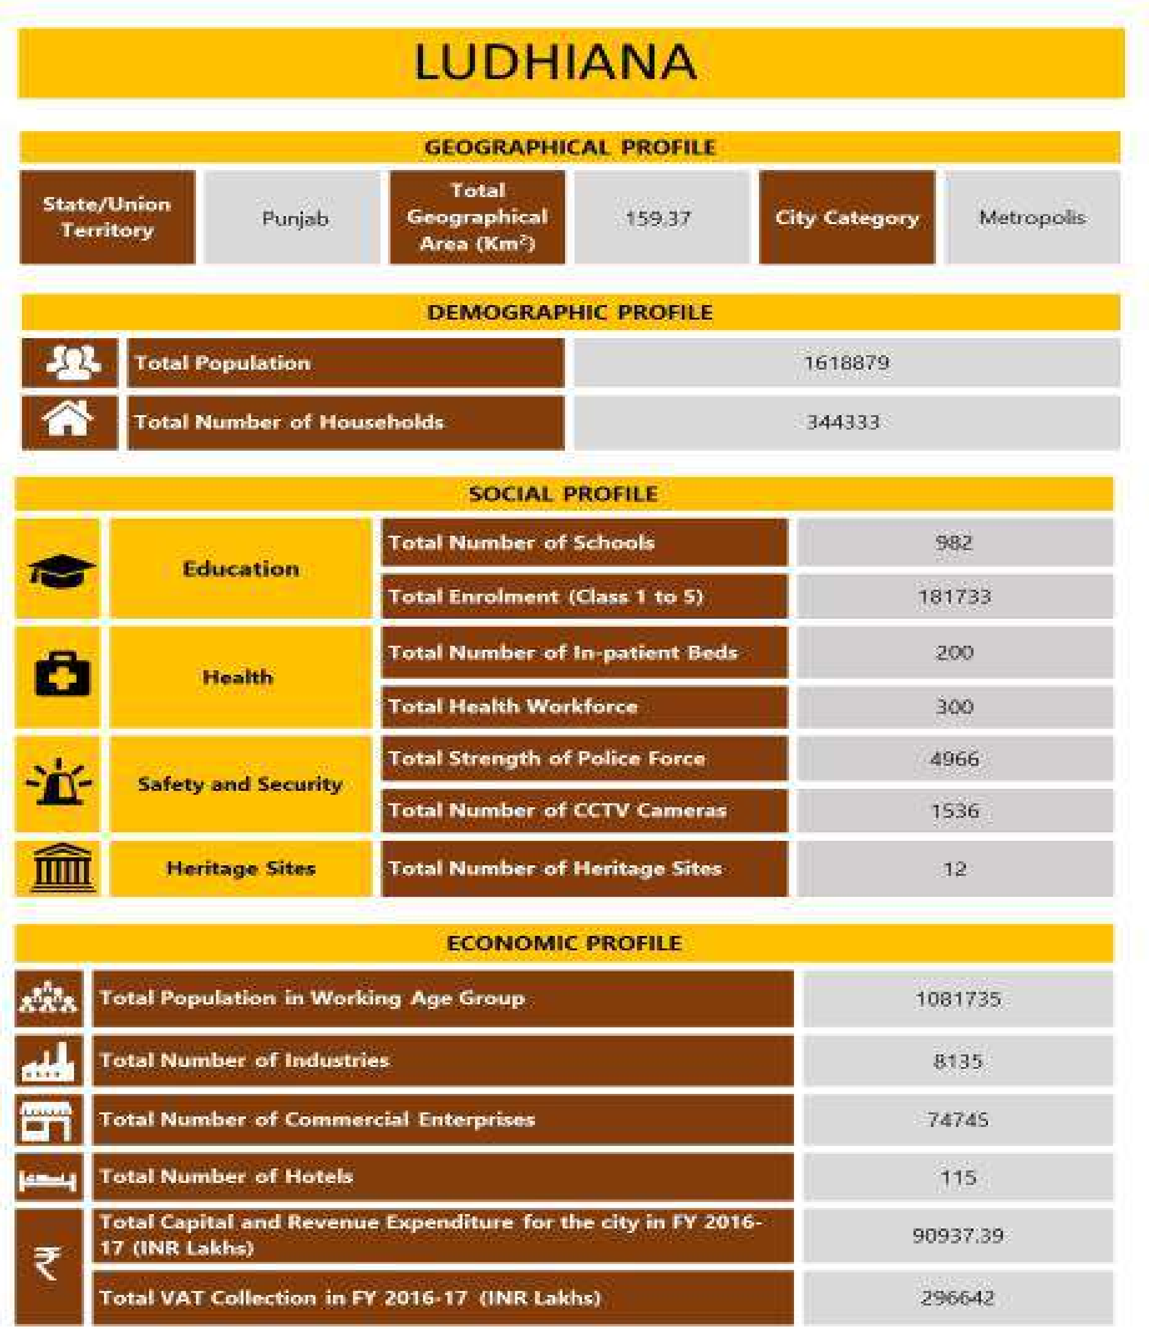


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



LUDHIANA

GEOGRAPHICAL PROFILE

State/Union Territory	Punjab	Total Geographical Area (Km²)	159.37	City Category	Metropolis

DEMOGRAPHIC PROFILE

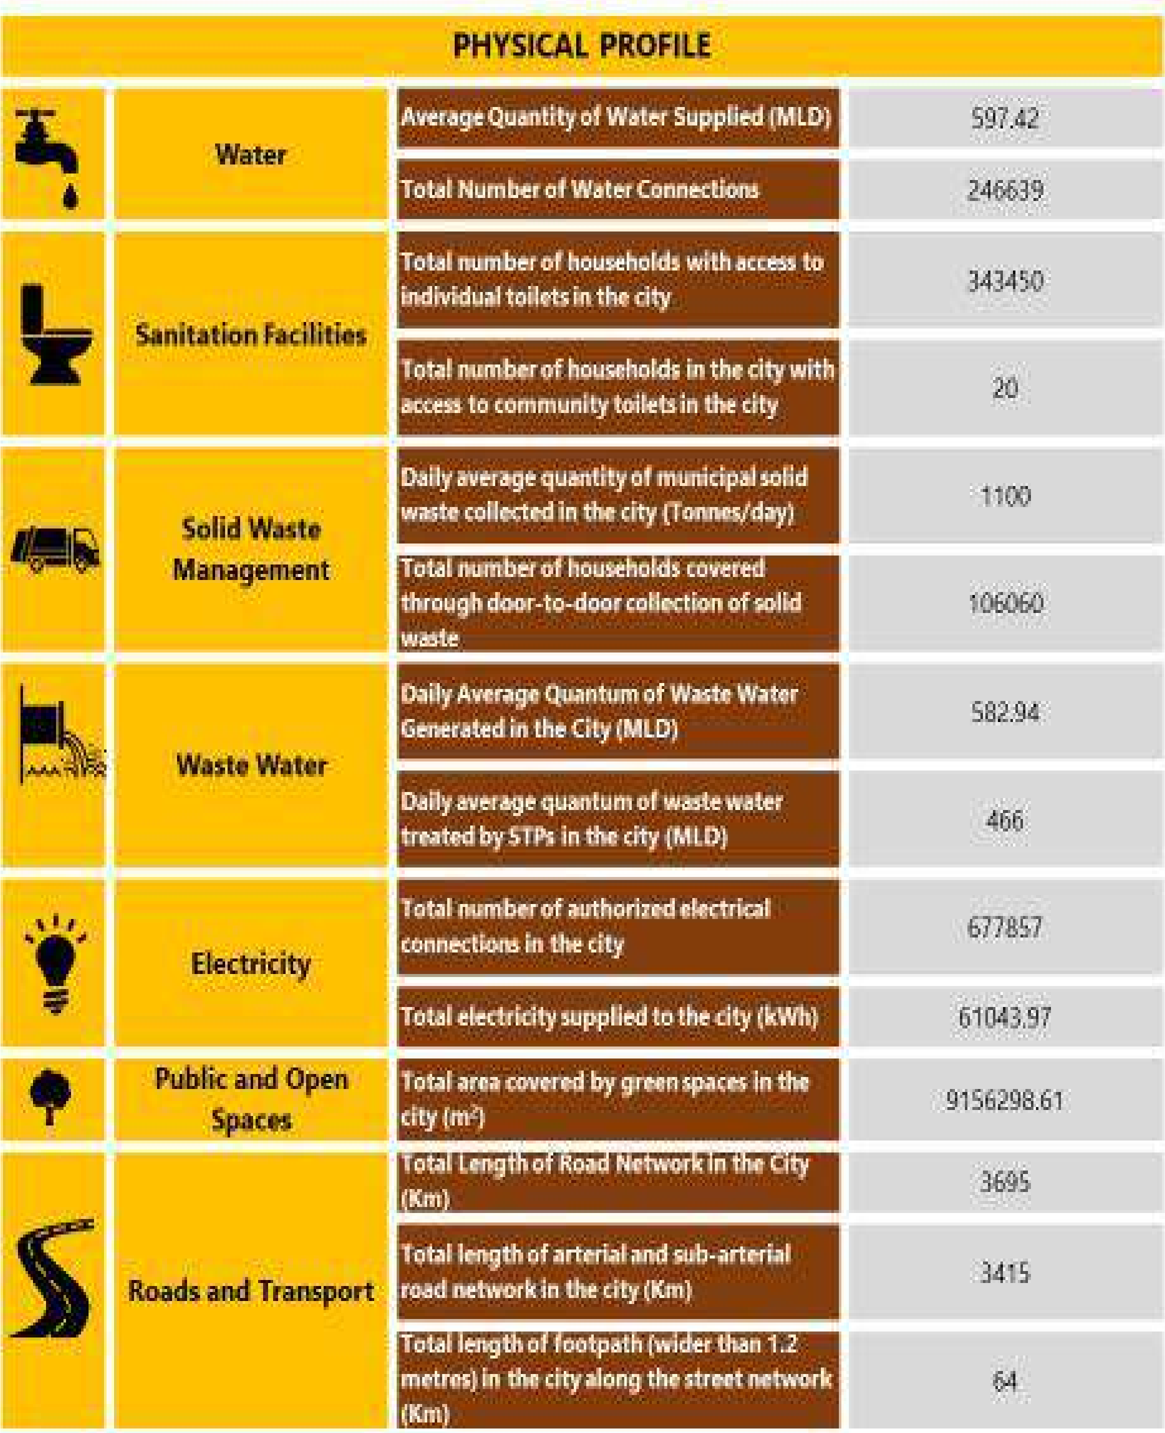
Total Population	1618879
Total Number of Households	344333

SOCIAL PROFILE

Education	Total Number of Schools	982
	Total Enrolment (Class 1 to 5)	181733
Health	Total Number of In-patient Beds	200
	Total Health Workforce	300
Safety and Security	Total Strength of Police Force	4966
	Total Number of CCTV Cameras	1536
Heritage Sites	Total Number of Heritage Sites	12

ECONOMIC PROFILE

Total Population in Working Age Group	1081735
Total Number of Industries	8135
Total Number of Commercial Enterprises	74745
Total Number of Hotels	115
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	90937.39
Total VAT Collection in FY 2016-17 (INR Lakhs)	296642



PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	597.42
	Total Number of Water Connections	246639
Sanitation Facilities	Total number of households with access to individual toilets in the city	343450
	Total number of households in the city with access to community toilets in the city	20
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	1100
	Total number of households covered through door-to-door collection of solid waste	106060
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	582.94
	Daily average quantum of waste water treated by STPs in the city (MLD)	466
Electricity	Total number of authorized electrical connections in the city	677857
	Total electricity supplied to the city (kWh)	61043.97
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	9156298.61
Roads and Transport	Total Length of Road Network in the City (Km)	3695
	Total length of arterial and sub-arterial road network in the city (Km)	3415
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	64

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city

Pillars of Comprehensive Development	Category	Indicators
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	Compactness	
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW

Pillars of Comprehensive Development	Category	Indicators
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

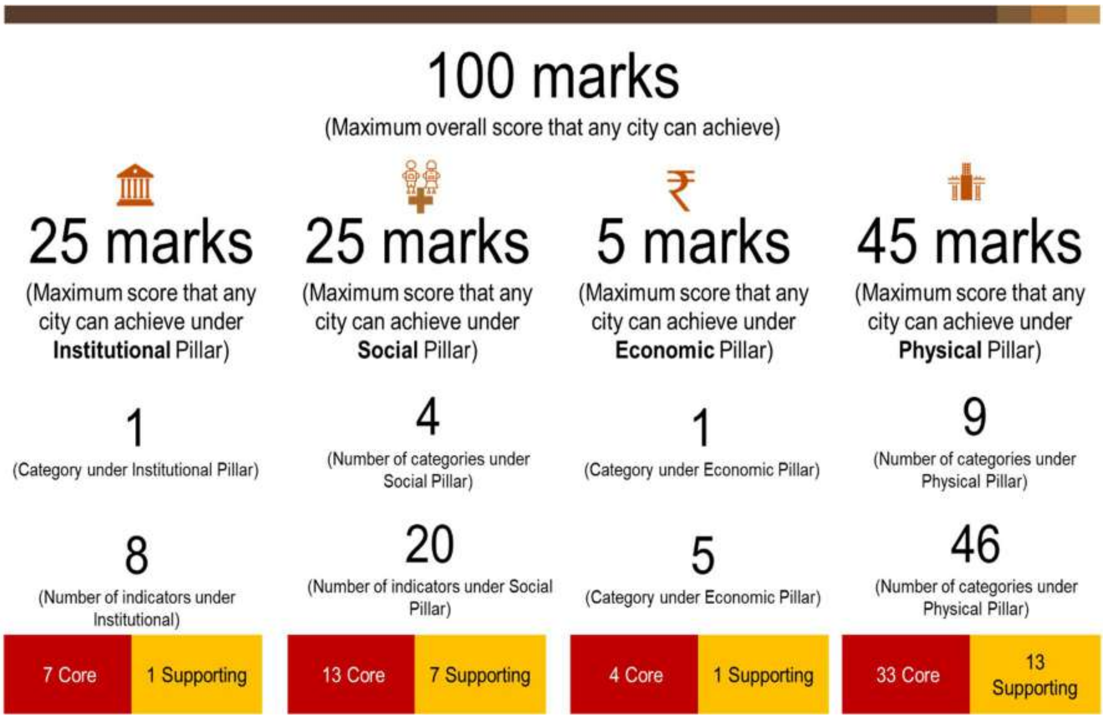
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts Department, Municipal Corporation Ludhiana
Urban Local Body	For Park and Recreation Related Questions	Horticulture Department, Municipal Corporation Ludhiana
Urban Local Body	For Water Supply and Drainage related questions	Water Supply and Sewerage, Municipal Corporation Ludhiana
Urban Local Body	For Heritage sites related data	No heritage sites available in Ludhiana
Urban Local Body	For Ecological sites related data	No ecological sites available in Ludhiana
Urban Local Body	For Housing related data	Census Department, Municipal Corporation Ludhiana
Urban Local Body	For Building plan related data	Municipal Town Planning, Municipal Corporation Ludhiana
Urban Local Body	For Roads related data	B&R Department, Municipal Corporation Ludhiana
Urban Local Body	For Solid waste management related data	Municipal Health and Sanitation Wing, Municipal Corporation Ludhiana
Urban Local Body	For IT services related data	IT department, Municipal Corporation Ludhiana
Urban Local Body	For Vendor committee related data	Tehbazari Department, Municipal Corporation Ludhiana
Urban Local Body	Any other departments involved in providing data for questions mentioned under	• District Sports Office • Employment Exchange • District Transport Office

Designated data owners	Subcategories	Data owners at city level
	Urban Local Body	• Traffic and Police Department • Property Tax Department
For questions under Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Punjab Pollution Control Board
Development Authority	Building Infrastructure	District Town Planning
	Construction planning	District Town Planning
	Green Building	District Town Planning
	Rain water harvesting	District Town Planning
	Universal Design Principle	District Town Planning
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Punjab State Power Corporation Limited
State Disaster management authority		Revenue Department
State Education Department		State Education Department
State Health Department	Health care professionals	State Health Department
State Health Department	Citizen Services	State Health Department
State Health Department	Disease Prevalence	State Health Department
State Health Department	Health Infrastructure	State Health Department
State Renewable Energy Development Agency		Punjab Energy Development Agency
State Sales / Commercial Taxes Department		Excise Department and Taxations Department, Ludhiana
Town and Country Planning Department	Land Use	District and Town Planning, Ludhiana
Traffic and Police Department		Traffic and Police Department, Ludhiana
Transport Authorities	Buses	City Bus Services, Ludhiana
Transport Authorities	Registered Vehicles	District Transport Office, Ludhiana
Transport Authorities	Sub urban rail transport	Not Applicable
Transport Authorities	Mono Rail Authority	Not Applicable
Transport Authorities	Tramways	Not Applicable
Transport Authorities	Marine Transport Authority	Not Applicable

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 177 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

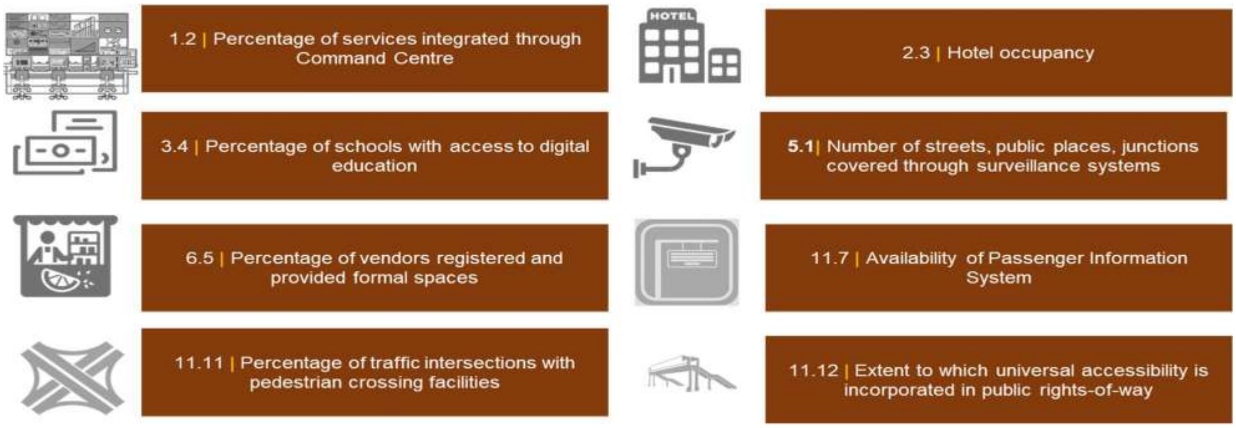
Data Owners	Number of Documents
Sales and Commercial Taxes	3
State Education Department	7
DISCOM/Electricity Department	14
Traffic and Police Department	5
Development Authority	1
Pollution Control Board	8
State Renewable Energy Department	0
Town and Country Planning	6
State Health Department	16
Transport Authority	12
Disaster Management	0
Urban Local Body	105
Total	177

* The count of documents is based on first round of submission.

4.4 Data Verification

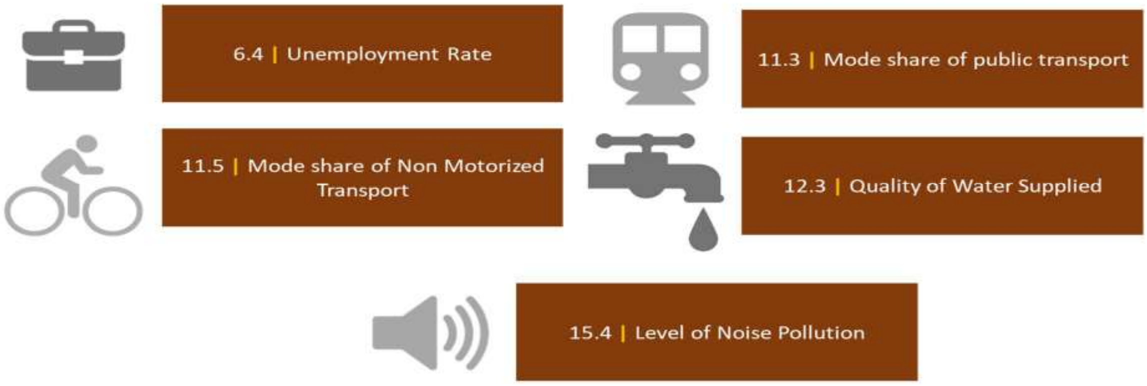
A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



- 1.2 | Percentage of services integrated through Command Centre
- 2.3 | Hotel occupancy
- 3.4 | Percentage of schools with access to digital education
- **5.1**| Number of streets, public places, junctions covered through surveillance systems
- 6.5 | Percentage of vendors registered and provided formal spaces
- 11.7 | Availability of Passenger Information System
- 11.11 | Percentage of traffic intersections with pedestrian crossing facilities
- 11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



- 6.4 | Unemployment Rate
- 11.3 | Mode share of public transport
- 11.5 | Mode share of Non Motorized Transport
- 12.3 | Quality of Water Supplied
- 15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**50.3**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.5
	1.1b death certificate	0.5
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	0
	1.1h property tax	1
	1.1i professional tax	0
	1.1j information	0.538461538
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**7.14**
Description	Services integrated through an integrated or a singular operations command centre	1.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**2.77**
Description		
Sub Indicators	1.3a Building plan	0.00000108237197
	1.3b Birth/Death Certificate	0.00001513392910
	1.3c water supply	0.00020262
	1.3d solid waste management	0
	1.3e property tax	0.010949058
	1.3f professional tax (RC)	NA

	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.001922678
	1.3i information	0
	1.3j electricity	0.208465797
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**2.44**
Description		
Sub Indicators	1.4a water supply	9.55
	1.4b solid waste	0.5
	1.4c street lights	0
	1.4d sewerage	4.56
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**92.42**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	6469.33
Denominator	Total demand raised for the year	7000
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**14.88**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	1267.13
Denominator	Total O&M cost for providing water supply services during the year	8514.69
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**19.51**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	37148.23
Denominator	Total expenditure (revenue and capital accounts) in the same year	190380.57
Unit	Percentage	

Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	Data Unavailable
Denominator	Total number of wards	95
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**33.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	4
Denominator	Total number of historic buildings/sites identified	12
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**331.34**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	301313

Denominator	Total budget of the ULB (capital and revenue)	90937.39
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**24**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	24
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**96.46**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	277957
Denominator	Total population in the age group of 6-14 years	288153
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**98.12**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	126542
Denominator	Total female population in the age group of 6-14 years	128973
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**29.39**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	181733
Denominator	Total number of teachers available for primary grades (public and private schools)	6183
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**25.25**
Formula:	*Numerator / Denominator*	

Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	248
Denominator	Total number of schools	982
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**94.09** 94.08511514
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**92** 981255078
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**1.24**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	200
Denominator	Total population of the city	1618879
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**1.85**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	300
Denominator	Total population of the city	1618879
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	

Indicator No: 4.3	**Average response time in case of health emergencies**	**Non-Computable**
Description	Total response time for health-related distress calls received in the city	Data Unavailable
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.47**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	7620
Denominator	Total population of the city	1618879
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.05**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	829
Denominator	Total population of the city	1618879
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**41.57**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	1536
Denominator	Total length of road network in the city	3695
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**480.58**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	7780
Denominator	Total population of the city	1618879
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**11.18**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	870
Denominator	Total crimes recorded in the same year	7780
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**54.54**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	883
Denominator	Total population of the city	1618879
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**53.1**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	102887
Denominator	Total VAT/GST collection during preceding year	1937.55
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 6.3	**Increase in issuance of Construction Permits**	**33.33**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	50
Denominator	Number of construction permits during preceding year	1.5
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	2377
Denominator	Total labour force in the city	288153
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	Data Unavailable
Denominator	Total number of vendors in the city	21000
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**27.32**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	14339
Denominator	Total number of slum and EWS households in the city	524.91
Unit	Percentage	
Benchmark	100%	

Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Computable** Data Unavailable
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**5.66**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	9156298.61
Denominator	Total population of the city	1618879
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**0.65**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	1052470.94
Denominator	Total population of the city	1618879
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	159370000
Unit	Percentage	

Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1618879
Denominator	Area allocated for residential land use (in hectares)	412380000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**144.92**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	498991
Denominator	Total number of households in the city	344333
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0.3**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	2063
Denominator	Total number of electricity connections in the city	677857
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**61360**
Description	Total number of sustained electrical interruptions in a year	61360
Unit	Number	

Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	4057932
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	21470
Denominator	Total energy consumption from all sources	61043.97
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.28**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	7146984.25
Denominator	Total quantum of water and waste water handled during the period	31902.6
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	32895360
Denominator	Total number of street light installations	105236

Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	371
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	40326
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	61043.97
Denominator	Total population of the city	1618879
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	152
Denominator	Total area of the city (sq.km)	159.37
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.06**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	92
Denominator	Total population of the city	1618879

Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	NA
Denominator	Total length of road network in the city	3695
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	3
Denominator	Total number of major transport interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronization**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalized intersections that are synchronized	NA
Denominator	Total number of signalized intersections in the city	42
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**22.22**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	4
Denominator	Total available on-street parking spaces in the city	18
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.87**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	64
Denominator	Total length of road network in the city	7390
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**67.74**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	42

Denominator	Total number of junctions/ intersections on major roads in the city	62
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	0
Denominator	Total number of public right-of-way areas in the city	190
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**62.47**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	215090
Denominator	Total number of households in the city	344333
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**369.03**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	597.42
Denominator	Total population of the city	1618879
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	

Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	492
Denominator	Total number of samples tested for water quality	691
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	597.42
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	0
Denominator	Total number of water connections in the city	246639
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**200**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	126
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	63
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**105.85**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	407464
Denominator	Total number of properties in the city	384957
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**89.22**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	343450
Denominator	Total number of properties in the city	384957
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	582.94
Denominator	Total waste water generated in the city per day	582.94
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**41.16**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	205
Denominator	Total waste water received at treatment plants per day	498

Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**0.54**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	20
Denominator	Total length of road network in the city	3695
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**73.1**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	306357
Denominator	Total number of households and establishments in the city	419078
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	1100
Denominator	Total quantum of MSW generated in the city	1100
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**8.29**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	2737

Denominator	Average MSW generated in the city (tons per month)	33000
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**9**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	9
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**27**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	27
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**162**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	162
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	19
Denominator	Total number of noise samples	64
Unit	Percentage	
Benchmark		

Indicator No: 15.5	**Quality of water in public surface water bodies**	**76.85**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	166
Denominator	Total number of samples tested	216
Unit	Percentage	
Benchmark	100%

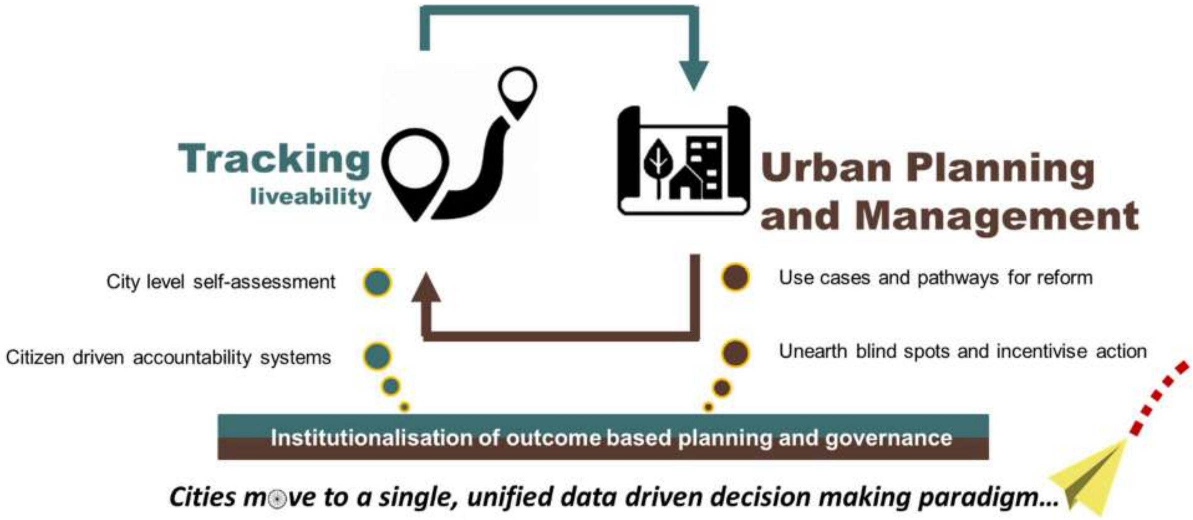
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



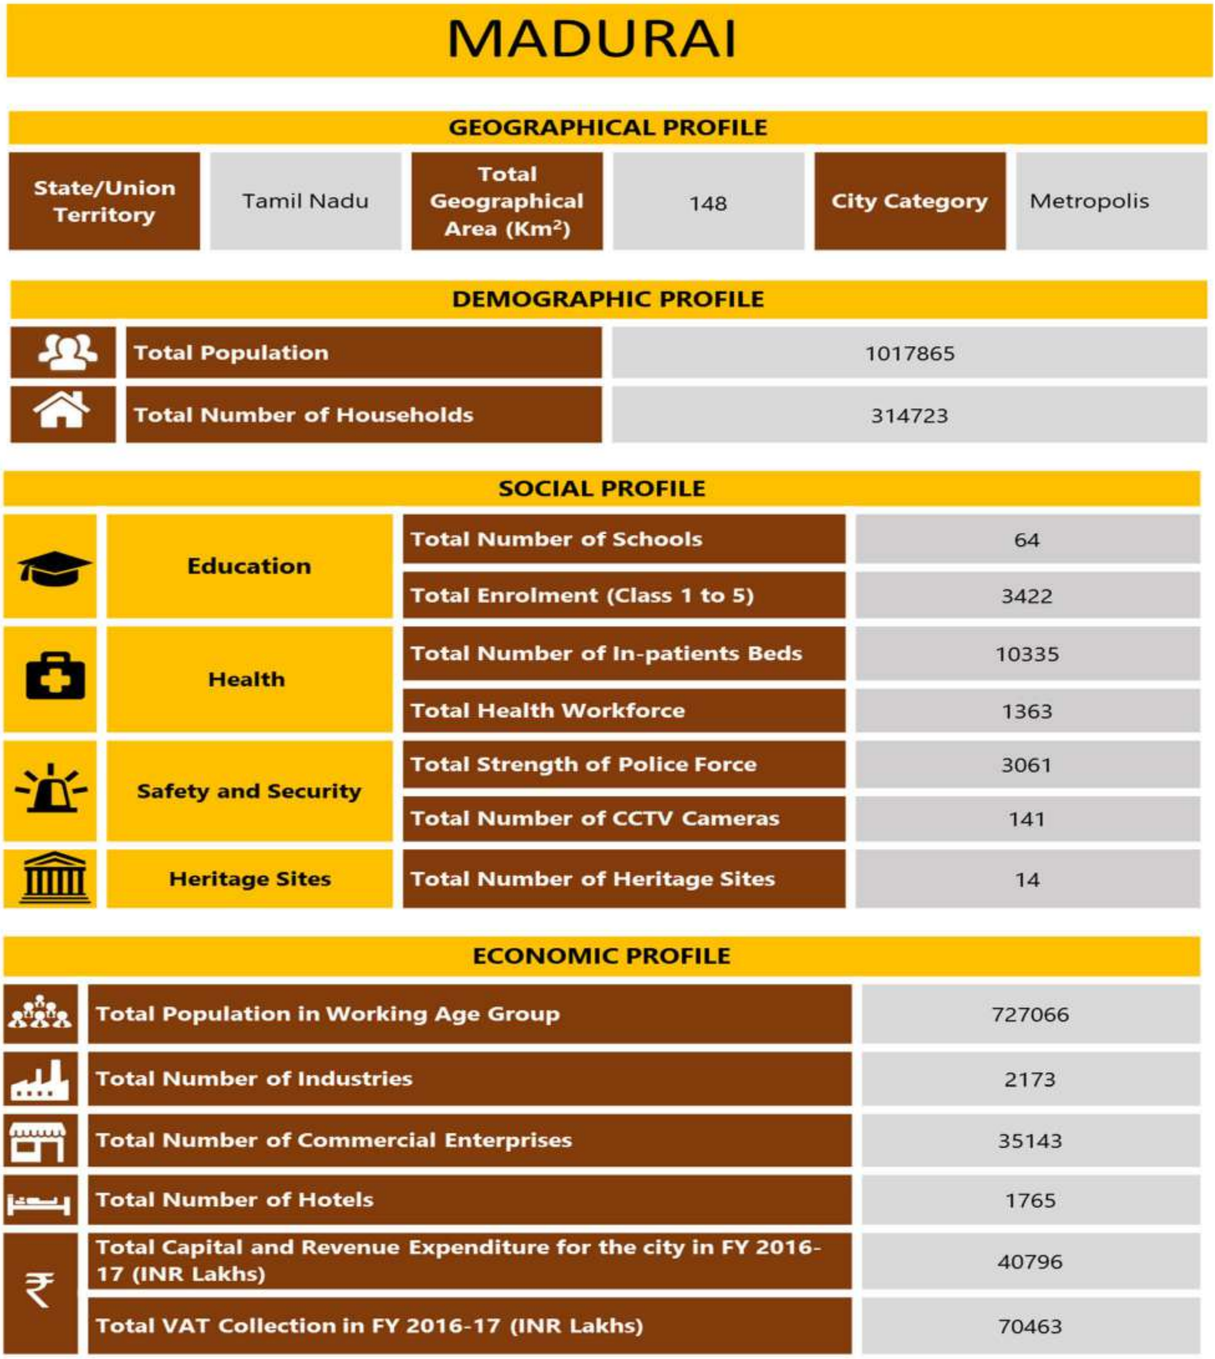
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



MADURAI

GEOGRAPHICAL PROFILE

State/Union Territory	Tamil Nadu	**Total Geographical Area (Km^2)**	148	**City Category**	Metropolis

DEMOGRAPHIC PROFILE

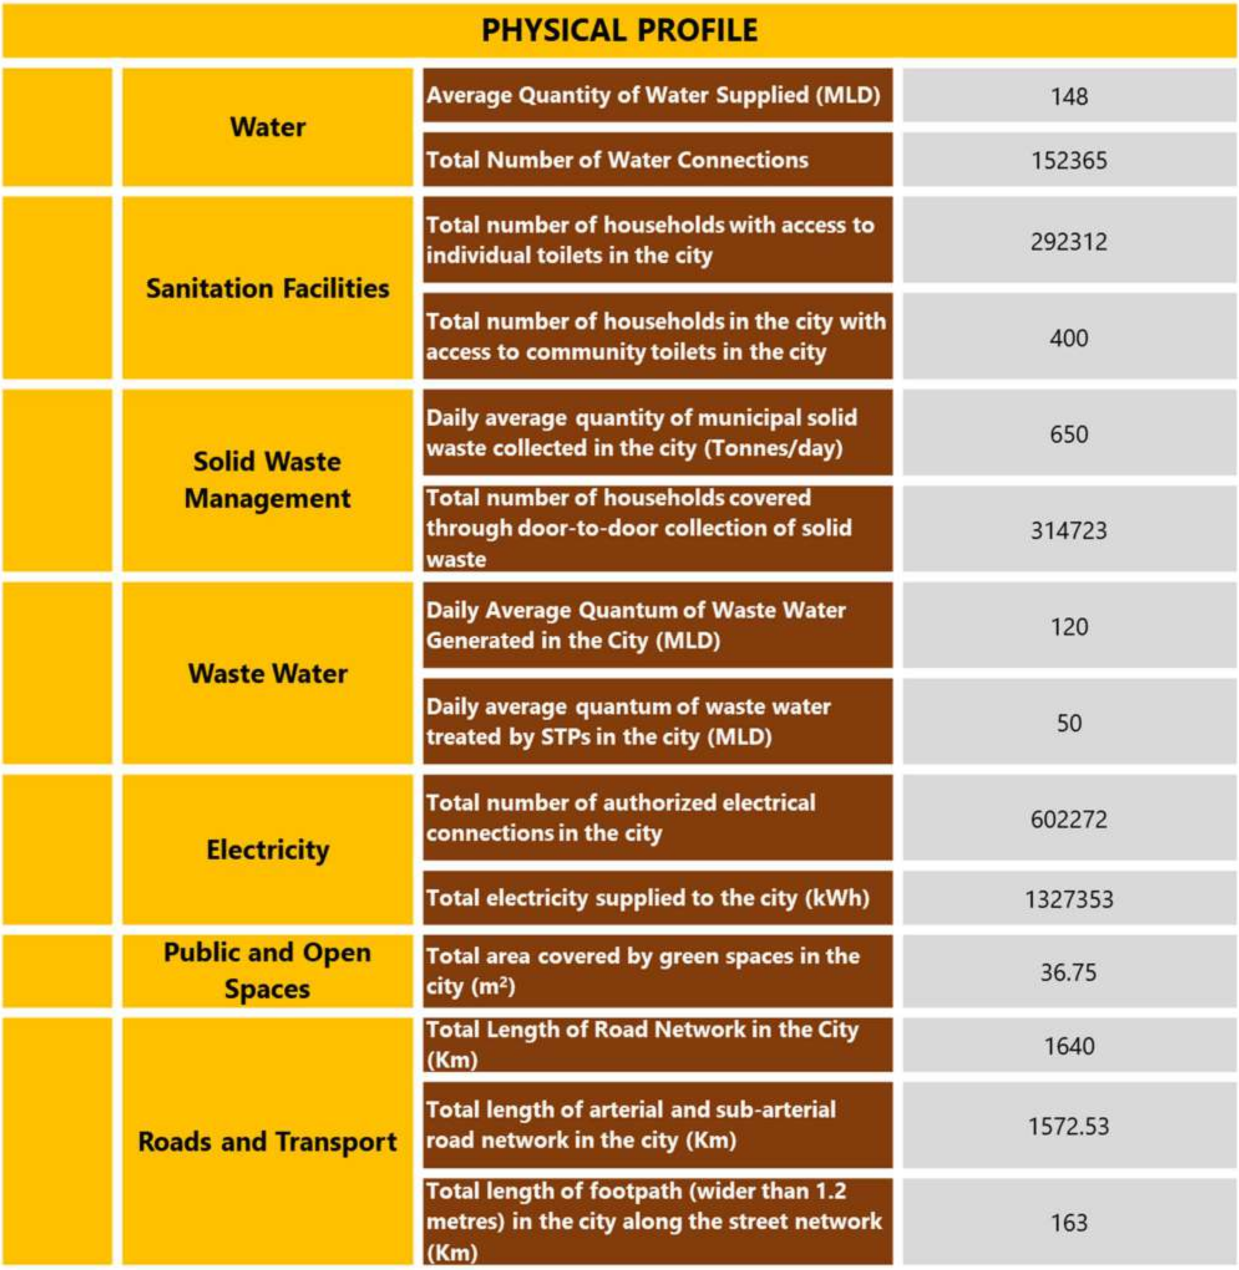
Total Population	1017865
Total Number of Households	314723

SOCIAL PROFILE

Education	**Total Number of Schools**	64
	Total Enrolment (Class 1 to 5)	3422
Health	**Total Number of In-patients Beds**	10335
	Total Health Workforce	1363
Safety and Security	**Total Strength of Police Force**	3061
	Total Number of CCTV Cameras	141
Heritage Sites	**Total Number of Heritage Sites**	14

ECONOMIC PROFILE

Total Population in Working Age Group	727066
Total Number of Industries	2173
Total Number of Commercial Enterprises	35143
Total Number of Hotels	1765
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	40796
Total VAT Collection in FY 2016-17 (INR Lakhs)	70463



PHYSICAL PROFILE

	Water	Average Quantity of Water Supplied (MLD)	148
		Total Number of Water Connections	152365
	Sanitation Facilities	Total number of households with access to individual toilets in the city	292312
		Total number of households in the city with access to community toilets in the city	400
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	650
		Total number of households covered through door-to-door collection of solid waste	314723
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	120
		Daily average quantum of waste water treated by STPs in the city (MLD)	50
	Electricity	Total number of authorized electrical connections in the city	602272
		Total electricity supplied to the city (kWh)	1327353
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	36.75
	Roads and Transport	Total Length of Road Network in the City (Km)	1640
		Total length of arterial and sub-arterial road network in the city (Km)	1572.53
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	163

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population

Pillars of Comprehensive Development	Category	Indicators
		enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services

Pillars of Comprehensive Development	Category	Indicators
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting

Pillars of Comprehensive Development	Category	Indicators
		facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

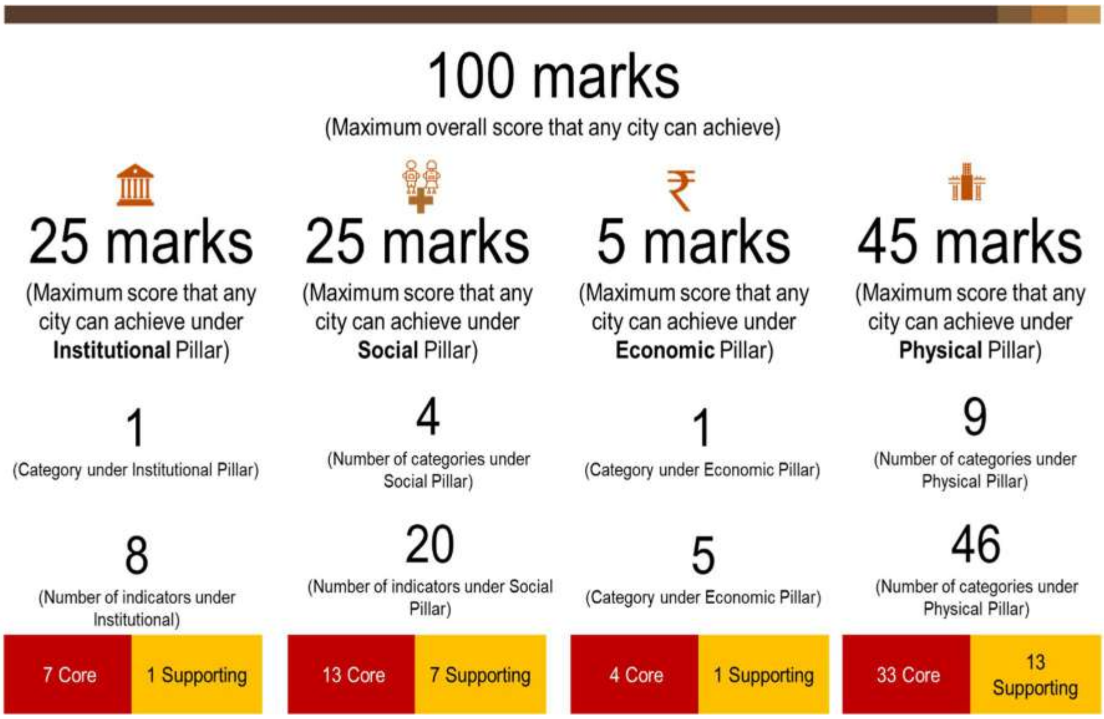
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks

(Maximum score that any city can achieve under **Institutional** Pillar)

1

(Category under Institutional Pillar)

8

(Number of indicators under Institutional)

7 Core | 1 Supporting

25 marks

(Maximum score that any city can achieve under **Social** Pillar)

4

(Number of categories under Social Pillar)

20

(Number of indicators under Social Pillar)

13 Core | 7 Supporting

5 marks

(Maximum score that any city can achieve under **Economic** Pillar)

1

(Category under Economic Pillar)

5

(Category under Economic Pillar)

4 Core | 1 Supporting

45 marks

(Maximum score that any city can achieve under **Physical** Pillar)

9

(Number of categories under Physical Pillar)

46

(Number of categories under Physical Pillar)

33 Core | 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts department
Urban Local Body	For Park and Recreation Related Questions	Engineering Section
Urban Local Body	For Water Supply and Drainage related questions	Engineering Section
Urban Local Body	For Heritage sites related data	Town planning
Urban Local Body	For Ecological sites related data	Town planning
Urban Local Body	For Housing related data	Town planning
Urban Local Body	For Building plan related data	Town planning
Urban Local Body	For Roads related data	Engineering Section
Urban Local Body	For Solid waste management related data	Health Department
Urban Local Body	For IT services related data	IT department
Urban Local Body	For Vendor committee related data	Town planning
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban	Revenue Section

Designated data owners	Subcategories	Data owners at city level
	Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	
Development Authority	Building Infrastructure	Town planning
	Construction planning	Town planning
	Green Building	Town planning
	Rain water harvesting	Town planning
	Universal Design Principle	Engineering Department
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Tamilnadu Electricity Board
State Disaster management authority		Revenue and Disaster Management Department
State Education Department		Education Department
State Health Department	Health care professionals	City Health Office
	Citizen Services	City Health Office
	Disease Prevalence	City Health Office
	Health Infrastructure	City Health Office
State Renewable Energy Development Agency		
State Sales / Commercial Taxes Department		District Commercial Tax Department
Town and Country Planning Department	Land Use	Town Planning
Traffic and Police Department		Police Department
Transport Authorities	Buses	Tamilnadu State Transport Corporation
	Registered Vehicles	Regional Transport Office
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 65 number of documents. Documents submitted include reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	4
DISCOM/Electricity Department	7
Traffic and Police Department	2
Development Authority	7
Pollution Control Board	2
State Renewable Energy Department	1
Town and Country Planning	3
State Health Department	7
Transport Authority	6
Disaster Management	1
Urban Local Body	24
Total	65*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

- 1.2 | Percentage of services integrated through Command Centre
- 2.3 | Hotel occupancy
- 3.4 | Percentage of schools with access to digital education
- **5.1**| Number of streets, public places, junctions covered through surveillance systems
- 6.5 | Percentage of vendors registered and provided formal spaces
- 11.7 | Availability of Passenger Information System
- 11.11 | Percentage of traffic intersections with pedestrian crossing facilities
- 11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

- 6.4 | Unemployment Rate
- 11.3 | Mode share of public transport
- 11.5 | Mode share of Non Motorized Transport
- 12.3 | Quality of Water Supplied
- 15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	**Indicator title**
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**87.18**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	0
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	1
	1.1j information	1
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.333333333
Unit	Percentage

Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**87.35**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	11008

Denominator	Total demand raised for the year	12602
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**182.35**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	1316.59
Denominator	Total O&M cost for providing water supply services during the year	722
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**0.47**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	431
Denominator	Total expenditure (revenue and capital accounts) in the same year	91539
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	NA
Denominator	Total number of wards	100
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	14
Denominator	Total number of historic buildings/sites identified	14
Unit	Percentage	

Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**73.85**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	48
Denominator	Total number of ecologically important sites identified in the city	65
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**37.14**
Description	Average Occupancy rate of Hotels	37.14285714
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	NA
Denominator	Total budget of the ULB (capital and revenue)	40796
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**41**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	41
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**4.15**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	6654
Denominator	Total population in the age group of 6-14 years	160169

Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**5.75**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	4474
Denominator	Total female population in the age group of 6-14 years	77745
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**31.11**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	3422
Denominator	Total number of teachers available for primary grades (public and private schools)	110
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**23.44**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	15
Denominator	Total number of schools	64
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**136.3**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	136.3020211
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**75.38**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	1222795
Numerator	Percentage	

Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**101.54**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	10335
Denominator	Total population of the city	1017865
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**13.39**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	1363
Denominator	Total population of the city	1017865
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**20**
Description	Total response time for health-related distress calls received in the city	20
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.25**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	2510
Denominator	Total population of the city	1017865
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.06**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	629

Denominator	Total population of the city	1017865
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**8.6**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	141
Denominator	Total length of road network in the city	1640
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**2705.17**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	27535
Denominator	Total population of the city	1017865
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**0.76**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	208
Denominator	Total crimes recorded in the same year	27535
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**21.12**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	215

Denominator	Total population of the city	1017865
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**6.63**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	4381
Denominator	Total VAT/GST collection during preceding year	660.82
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**-1.36**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	-21
Denominator	Total Professional Tax collection during preceding year	1549
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-4.92**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-153
Denominator	Number of construction permits during preceding year	31.07
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	332734

Denominator	Total labour force in the city	160169
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	NA
Denominator	Total number of vendors in the city	5448
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**90**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	100156
Denominator	Total number of slum and EWS households in the city	1112.88
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0.01**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	94638173400
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0**
Formula:	*Numerator / Denominator*	

Numerator	Total area of green space (sq.m.)	36.75
Denominator	Total population of the city	1017865
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**1.4**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	1421000
Denominator	Total population of the city	1017865
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	721
Denominator	Total area of the city (total area of all land uses)	148000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**3.35**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1017865
Denominator	Area allocated for residential land use (in hectares)	303766
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**153.46**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	482970
Denominator	Total number of households in the city	314723
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	Data Unavailable
Denominator	Total number of electricity connections in the city	602272
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**650**
Description	Total number of sustained electrical interruptions in a year	650
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	18000
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.01**

Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	839
Denominator	Total energy consumption from all sources	1327420.97
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	309957.6667
Denominator	Total quantum of water and waste water handled during the period	5940
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.33**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	17064997.1
Denominator	Total number of street light installations	51297
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**

Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1327420.97
Denominator	Total population of the city	1017865
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.18**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	35
Denominator	Total area of the city (sq.km)	148
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.61**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	621
Denominator	Total population of the city	1017865
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	80
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	NA
Denominator	Total length of road network in the city	1640
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**30**
Formula:	*Numerator / Denominator*	

Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	3
Denominator	Total number of major transport interchanges in the city	10
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport[1]**	**To be computed**
Description	Mode share of non-motorised transport	10
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	10
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	NA
Denominator	Total number of signalised intersections in the city	18
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**150**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	15
Denominator	Total available on-street parking spaces in the city	10
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**4.97**
Formula:	*Numerator / Denominator*	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Total length of footpaths (wider than 1.2 m) available in the city	163
Denominator	Total length of road network in the city	3280
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**138.89**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	50
Denominator	Total number of junctions/ intersections on major roads in the city	36
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**1.48**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	30
Denominator	Total number of public right-of-way areas in the city	2021
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**46.94**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	147739
Denominator	Total number of households in the city	314723
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**145.4**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	148
Denominator	Total population of the city	1017865

Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	48
Denominator	Total number of samples tested for water quality	48
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**18.92**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	28
Denominator	Quantum of water put into the distribution system (mld)	148
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	152365
Denominator	Total number of water connections in the city	152365
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**49483.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	2969
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	6
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**96.36**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	304770
Denominator	Total number of properties in the city	316282
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**135.49**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	428524
Denominator	Total number of properties in the city	316282
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**83.33**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	100
Denominator	Total waste water generated in the city per day	120
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**351.67**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	211
Denominator	Total waste water received at treatment plants per day	60
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**45.43**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and	745

	tertiary drains (of pucca construction)	
Denominator	Total length of road network in the city	1640
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**97.66**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	341669
Denominator	Total number of households and establishments in the city	349866
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	650
Denominator	Total quantum of MSW generated in the city	650
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**8.77**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	1710
Denominator	Average MSW generated in the city (tons per month)	19500
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**15.3**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	15.3
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean	

	concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**24.7**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	24.7
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**78.4**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	78.4
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	NA
Denominator	Total number of noise samples	NA
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	1
Denominator	Total number of samples tested	1
Unit	Percentage	
Benchmark	100%

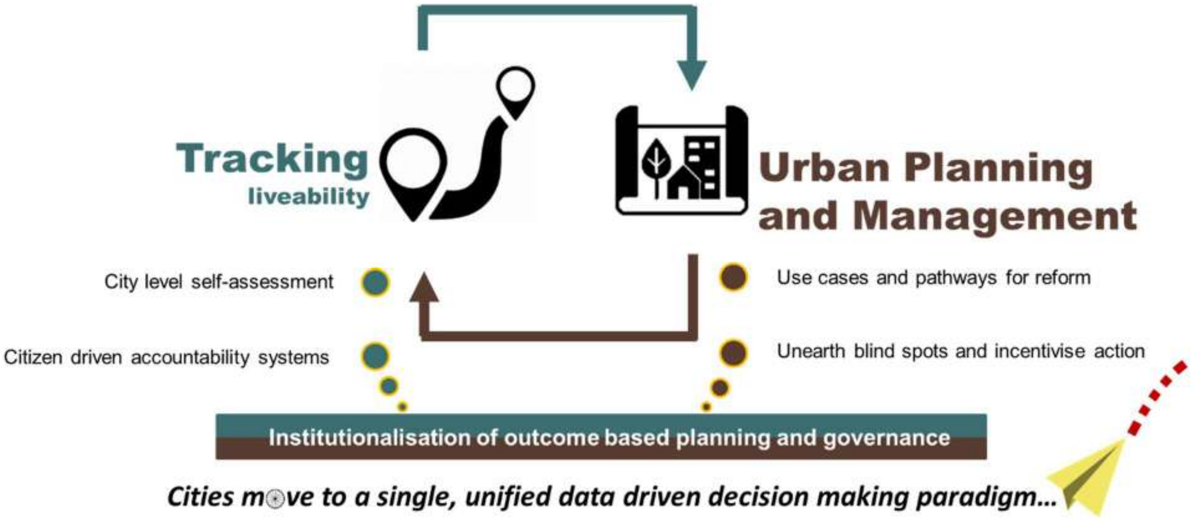
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

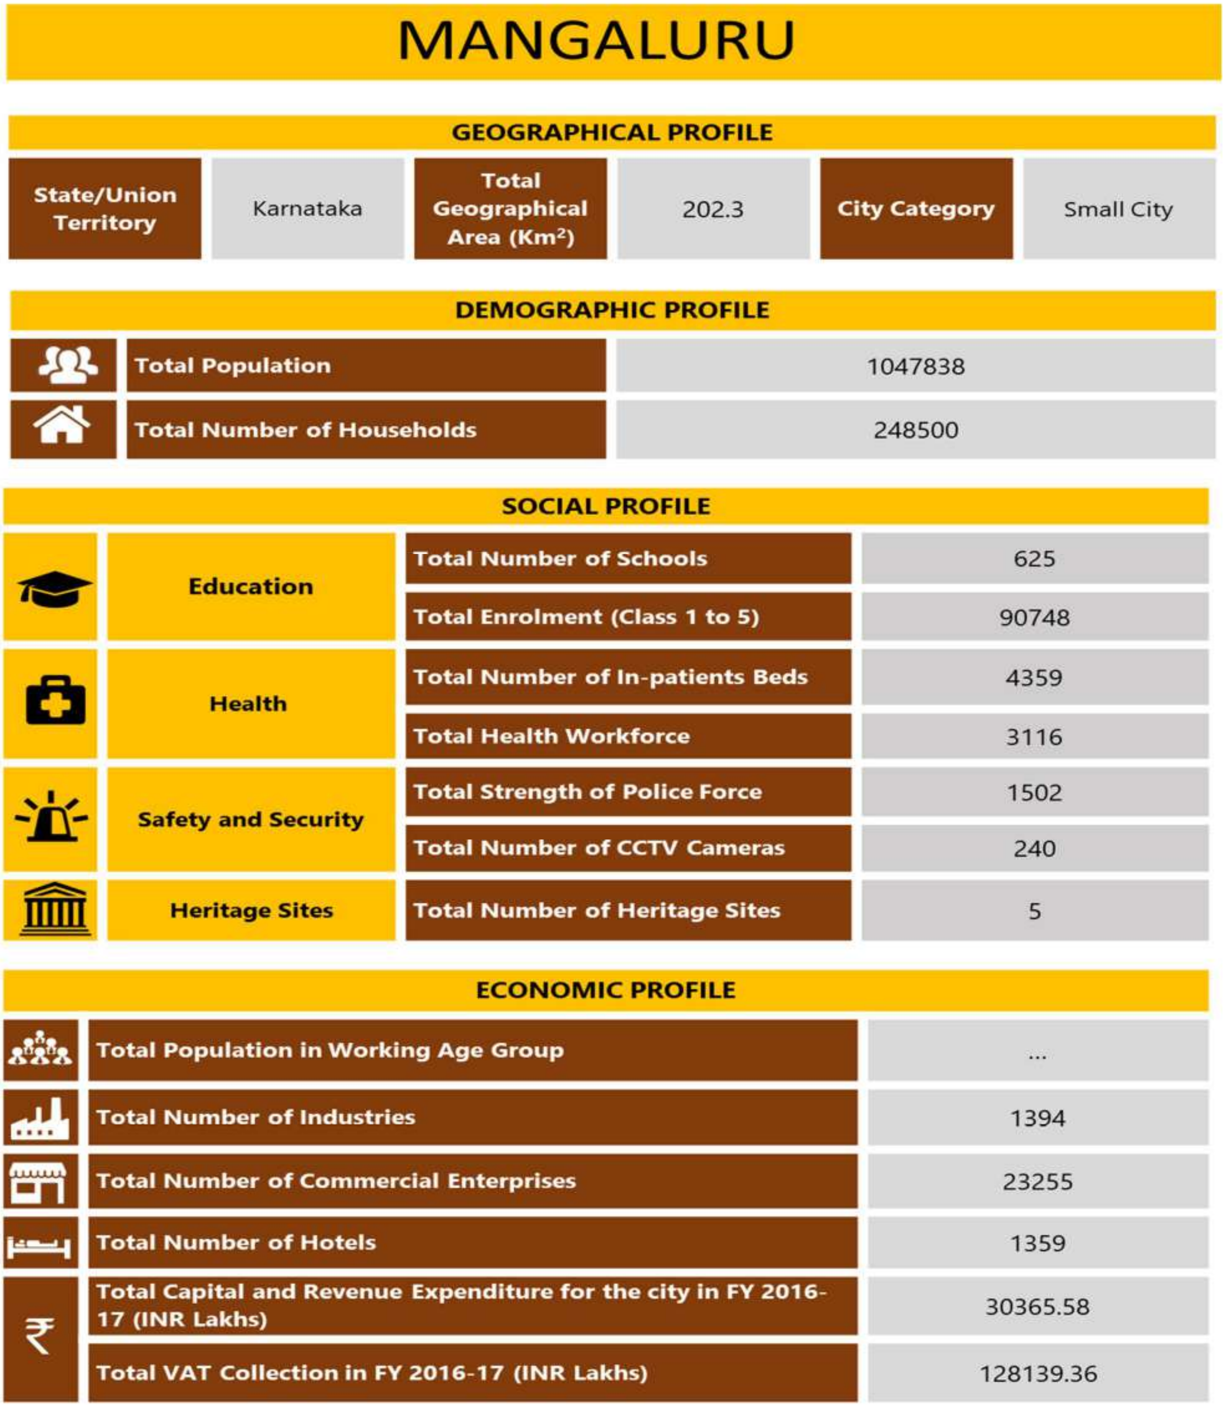


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



MANGALURU

GEOGRAPHICAL PROFILE

State/Union Territory	Karnataka	Total Geographical Area (Km^2)	202.3	City Category	Small City

DEMOGRAPHIC PROFILE

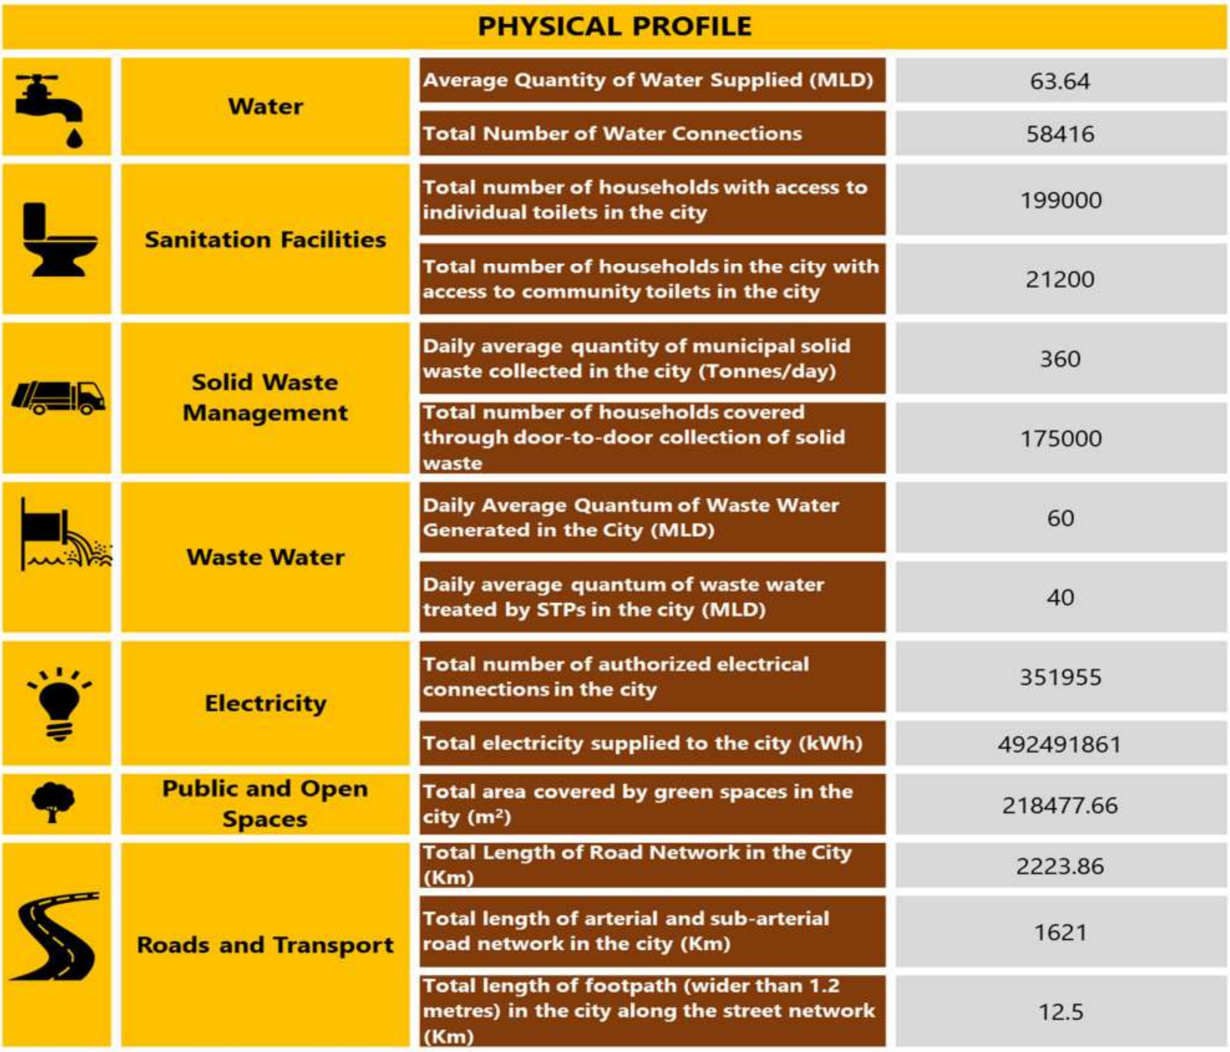
Total Population	1047838
Total Number of Households	248500

SOCIAL PROFILE

Education	Total Number of Schools	625
	Total Enrolment (Class 1 to 5)	90748
Health	Total Number of In-patients Beds	4359
	Total Health Workforce	3116
Safety and Security	Total Strength of Police Force	1502
	Total Number of CCTV Cameras	240
Heritage Sites	Total Number of Heritage Sites	5

ECONOMIC PROFILE

Total Population in Working Age Group	...
Total Number of Industries	1394
Total Number of Commercial Enterprises	23255
Total Number of Hotels	1359
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	30365.58
Total VAT Collection in FY 2016-17 (INR Lakhs)	128139.36



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	63.64
	Total Number of Water Connections	58416
Sanitation Facilities	Total number of households with access to individual toilets in the city	199000
	Total number of households in the city with access to community toilets in the city	21200
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	360
	Total number of households covered through door-to-door collection of solid waste	175000
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	60
	Daily average quantum of waste water treated by STPs in the city (MLD)	40
Electricity	Total number of authorized electrical connections in the city	351955
	Total electricity supplied to the city (kWh)	492491861
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	218477.66
Roads and Transport	Total Length of Road Network in the City (Km)	2223.86
	Total length of arterial and sub-arterial road network in the city (Km)	1621
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	12.5

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies

Pillars of Comprehensive Development	Category	Indicators
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita

Pillars of Comprehensive Development	Category	Indicators
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced	15.1 Concentration of SO2- air pollution

Pillars of Comprehensive Development	Category	Indicators
	Pollution	15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

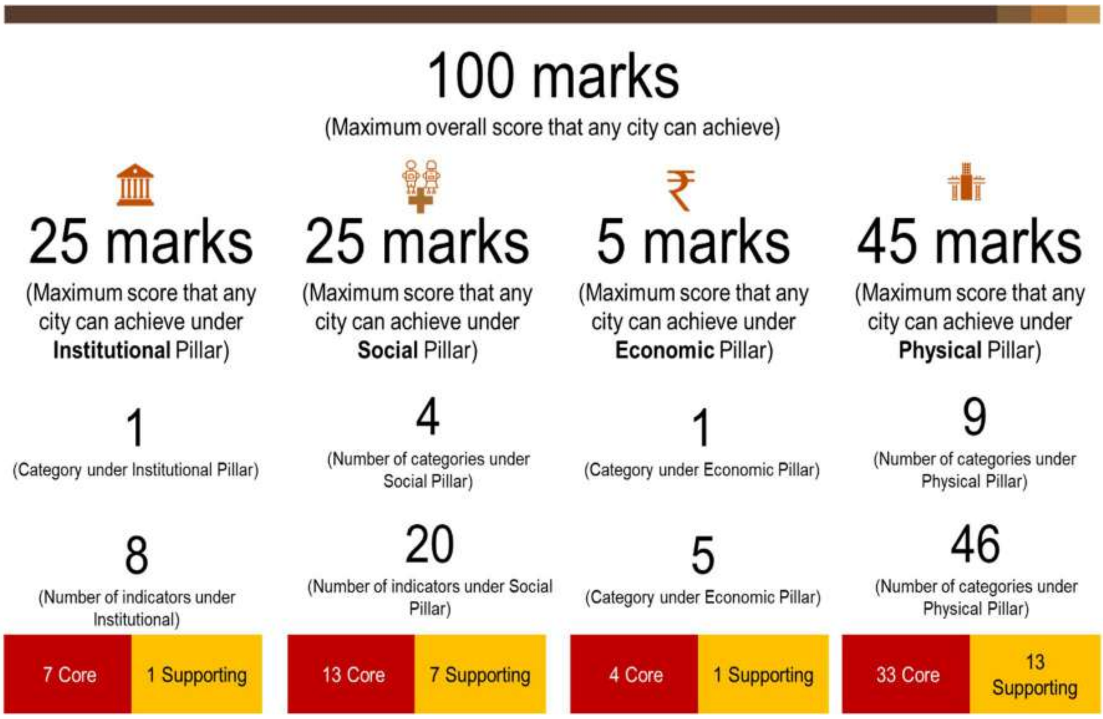
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core	13 Core	4 Core	33 Core
1 Supporting	7 Supporting	1 Supporting	13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning

department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts Department MCC
Urban Local Body	For Park and Recreation Related Questions	Town Planning Department MCC
Urban Local Body	For Water Supply and Drainage related questions	Engineering Department MCC
Urban Local Body	For Heritage sites related data	Town Planning Department MCC
Urban Local Body	For Ecological sites related data	Department of forest, ecology and environment
Urban Local Body	For Housing related data	Rajiv Gandhi rural housing corporation limited. MCC
Urban Local Body	For Building plan related data	Town Planning Department MCC
Urban Local Body	For Roads related data	Engineering Department MCC
Urban Local Body	For Solid waste management related data	Environment Department
Urban Local Body	For IT services related data	IT Department
Urban Local Body	For Vendor committee related data	Urban Poverty Alleviation Cell Deendayal Antyodaya Yojana National Urban Livelihood Mission. MCC (DAY_NULM)
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Commercial Tax Department (Professional Tax related queries), Education Department (Population of age group between 6-14), Revenue Department, PMAY, District Employment Exchange, Development Authority, DULT (CMP related), KMDS (No. of Hits in the online service portals), Health Department, Pollution Department
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	State Pollution department

Designated data owners	Subcategories	Data owners at city level
Development Authority	Building Infrastructure	Development Authority
	Construction planning	Development Authority and Town Planning Department, MCC
	Green Building	Town Planning Department, MCC
	Rain water harvesting	Town Planning Department, MCC
	Universal Design Principle	Development Authority
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Mangalore Electricity Supply Company Limited
State Disaster management authority		District Collector Office
State Education Department		
State Health Department	Health care professionals	District Health Office
	Citizen Services	District Health Office
	Disease Prevalence	District Health Office
	Health Infrastructure	District Health Office
State Renewable Energy Development Agency	Renewable Energy	Mangalore Electricity Supply Company Limited
State Sales / Commercial Taxes Department		Joint Commissioner, Commercial Tax Office
Town and Country Planning Department	Land Use	Development Authority
Traffic and Police Department		Deputy Police Commissioner's Office
Transport Authorities	Buses	Regional Transport Officer Office
	Registered Vehicles	Regional Transport Officer Office
	Sub urban rail transport	Not Applicable
	Mono Rail Authority	Not Applicable
	Tramways	Not Applicable
	Marine Transport Authority	Urban Local Body

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 149 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**2**
State Education Department	**6**
DISCOM /Electricity Department	**11**
Traffic and Police Department	**10**
Development Authority	**2**
Pollution Control Board	**7**
State Renewable Energy Department	**1**
Town and Country Planning	**1**
State Health Department	**14**
Transport Authority	**10**
Disaster Management	**1**
Urban Local Body	**84**
Total	**149***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend

etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**70.99**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	1
	1.1d solid waste management	0
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	1
	1.1h property tax	0.333333333
	1.1i professional tax	0.75
	1.1j information	0.923076923
	1.1k Grievance redressal	1
	1.1l electricity	0.5
	1.1m Building plan	0.222222222
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**4.76**
Description	Services integrated through an integrated or a singular operations command centre	1
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**5.34**
Description		
Sub Indicators	1.3a Building plan	0.018432918

	1.3b Birth/Death Certificate	0.010450722
	1.3c water supply	0.021268752
	1.3d solid waste management	NA
	1.3e property tax	0.06322491
	1.3f professional tax (RC)	0.002699408

	1.3h complaints/ grievance redressal	0.031616438
	1.3i information	0.001057085
	1.3j electricity	0.325177785
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**106.91**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	8092.05
Denominator	Total demand raised for the year	7569.02
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**100.73**
Formula:	*Numerator / Denominator*	

Numerator	Total collection of user charges in water supply in a year	3314
Denominator	Total O&M cost for providing water supply services during the year	3290
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**21.04**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	10356.14
Denominator	Total expenditure (revenue and capital accounts) in the same year	49212.51
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	Data Unavailable
Denominator	Total number of wards	60
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**50**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	1
Denominator	Total number of historic buildings/sites identified	2
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**70.59**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	12
Denominator	Total number of ecologically important sites identified in the city	17

Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.07**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	17.17
Denominator	Total budget of the ULB (capital and revenue)	22928.45
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**14**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	14
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**84.24**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	58536
Denominator	Total population in the age group of 6-14 years	69488
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**83.57**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	28411

Denominator	Total female population in the age group of 6-14 years	33998
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**28.09**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	36627
Denominator	Total number of teachers available for primary grades (public and private schools)	1304
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**39.67**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	119
Denominator	Total number of schools	300
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**120.81**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	120.8140004
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**109.86**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	54081252
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**164.49**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	8216
Denominator	Total population of the city	499487
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**107.99**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	5394
Denominator	Total population of the city	499487
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**15**
Description	Total response time for health-related distress calls received in the city	15
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	64
Denominator	Total population of the city	499487
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**1**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	4974
Denominator	Total population of the city	499487
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**15.84**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	186
Denominator	Total length of road network in the city	1174
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**1128.56**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	5637
Denominator	Total population of the city	499487
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**5.27**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	297
Denominator	Total crimes recorded in the same year	5637
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**33.23**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	166
Denominator	Total population of the city	499487
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**0.95**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	867
Denominator	Total VAT/GST collection during preceding year	910.2223
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**93.44**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	1097.67
Denominator	Total Professional Tax collection during preceding year	1174.77
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-14.9**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-309
Denominator	Number of construction permits during preceding year	20.74
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	1657
Denominator	Total labour force in the city	69488
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	1737.2
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**3.78**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	359
Denominator	Total number of slum and EWS households in the city	94.91
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	**0**
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.23**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	116260.1
Denominator	Total population of the city	499487
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**2**
Formula:	*Numerator / Denominator*	

Numerator	Total area of public and recreational places (sq.m.)	999464.91
Denominator	Total population of the city	499487
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	Data Unavailable
Denominator	Total area of the city (total area of all land uses)	132450000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**7.83**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	499487
Denominator	Area allocated for residential land use (in hectares)	63761
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**136.4**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	178549
Denominator	Total number of households in the city	130897
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**

Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	191383
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**25103**
Description	Total number of sustained electrical interruptions in a year	25103
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	3413
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	42729
Denominator	Total energy consumption from all sources	Data Unavailable
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.22**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	8350000
Denominator	Total quantum of water and waste water handled during the period	4500
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.34**

Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	18600000
Denominator	Total number of street light installations	64259
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	856257.68
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	Data Unavailable
Denominator	Total population of the city	499487
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	478
Denominator	Total area of the city (sq.km)	132.45
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**2.12**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	1060
Denominator	Total population of the city	499487
Unit	Number per 1000 persons	
Benchmark	>=0.6	

Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	73.76
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	1174
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	Data Unavailable
Denominator	Total number of major transport interchanges in the city	9
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0.03
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	Data Unavailable
Denominator	Total number of major interchanges in the city	9
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total number of signalised intersections in the city	13
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	6
Denominator	Total available on-street parking spaces in the city	6
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	15
Denominator	Total length of road network in the city	2348
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**116.67**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	35
Denominator	Total number of junctions/ intersections on major roads in the city	30
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	177
Denominator	Total number of public right-of-way areas in the city	177
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**83.22**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	108928
Denominator	Total number of households in the city	130897
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**240.25**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	120
Denominator	Total population of the city	499487
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	26
Denominator	Total number of samples tested for water quality	30
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**35.83**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	43
Denominator	Quantum of water put into the distribution system (mld)	120
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**50.49**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	88587
Denominator	Total number of water connections in the city	175470
Unit	Percentage	
Benchmark	100%	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**84.99**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	634
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	746
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**61.74**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	130637
Denominator	Total number of properties in the city	211578
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**36.22**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	76635
Denominator	Total number of properties in the city	211578
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**85.71**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	30
Denominator	Total waste water generated in the city per day	35
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**189.17**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	56.75

Denominator	Total waste water received at treatment plants per day	30
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**1.28**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	15
Denominator	Total length of road network in the city	1174
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**88.49**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	141894
Denominator	Total number of households and establishments in the city	160347
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	345
Denominator	Total quantum of MSW generated in the city	345
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**74.59**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	7720
Denominator	Average MSW generated in the city (tons per month)	10350
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**7.57**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	7.57
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**9.75**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	9.75
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**75.42**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	75.42
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	1
Denominator	Total number of noise samples	14
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	12
Denominator	Total number of samples tested	12
Unit	Percentage	
Benchmark	100%

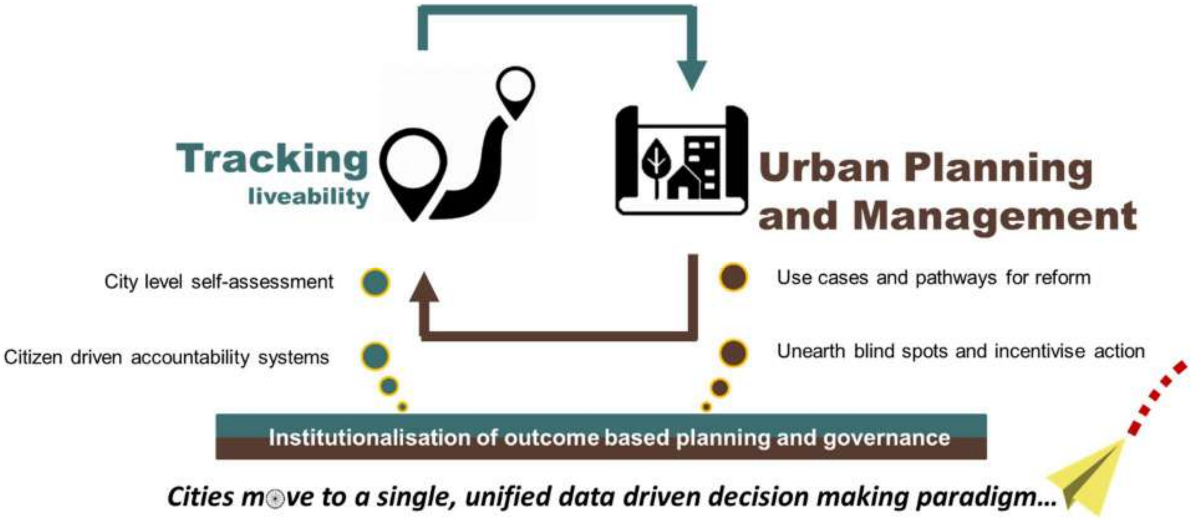
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

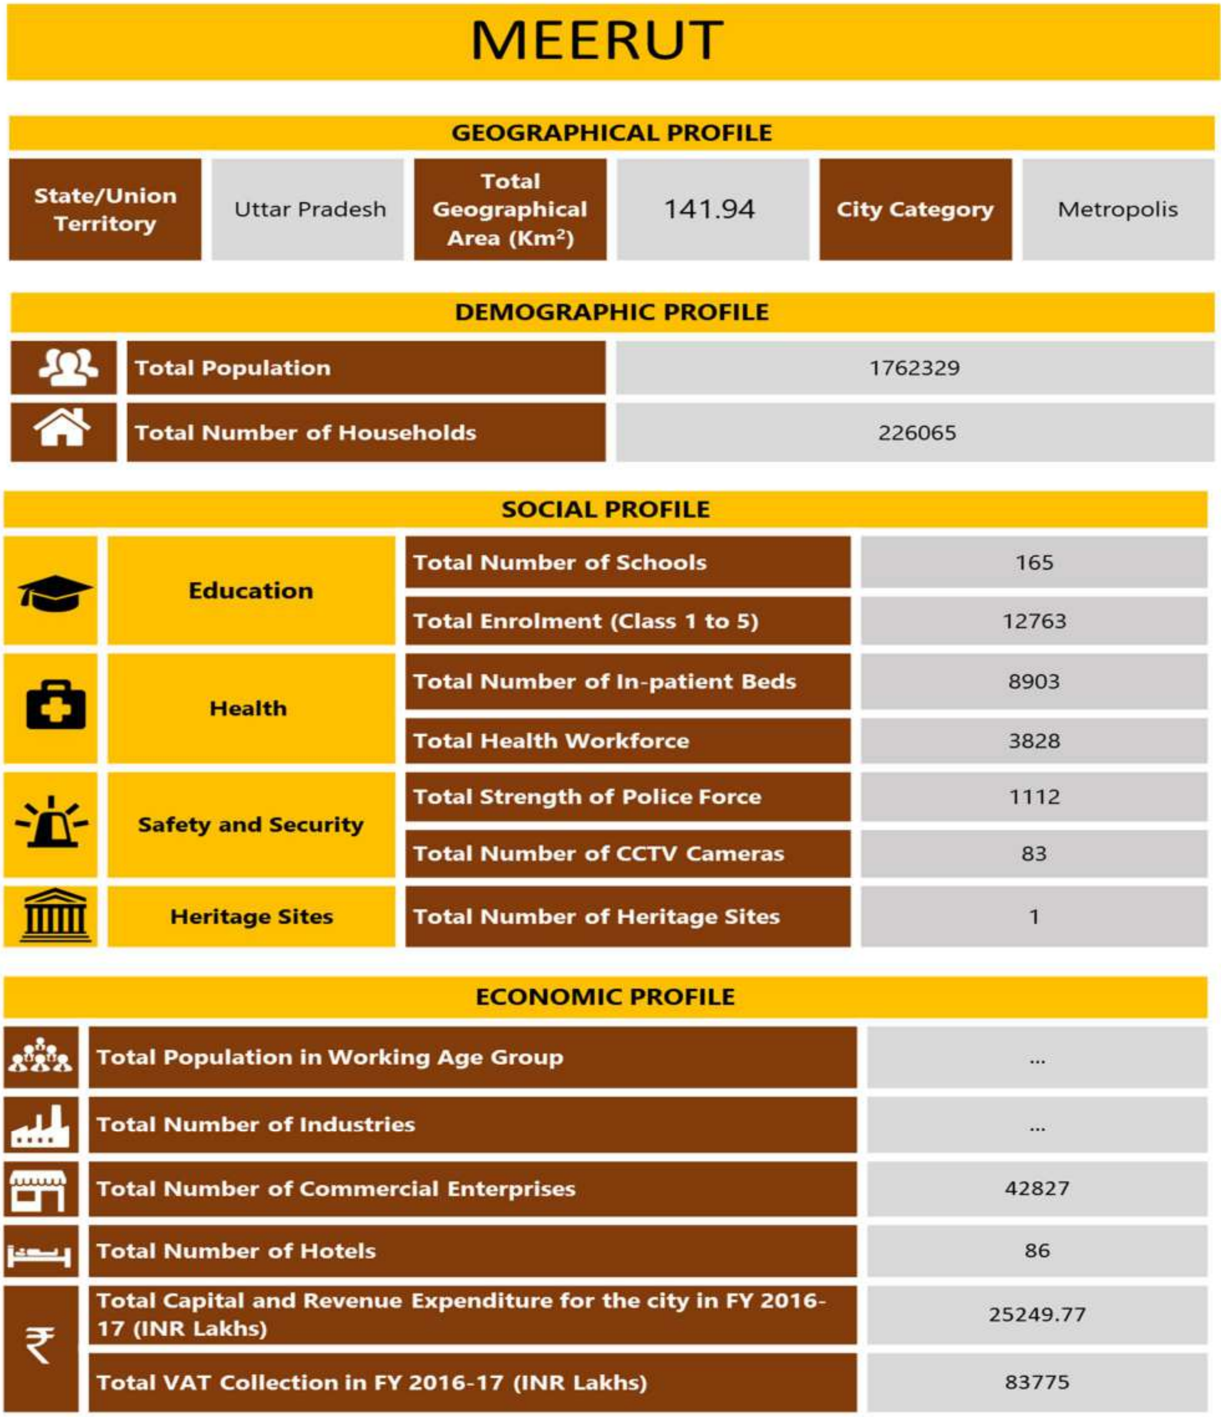


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



MEERUT

GEOGRAPHICAL PROFILE

State/Union Territory	Uttar Pradesh	Total Geographical Area (Km²)	141.94	City Category	Metropolis

DEMOGRAPHIC PROFILE

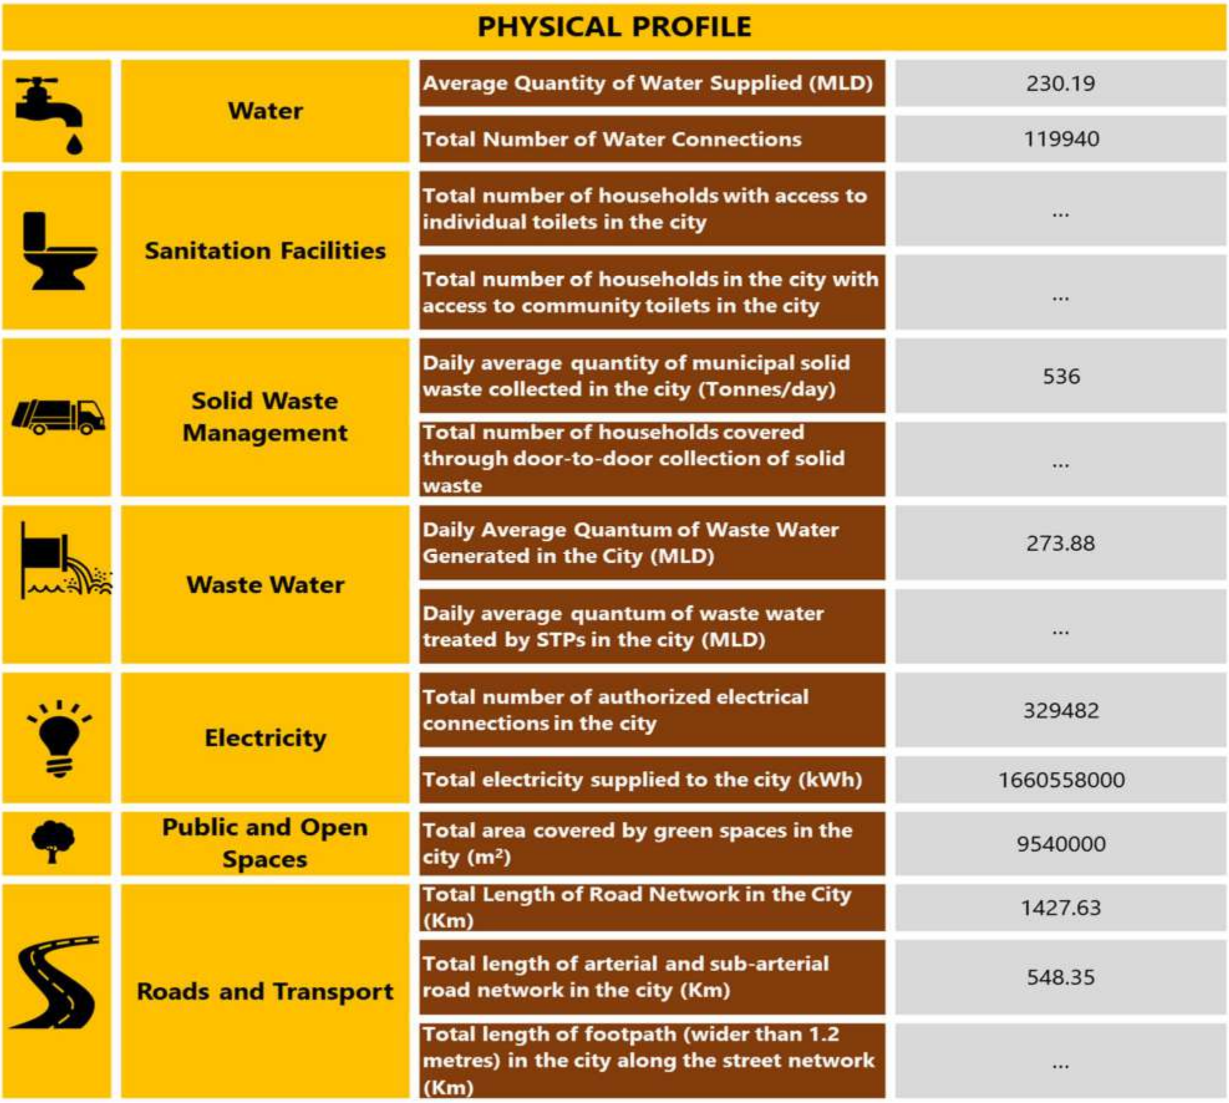
Total Population	1762329
Total Number of Households	226065

SOCIAL PROFILE

Education	Total Number of Schools	165
	Total Enrolment (Class 1 to 5)	12763
Health	Total Number of In-patient Beds	8903
	Total Health Workforce	3828
Safety and Security	Total Strength of Police Force	1112
	Total Number of CCTV Cameras	83
Heritage Sites	Total Number of Heritage Sites	1

ECONOMIC PROFILE

Total Population in Working Age Group	...
Total Number of Industries	...
Total Number of Commercial Enterprises	42827
Total Number of Hotels	86
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	25249.77
Total VAT Collection in FY 2016-17 (INR Lakhs)	83775



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	230.19
	Total Number of Water Connections	119940
Sanitation Facilities	Total number of households with access to individual toilets in the city	...
	Total number of households in the city with access to community toilets in the city	...
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	536
	Total number of households covered through door-to-door collection of solid waste	...
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	273.88
	Daily average quantum of waste water treated by STPs in the city (MLD)	...
Electricity	Total number of authorized electrical connections in the city	329482
	Total electricity supplied to the city (kWh)	1660558000
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	9540000
Roads and Transport	Total Length of Road Network in the City (Km)	1427.63
	Total length of arterial and sub-arterial road network in the city (Km)	548.35
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	...

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies

Pillars of Comprehensive Development	Category	Indicators
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita

Pillars of Comprehensive Development	Category	Indicators
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced	15.1 Concentration of SO2- air pollution

Pillars of Comprehensive Development	Category	Indicators
	Pollution	15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

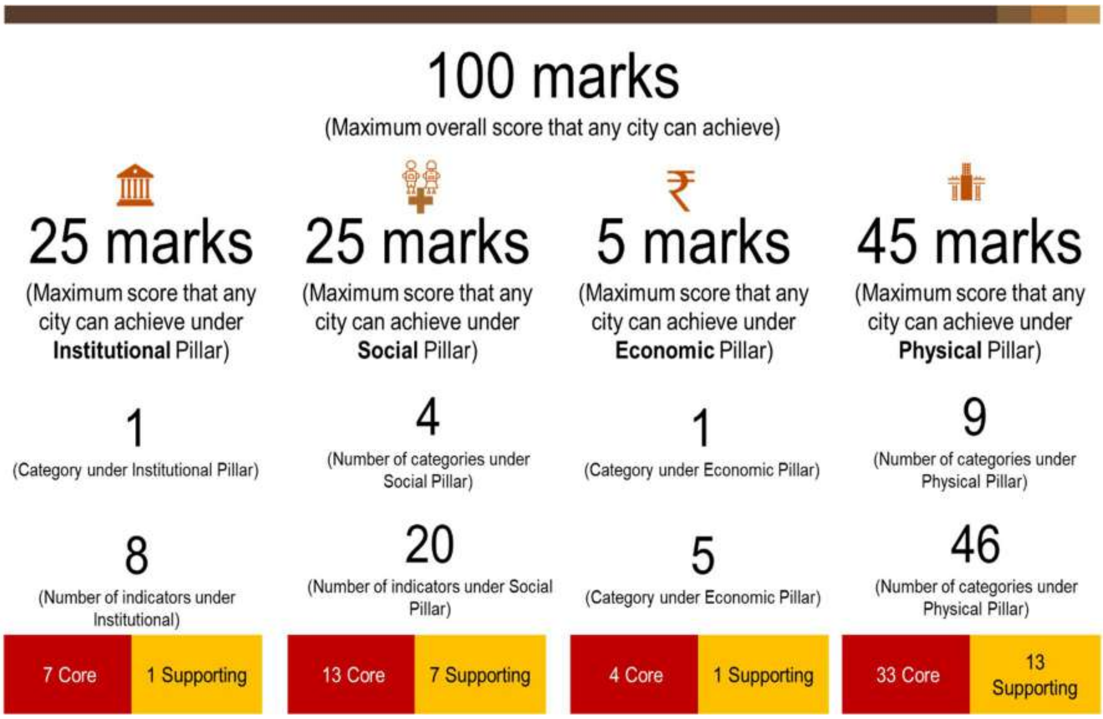
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)

25 marks (Maximum score that any city can achieve under **Institutional** Pillar)	25 marks (Maximum score that any city can achieve under **Social** Pillar)	5 marks (Maximum score that any city can achieve under **Economic** Pillar)	45 marks (Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and

development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts section, Meerut Nagar Nigam
Urban Local Body	For Park and Recreation Related Questions	Garden Section, Meerut Nagar Nigam
Urban Local Body	For Water Supply and Drainage related questions	Water supply, Meerut Nagar Nigam
Urban Local Body	For Heritage sites related data	Tourism Department
Urban Local Body	For Ecological sites related data	
Urban Local Body	For Housing related data	Housing, Meerut Nagar Nigam
Urban Local Body	For Building plan related data	Development authority
Urban Local Body	For Roads related data	Development authority, roads
Urban Local Body	For Solid waste management related data	PHED
Urban Local Body	For IT services related data	IT Section, Meerut Nagar Nigam
Urban Local Body	For Vendor committee related data	
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	UP Pollution control Board
Development	Building Infrastructure	Development Authority

Designated data owners	Subcategories	Data owners at city level
Authority		
	Construction planning	Development Authority
	Green Building	Development Authority
	Rain water harvesting	Development Authority
	Universal Design Principle	Development Authority
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	DISCOM/Electricity Board
State Disaster management authority		State Disaster management authority
State Education Department		Education department
State Health Department	Health care professionals	Health department
	Citizen Services	Health department
	Disease Prevalence	Health department
	Health Infrastructure	Health department
State Renewable Energy Development Agency	Renewable Energy	State Renewable Energy Development Agency
State Sales / Commercial Taxes Department		State Sales / Commercial Taxes Department
Town and Country Planning Department	Land Use	Town and Country Planning Department
Traffic and Police Department		Traffic and Police Department
Transport Authorities	Buses	Transport Authorities
	Registered Vehicles	RTO
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 12 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**1**
State Education Department	**1**
DISCOM/Electricity Department	**1**
Traffic and Police Department	**1**
Development Authority	**1**
Pollution Control Board	**1**
State Renewable Energy Department	**1**
Town and Country Planning	**1**
State Health Department	**1**
Transport Authority	**1**
Disaster Management	**1**
Urban Local Body	**1**
Total	**12***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**67.95**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	1
	1.1d solid waste management	0
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	0
	1.1h property tax	1
	1.1i professional tax	0
	1.1j information	1
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.333333333
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	

Indicator No. 1.3	**Percentage of citizens using online services**	**1.02**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	NA
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.005885613
	1.3i information	0.004406214
	1.3j electricity	0.020248451
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**1.17**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	7
	1.4f parks and recreational spaces	0
	1.4g building plan	NA
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**89.84**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	2621.07
Denominator	Total demand raised for the year	2917.49
Unit	Percentage	

Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	0
Denominator	Total O&M cost for providing water supply services during the year	450
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**-384.12**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-46855.18
Denominator	Total expenditure (revenue and capital accounts) in the same year	12198.01
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	0
Denominator	Total number of wards	80
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	1
Denominator	Total number of historic buildings/sites identified	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	25249.77
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**0**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	0
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**5.21**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	14374
Denominator	Total population in the age group of 6-14 years	276012
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**5.77**

Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	7301
Denominator	Total female population in the age group of 6-14 years	126613
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**60.2**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	12763
Denominator	Total number of teachers available for primary grades (public and private schools)	212
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**1.82**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	3
Denominator	Total number of schools	165
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**39.26**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	39.2571269
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**68.08**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	219632
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**68.2**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	8903
Denominator	Total population of the city	1305429
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**29.32**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	3828
Denominator	Total population of the city	1305429
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**15**
Description	Total response time for health-related distress calls received in the city	15
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**2.74**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	35721
Denominator	Total population of the city	1305429
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.08**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	1080
Denominator	Total population of the city	1305429
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**5.81**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	83
Denominator	Total length of road network in the city	1427.63
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**814.98**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	10639
Denominator	Total population of the city	1305429
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**10.65**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	1133
Denominator	Total crimes recorded in the same year	10639
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**64.19**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	838
Denominator	Total population of the city	1305429
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**12.07**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	9021
Denominator	Total VAT/GST collection during preceding year	747.54
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	0
Denominator	Total Professional Tax collection during preceding year	0
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**16.92**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	90
Denominator	Number of construction permits during preceding year	5.32
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	Data Unavailable
Denominator	Total labour force in the city	276012
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**4.27**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	780
Denominator	Total number of vendors in the city	18250
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	Data Unavailable
Denominator	Total number of slum and EWS households in the city	2355.75
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	**0**
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**7.31**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	9540000
Denominator	Total population of the city	1305429
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.73**
Formula:	*Numerator / Denominator*	

Numerator	Total area of public and recreational places (sq.m.)	957500
Denominator	Total population of the city	1305429
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**109.84**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	155900000
Denominator	Total area of the city (total area of all land uses)	141940000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1305429
Denominator	Area allocated for residential land use (in hectares)	62010000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**118.63**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	268183
Denominator	Total number of households in the city	226065
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**

Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	329482
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**11629**
Description	Total number of sustained electrical interruptions in a year	11629
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.65**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	816384
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	1495
Denominator	Total energy consumption from all sources	1660558000
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	0
Denominator	Total quantum of water and waste water handled during the period	6905.7
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.29**

Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	38240000
Denominator	Total number of street light installations	42089
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	Data Unavailable
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	65748
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.47**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1660558000
Denominator	Total population of the city	1305429
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.41**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	100
Denominator	Total area of the city (sq.km)	141.94
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.14**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	179
Denominator	Total population of the city	1305429
Unit	Number per 1000 persons	
Benchmark	>=0.6	

Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0.39**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	5.5
Denominator	Total length of road network in the city	1427.63
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	Data Unavailable
Denominator	Total number of major transport interchanges in the city	17
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	Data Unavailable
Denominator	Total number of major interchanges in the city	17
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	13
Denominator	Total number of signalised intersections in the city	13

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	Data Unavailable
Denominator	Total available on-street parking spaces in the city	Data Unavailable
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	Data Unavailable
Denominator	Total length of road network in the city	2855.26
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	Data Unavailable
Denominator	Total number of junctions/ intersections on major roads in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**3.2**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	4
Denominator	Total number of public right-of-way areas in the city	125
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**50.31**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	113726
Denominator	Total number of households in the city	226065
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**176.33**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	230.19
Denominator	Total population of the city	1305429
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	0
Denominator	Total number of samples tested for water quality	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**11.73**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	27
Denominator	Quantum of water put into the distribution system (mld)	230.19
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	0
Denominator	Total number of water connections in the city	119940
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**4.07**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	25
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	615
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	0
Denominator	Total number of properties in the city	254292
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	0
Denominator	Total number of properties in the city	254292
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	0
Denominator	Total waste water generated in the city per day	273.88
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	0

Denominator	Total waste water received at treatment plants per day	0
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**1.05**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	15
Denominator	Total length of road network in the city	1427.63
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	0
Denominator	Total number of households and establishments in the city	268892
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**58.9**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	536
Denominator	Total quantum of MSW generated in the city	910
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	0
Denominator	Average MSW generated in the city (tons per month)	16080
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**7.04**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	7.04
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**62.17**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	62.166
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**169.21**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	169.206
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	0
Denominator	Total number of noise samples	144
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**13.52**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	48
Denominator	Total number of samples tested	355
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT

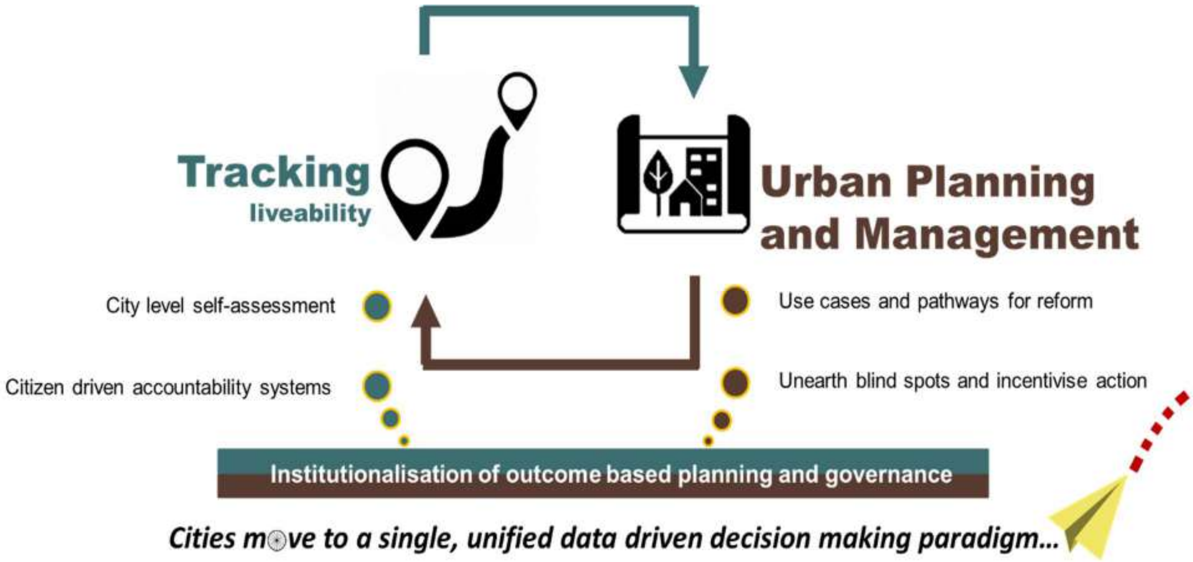
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

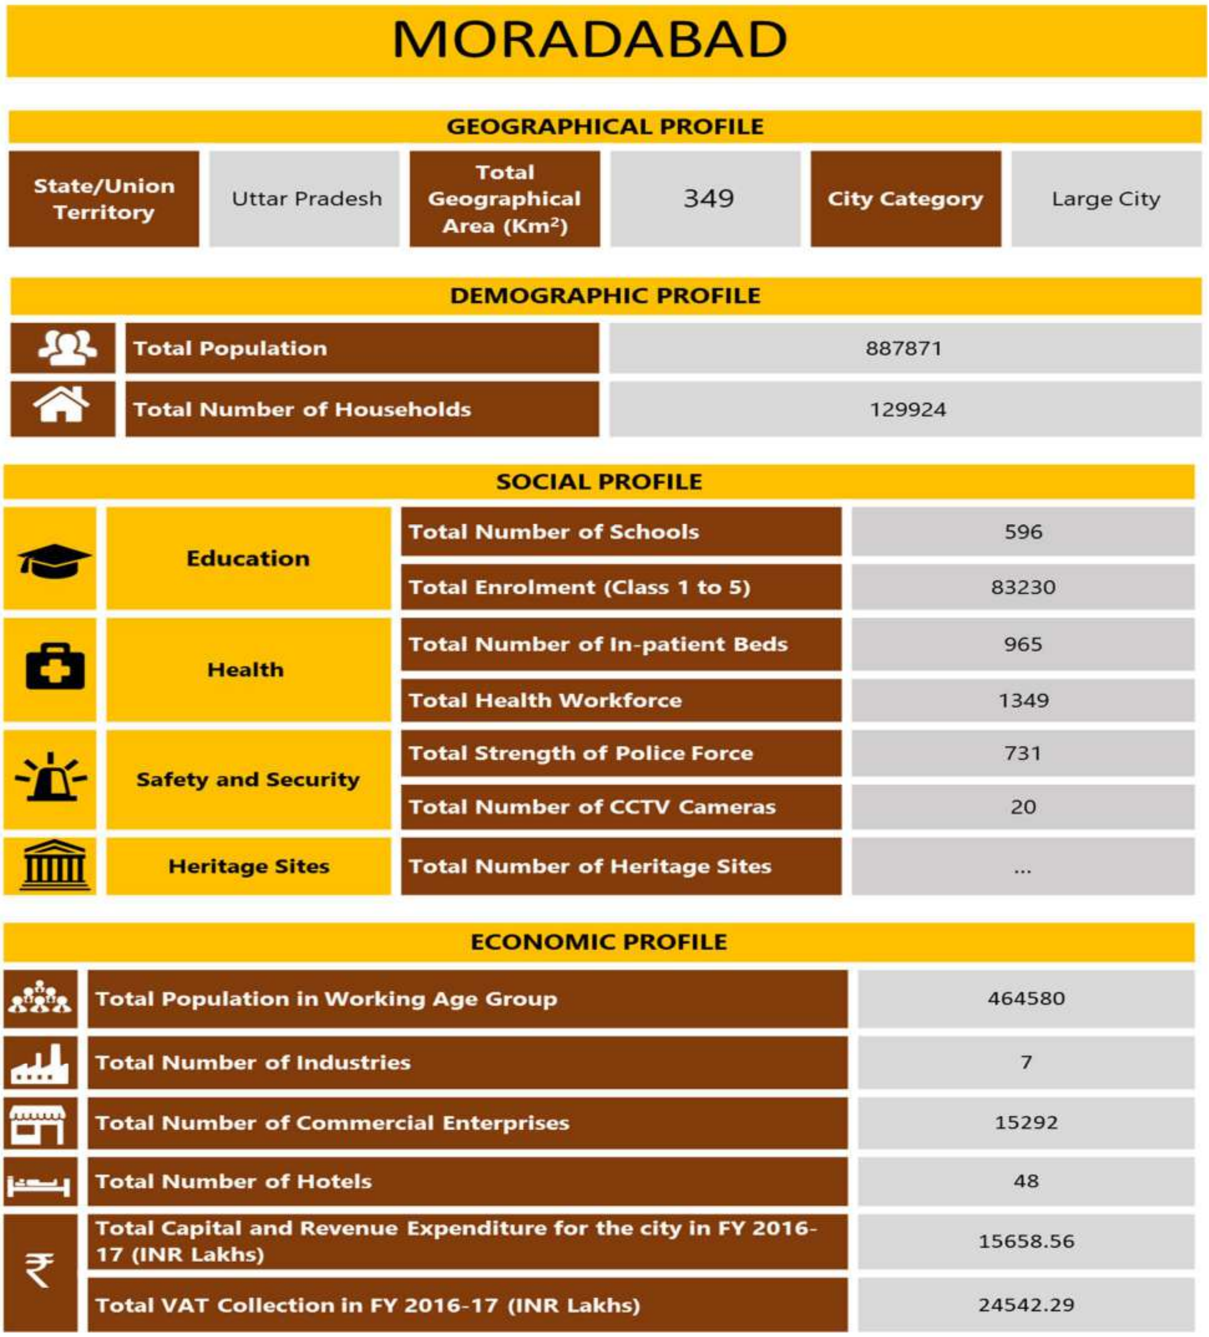


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



MORADABAD

GEOGRAPHICAL PROFILE

State/Union Territory	Uttar Pradesh	Total Geographical Area (Km²)	349	City Category	Large City

DEMOGRAPHIC PROFILE

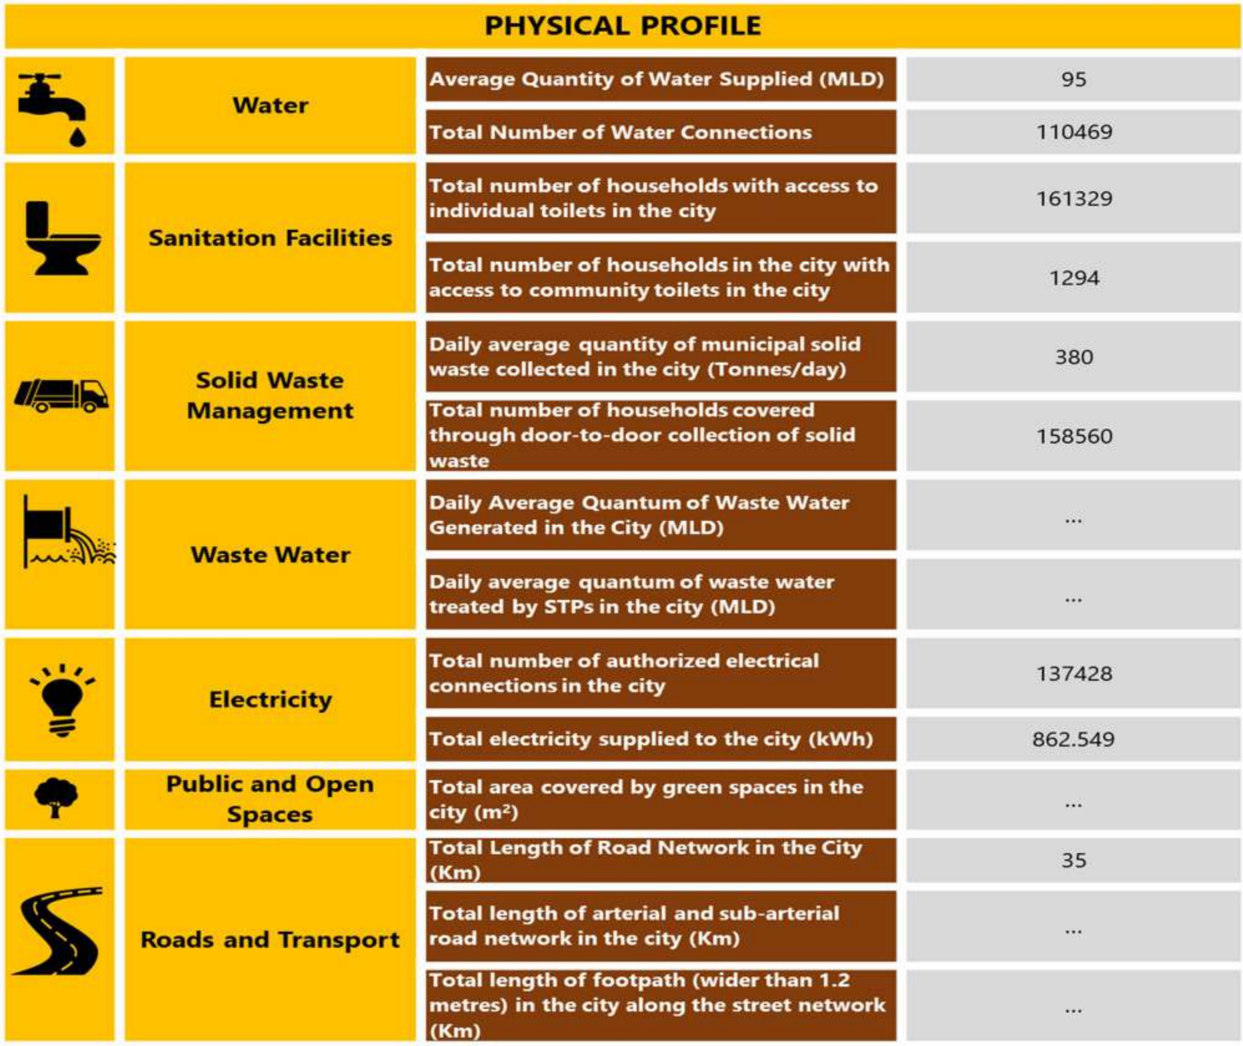
Total Population	887871
Total Number of Households	129924

SOCIAL PROFILE

Education	Total Number of Schools	596
	Total Enrolment (Class 1 to 5)	83230
Health	Total Number of In-patient Beds	965
	Total Health Workforce	1349
Safety and Security	Total Strength of Police Force	731
	Total Number of CCTV Cameras	20
Heritage Sites	Total Number of Heritage Sites	...

ECONOMIC PROFILE

Total Population in Working Age Group	464580
Total Number of Industries	7
Total Number of Commercial Enterprises	15292
Total Number of Hotels	48
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	15658.56
Total VAT Collection in FY 2016-17 (INR Lakhs)	24542.29



PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	95
	Total Number of Water Connections	110469
Sanitation Facilities	Total number of households with access to individual toilets in the city	161329
	Total number of households in the city with access to community toilets in the city	1294
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	380
	Total number of households covered through door-to-door collection of solid waste	158560
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	...
	Daily average quantum of waste water treated by STPs in the city (MLD)	...
Electricity	Total number of authorized electrical connections in the city	137428
	Total electricity supplied to the city (kWh)	862.549
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	...
Roads and Transport	Total Length of Road Network in the City (Km)	35
	Total length of arterial and sub-arterial road network in the city (Km)	...
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	...

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies

Pillars of Comprehensive Development	Category	Indicators
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita

Pillars of Comprehensive Development	Category	Indicators
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced	15.1 Concentration of SO2- air pollution

Pillars of Comprehensive Development	Category	Indicators
	Pollution	15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

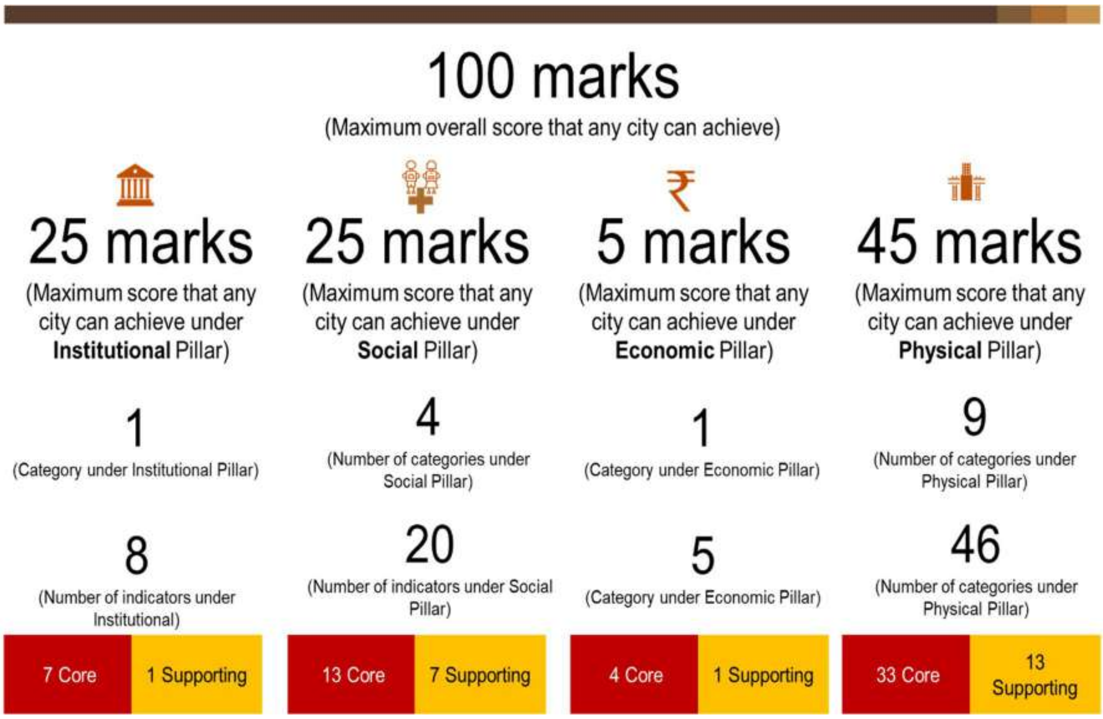
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks

(Maximum score that any city can achieve under **Institutional** Pillar)

1

(Category under Institutional Pillar)

8

(Number of indicators under Institutional)

7 Core | 1 Supporting

25 marks

(Maximum score that any city can achieve under **Social** Pillar)

4

(Number of categories under Social Pillar)

20

(Number of indicators under Social Pillar)

13 Core | 7 Supporting

5 marks

(Maximum score that any city can achieve under **Economic** Pillar)

1

(Category under Economic Pillar)

5

(Category under Economic Pillar)

4 Core | 1 Supporting

45 marks

(Maximum score that any city can achieve under **Physical** Pillar)

9

(Number of categories under Physical Pillar)

46

(Number of categories under Physical Pillar)

33 Core | 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark -\ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning

department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts department, Nagar Nigam Moradabad
Urban Local Body	For Park and Recreation Related Questions	Udyan vibhag, Nagar Nigam Moradabad
Urban Local Body	For Water Supply and Drainage related questions	Jal Nigam/Jalkal, vibhag Nagar Nigam Moradabd
Urban Local Body	For Heritage sites related data	Archeological survey of India /in charge in ULB
Urban Local Body	For Ecological sites related data	Forest Department Moradabad
Urban Local Body	For Housing related data	Moradabad Development Authority / Nirmaan Vibhag Nagar Nigam Moradabad
Urban Local Body	For Building plan related data	Moradabad Development Authority Moradabad
Urban Local Body	For Roads related data	Public Works Department / Nirmaan Vibhag Nagar Nigam Moradabad
Urban Local Body	For Solid waste management related data	Health Department Nagar Nigam Moradabad
Urban Local Body	For IT services related data	Computer Department. Nagar Nigam Moradabad
Urban Local Body	For Vendor committee related data	District Urban Development Agency(DUDA) Moradabad
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Public Works Department ,Employment Exchange, District urban development Agency moradabad
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Uttar Pradesh pollution Control Board Moradabad
Development Authority	Building Infrastructure	Moradabad development Authority Moradabad
	Construction planning	Moradabad development Authority

Designated data owners	Subcategories	Data owners at city level
		Moradabad
	Green Building	Moradabad development Authority Moradabad
	Rain water harvesting	Moradabad development Authority Moradabad
	Universal Design Principle	Moradabad development Authority Moradabad
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Uttar Pradesh Power Corporation Ltd Moradabad
State Disaster management authority		State Disaster Management Moradabad [in UP ADM (FR]
State Education Department		Basic Siksha Adhikari/district inspector of school Moradabad (DIOS)
State Health Department	Health care professionals	UP State Health Department Moradabad (CMO)
	Citizen Services	UP State Health Department Moradabad (CMO)
	Disease Prevalence	UP State Health Department Moradabad (CMO)
	Health Infrastructure	UP State Health Department Moradabad (CMO)
State Renewable Energy Development Agency	Renewable Energy	State Renewable Energy Develop. Agency(NEDA)
State Sales / Commercial Taxes Department		Commercial Taxes Department Moradabad Zone
Town and Country Planning Department	Land Use	Town and Country Planning Department Moradabad
Traffic and Police Department		Traffic police, Civil police & Grand Railway police Moradabad
Transport Authorities	Buses	Uttar Pradesh State transport Corporation & Regional Transport Office Moradabad
	Registered Vehicles	Regional Transport Office Moradabad
	Sub urban rail transport	N A
	Mono Rail Authority	N A
	Tramways	N A
	Marine Transport Authority	N A

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 27 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**1**
State Education Department	**1**
DISCOM/Electricity Department	**1**
Traffic and Police Department	**2**
Development Authority	**1**
Pollution Control Board	**1**
State Renewable Energy Department	**1**
Town and Country Planning	**2**
State Health Department	**1**
Transport Authority	**1**
Disaster Management	**1**
Urban Local Body	**14**
Total	**27***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

Indicator
1. LA - Pedestrian Crossing Facilities
2. LA - Command and Control Centre
3. LA - Digital Education Infrastructure
4. LA - Hotel Occupancy
5. LA - Surveillance Camera
6. LA - Passenger Information Systems
7. LA - Street Vendors
8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**76.92**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	1
	1.1e water supply	0.666666667
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	1
	1.1i professional tax	1
	1.1j information	1
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.333333333
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**14.29**
Description	Services integrated through an integrated or a singular operations command centre	3
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**0.81**
Description		
Sub Indicators	1.3a Building plan	0
	1.3b Birth/Death Certificate	0

	1.3c water supply	0
	1.3d solid waste management	0
	1.3e property tax	0
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	7.38658E-05
	1.3i information	5.63145E-05
	1.3j electricity	0.064331868
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.25**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	1
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0.5
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**96.42**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	1212.54
Denominator	Total demand raised for the year	1257.6
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**169815.62**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply	5422060

	in a year	
Denominator	Total O&M cost for providing water supply services during the year	3192.91
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**2.16**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	889.18
Denominator	Total expenditure (revenue and capital accounts) in the same year	41147.22
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	70
Denominator	Total number of wards	70
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	0
Denominator	Total number of historic buildings/sites identified	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0

Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**7.14**
Description	Average Occupancy rate of Hotels	7.142857143
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	15658.56
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**10**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	10
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**63.36**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	125228
Denominator	Total population in the age group of 6-14 years	197644
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**64.31**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	60224
Denominator	Total female population in the age group of 6-14 years	93640

Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**29.1**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	83230
Denominator	Total number of teachers available for primary grades (public and private schools)	2860
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**6.88**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	41
Denominator	Total number of schools	596
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**195.87**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	195.870 46
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**148.84**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	1921418 52
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**10.87**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	965
Denominator	Total population of the city	887871
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**15.19**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	1349
Denominator	Total population of the city	887871
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**21**
Description	Total response time for health-related distress calls received in the city	21
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**4.53**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	40229
Denominator	Total population of the city	887871
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.06**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	553
Denominator	Total population of the city	887871
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**57.14**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	20
Denominator	Total length of road network in the city	35
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**346.56**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	3077
Denominator	Total population of the city	887871
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**26.26**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	808
Denominator	Total crimes recorded in the same year	3077
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**52.03**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	462
Denominator	Total population of the city	887871
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**7.95**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	1806.92
Denominator	Total VAT/GST collection during preceding year	227.3537
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**70.13**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	162
Denominator	Number of construction permits during preceding year	2.31
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	10369
Denominator	Total labour force in the city	197644
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	8750
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**4.94**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	7002
Denominator	Total number of slum and EWS households in the city	1416.19
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	211520000
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	Data Unavailable
Denominator	Total population of the city	887871
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**0.41**
Formula:	*Numerator / Denominator*	

Numerator	Total area of public and recreational places (sq.m.)	365929
Denominator	Total population of the city	887871
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	Data Unavailable
Denominator	Total area of the city (total area of all land uses)	349000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	887871
Denominator	Area allocated for residential land use (in hectares)	58558500
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**120.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	155935
Denominator	Total number of households in the city	129924
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**

Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	137428
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**750**
Description	Total number of sustained electrical interruptions in a year	750
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	300
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	1000070
Denominator	Total energy consumption from all sources	862.549
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	0
Denominator	Total quantum of water and waste water handled during the period	2850
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.35**

Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	61032
Denominator	Total number of street light installations	39684
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	862.549
Denominator	Total population of the city	887871
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	NA
Denominator	Total area of the city (sq.km)	349
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	NA
Denominator	Total population of the city	887871
Unit	Number per 1000 persons	

Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	35
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	2
Denominator	Total number of major transport interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**1**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	2
Denominator	Total number of major interchanges in the city	2
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	6
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	8
Denominator	Total available on-street parking spaces in the city	0
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	0
Denominator	Total length of road network in the city	70
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	0
Denominator	Total number of junctions/ intersections on major roads in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	0
Denominator	Total number of public right-of-way areas in the city	118
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**57.82**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	75121
Denominator	Total number of households in the city	129924
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**107**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	95
Denominator	Total population of the city	887871
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	0
Denominator	Total number of samples tested for water quality	953
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**100.53**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	95.5
Denominator	Quantum of water put into the distribution system (mld)	95
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	0
Denominator	Total number of water connections in the city	110469
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	1
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	0
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**113.08**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	179328
Denominator	Total number of properties in the city	158587
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	0
Denominator	Total number of properties in the city	158587
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	0
Denominator	Total waste water generated in the city per day	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	Quantum of waste water recycled or reused per day	0
Denominator	Total waste water received at treatment plants per day	0
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	0
Denominator	Total length of road network in the city	35
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**118.11**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	171510
Denominator	Total number of households and establishments in the city	145216
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	380
Denominator	Total quantum of MSW generated in the city	380
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	0
Denominator	Average MSW generated in the city (tons per month)	11400
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**22**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	22
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**40**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	40
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**240**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	240
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	0
Denominator	Total number of noise samples	48
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	953
Denominator	Total number of samples tested	953
Unit	Percentage	
Benchmark	100%

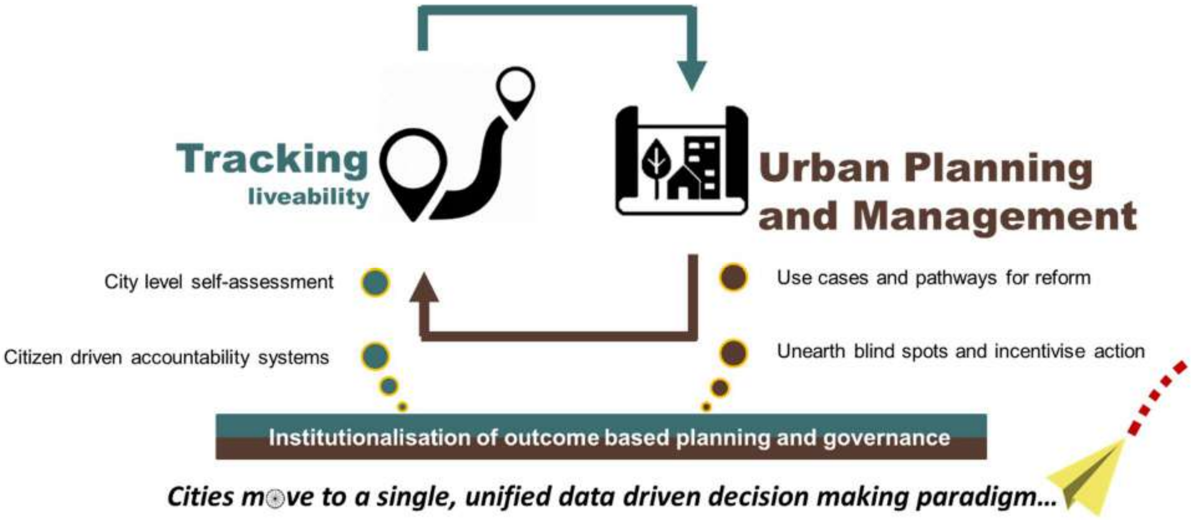
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

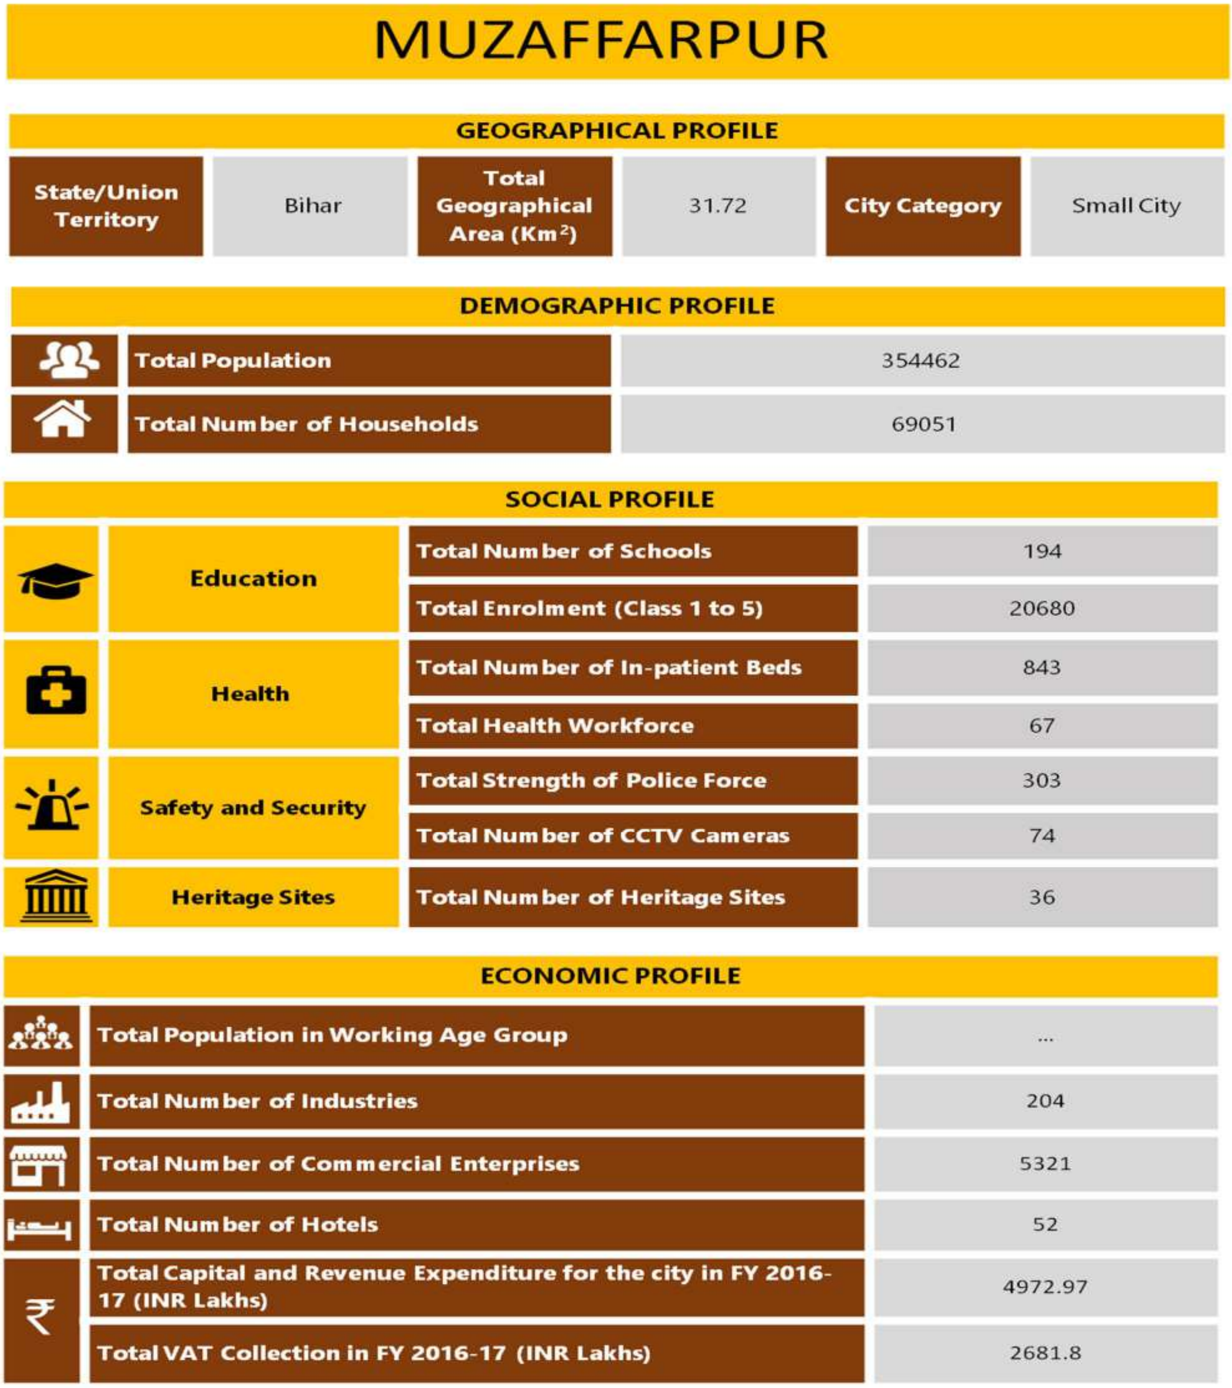


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



MUZAFFARPUR

GEOGRAPHICAL PROFILE

State/Union Territory	Bihar	**Total Geographical Area (Km^2)**	31.72	**City Category**	Small City

DEMOGRAPHIC PROFILE

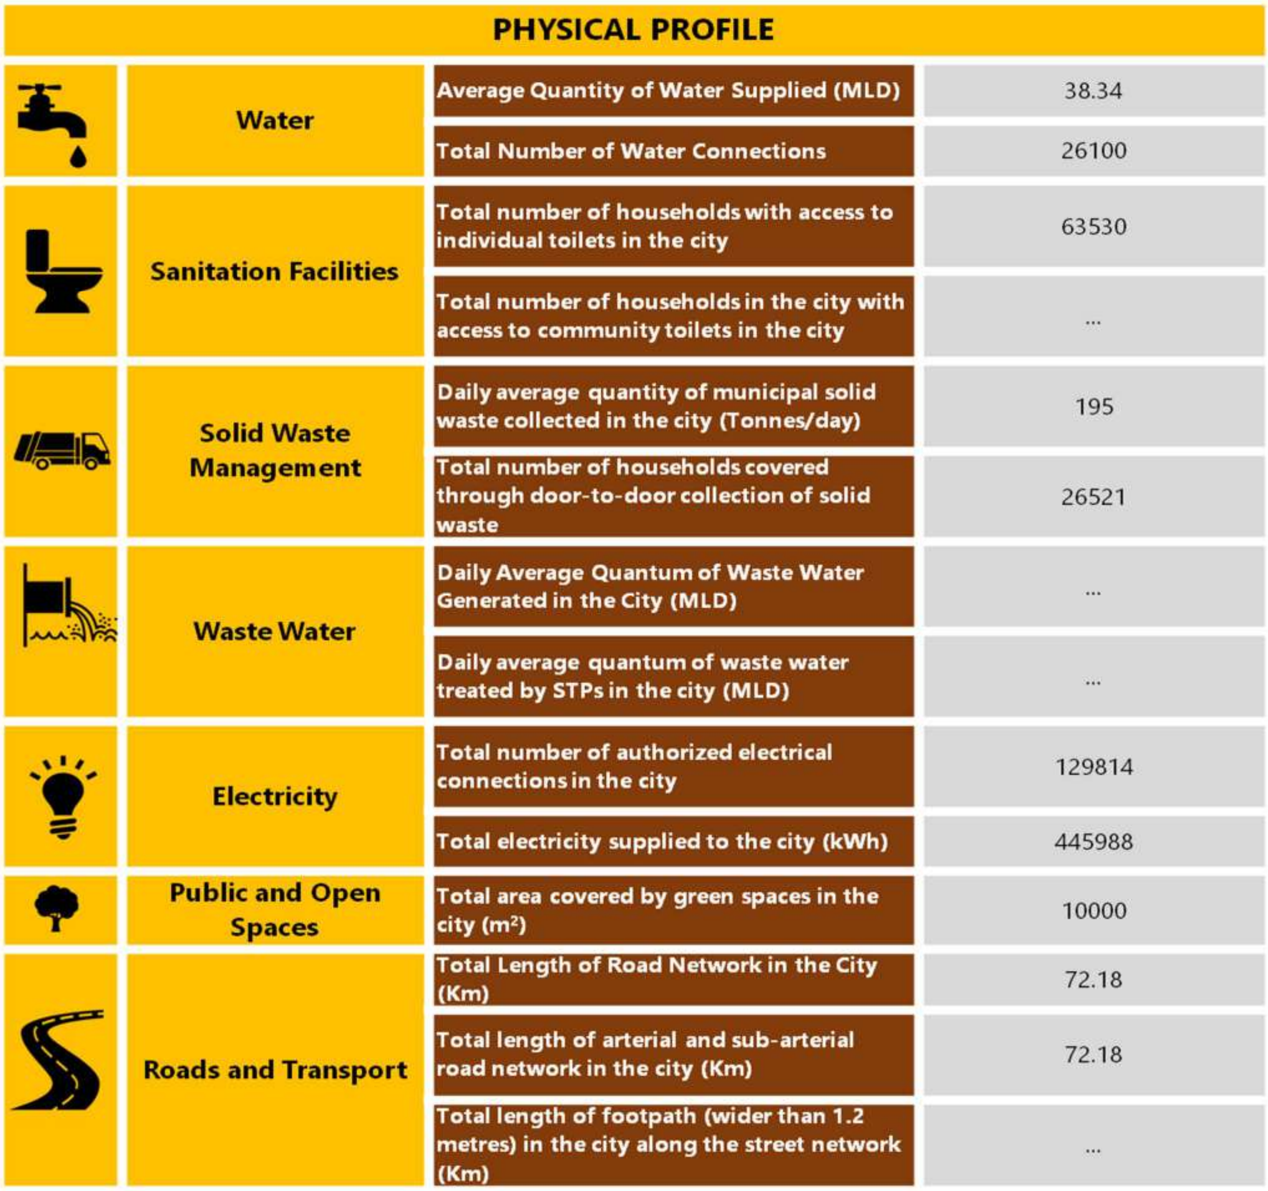
Total Population	354462
Total Number of Households	69051

SOCIAL PROFILE

Education	**Total Number of Schools**	194
	Total Enrolment (Class 1 to 5)	20680
Health	**Total Number of In-patient Beds**	843
	Total Health Workforce	67
Safety and Security	**Total Strength of Police Force**	303
	Total Number of CCTV Cameras	74
Heritage Sites	**Total Number of Heritage Sites**	36

ECONOMIC PROFILE

Total Population in Working Age Group	...
Total Number of Industries	204
Total Number of Commercial Enterprises	5321
Total Number of Hotels	52
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	4972.97
Total VAT Collection in FY 2016-17 (INR Lakhs)	2681.8



PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	38.34
	Total Number of Water Connections	26100
Sanitation Facilities	Total number of households with access to individual toilets in the city	63530
	Total number of households in the city with access to community toilets in the city	...
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	195
	Total number of households covered through door-to-door collection of solid waste	26521
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	...
	Daily average quantum of waste water treated by STPs in the city (MLD)	...
Electricity	Total number of authorized electrical connections in the city	129814
	Total electricity supplied to the city (kWh)	445988
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	10000
Roads and Transport	Total Length of Road Network in the City (Km)	72.18
	Total length of arterial and sub-arterial road network in the city (Km)	72.18
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	...

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in

Pillars of Comprehensive Development	Category	Indicators
		schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through

Pillars of Comprehensive Development	Category	Indicators
		meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

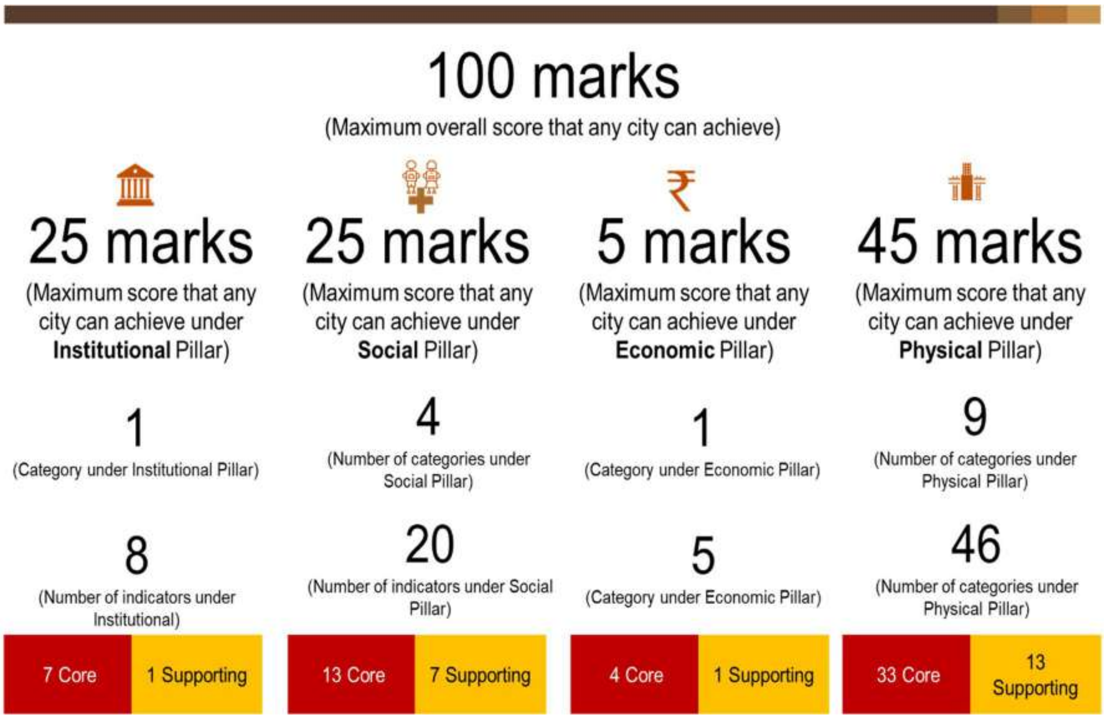
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks

(Maximum score that any city can achieve under **Institutional** Pillar)

1

(Category under Institutional Pillar)

8

(Number of indicators under Institutional)

7 Core | 1 Supporting

25 marks

(Maximum score that any city can achieve under **Social** Pillar)

4

(Number of categories under Social Pillar)

20

(Number of indicators under Social Pillar)

13 Core | 7 Supporting

5 marks

(Maximum score that any city can achieve under **Economic** Pillar)

1

(Category under Economic Pillar)

5

(Category under Economic Pillar)

4 Core | 1 Supporting

45 marks

(Maximum score that any city can achieve under **Physical** Pillar)

9

(Number of categories under Physical Pillar)

46

(Number of categories under Physical Pillar)

33 Core | 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark -\ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Account Department, Muzaffarpur Municipal Corporation
Urban Local Body	For Park and Recreation Related Questions	Engineering Department, Muzaffarpur Municipal Corporation
Urban Local Body	For Water Supply and Drainage related questions	Engineering Department, Muzaffarpur Municipal Corporation
Urban Local Body	For Heritage sites related data	Muzaffarpur Municipal Corporation
Urban Local Body	For Ecological sites related data	Muzaffarpur Municipal Corporation
Urban Local Body	For Housing related data	Social development Section, Muzaffarpur Municipal Corporation
Urban Local Body	For Building plan related data	Engineering Department, Muzaffarpur Municipal Corporation
Urban Local Body	For Roads related data	Engineering Department, Muzaffarpur Municipal Corporation
Urban Local Body	For Solid waste management related data	Muzaffarpur Municipal Corporation

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For IT services related data	IT section, Muzaffarpur Municipal Corporation
Urban Local Body	For Vendor committee related data	Social Development Section, Muzaffarpur Municipal Corporation
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	State Pollution Control Board, Bihar
Development Authority	Building Infrastructure	Engineering Department, Muzaffarpur Municipal Corporation
	Construction planning	Engineering Department, Muzaffarpur Municipal Corporation
	Green Building	Engineering Department, Muzaffarpur Municipal Corporation
	Rain water harvesting	Engineering Department, Muzaffarpur Municipal Corporation
	Universal Design Principle	Engineering Department, Muzaffarpur Municipal Corporation
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Bihar Power Distribution Corporation Limited
State Disaster management authority		District Collectorate Office
State Education Department		District Education Department
State Health Department	Health care professionals	Civil Surgeon Office
	Citizen Services	Civil Surgeon Office
	Disease Prevalence	Civil Surgeon Office
	Health Infrastructure	Civil Surgeon Office
State Renewable Energy Development		Bihar Renewable Energy Development Authority

Designated data owners	Subcategories	Data owners at city level
Agency		
State Sales / Commercial Taxes Department		State Commercial and Tax department
Town and Country Planning Department	Land Use	Muzaffarpur Municipal Corporation
Traffic and Police Department		Office of Senior Superintendent of Police
Transport Authorities	Buses	District Transport office
	Registered Vehicles	District Transport office
	Sub urban rail transport	
	Mono Rail Authority	
	Tramways	
	Marine Transport Authority	

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 40 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

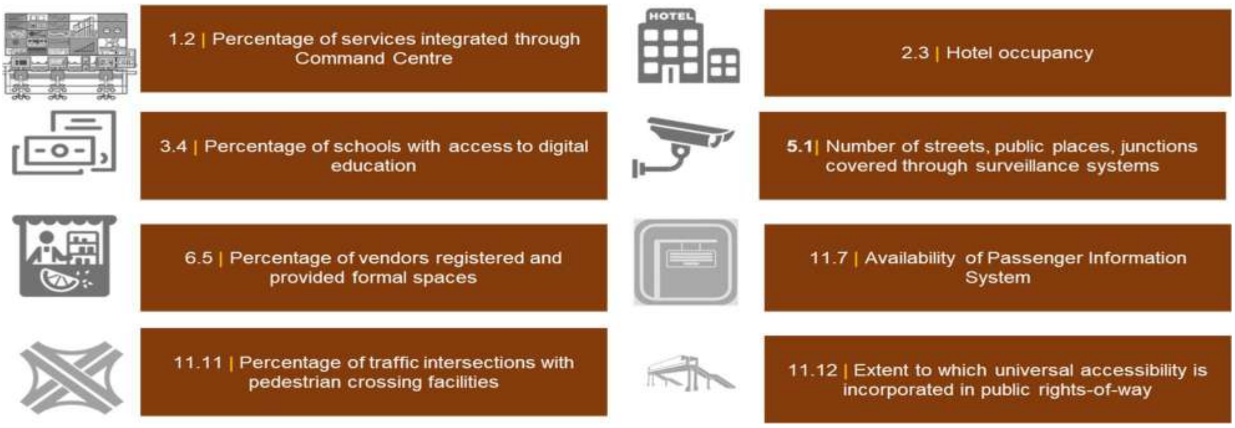
Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	2
DISCOM/Electricity Department	0
Traffic and Police Department	4
Development Authority	0
Pollution Control Board	2
State Renewable Energy Department	0
Town and Country Planning	0
State Health Department	5
Transport Authority	0
Disaster Management	0
Urban Local Body	27
Total	40*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

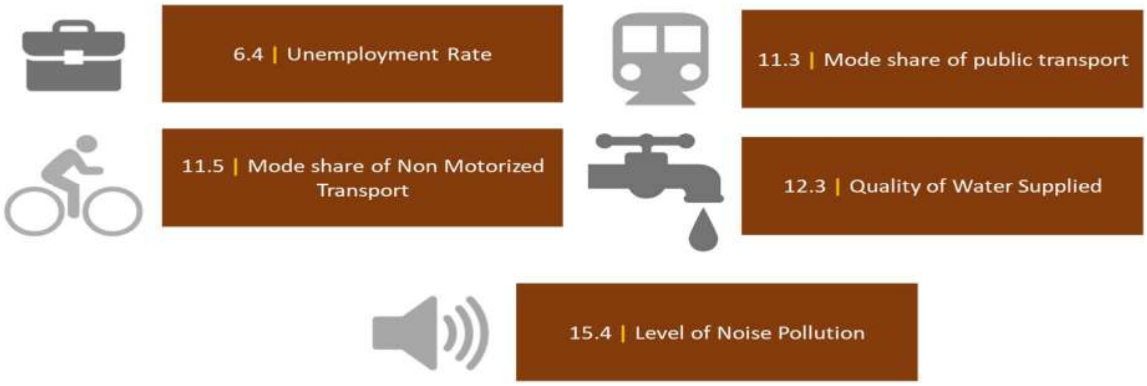
6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**52.56**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	0
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	1
	1.1i professional tax	0
	1.1j information	1
	1.1k Grievance redressal	1
	1.1l electricity	0.5
	1.1m Building plan	0.333333333
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**23.81**
Description	Services integrated through an integrated or a singular operations command centre	5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**1.9**

Description		
Sub Indicators	1.3a Building plan	3.07037E-05
	1.3b Birth/Death Certificate	0.004945053
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	0.001462939
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.002173952
	1.3i information	0.002172306
	1.3j electricity	0.103151432
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**NC**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	NA
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**82.6**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	1134.59
Denominator	Total demand raised for the year	1373.61

Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	NA
Denominator	Total O&M cost for providing water supply services during the year	11.89
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**213.76**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-17110.81
Denominator	Total expenditure (revenue and capital accounts) in the same year	-8004.55
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	49
Denominator	Total number of wards	49
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	0
Denominator	Total number of historic buildings/sites identified	36

Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**33.33**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	1
Denominator	Total number of ecologically important sites identified in the city	3
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**80**
Description	Average Occupancy rate of Hotels	80
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	1.03
Denominator	Total budget of the ULB (capital and revenue)	4972.97
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**152**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	152
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in**	**44.53**

	schools	
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	33133
Denominator	Total population in the age group of 6-14 years	74410
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**46.82**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	16385
Denominator	Total female population in the age group of 6-14 years	34999
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**13.14**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	20680
Denominator	Total number of teachers available for primary grades (public and private schools)	1574
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**12.89**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	25
Denominator	Total number of schools	194
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**91.35** 91.34654349
Formula:	*Product of ratios of students passing successive grades*	

	(between grades 1 to 5) in 2016-17	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**94.25**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	16816404
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**23.78**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	843
Denominator	Total population of the city	354462
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**1.89**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	67
Denominator	Total population of the city	354462
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**Non-Computable**
Description	Total response time for health-related distress calls received in the city	NA

Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**1.38**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	4874
Denominator	Total population of the city	354462
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	1197
Denominator	Total population of the city	354462
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**102.52**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	74
Denominator	Total length of road network in the city	72.18
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**1156.4**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	4099
Denominator	Total population of the city	354462

Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**3.46**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	142
Denominator	Total crimes recorded in the same year	4099
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**68.27**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	242
Denominator	Total population of the city	354462
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**16.93**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	5945.89
Denominator	Total VAT/GST collection during preceding year	351.2495
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-**
Formula:	*Numerator / Denominator*	

		Computable
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**35.04**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	48
Denominator	Number of construction permits during preceding year	1.37
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	30032
Denominator	Total labour force in the city	74410
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**13.48**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	304
Denominator	Total number of vendors in the city	2255
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**16.77**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	1126
Denominator	Total number of slum and EWS households in the city	67.14
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	0
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	10000
Denominator	Total population of the city	354462
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**131.96**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	46776087.12
Denominator	Total population of the city	354462
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability	

	(amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	31720000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.06**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	354462
Denominator	Area allocated for residential land use (in hectares)	5779074
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**137.62**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	95031
Denominator	Total number of households in the city	69051
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**Non-**

Formula:	*Numerator / Denominator*	**Computable**
Numerator	Number of electrical connections (residential and commercial) with smart meters	NA
Denominator	Total number of electricity connections in the city	129814
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**36908**
Description	Total number of sustained electrical interruptions in a year	36908
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	60
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	NA
Denominator	Total energy consumption from all sources	452254.4
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**NC**
Formula:	*Numerator / Denominator*	

Numerator	Energy consumption on water supply and sewerage services	86.25
Denominator	Total quantum of water and waste water handled during the period	NA
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	1187
Denominator	Total number of street light installations	5418
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	1300
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	26900
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	452254.4
Denominator	Total population of the city	354462
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.42**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	20
Denominator	Total area of the city (sq.km)	31.72
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	NA
Denominator	Total population of the city	354462
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	72.18
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with	NA

	bicycle parking facility (within 250m radius)	
Denominator	Total number of major transport interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	NA
Denominator	Total number of signalised intersections in the city	NA
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	0

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Total available on-street parking spaces in the city	1
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**50**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	72.18
Denominator	Total length of road network in the city	144.36
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	0
Denominator	Total number of junctions/ intersections on major roads in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**3.65**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	22
Denominator	Total number of public right-of-way areas in the city	603
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**36.39**

Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	25125
Denominator	Total number of households in the city	69051
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**108.16**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	38.34
Denominator	Total population of the city	354462
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied[2]**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	6
Denominator	Total number of samples tested for water quality	12
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	38.34
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Number of metered water connections	NA
Denominator	Total number of water connections in the city	26100
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	186
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	186
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**138.63**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	63966
Denominator	Total number of properties in the city	46140
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**143.04**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	66000
Denominator	Total number of properties in the city	46140
Unit	Percentage	
Benchmark	100%	

Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	NA
Denominator	Total waste water generated in the city per day	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	NA
Denominator	Total waste water received at treatment plants per day	NA
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	NA
Denominator	Total length of road network in the city	72.18
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**53.4**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	39713
Denominator	Total number of households and establishments in the city	74372
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**95.12**
Formula:	*Numerator / Denominator*	

Numerator	Total quantum of MSW collected by the ULB or private operator	195
Denominator	Total quantum of MSW generated in the city	205
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**0.58**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	33.8
Denominator	Average MSW generated in the city (tons per month)	5850
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**10.8**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	10.8
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**42.64**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	42.64
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	NA
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**

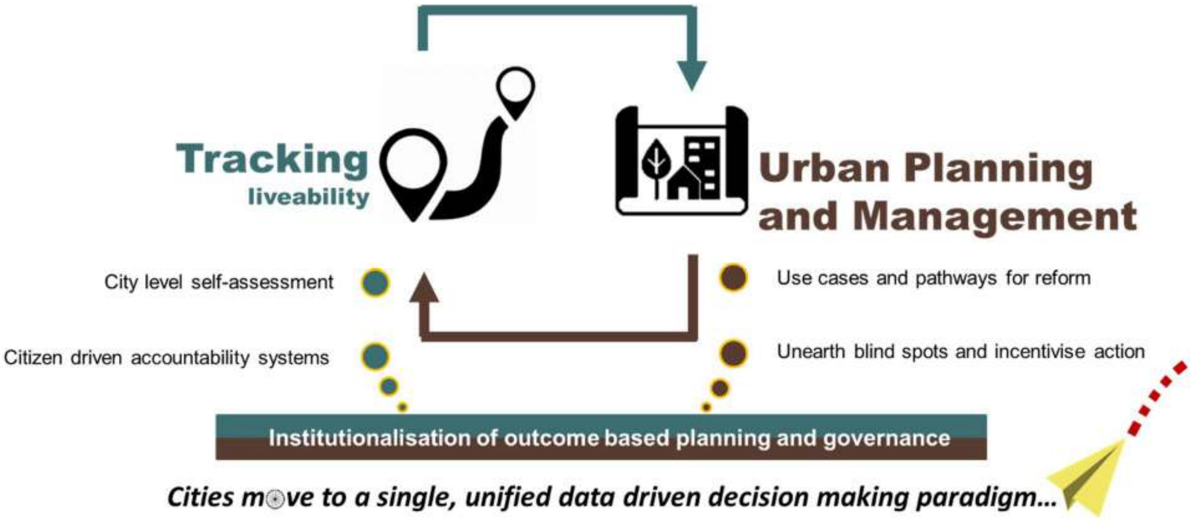
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



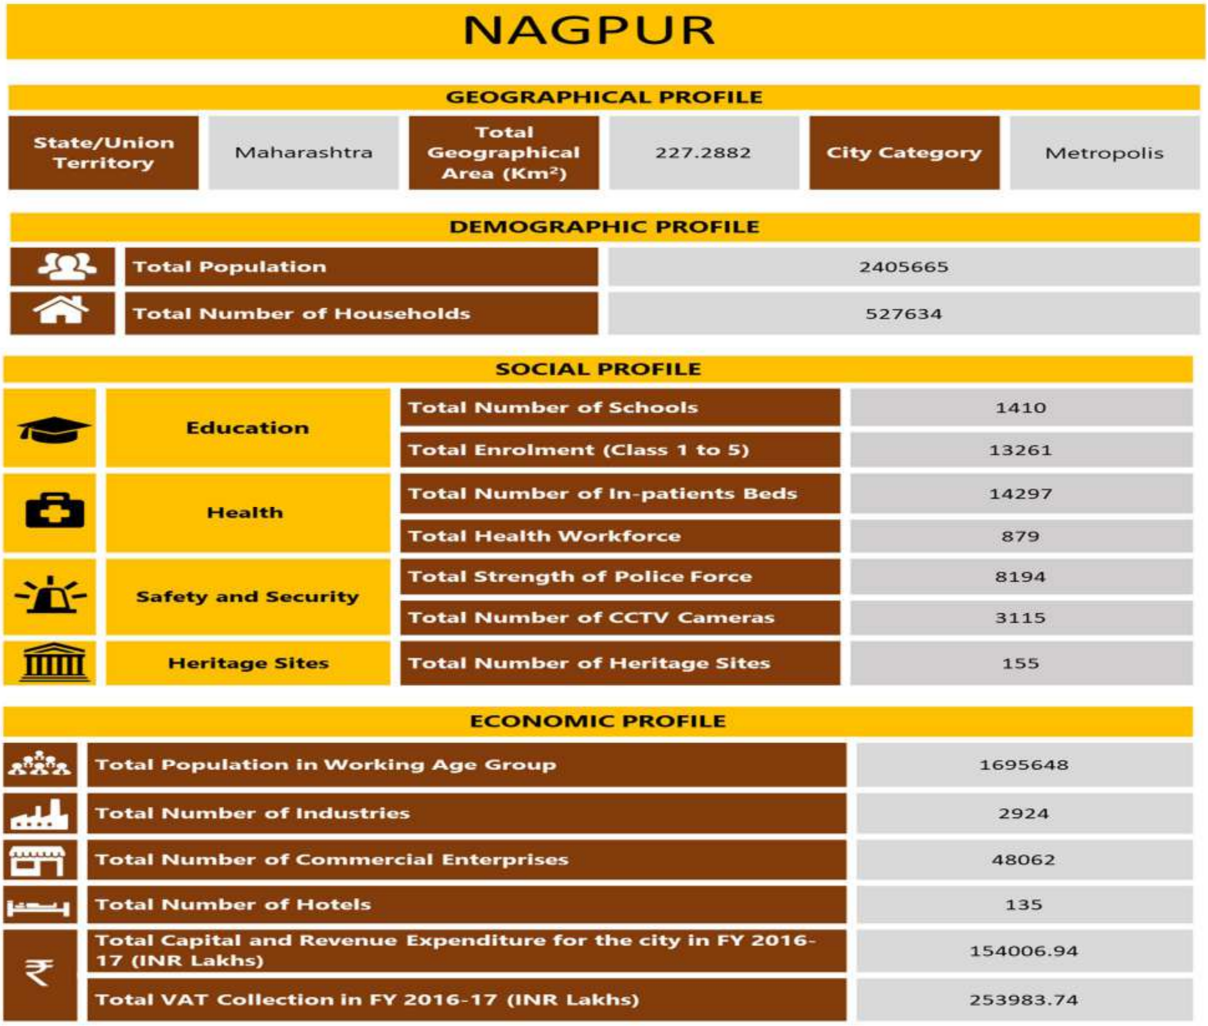
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



NAGPUR

GEOGRAPHICAL PROFILE

State/Union Territory	Maharashtra	**Total Geographical Area (Km²)**	227.2882	**City Category**	Metropolis

DEMOGRAPHIC PROFILE

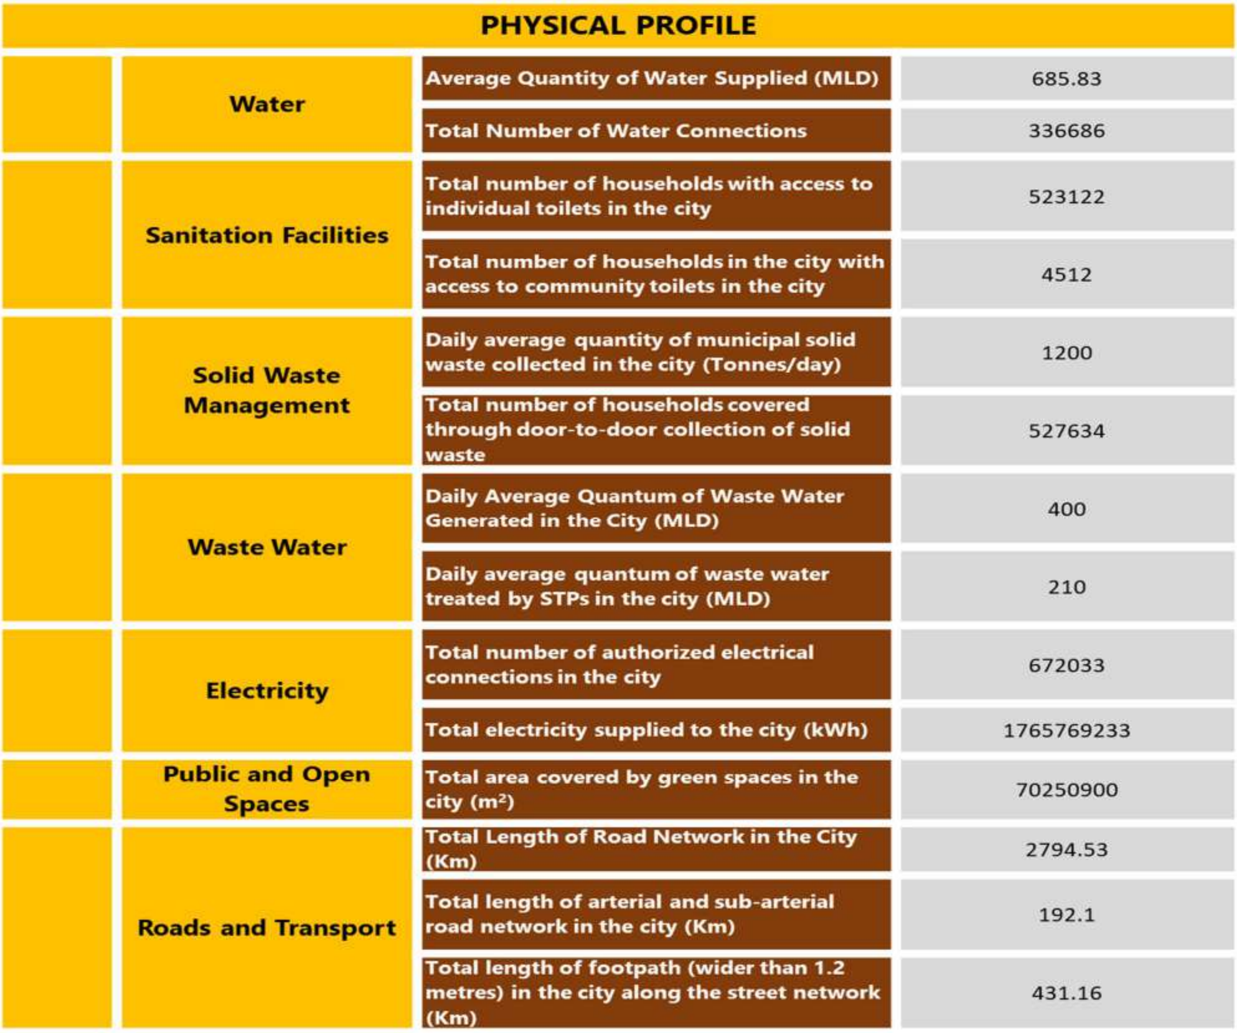
Total Population	2405665
Total Number of Households	527634

SOCIAL PROFILE

Education	**Total Number of Schools**	1410
	Total Enrolment (Class 1 to 5)	13261
Health	**Total Number of In-patients Beds**	14297
	Total Health Workforce	879
Safety and Security	**Total Strength of Police Force**	8194
	Total Number of CCTV Cameras	3115
Heritage Sites	**Total Number of Heritage Sites**	155

ECONOMIC PROFILE

Total Population in Working Age Group	1695648
Total Number of Industries	2924
Total Number of Commercial Enterprises	48062
Total Number of Hotels	135
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	154006.94
Total VAT Collection in FY 2016-17 (INR Lakhs)	253983.74



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	685.83
		Total Number of Water Connections	336686
	Sanitation Facilities	Total number of households with access to individual toilets in the city	523122
		Total number of households in the city with access to community toilets in the city	4512
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	1200
		Total number of households covered through door-to-door collection of solid waste	527634
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	400
		Daily average quantum of waste water treated by STPs in the city (MLD)	210
	Electricity	Total number of authorized electrical connections in the city	672033
		Total electricity supplied to the city (kWh)	1765769233
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	70250900
	Roads and Transport	Total Length of Road Network in the City (Km)	2794.53
		Total length of arterial and sub-arterial road network in the city (Km)	192.1
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	431.16

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary

Pillars of Comprehensive Development	Category	Indicators
		education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian

Pillars of Comprehensive Development	Category	Indicators
		crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

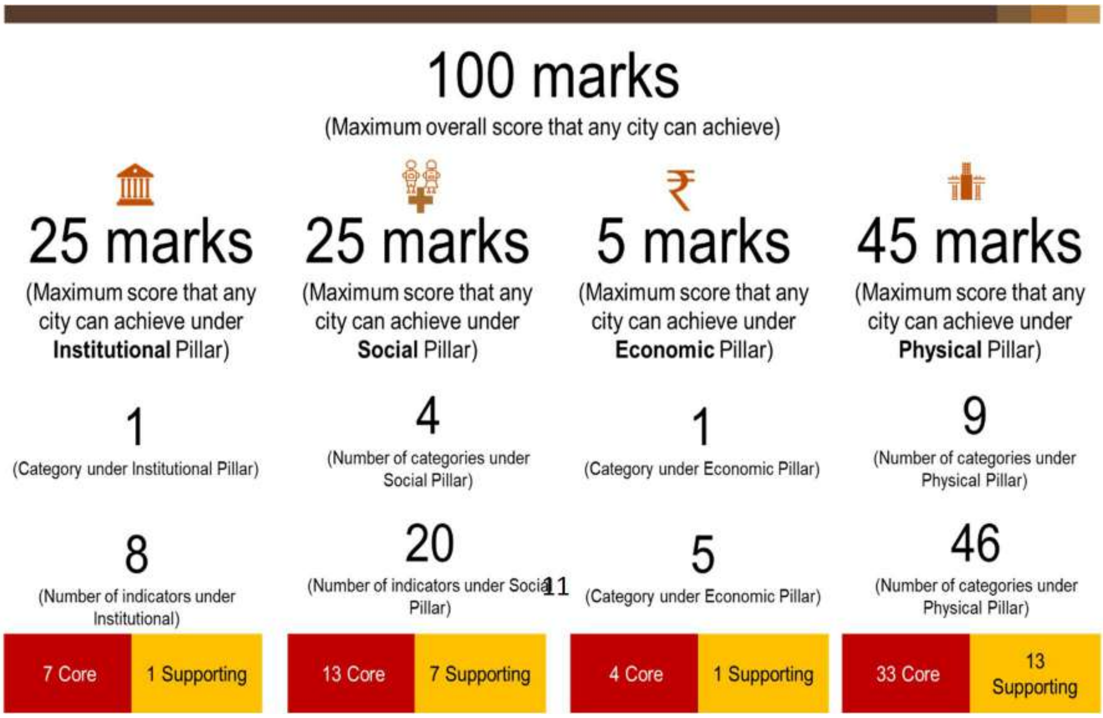
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)

25 marks
(Maximum score that any city can achieve under **Institutional** Pillar)
1
(Category under Institutional Pillar)
8
(Number of indicators under Institutional)
7 Core | 1 Supporting

25 marks
(Maximum score that any city can achieve under **Social** Pillar)
4
(Number of categories under Social Pillar)
20
(Number of indicators under Social Pillar)
13 Core | 7 Supporting

5 marks
(Maximum score that any city can achieve under **Economic** Pillar)
1
(Category under Economic Pillar)
5
(Category under Economic Pillar)
4 Core | 1 Supporting

45 marks
(Maximum score that any city can achieve under **Physical** Pillar)
9
(Number of categories under Physical Pillar)
46
(Number of categories under Physical Pillar)
33 Core | 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark -\ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled

in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Account and Finance Department
Urban Local Body	For Park and Recreation Related Questions	Garden Department.
Urban Local Body	For Water Supply and Drainage related questions	Water Works Department
Urban Local Body	For Heritage sites related data	Estate Department
Urban Local Body	For Ecological sites related data	Town Planning Department
Urban Local Body	For Housing related data	Slum Department
Urban Local Body	For Building plan related data	General Administration Department
Urban Local Body	For Roads related data	Public Work Department (City Engineer & Development Engineer).
Urban Local Body	For Solid waste management related data	Health Department (Sanitation)
Urban Local Body	For IT services related data	E-Governance Department
Urban Local Body	For Vendor committee related data	Market Department
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Garden Department, Election Department, Education Department, Zilla Udyog Bhawan, Nagpur Residential Hotel Association,

Designated data owners	Subcategories	Data owners at city level
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Maharashtra Pollution Central Board.
Development Authority	Building Infrastructure	Town Planning Department Nagpur Municipal Corporation.
	Construction planning	Town Planning Department Nagpur Municipal Corporation.
	Green Building	Data Unavailable
	Rain water harvesting	Town Planning Department Nagpur Municipal Corporation.
	Universal Design Principle	Town Planning Department Nagpur Municipal Corporation.
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	MahaVitran / DISCOM
State Disaster management authority		Fire Brigade Department Nagpur Municipal Corporation
State Education Department		Zilla Parishad Nagpur
State Health Department	Health care professionals	Nagpur Deputy Director Health Services.
	Citizen Services	Nagpur Deputy Director Health Services.
	Disease Prevalence	Nagpur Deputy Director Health Services.
	Health Infrastructure	Nagpur Deputy Director Health Services.
State Renewable Energy Development Agency		Maharashtra Energy Development Agency
State Sales / Commercial Taxes Department		Sales Tax Department Nagpur
Town and Country Planning Department	Land Use	Town Planning Department Nagpur Municipal Corporation.
Traffic and Police Department		Traffic Police Department Nagpur
Transport Authorities	Buses	Transport Departmental
	Registered Vehicles	Deputy RTO Nagpur
	Sub urban rail transport	Central Railway / South East central Railway Nagpur.
	Mono Rail Authority	_
	Tramways	_
	Marine Transport Authority	_

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 59 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**1**
State Education Department	**1**
DISCOM/Electricity Department	**2**
Traffic and Police Department	**1**
Development Authority	**0**
Pollution Control Board	**2**
State Renewable Energy Department	**4**
Town and Country Planning	**2**
State Health Department	**1**
Transport Authority	**4**
Disaster Management	**1**
Urban Local Body	**40**
Total	**59***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

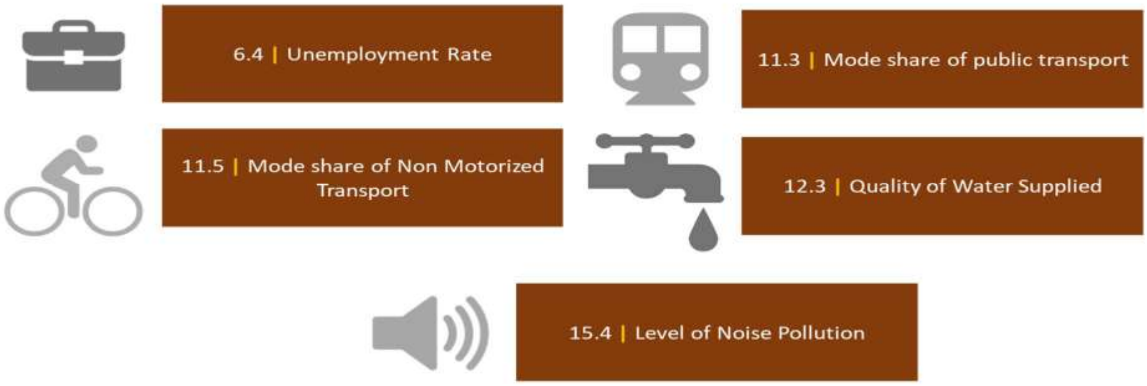
6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**36**
Description	Average citizen services available online	

Sub Indicators	1.1a birth certificate	0
	1.1b death certificate	0
	1.1c trade license	0
	1.1d solid waste management	1
	1.1e water supply	0.333333333
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	1
	1.1i professional tax	0

Indicator No. 1.4	**Average delay in grievance redressal**	**5.36**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	30
	1.4g building plan	7.5
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**47.22**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	18581.444
Denominator	Total demand raised for the year	39350
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**81.18**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	12226
Denominator	Total O&M cost for providing water supply services during the year	15059.79
Unit	Percentage	
Benchmark	100%	

Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**-17.7**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-36561.43
Denominator	Total expenditure (revenue and capital accounts) in the same year	206615.38
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**26.32**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	10
Denominator	Total number of wards	38
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**7.1**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	11
Denominator	Total number of historic buildings/sites identified	155
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**25.71**
Description	Average Occupancy rate of Hotels	25.71428571

Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.52**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	804.48
Denominator	Total budget of the ULB (capital and revenue)	154006.94
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**1**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	1
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**5.76**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	22389
Denominator	Total population in the age group of 6-14 years	388386
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**5.93**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	11040
Denominator	Total female population in the age group of 6-14 years	186162
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**20.53**
Formula:	*Numerator / Denominator*	

Numerator	Total number of students in primary grades (public and private)	13261
Denominator	Total number of teachers available for primary grades (public and private schools)	646
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**1.42**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	20
Denominator	Total number of schools	1410
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**65.97**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	65.97033994
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**85.39**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	9801000
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**59.43**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	14297
Denominator	Total population of the city	2405665
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	

Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**3.65**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	879
Denominator	Total population of the city	2405665
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**23.49**
Description	Total response time for health-related distress calls received in the city	23.49
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	173
Denominator	Total population of the city	2405665
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	234
Denominator	Total population of the city	2405665
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**111.47**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	3115
Denominator	Total length of road network in the city	2794.53

Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**718.64**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	17288
Denominator	Total population of the city	2405665
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**6.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	1095
Denominator	Total crimes recorded in the same year	17288
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**9.23**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	222
Denominator	Total population of the city	2405665
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**15.25**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	33614.1
Denominator	Total VAT/GST collection during preceding year	2203.6964
Unit	Percentage	

Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	14.364
Denominator	Total Professional Tax collection during preceding year	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**210**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	231
Denominator	Number of construction permits during preceding year	1.1
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	184807
Denominator	Total labour force in the city	388386
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**3.36**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	1136
Denominator	Total number of vendors in the city	33770

Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**0.23**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	429
Denominator	Total number of slum and EWS households in the city	1826.44
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0.39**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	11049989102048
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**29.2**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	70250900
Denominator	Total population of the city	2405665
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**4.06**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	9764246.62
Denominator	Total population of the city	2405665
Unit	Square metres (sq.m.)	

Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**33.89**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	77018200
Denominator	Total area of the city (total area of all land uses)	227288200
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	2405665
Denominator	Area allocated for residential land use (in hectares)	67057000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**110.37**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	582340
Denominator	Total number of households in the city	527634
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**1.27**
Formula:	*Numerator / Denominator*	

Numerator	Number of electrical connections (residential and commercial) with smart meters	8511
Denominator	Total number of electricity connections in the city	672033
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**10026**
Description	Total number of sustained electrical interruptions in a year	10026
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.8**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	45000
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	13335
Denominator	Total energy consumption from all sources	1765770068
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.25**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	8779414.583
Denominator	Total quantum of water and waste water handled during the period	26874.9
Unit	kWh per million litres	

Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.32**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	54753086
Denominator	Total number of street light installations	134560
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	Data Unavailable
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	26789.99
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.61**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1765770068
Denominator	Total population of the city	2405665
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	3850.5
Denominator	Total area of the city (sq.km)	227.2882
Unit	Transport length (kms) per square km	

Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.17**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	415
Denominator	Total population of the city	2405665
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	10
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	2794.53
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**80**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	4
Denominator	Total number of major transport interchanges in the city	5
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	1.26
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.2**
Formula:	Numerator / Denominator	

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Total number of major interchanges with PIS	1
Denominator	Total number of major interchanges in the city	5
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**95.48**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	148
Denominator	Total number of signalised intersections in the city	155
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**25**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	2
Denominator	Total available on-street parking spaces in the city	8
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**7.71**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	431.16
Denominator	Total length of road network in the city	5589.06
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**122.05**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	155
Denominator	Total number of junctions/ intersections on major roads in the city	127
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**77.82**
Formula:	*Numerator / Denominator*	

Numerator	Number of public right-of-way areas designed as per universal design principles	1161.16
Denominator	Total number of public right-of-way areas in the city	1492.16
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**44.52**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	234925
Denominator	Total number of households in the city	527634
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**285.09**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	685.83
Denominator	Total population of the city	2405665
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied[2]**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	17374
Denominator	Total number of samples tested for water quality	18253
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**21.17**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	145.221

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Denominator	Quantum of water put into the distribution system (mld)	685.83
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**93.2**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	313777
Denominator	Total number of water connections in the city	336686
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**25.22**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	86
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	341
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**102.24**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	581015
Denominator	Total number of properties in the city	568284
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**98.68**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	560797

Denominator	Total number of properties in the city	568284
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**25**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	100
Denominator	Total waste water generated in the city per day	400
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	210
Denominator	Total waste water received at treatment plants per day	210
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**50.3**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	1405.7
Denominator	Total length of road network in the city	2794.53
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	575696
Denominator	Total number of households and establishments in the city	575696
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	

Numerator	Total quantum of MSW collected by the ULB or private operator	1200
Denominator	Total quantum of MSW generated in the city	1200
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**16.67**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	6000
Denominator	Average MSW generated in the city (tons per month)	36000
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**11.12**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	11.116
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**32.08**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	32.082
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**94.16**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	94.16
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	88
Denominator	Total number of noise samples	88

Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**95.18**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	17374
Denominator	Total number of samples tested	18253
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT

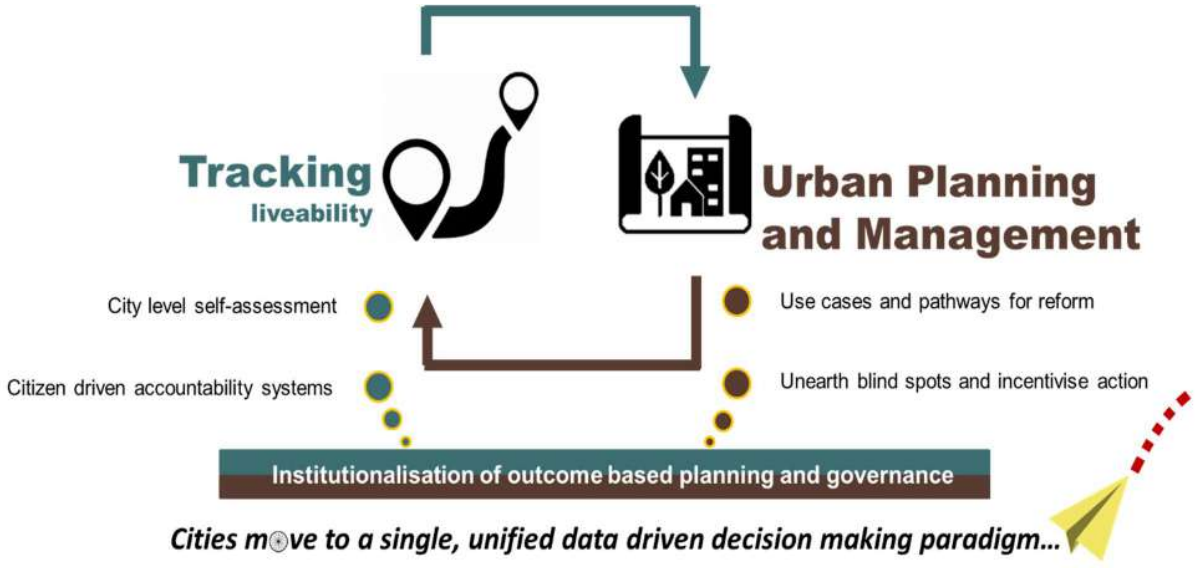
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more ‘liveable.’ The overarching goal of these initiatives is to move from an input-based approach to a ‘citizen centric-outcome based’ assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of ‘Liveability Standards’ relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an ‘Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city’s liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

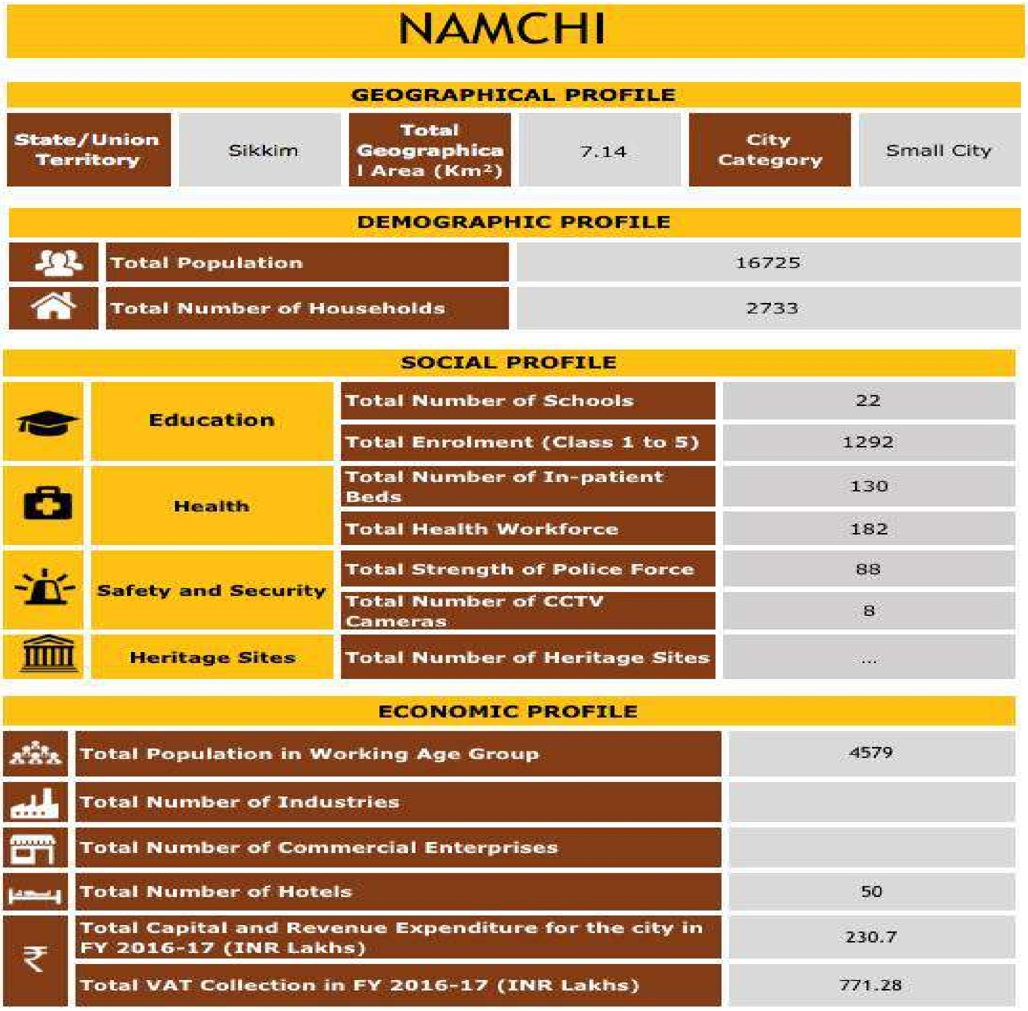


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



NAMCHI

GEOGRAPHICAL PROFILE

State/Union Territory	Sikkim	Total Geographical Area (Km^2)	7.14	City Category	Small City

DEMOGRAPHIC PROFILE

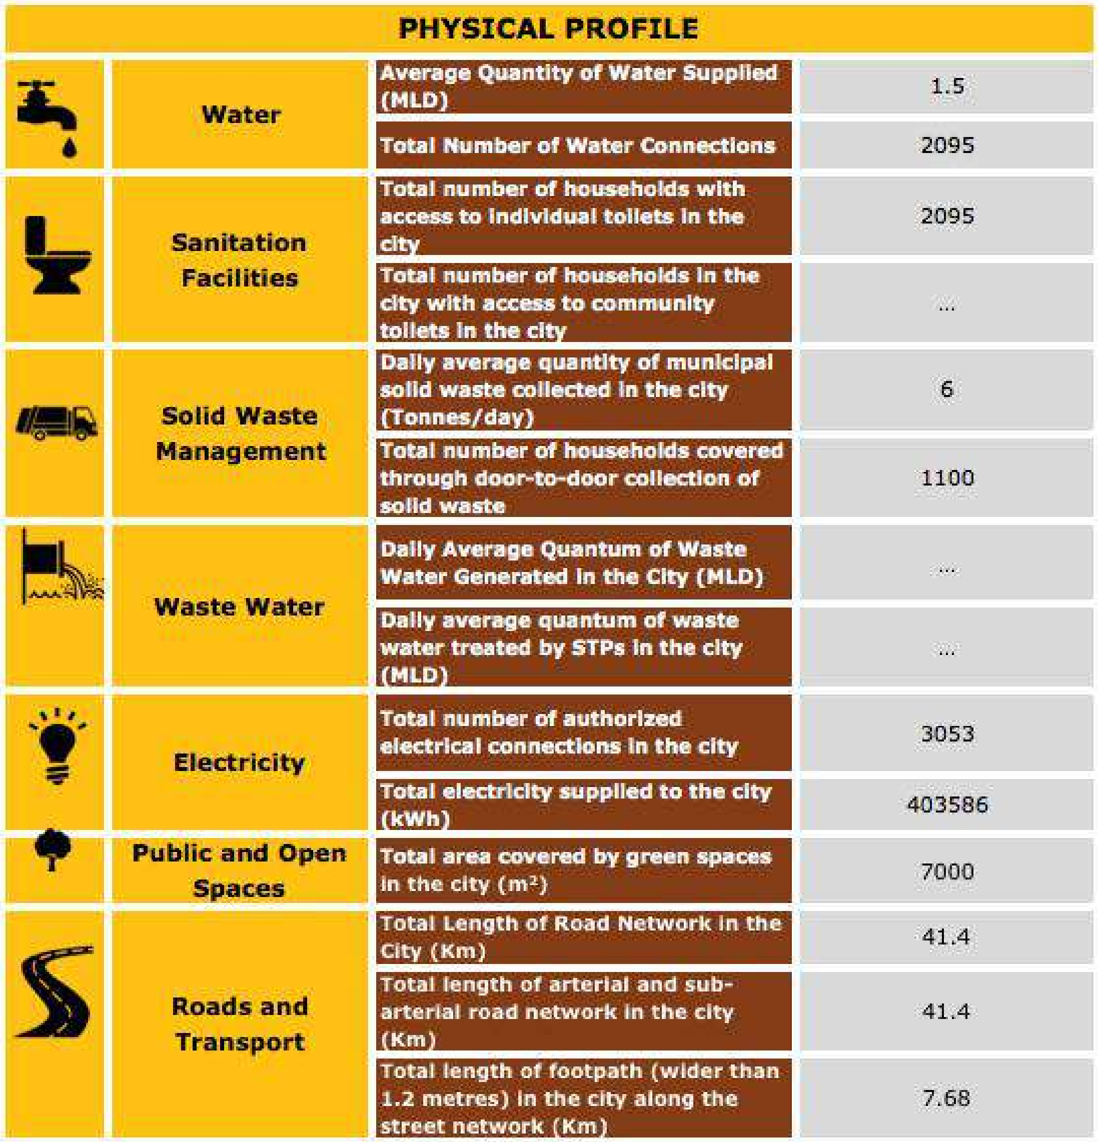
Total Population	16725
Total Number of Households	2733

SOCIAL PROFILE

Education	Total Number of Schools	22
	Total Enrolment (Class 1 to 5)	1292
Health	Total Number of In-patient Beds	130
	Total Health Workforce	182
Safety and Security	Total Strength of Police Force	88
	Total Number of CCTV Cameras	8
Heritage Sites	Total Number of Heritage Sites	...

ECONOMIC PROFILE

Total Population in Working Age Group	4579
Total Number of Industries	
Total Number of Commercial Enterprises	
Total Number of Hotels	50
₹ Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	230.7
Total VAT Collection in FY 2016-17 (INR Lakhs)	771.28



PHYSICAL PROFILE		
Water	Average Quantity of Water Supplied (MLD)	1.5
	Total Number of Water Connections	2095
Sanitation Facilities	Total number of households with access to individual toilets in the city	2095
	Total number of households in the city with access to community toilets in the city	...
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	6
	Total number of households covered through door-to-door collection of solid waste	1100
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	...
	Daily average quantum of waste water treated by STPs in the city (MLD)	...
Electricity	Total number of authorized electrical connections in the city	3053
	Total electricity supplied to the city (kWh)	403586
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	7000
Roads and Transport	Total Length of Road Network in the City (Km)	41.4
	Total length of arterial and sub-arterial road network in the city (Km)	41.4
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	7.68

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the perfor-

mance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1. Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities

Pillars of Comprehensive Development	Category	Indicators
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population

Pillars of Comprehensive Development	Category	Indicators
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year

Pillars of Comprehensive Development	Category	Indicators
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities

Pillars of Comprehensive Development	Category	Indicators
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution

Pillars of Comprehensive Development	Category	Indicators
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2. Scoring and Computing Category Indices of Liveability

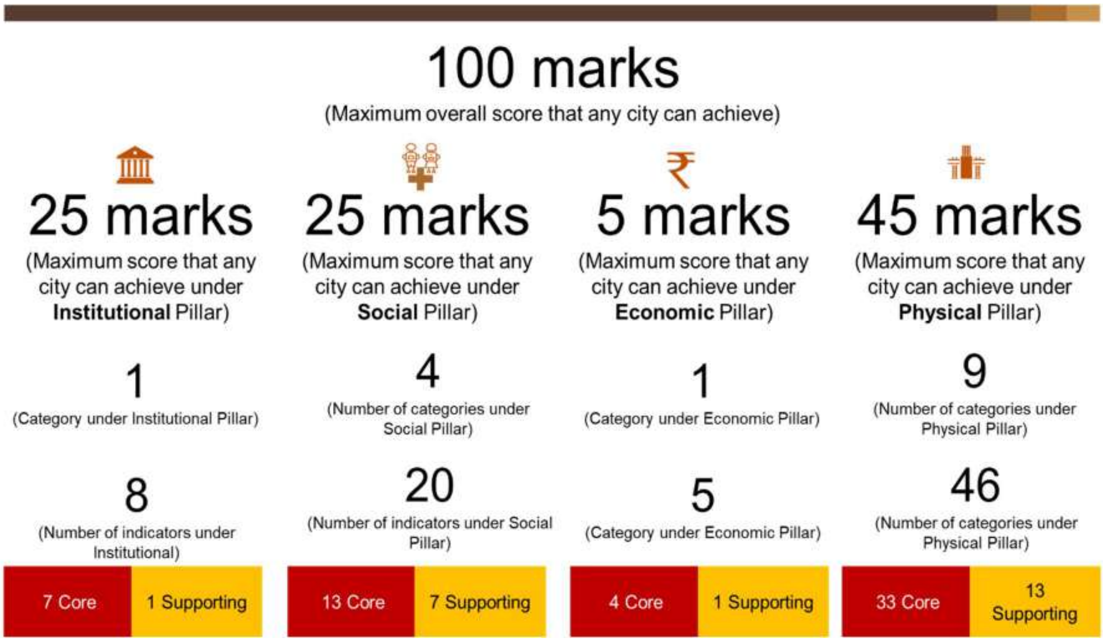
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3. Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)

25 marks
(Maximum score that any city can achieve under **Institutional** Pillar)
1
(Category under Institutional Pillar)
8
(Number of indicators under Institutional)
7 Core | 1 Supporting

25 marks
(Maximum score that any city can achieve under **Social** Pillar)
4
(Number of categories under Social Pillar)
20
(Number of indicators under Social Pillar)
13 Core | 7 Supporting

5 marks
(Maximum score that any city can achieve under **Economic** Pillar)
1
(Category under Economic Pillar)
5
(Category under Economic Pillar)
4 Core | 1 Supporting

45 marks
(Maximum score that any city can achieve under **Physical** Pillar)
9
(Number of categories under Physical Pillar)
46
(Number of categories under Physical Pillar)
33 Core | 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4. Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicatorvalueforthecity - indicatorvaluefortheworstperformingcity}{benchmark - indicatorvaluefortheworstperformingcity}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1. Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2. Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Municipal council Namchi
Urban Local Body	For Park and Recreation Related	UD&HD (urban development and

	Questions	housing department)
Urban Local Body	For Water Supply and Drainage related questions	PHED (water security and public health engineering department)
Urban Local Body	For Heritage sites related data	Municipal council Namchi
Urban Local Body	For Ecological sites related data	Municipal council Namchi
Urban Local Body	For Housing related data	UD&HD (urban development and housing department)
Urban Local Body	For Building plan related data	UD&HD (urban development and housing department)
Urban Local Body	For Roads related data	UD&HD (urban development and housing department)
Urban Local Body	For Solid waste management related data	Municipal council namchi
Urban Local Body	For IT services related data	Municipal council namchi
Urban Local Body	For Vendor committee related data	Municipal council namchi
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Municipal council namchi
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	State pollution control board Gangtok
Development Authority	Building Infrastructure	UD&HD (urban development and housing department)
	Construction planning	UD&HD (urban development and housing department)
	Green Building	UD&HD (urban development and housing department)
	Rain water harvesting	UD&HD (urban development and housing department)
	Universal Design Principle	UD&HD (urban development and housing department)
DISCOM/Electricity Board	Electrical Connection/ Grievance	Energy and power department

	Redressal/ Power supply	namchi
State Disaster management authority		District collector office namchi
State Education Department		HRDD(human resource and development department) south
State Health Department	Health care professionals	Healthcare, human services and family welfare department namchi
	Citizen Services	Healthcare, human services and family welfare department namchi
	Disease Prevalence	Healthcare, human services and family welfare department namchi
	Health Infrastructure	Healthcare, human services and family welfare department namchi
State Renewable Energy Development Agency		SREDA GANGTOK
State Sales / Commercial Taxes Department		Sales and commercial tax Department Gangtok
Town and Country Planning Department	Land Use	UD&HD (urban development and housing department)
Traffic and Police Department		SNT (sikkim nationalised transport department) south
Transport Authorities	Buses	SNT (sikkim nationalised transport department) south
	Registered Vehicles	Motor vechile department south
	Sub urban rail transport	
	Mono Rail Authority	
	Tramways	
	Marine Transport Authority	

4.3. List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 7 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	1
DISCOM/Electricity Department	0
Traffic and Police Department	0
Development Authority	0
Pollution Control Board	0
State Renewable Energy Department	0
Town and Country Planning	0
State Health Department	0
Transport Authority	0
Disaster Management	0
Urban Local Body	6
Total	7

* The count of documents is based on first round of submission.

4.4. Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre
2.3 | Hotel occupancy
3.4 | Percentage of schools with access to digital education
5.1 | Number of streets, public places, junctions covered through surveillance systems
6.5 | Percentage of vendors registered and provided formal spaces
11.7 | Availability of Passenger Information System
11.11 | Percentage of traffic intersections with pedestrian crossing facilities
11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate
11.3 | Mode share of public transport
11.5 | Mode share of Non Motorized Transport
12.3 | Quality of Water Supplied
15.4 | Level of Noise Pollution

4.5. Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	**Indicator title**
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**2.37**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0
	1.1b death certificate	0
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0
	1.1i professional tax	0
	1.1j information	0.307692307692308
	1.1k Grievance redressal	0
	1.1l electricity	0
	1.1m Building plan	0
Unit	Percentage	
Benchmark	100%	

Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**Non-Computable**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	NA
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	NA
	1.3i information	NA
	1.3j electricity	NA
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**NC**
Description		
Sub Indicators	1.4a water supply	0

	1.4b solid waste	NA
	1.4c street lights	0
	1.4d sewerage	NA
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	Data Unavailable
Denominator	Total demand raised for the year	Data Unavailable
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**191.25**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	15.3
Denominator	Total O&M cost for providing water supply services during the year	8
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**-61.34**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-147.75
Denominator	Total expenditure (revenue and capital accounts) in	240.87

	the same year	
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	7
Denominator	Total number of wards	7
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

\

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	Data Unavailable
Denominator	Total number of historic buildings/sites identified	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	Data Unavailable
Denominator	Total number of ecologically important sites identified in the city	Data Unavailable

Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**70**
Description	Average Occupancy rate of Hotels	70
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	Data Unavailable
Denominator	Total budget of the ULB (capital and revenue)	230.7
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**10**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	10
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**54.92**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	2211
Denominator	Total population in the age group of 6-14 years	4026

Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**79.56**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	1569
Denominator	Total female population in the age group of 6-14 years	1972
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**7.78**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	1292
Denominator	Total number of teachers available for primary grades (public and private schools)	166
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**31.82**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	7
Denominator	Total number of schools	22
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**168.08**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	

Numerator	Percentage	168.07595 1124547
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**107.49**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	189673
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**106.64**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	130
Denominator	Total population of the city	12190
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**149.3**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	182
Denominator	Total population of the city	12190
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**9**
Description	Total response time for health-related distress calls received in the city	9
Unit	Minutes and seconds	

Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**5.94**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	724
Denominator	Total population of the city	12190
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.17**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	21
Denominator	Total population of the city	12190
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**19.32**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	8
Denominator	Total length of road network in the city	41.4
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**295.32**
Formula:	Numerator / Denominator	36

Numerator	Total number of crimes recorded in a year	12190
Denominator	Total population of the city	
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**8.33**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	3
Denominator	Total crimes recorded in the same year	36
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	
Denominator	Total population of the city	12190
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**-14.16**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total	-12717849

	VAT/GST collection during preceding year)	
Denominator	Total VAT/GST collection during preceding year	898462.74
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	Data Unavailable
Denominator	Total Professional Tax collection during preceding year	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**100**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	25
Denominator	Number of construction permits during preceding year	0.25
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	Data Unavailable

Denominator	Total labour force in the city	15146
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**528.19**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	2000
Denominator	Total number of vendors in the city	378.65
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**4.55**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	107
Denominator	Total number of slum and EWS households in the city	23.53
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	Data Unavailable
Unit	Percentage	

Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.57**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	7000
Denominator	Total population of the city	12190
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**2.47**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	30140.56
Denominator	Total population of the city	12190
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0.47**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	33835
Denominator	Total area of the city (total area of all land uses)	7140000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	12190

Denominator	Area allocated for residential land use (in hectares)	1275460
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**78.52**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at house-hold level	2146
Denominator	Total number of households in the city	2733
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	3053
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**133**
Description	Total number of sustained electrical interruptions in a year	133
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.43**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	15340
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	
Denominator	Total energy consumption from all sources	Data Unavailable
Unit	Percentage	403586
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	0
Denominator	Total quantum of water and waste water handled during the period	Data Unavailable
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	28044
Denominator	Total number of street light installations	221
Unit	kWh per light installation	

Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	Data Unavailable
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	3500
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.8**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	403586
Denominator	Total population of the city	12190
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	300
Denominator	Total area of the city (sq.km)	7.14
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**1.07**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available	13

	per day	
Denominator	Total population of the city	12190
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	2
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	NA
Denominator	Total length of road network in the city	41.4
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	Data Unavailable
Denominator	Total number of major transport interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**	**To be computed**
Description	Mode share of non-motorised transport	Data

		Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	NA
Denominator	Total number of major interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	Data Unavailable
Denominator	Total number of signalised intersections in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	1
Denominator	Total available on-street parking spaces in the city	Data Unavailable
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**9.28**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	7.6866

Denominator	Total length of road network in the city	82.8
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	3
Denominator	Total number of junctions/ intersections on major roads in the city	3
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**11.43**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	4
Denominator	Total number of public right-of-way areas in the city	35
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**76.51**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	2091
Denominator	Total number of households in the city	2733
Unit	Percentage	
Benchmark	100%	

Indicator No: 12.2	**Per capita supply of water**	**123.05**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	1.5
Denominator	Total population of the city	12190
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	12
Denominator	Total number of samples tested for water quality	12
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**33.33**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	0.5
Denominator	Quantum of water put into the distribution system (mld)	1.5
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	Data Unavailable
Denominator	Total number of water connections in the city	2095
Unit	Percentage	

Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	Data Unavailable
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	21
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**69833.33**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	2095
Denominator	Total number of properties in the city	3
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**91100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	2733
Denominator	Total number of properties in the city	3
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-**

		Computable
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	Data Unavailable
Denominator	Total waste water generated in the city per day	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	Data Unavailable
Denominator	Total waste water received at treatment plants per day	Data Unavailable
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	Data Unavailable
Denominator	Total length of road network in the city	41.4
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**58.54**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	1600
Denominator	Total number of households and establishments in the	2733

	city	
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	6
Denominator	Total quantum of MSW generated in the city	6
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through re-use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	Data Unavailable
Denominator	Average MSW generated in the city (tons per month)	180
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**5.73**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	5.73
Unit	μg/m3	
Benchmark	Annual mean concentration of 50 μg/m3 OR Mean concentration over 24 hours of 80 μg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**2.59**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	2.59
Unit	μg/m3	

Benchmark	Annual mean concentration of 40 μg/m3 OR Mean concentration over 24 hours of 80 μg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**23.65**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	23.65
Unit	μg/m3	
Benchmark	Annual mean concentration of 60 μg/m3 OR Mean concentration over 24 hours of 100 μg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	Data Unavailable
Denominator	Total number of noise samples	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	Data Unavailable
Denominator	Total number of samples tested	Data Unavailable
Unit	Percentage	
Benchmark	100%	

LIVEABILITY ASSESSMENT
DRAFT REPORT

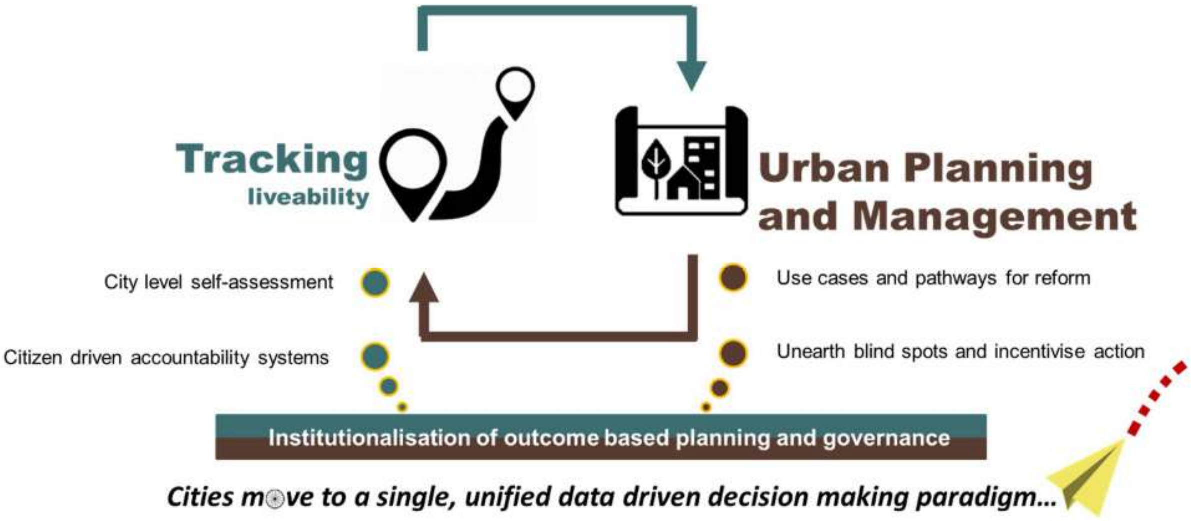
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



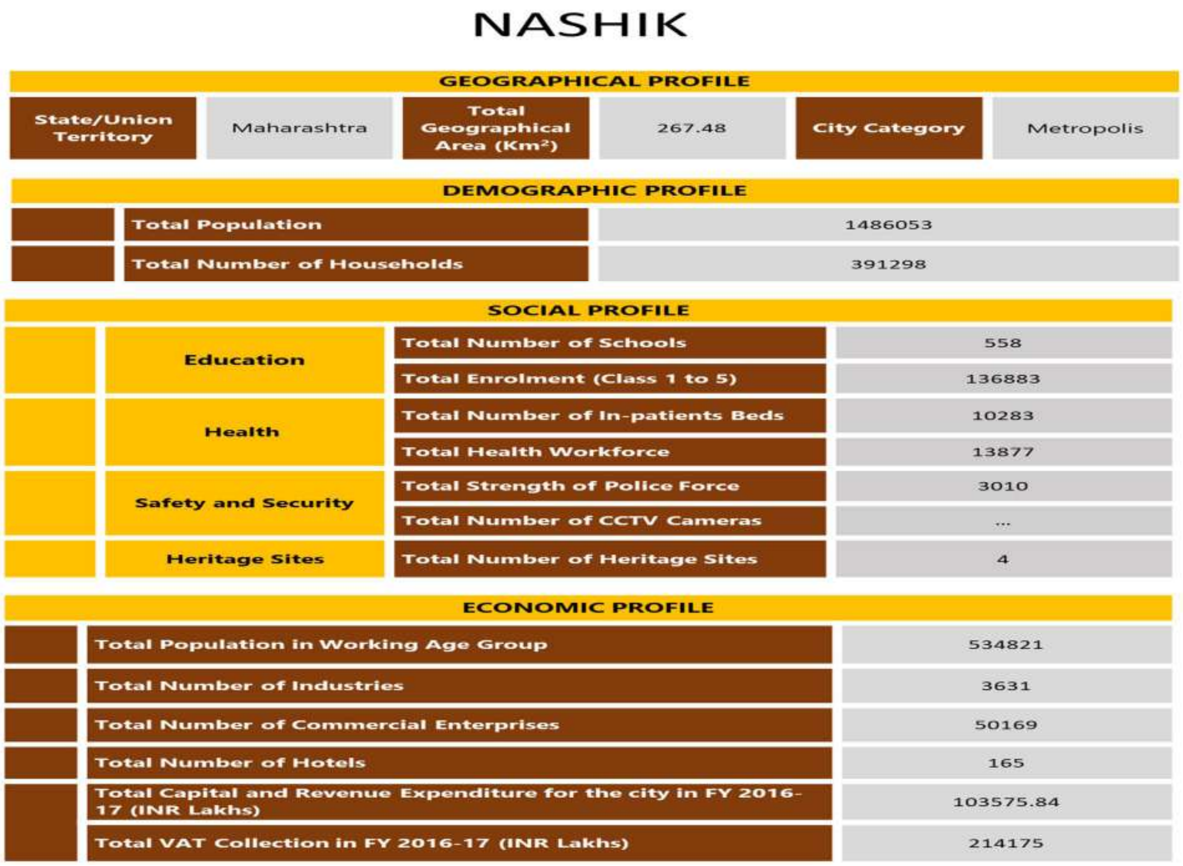
Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart

cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



NASHIK

GEOGRAPHICAL PROFILE

State/Union Territory	Maharashtra	Total Geographical Area (Km²)	267.48	City Category	Metropolis

DEMOGRAPHIC PROFILE

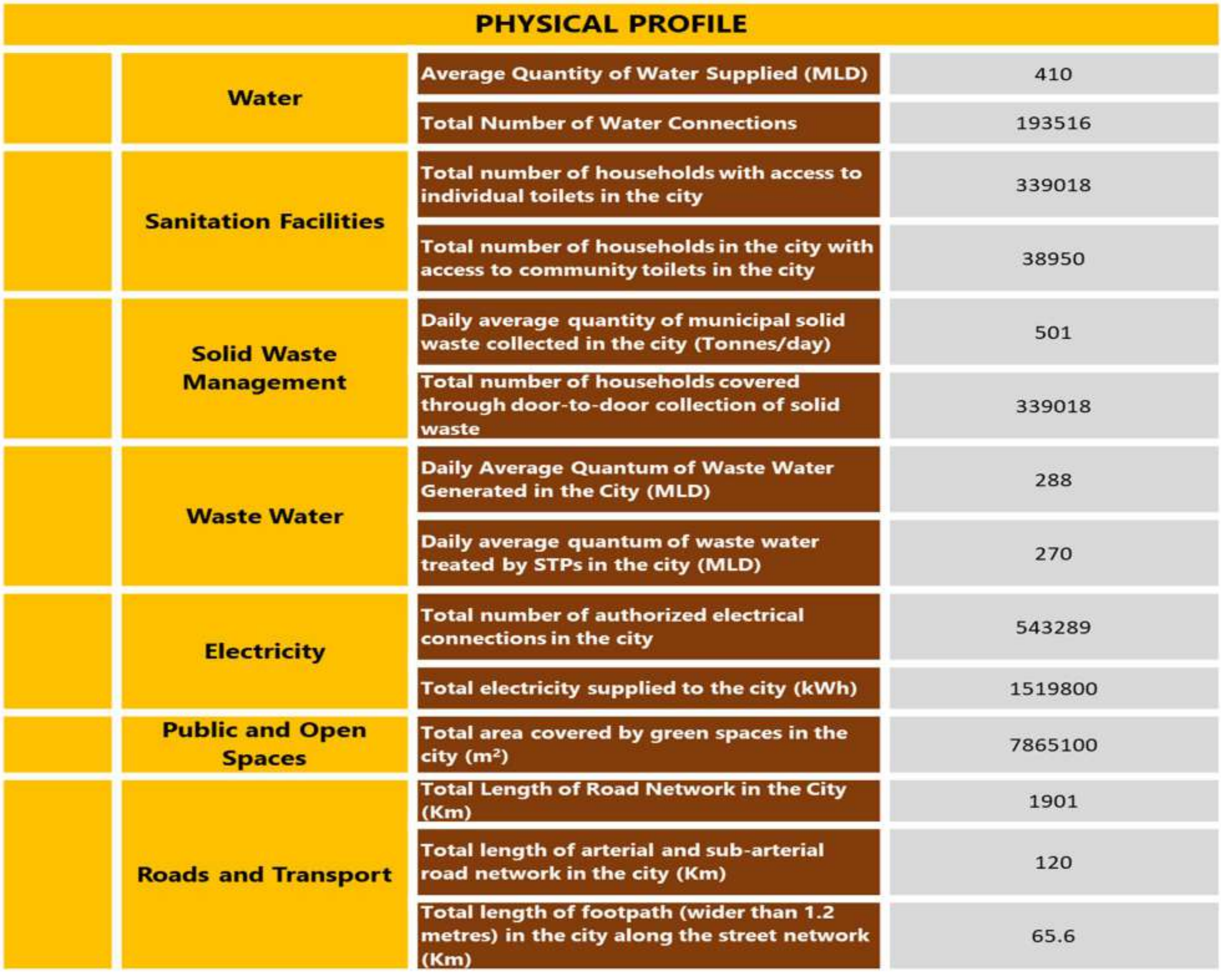
Total Population	1486053
Total Number of Households	391298

SOCIAL PROFILE

Education	Total Number of Schools	558
	Total Enrolment (Class 1 to 5)	136883
Health	Total Number of In-patients Beds	10283
	Total Health Workforce	13877
Safety and Security	Total Strength of Police Force	3010
	Total Number of CCTV Cameras	...
Heritage Sites	Total Number of Heritage Sites	4

ECONOMIC PROFILE

Total Population in Working Age Group	534821
Total Number of Industries	3631
Total Number of Commercial Enterprises	50169
Total Number of Hotels	165
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	103575.84
Total VAT Collection in FY 2016-17 (INR Lakhs)	214175



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	410
		Total Number of Water Connections	193516
	Sanitation Facilities	Total number of households with access to individual toilets in the city	339018
		Total number of households in the city with access to community toilets in the city	38950
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	501
		Total number of households covered through door-to-door collection of solid waste	339018
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	288
		Daily average quantum of waste water treated by STPs in the city (MLD)	270
	Electricity	Total number of authorized electrical connections in the city	543289
		Total electricity supplied to the city (kWh)	1519800
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	7865100
	Roads and Transport	Total Length of Road Network in the City (Km)	1901
		Total length of arterial and sub-arterial road network in the city (Km)	120
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	65.6

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education

Pillars of Comprehensive Development	Category	Indicators
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use	9.1 Share of mixed land use area in overall city land use

Pillars of Comprehensive Development	Category	Indicators
	and Compactness	9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces

Pillars of Comprehensive Development	Category	Indicators
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution

Pillars of Comprehensive Development	Category	Indicators
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

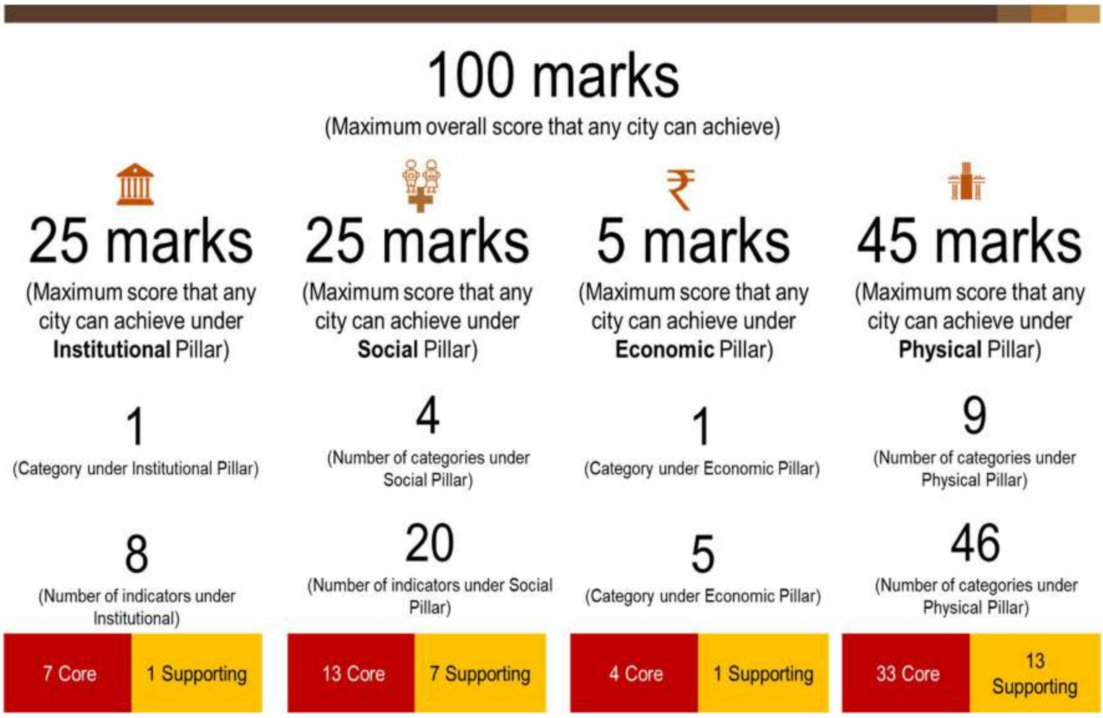
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks	**25 marks**	**5 marks**	**45 marks**
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1	4	1	9
(Category under Institutional Pillar)	(Number of categories under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
8	20	5	46
(Number of indicators under Institutional)	(Number of indicators under Social Pillar)	(Category under Economic Pillar)	(Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts Department, Nashik Municipal Corporation Excise Department
Urban Local Body	For Park and Recreation Related Questions	Town Planning, NMC District Collectorate office, NMC
Urban Local Body	For Water Supply and Drainage related questions	Maharashtra Industrial development Corporation, Nashik Public work department, Nashik Irrigation Department, Nashik
Urban Local Body	For Heritage sites related data	Tourism department
Urban Local Body	For Ecological sites related data	NMC
Urban Local Body	For Housing related data	Maharashtra Housing Development Corporation, Slum Department, NMC
Urban Local Body	For Building plan related data	Town Planning, NMC
Urban Local Body	For Roads related data	Town Planning, NMC
Urban Local Body	For Solid waste management related data	Waste Management Department, NMC
Urban Local Body	For IT services related data	IT Department, NMC
Urban Local Body	For Vendor committee related data	Nashik Municipal Corporation
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Maharashtra Pollution Control Board
Development Authority	Building Infrastructure	Town Planning, NMC
	Construction planning	Town Planning, NMC
	Green Building	Town Planning, NMC
	Rain water harvesting	Town Planning, NMC
	Universal Design Principle	Town Planning, NMC
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	DISCOM, Nashik Maharashtra State Electricity Development Corporation
State Disaster management authority		Fire fight and disaster management unit, NMC
State Education Department		District Education Department Education Department, NMC
State Health Department	Health care professionals	Civil Hospital, Nashik

Designated data owners	Subcategories	Data owners at city level
	Citizen Services	Civil Hospital, Nashik
	Disease Prevalence	Civil Hospital, Nashik
	Health Infrastructure	Civil Hospital, Nashik Road and Transport Department
State Renewable Energy Development Agency		Maharashtra Renewable Energy Development Agency
State Sales / Commercial Taxes Department		Sales Taxes department, Nashik
Town and Country Planning Department	Land Use	Town Planning, NMC
Traffic and Police Department		Commissioner of Police, Nashik
Transport Authorities	Buses	Road and Transport Office
	Registered Vehicles	Maharashtra State Transport department
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 83 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**0**
State Education Department	**1**
DISCOM/Electricity Department	**2**
Traffic and Police Department	**5**
Development Authority	**0**

Pollution Control Board	**5**
State Renewable Energy Department	**1**
Town and Country Planning	**0**
State Health Department	**4**
Transport Authority	**2**
Disaster Management	**1**
Urban Local Body	**62**
Total	**83***

* The count of documents is based on first round of submission.

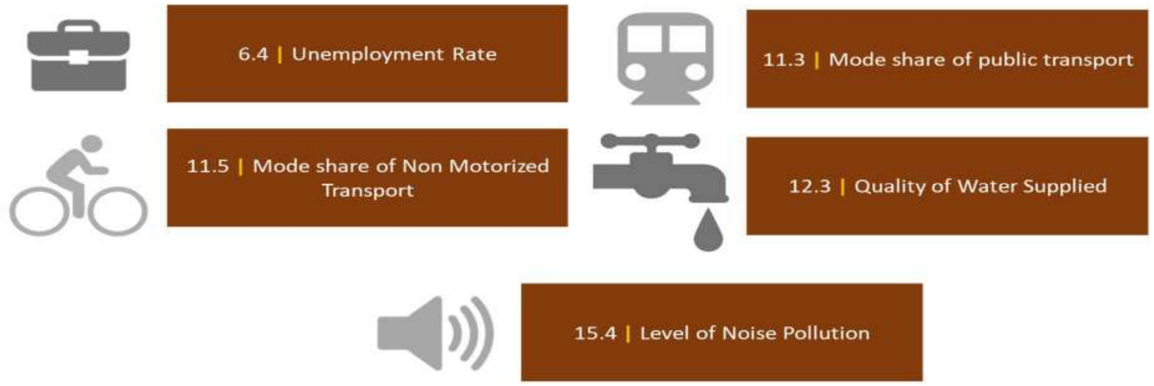
4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

- 1.2 | Percentage of services integrated through Command Centre
- 2.3 | Hotel occupancy
- 3.4 | Percentage of schools with access to digital education
- 5.1 | Number of streets, public places, junctions covered through surveillance systems
- 6.5 | Percentage of vendors registered and provided formal spaces
- 11.7 | Availability of Passenger Information System
- 11.11 | Percentage of traffic intersections with pedestrian crossing facilities
- 11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried out to fill data gaps.



6.4 | Unemployment Rate
11.3 | Mode share of public transport
11.5 | Mode share of Non Motorized Transport
12.3 | Quality of Water Supplied
15.4 | Level of Noise Pollution

5 Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**81.46**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	1
	1.1h property tax	0.666666667
	1.1i professional tax	1
	1.1j information	0.923076923
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**2.34**
Description		
Sub Indicators	1.3a Building plan	0.0000238365622981008
	1.3b Birth/Death Certificate	0.000124659
	1.3c water supply	0.008318604

	1.3d solid waste management	0.0000773862035876244
	1.3e property tax	0.009479125
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.00139598
	1.3i information	4.71046456620322E-06
	1.3j electricity	0.167792832
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**1**
Description		
Sub Indicators	1.4a water supply	2
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	4
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**96.96**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	14870.47
Denominator	Total demand raised for the year	15336.1
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**47.21**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	2937

Denominator	Total O&M cost for providing water supply services during the year	6220.54
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**21.34**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	47764.49
Denominator	Total expenditure (revenue and capital accounts) in the same year	223858.45
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	31
Denominator	Total number of wards	31
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	4
Denominator	Total number of historic buildings/sites identified	4
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	

Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**22.78**
Description	Average Occupancy rate of Hotels	22.78
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.43**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	444.71
Denominator	Total budget of the ULB (capital and revenue)	103575.84
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**77**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	77
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**85.66**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	218273
Denominator	Total population in the age group of 6-14 years	254813
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**84.49**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	99270
Denominator	Total female population in the age group of 6-14 years	117498
Unit	Percentage	

Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**43.54**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	136883
Denominator	Total number of teachers available for primary grades (public and private schools)	3144
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**24.19**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	135
Denominator	Total number of schools	558
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**105.45**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	105.4475933
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**104.71**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	737936264
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**69.2**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	10283

Denominator	Total population of the city	1486053
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**93.38**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	13877
Denominator	Total population of the city	1486053
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**15**
Description	Total response time for health-related distress calls received in the city	15
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.85**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	12608
Denominator	Total population of the city	1486053
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.07**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	987
Denominator	Total population of the city	1486053
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**0**
Formula:	*Numerator / Denominator*	

Numerator	Total number of CCTV cameras installed	0
Denominator	Total length of road network in the city	1901
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**397.9**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	5913
Denominator	Total population of the city	1486053
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**18.57**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	1098
Denominator	Total crimes recorded in the same year	5913
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**14.67**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	218
Denominator	Total population of the city	1486053
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**-22.81**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	-63283

Denominator	Total VAT/GST collection during preceding year	2774.58
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**-2.08**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	-133.71
Denominator	Total Professional Tax collection during preceding year	6427.65
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**30.19**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	503
Denominator	Number of construction permits during preceding year	16.66
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	11592
Denominator	Total labour force in the city	254813
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**35.34**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	3400

Denominator	Total number of vendors in the city	9620
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**10.47**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	10624
Denominator	Total number of slum and EWS households in the city	1014.65
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**21.11**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	31742381023200
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**5.29**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	7865100
Denominator	Total population of the city	1486053
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**2.89**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	4300349
Denominator	Total population of the city	1486053

Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	267477500
Denominator	Total area of the city (total area of all land uses)	267480000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1486053
Denominator	Area allocated for residential land use (in hectares)	128357800
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**115.08**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	450319
Denominator	Total number of households in the city	391298
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	

Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	543289
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**2025**
Description	Total number of sustained electrical interruptions in a year	2025
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.77**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	233772
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	1424
Denominator	Total energy consumption from all sources	1519800
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.28**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	4592049.667
Denominator	Total quantum of water and waste water handled during the period	20400
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.32**
Formula:	*Numerator / Denominator*	

Numerator	Energy consumption on street lighting	39300499
Denominator	Total number of street light installations	75455
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	1529323
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	1519800
Denominator	Total population of the city	1486053
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	6356.3
Denominator	Total area of the city (sq.km)	267.48
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.09**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	130
Denominator	Total population of the city	1486053
Unit	Number per 1000 persons	
Benchmark	>=0.6	

Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	6.6
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	1901
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**20**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	1
Denominator	Total number of major transport interchanges in the city	5
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	1.99
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.8**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	4
Denominator	Total number of major interchanges in the city	5
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are	0

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

	synchronised	
Denominator	Total number of signalised intersections in the city	39
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	0
Denominator	Total available on-street parking spaces in the city	1628
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**1.73**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	65.6
Denominator	Total length of road network in the city	3802
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**82.93**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	68
Denominator	Total number of junctions/ intersections on major roads in the city	82
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	0
Denominator	Total number of public right-of-way areas in the city	1079
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**93.82**
Formula:	*Numerator / Denominator*	

Numerator	Total number of households with direct water supply connection	367101
Denominator	Total number of households in the city	391298
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**275.9**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	410
Denominator	Total population of the city	1486053
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	9715
Denominator	Total number of samples tested for water quality	9835
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	410
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**99.73**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	192992
Denominator	Total number of water connections in the city	193516
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**34.62**
Formula:	*Numerator / Denominator*	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	573
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	1655
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**91.81**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	430107
Denominator	Total number of properties in the city	468468
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**84.17**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	394323
Denominator	Total number of properties in the city	468468
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**93.75**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	270
Denominator	Total waste water generated in the city per day	288
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	270

Denominator	Total waste water received at treatment plants per day	270
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**18.85**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	358.25
Denominator	Total length of road network in the city	1901
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**87.73**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	387315
Denominator	Total number of households and establishments in the city	441467
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**89.78**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	501
Denominator	Total quantum of MSW generated in the city	558
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**3.37**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	506
Denominator	Average MSW generated in the city (tons per month)	15030
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**11.55**

Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	11.55
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**24.04**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	24.04
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**81.21**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	81.21
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	48
Denominator	Total number of noise samples	750
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**88.24**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	60
Denominator	Total number of samples tested	68
Unit	Percentage	
Benchmark	100%

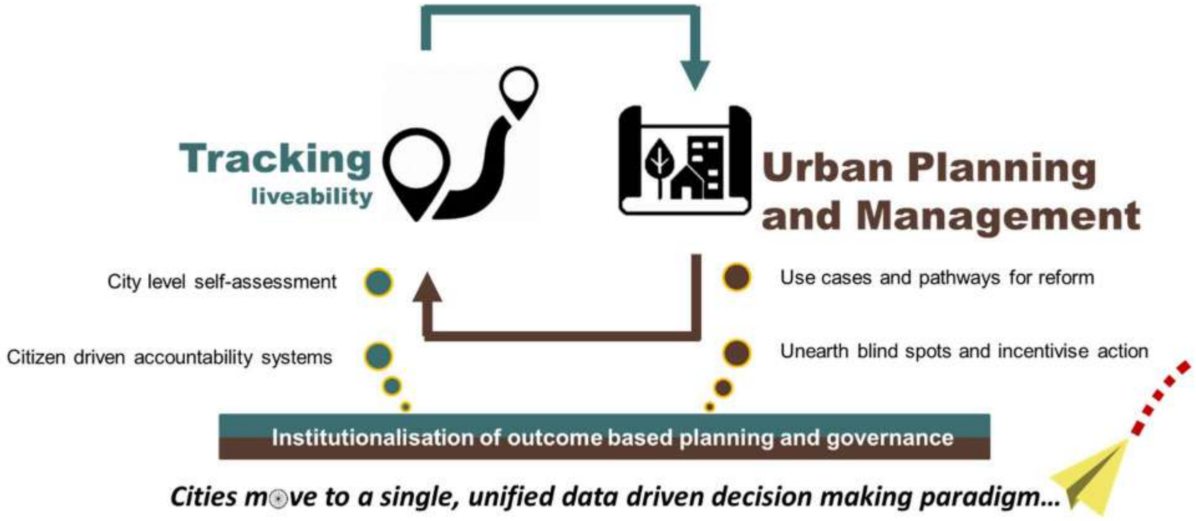
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

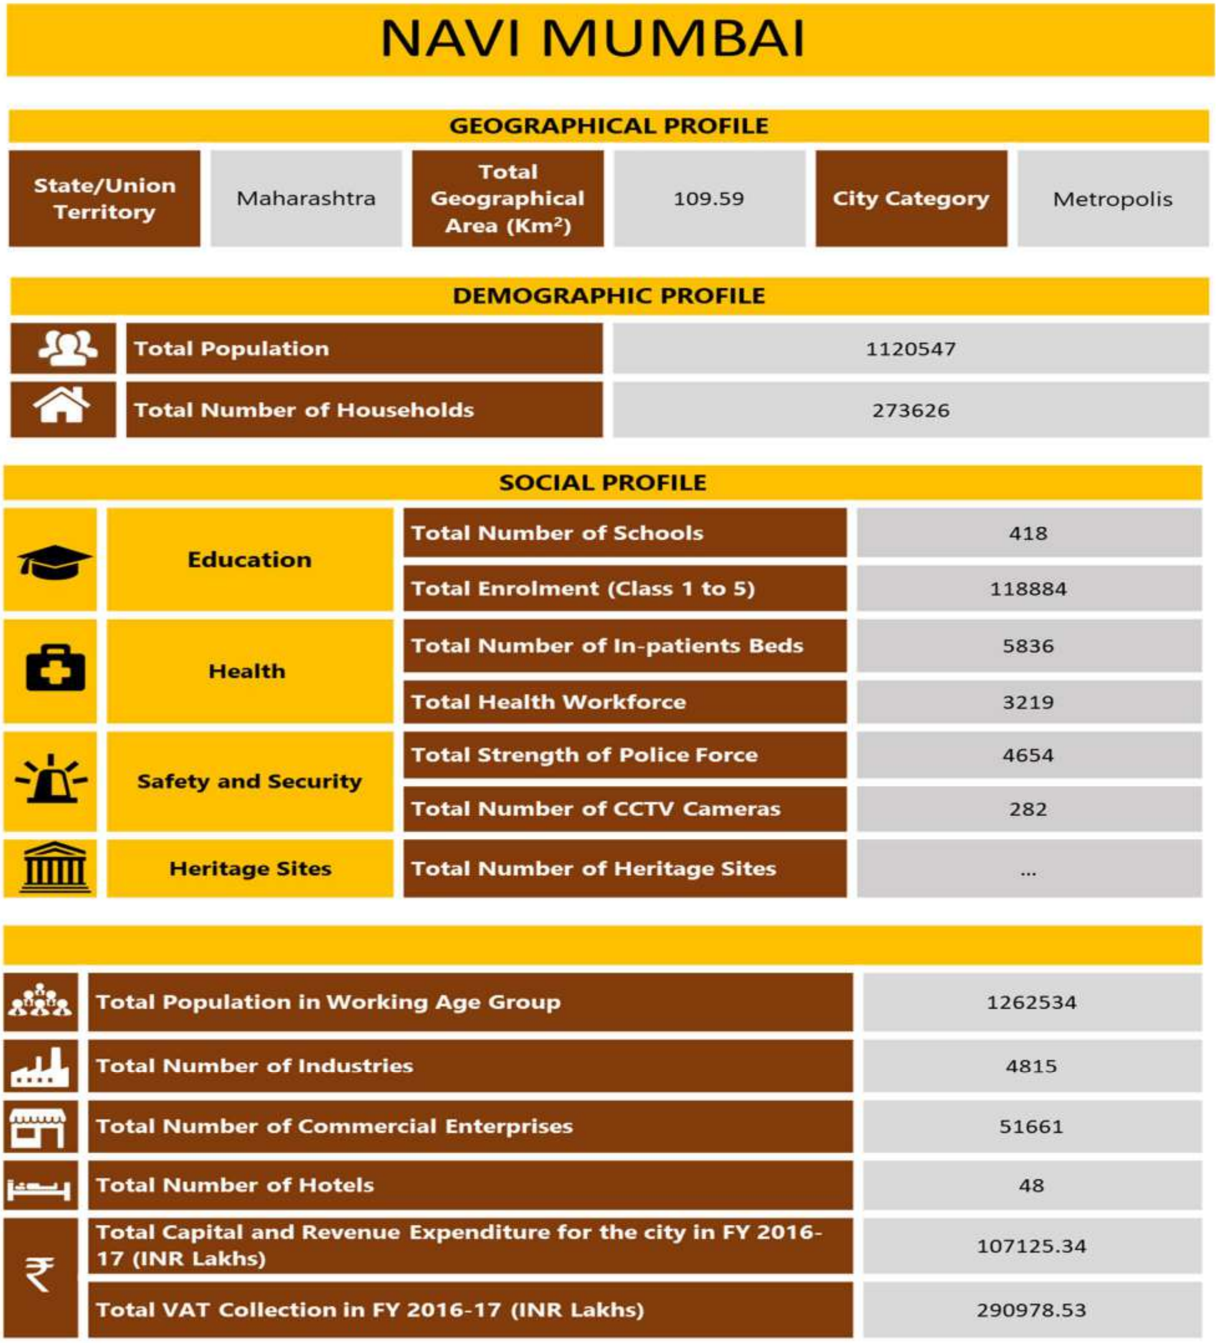


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



NAVI MUMBAI

GEOGRAPHICAL PROFILE

State/Union Territory	Maharashtra	**Total Geographical Area (Km^2)**	109.59	**City Category**	Metropolis

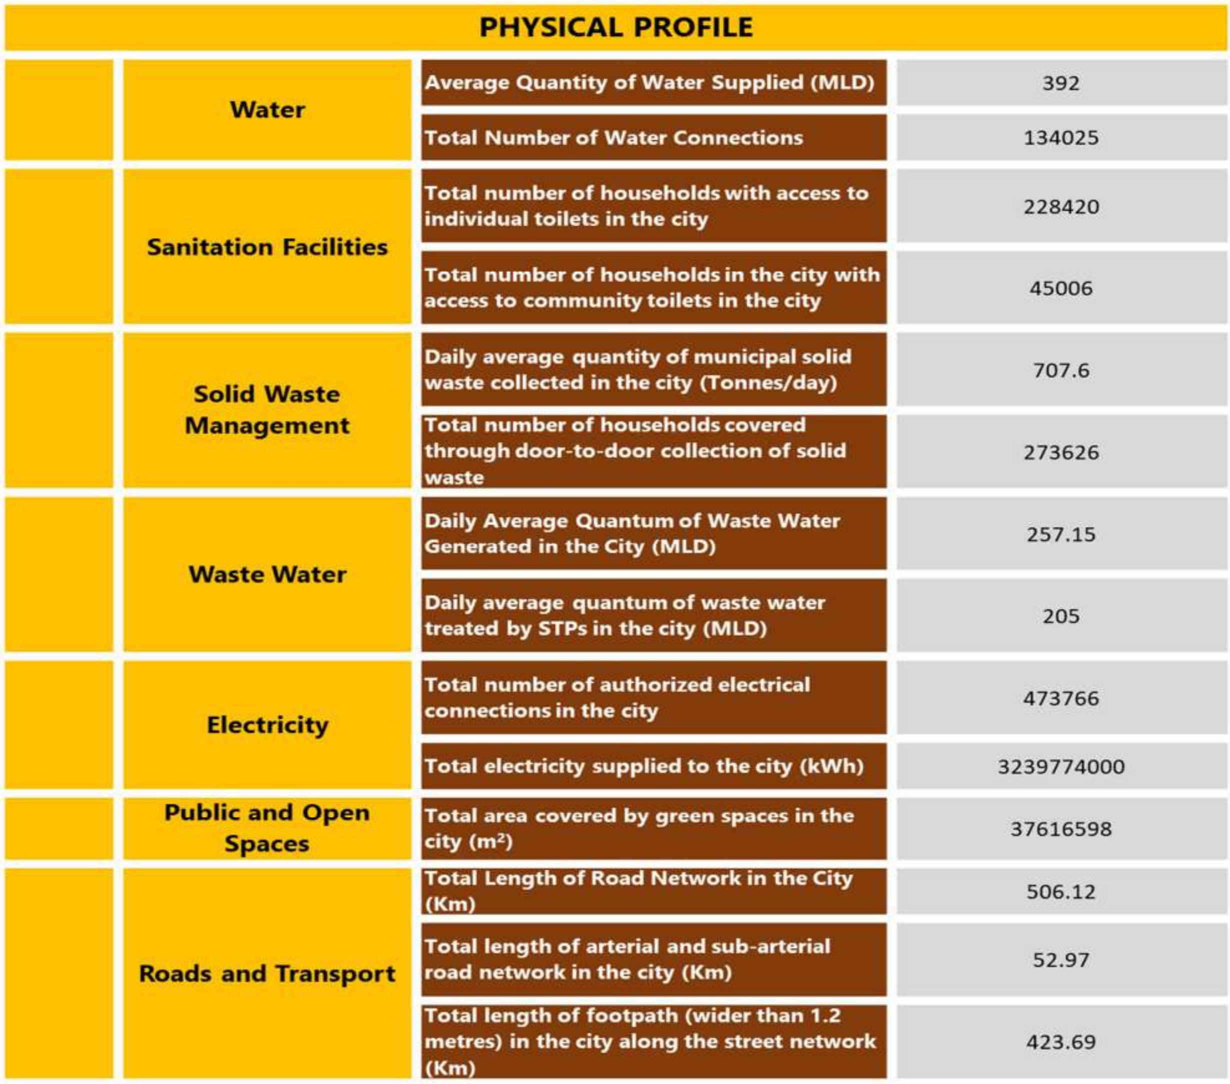
DEMOGRAPHIC PROFILE

Total Population	1120547
Total Number of Households	273626

SOCIAL PROFILE

Education	**Total Number of Schools**	418
	Total Enrolment (Class 1 to 5)	118884
Health	**Total Number of In-patients Beds**	5836
	Total Health Workforce	3219
Safety and Security	**Total Strength of Police Force**	4654
	Total Number of CCTV Cameras	282
Heritage Sites	**Total Number of Heritage Sites**	...

Total Population in Working Age Group	1262534
Total Number of Industries	4815
Total Number of Commercial Enterprises	51661
Total Number of Hotels	48
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	107125.34
Total VAT Collection in FY 2016-17 (INR Lakhs)	290978.53



PHYSICAL PROFILE		
Water	**Average Quantity of Water Supplied (MLD)**	392
	Total Number of Water Connections	134025
Sanitation Facilities	**Total number of households with access to individual toilets in the city**	228420
	Total number of households in the city with access to community toilets in the city	45006
Solid Waste Management	**Daily average quantity of municipal solid waste collected in the city (Tonnes/day)**	707.6
	Total number of households covered through door-to-door collection of solid waste	273626
Waste Water	**Daily Average Quantum of Waste Water Generated in the City (MLD)**	257.15
	Daily average quantum of waste water treated by STPs in the city (MLD)	205
Electricity	**Total number of authorized electrical connections in the city**	473766
	Total electricity supplied to the city (kWh)	3239774000
Public and Open Spaces	**Total area covered by green spaces in the city (m^2)**	37616598
Roads and Transport	**Total Length of Road Network in the City (Km)**	506.12
	Total length of arterial and sub-arterial road network in the city (Km)	52.97
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	423.69

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various ‘Category Sub-Indexes’ and a composite ‘City Liveability Index’ will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies

Pillars of Comprehensive Development	Category	Indicators
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita

Pillars of Comprehensive Development	Category	Indicators
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced	15.1 Concentration of SO2- air pollution

Pillars of Comprehensive Development	Category	Indicators
	Pollution	15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

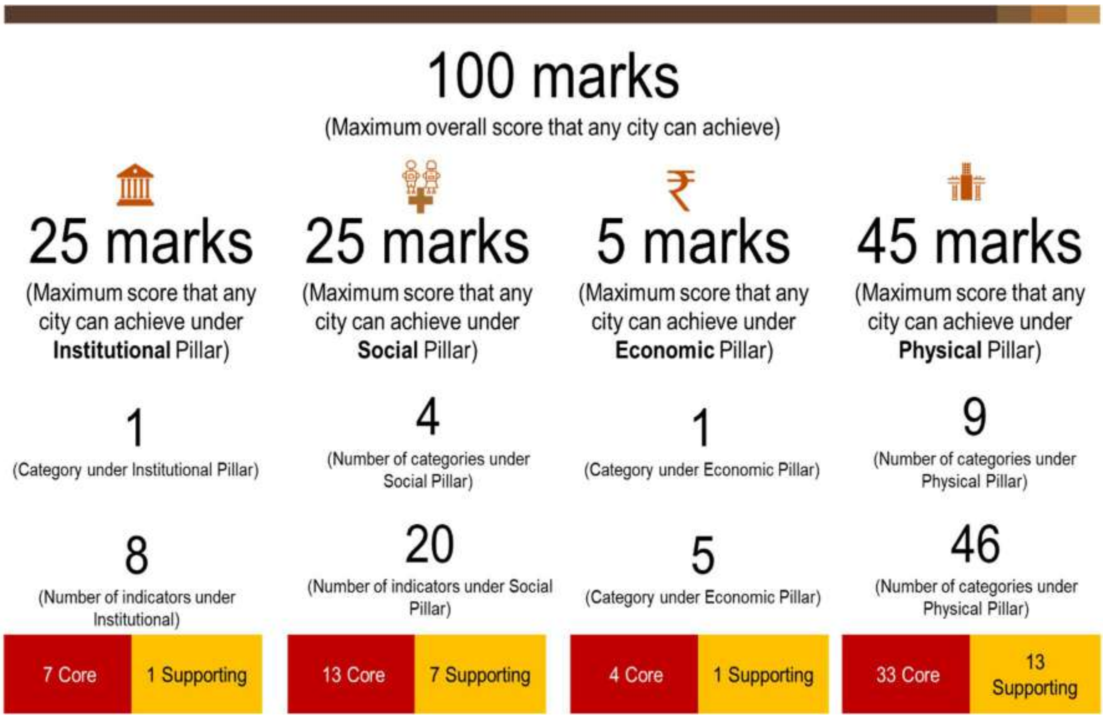
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under **Institutional** Pillar)
25 marks
(Maximum score that any city can achieve under **Social** Pillar)
5 marks
(Maximum score that any city can achieve under **Economic** Pillar)
45 marks
(Maximum score that any city can achieve under **Physical** Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning

department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts department
Urban Local Body	For Park and Recreation Related Questions	Garden department
Urban Local Body	For Water Supply and Drainage related questions	Water department
Urban Local Body	For Heritage sites related data	License department
Urban Local Body	For Ecological sites related data	License department
Urban Local Body	For Housing related data	Town planning department
Urban Local Body	For Building plan related data	City engineer and town planning department
Urban Local Body	For Roads related data	City engineer department
Urban Local Body	For Solid waste management related data	Solid waste management department
Urban Local Body	For IT services related data	It department
Urban Local Body	For Vendor committee related data	License department
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Water department and environment department
Development Authority	Building Infrastructure	City engineer and town planning department
	Construction planning	City engineer department
	Green Building	Town planning department
	Rain water harvesting	Town planning department
	Universal Design Principle	City engineering department
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Electricity department
State Disaster management authority		Disaster management department
State Education Department		Education department
State Health Department	Health care professionals	Health department
	Citizen Services	Health department

Designated data owners	Subcategories	Data owners at city level
	Disease Prevalence	Health department
	Health Infrastructure	Health department
State Renewable Energy Development Agency		Town planning department
State Sales / Commercial Taxes Department		Accounts department
Town and Country Planning Department	Land Use	Town planning department
Traffic and Police Department		Disaster management department
Transport Authorities	Buses	Transport department
	Registered Vehicles	Transport department
	Sub urban rail transport	Transport department
	Mono Rail Authority	Transport department
	Tramways	Transport department
	Marine Transport Authority	Transport department

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 318 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	**2**
State Education Department	**4**
DISCOM/Electricity Department	**20**
Traffic and Police Department	**16**
Development Authority	**38**
Pollution Control Board	**6**
State Renewable Energy Department	**3**
Town and Country Planning	**3**
State Health Department	**26**
Transport Authority	**18**
Disaster Management	**2**
Urban Local Body	**180**
Total	**318***

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

6. LA - Passenger Information Systems
7. LA - Street Vendors
8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**95.56**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	1
	1.1d solid waste management	0.5
	1.1e water supply	1
	1.1f sewerage/drainage	1
	1.1g fogging	1
	1.1h property tax	1
	1.1i professional tax	1
	1.1j information	0.923076923
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**21.43**
Description	Services integrated through an integrated or a singular operations command centre	4.5
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**21.66**
Description		
Sub Indicators	1.3a Building plan	0.000478535
	1.3b Birth/Death Certificate	3.07142E-05
	1.3c water supply	4.87472E-05

	1.3d solid waste management	0
	1.3e property tax	8.612E-05
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.000559623
	1.3i information	1.428037378
	1.3j electricity	0.303699506
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.21**
Description		
Sub Indicators	1.4a water supply	1.5
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**99.14**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	74651.93
Denominator	Total demand raised for the year	75297.93
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**567.07**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	6841.04

Denominator	Total O&M cost for providing water supply services during the year	1206.38
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**47.47**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	183335.1
Denominator	Total expenditure (revenue and capital accounts) in the same year	386183.31
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**7.21**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	8
Denominator	Total number of wards	111
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	0
Denominator	Total number of historic buildings/sites identified	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**14.29**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	2
Denominator	Total number of ecologically important sites identified in the city	14
Unit	Percentage	
Benchmark	100%	

Indicator No: 2.3	**Hotel Occupancy**	**39.63**
Description	Average Occupancy rate of Hotels	39.63
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**1.97**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	2108.05
Denominator	Total budget of the ULB (capital and revenue)	107125.34
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**272**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	272
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**100.71**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	185651
Denominator	Total population in the age group of 6-14 years	184336
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**99.89**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	86078
Denominator	Total female population in the age group of 6-14 years	86176
Unit	Percentage	
Benchmark	100%	

Indicator No: 3.3	**Primary education student-teacher ratio**	**40.52**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	118884
Denominator	Total number of teachers available for primary grades (public and private schools)	2934
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**62.44**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	261
Denominator	Total number of schools	418
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**99.07**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	99.06973 536
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**97.87**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	48233203 2
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**52.08**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	5836

Denominator	Total population of the city	1120547
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**28.73**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	3219
Denominator	Total population of the city	1120547
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**29**
Description	Total response time for health-related distress calls received in the city	29
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	97
Denominator	Total population of the city	1120547
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	172
Denominator	Total population of the city	1120547
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**55.72**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	282
Denominator	Total length of road network in the city	506.12
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**223.91**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	2509
Denominator	Total population of the city	1120547
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**23.83**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	598
Denominator	Total crimes recorded in the same year	2509
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**35.07**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	393
Denominator	Total population of the city	1120547
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**47.25**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	93368.69
Denominator	Total VAT/GST collection during preceding year	1976.0984
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**0.62**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	63.04
Denominator	Total Professional Tax collection during preceding year	10134.89
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**57.25**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	79
Denominator	Number of construction permits during preceding year	1.38
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	1422
Denominator	Total labour force in the city	184336
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**29.18**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	2138
Denominator	Total number of vendors in the city	7326
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	0
Denominator	Total number of slum and EWS households in the city	418.05
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**22.88**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	16718096667150
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**33.57**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	37616598
Denominator	Total population of the city	1120547
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**1.47**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	1646533.7

Denominator	Total population of the city	1120547
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**41.55**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	45537100
Denominator	Total area of the city (total area of all land uses)	109590000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1120547
Denominator	Area allocated for residential land use (in hectares)	42499000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**145.05**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	396894
Denominator	Total number of households in the city	273626
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**97.28**
Formula:	*Numerator / Denominator*	

Numerator	Number of electrical connections (residential and commercial) with smart meters	460894
Denominator	Total number of electricity connections in the city	473766
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**834**
Description	Total number of sustained electrical interruptions in a year	834
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.8**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	71340
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	740000
Denominator	Total energy consumption from all sources	3239821144
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.31**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	2046031.667
Denominator	Total quantum of water and waste water handled during the period	17910
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.3**
Formula:	*Numerator / Denominator*	

Numerator	Energy consumption on street lighting	31354818.6
Denominator	Total number of street light installations	43700
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	425306
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	3239821144
Denominator	Total population of the city	1120547
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	1152.6
Denominator	Total area of the city (sq.km)	109.59
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**28.66**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	32120
Denominator	Total population of the city	1120547
Unit	Number per 1000 persons	
Benchmark	>=0.6	

Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	71.2
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0.13**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0.65
Denominator	Total length of road network in the city	506.12
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**39.29**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	11
Denominator	Total number of major transport interchanges in the city	28
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport[1]**	**To be computed**
Description	Mode share of non-motorised transport	60
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**2.29**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	64
Denominator	Total number of major interchanges in the city	28
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are	0

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

	synchronised	
Denominator	Total number of signalised intersections in the city	46
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**51.55**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	50
Denominator	Total available on-street parking spaces in the city	97
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**41.86**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	423.69
Denominator	Total length of road network in the city	1012.24
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**132.35**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	180
Denominator	Total number of junctions/ intersections on major roads in the city	136
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**80.5**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	714
Denominator	Total number of public right-of-way areas in the city	887
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**43.87**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	120050
Denominator	Total number of households in the city	273626
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**349.83**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	392
Denominator	Total population of the city	1120547
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	19967

Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**64.29**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	117
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	182
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**106.22**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	326843
Denominator	Total number of properties in the city	307710
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**100.69**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	309841
Denominator	Total number of properties in the city	307710
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**79.72**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	205
Denominator	Total waste water generated in the city per day	257.15
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**100**
Formula:	*Numerator / Denominator*	

Numerator	Quantum of waste water recycled or reused per day	205
Denominator	Total waste water received at treatment plants per day	205
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**108.67**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	550
Denominator	Total length of road network in the city	506.12
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	325287
Denominator	Total number of households and establishments in the city	325287
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	707.6
Denominator	Total quantum of MSW generated in the city	707.6
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**41.84**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	8880.96
Denominator	Average MSW generated in the city (tons per month)	21228
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**23.79**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	23.79
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**34.08**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	34.08
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**43.04**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	43.04
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	50
Denominator	Total number of noise samples	115
Unit	Percentage

1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance

Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

2.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed

Pillars of Comprehensive Development	Category	Indicators
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases

Pillars of Comprehensive Development	Category	Indicators
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year

Pillars of Comprehensive Development	Category	Indicators
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water

Pillars of Comprehensive Development	Category	Indicators
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

2.2 Scoring and Computing Category Indices of Liveability

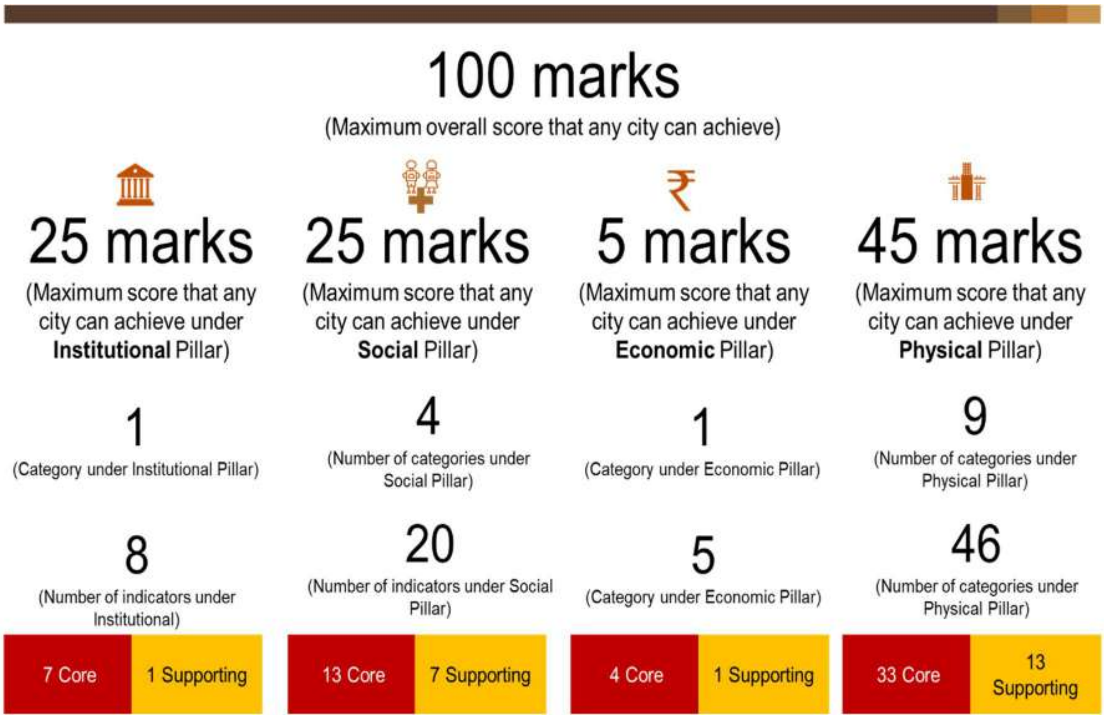
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

2.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)

25 marks	25 marks	5 marks	45 marks
(Maximum score that any city can achieve under **Institutional** Pillar)	(Maximum score that any city can achieve under **Social** Pillar)	(Maximum score that any city can achieve under **Economic** Pillar)	(Maximum score that any city can achieve under **Physical** Pillar)
1 (Category under Institutional Pillar)	4 (Number of categories under Social Pillar)	1 (Category under Economic Pillar)	9 (Number of categories under Physical Pillar)
8 (Number of indicators under Institutional)	20 (Number of indicators under Social Pillar)	5 (Category under Economic Pillar)	46 (Number of categories under Physical Pillar)
7 Core 1 Supporting	13 Core 7 Supporting	4 Core 1 Supporting	33 Core 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks

awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

2.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

3. City Reconnaissance Meetings:

State level workshop was necessary to make cities understand the importance and process of liveability assessment. City level assessments didn’t happen as State level workshop could not be conducted despite several meetings and follow ups with Urban development department and SUDA at state level.

1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places

Pillars of Comprehensive Development	Category	Indicators
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks

Pillars of Comprehensive Development	Category	Indicators
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
		13.1 Coverage of toilets

Pillars of Comprehensive Development	Category	Indicators
	13. Waste Water Management	13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

2.2. Scoring and Computing Category Indices of Liveability

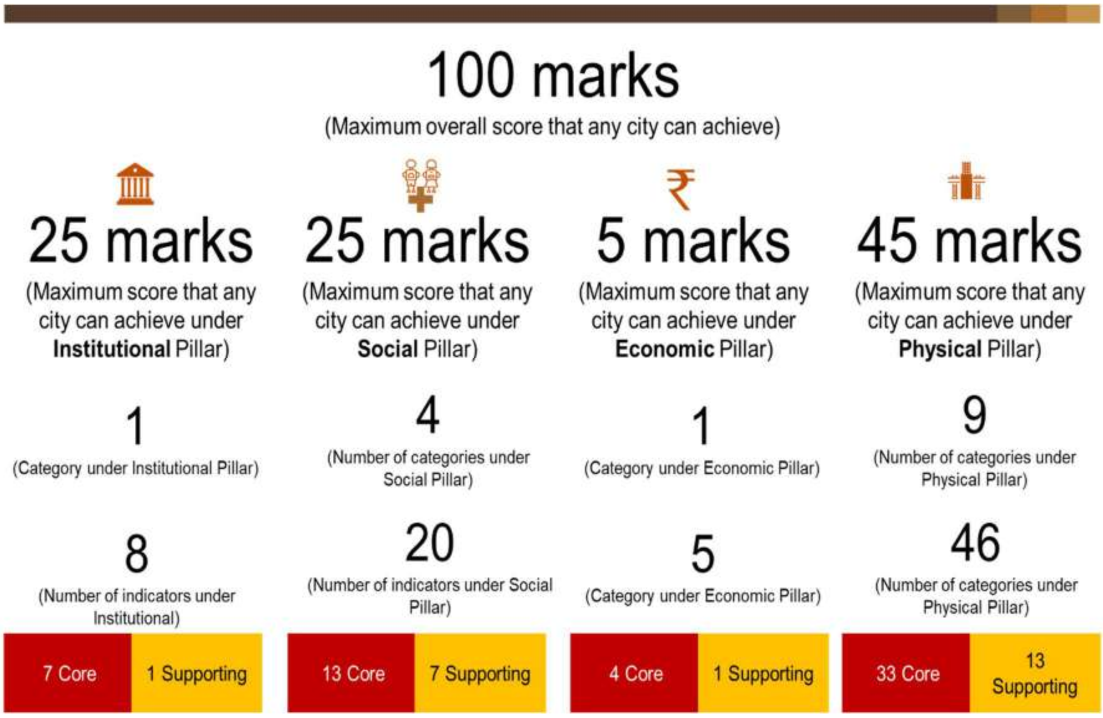
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	**Population range**
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

2.3. Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)

25 marks

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring. The list of benchmarks is presented in Annexure 1.

2.4. Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicatorvalueforthecity - indicatorvaluefortheworstperformingcity}{benchmark - indicatorvaluefortheworstperformingcity}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1. Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2. Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Corporation of City of Panaji
Urban Local Body	For Park and Recreation Related Questions	Corporation of City of Panaji
Urban Local Body	For Water Supply and Drainage related questions	Public Works Department
Urban Local Body	For Heritage sites related data	Urban Local Body
Urban Local Body	For Ecological sites related data	North Goa Planning and Development Authority

Urban Local Body	For Housing related data	Corporation of City of Panaji and North Goa Planning and Development Authority
Urban Local Body	For Building plan related data	Corporation of City of Panaji and North Goa Planning and Development Authority
Urban Local Body	For Roads related data	Transport Department
Urban Local Body	For Solid waste management related data	Corporation of City of Panaji
Urban Local Body	For IT services related data	Corporation of City of Panaji and Department of Information Technology
Urban Local Body	For Vendor committee related data	Corporation of City of Panaji
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	Corporation of City of Panaji
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Goa Pollution Control Board
Development Authority	Building Infrastructure	Corporation of City of Panaji and North Goa Planning and Development Authority
	Construction planning	Corporation of City of Panaji
	Green Building	North Goa Planning and Development Authority
	Rain water harvesting	Water Resource Department
	Universal Design Principle	North Goa Planning and Development Authority
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Electricity Department
State Disaster management authority		

State Education Department		
State Health Department	Health care professionals	Directorate of Health Services, Panaji
	Citizen Services	Directorate of Health Services, Panaji
	Disease Prevalence	Directorate of Health Services, Panaji
	Health Infrastructure	Directorate of Health Services, Panaji
State Renewable Energy Development Agency		
State Sales / Commercial Taxes Department		Office of the Commissioner of Commercial Taxes
Town and Country Planning Department	Land Use	Town and Country Planning Department and North Goa Planning and Development Authority
Traffic and Police Department		
Transport Authorities	Buses	Directorate of Transport
	Registered Vehicles	Directorate of Transport
	Sub urban rail transport	Directorate of Transport
	Mono Rail Authority	Directorate of Transport
	Tramways	Directorate of Transport

	Marine Transport Authority	River Navigation Department

4.3. List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 30 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	3
DISCOM/Electricity Department	2
Traffic and Police Department	3
Development Authority	2
Pollution Control Board	1
State Renewable Energy Department	1
Town and Country Planning	0
State Health Department	1
Transport Authority	4
Disaster Management	0

Urban Local Body	13
Total	30

* The count of documents is based on first round of submission.

4.4. Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1| Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5. Physical Audit

8. LA - Universal Design Principles

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**29.19**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	0
	1.1d solid waste management	0

	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0.333333333333333
	1.1i professional tax	0
	1.1j information	0.461538461538462
	1.1k Grievance redressal	1
	1.1l electricity	0.5
	1.1m Building plan	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**4.76**
Description	Services integrated through an integrated or a singular operations command centre	1
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**2330.41**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	0

	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0.00481670290126696
	1.3i information	NA
	1.3j electricity	46.603451116053
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**0.33**
Description		
Sub Indicators	1.4a water supply	1
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	1
	1.4e professional tax	NA
	1.4f parks and recreational spaces	0
	1.4g building plan	0

Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**54.55**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	1246.89594
Denominator	Total demand raised for the year	2285.96708
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**4649135350**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	92982707
Denominator	Total O&M cost for providing water supply services during the year	2
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**2.37**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	170.83
Denominator	Total expenditure (revenue and capital accounts) in the same year	7197.7
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**

Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	NA
Denominator	Total number of wards	30
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)

Table 5: Details of Indicator Values ……………………………………………………………………..24

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	Data Unavailable
Denominator	Total number of historic buildings/sites identified	37
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	2
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**72.81**
Description	Average Occupancy rate of Hotels	72.81
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**

Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	2710.27
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**0**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	0
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**19.31**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	13693
Denominator	Total population in the age group of 6-14 years	70923
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**19.97**
Formula:	*Numerator / Denominator*	

Numerator	Total female enrolment in primary and secondary schools (public and private	6820
Denominator	Total female population in the age group of 6-14 years	34158
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**29.56**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	8306
Denominator	Total number of teachers available for primary grades (public and private schools)	281
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**74.47**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	35
Denominator	Total number of schools	47
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**143.09**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	143.091598839753
Unit	Percentage	
Benchmark	100%	

Indicator No: 3.6	**Percentage of students completing secondary education**	**99.64**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	3247446
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**420.82**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	1684
Denominator	Total population of the city	40017
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**69.72**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	279
Denominator	Total population of the city	40017
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	

Indicator No: 4.3	**Average response time in case of health emergencies**	**15**
Description	Total response time for health-related distress calls received in the city	15
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**44.07**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	17634
Denominator	Total population of the city	40017
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	0.28
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	111
Denominator	Total population of the city	40017
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	Data Unavailable
Denominator	Total length of road network in the city	77
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**247.39**
Formula:	Numerator / Denominator	99
Numerator	Total number of crimes recorded in a year	40017
Denominator	Total population of the city	
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**15.15**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	15
Denominator	Total crimes recorded in the same year	99
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**22.49**
Formula:	*Numerator / Denominator*	

Numerator	Total number of fatalities recorded in road accidents in a year	9
Denominator	Total population of the city	40017
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**3.36**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	1945.36
Denominator	Total VAT/GST collection during preceding year	578.2607
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**32**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	8
Denominator	Number of construction permits during preceding year	0.25
Unit	Percentage	

Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	Data Unavailable
Denominator	Total labour force in the city	353253
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	NA
Denominator	Total number of vendors in the city	8831.325
Unit	Percentage	
Benchmark	100%	

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	NA
Denominator	Total number of slum and EWS households in the city	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	NA
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**28.64**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	1146105

Denominator	Total population of the city	40017
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**2.13**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	85064
Denominator	Total population of the city	40017
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	8120000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	40017
Denominator	Area allocated for residential land use (in hectares)	Data Unavailable
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**104.14**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	15100
Denominator	Total number of households in the city	14500
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0.26**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	63
Denominator	Total number of electricity connections in the city	24282
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**30**
Description	Total number of sustained electrical interruptions in a year	30
Unit	Number	

Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.72**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	4265
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	24007.4
Denominator	Total energy consumption from all sources	228
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	

Numerator	Energy consumption on water supply and sewerage services	36.2925
Denominator	Total quantum of water and waste water handled during the period	750
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	2170860
Denominator	Total number of street light installations	2600
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	Data Unavailable
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	64780.72

Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	228
Denominator	Total population of the city	40017
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.67**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	50
Denominator	Total area of the city (sq.km)	8.12
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**23.19**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	928
Denominator	Total population of the city	40017

Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	77
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	NA
Denominator	Total number of major transport interchanges in the city	4
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**	**To be computed**
Description	Mode share of non-motorised transport	Data Unavailable

Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.25**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	1
Denominator	Total number of major interchanges in the city	4
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	0
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	NA
Denominator	Total available on-street parking spaces in the city	NA
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	Total length of footpaths (wider than 1.2 m) available in the city	Data Unavailable
Denominator	Total length of road network in the city	154
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	NA
Denominator	Total number of junctions/ intersections on major roads in the city	NA
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	Data Unavailable
Denominator	Total number of public right-of-way areas in the city	23
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**42.85**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	6213
Denominator	Total number of households in the city	14500
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**349.85**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	14
Denominator	Total population of the city	40017
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	Data Unavailable
Denominator	Total number of samples tested for water quality	Data Unavailable
Unit	Percentage	

Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	14
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	11110
Denominator	Total number of water connections in the city	11110
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	Data Unavailable
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	Data Unavailable
Unit	Percentage	

Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**76.98**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	18475
Denominator	Total number of properties in the city	24000
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**11.67**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	2800
Denominator	Total number of properties in the city	24000
Unit	Percentage	
Benchmark	100%	

Indicator No: 13.3	**Collection efficiency of sewerage network**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	12
Denominator	Total waste water generated in the city per day	12
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**93.33**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	11.2
Denominator	Total waste water received at treatment plants per day	12
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	77
Denominator	Total length of road network in the city	77
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	22883
Denominator	Total number of households and establishments in the city	22883
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	50
Denominator	Total quantum of MSW generated in the city	50
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through re-use**	**12**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	180

Denominator	Average MSW generated in the city (tons per month)	1500
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**3.1**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	3.1
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**19.2**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	19.2
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**75.2**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	75.2

Unit	μg/m3	
Benchmark	Annual mean concentration of 60 μg/m3 OR Mean concentration over 24 hours of 100 μg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	Data Unavailable
Denominator	Total number of noise samples	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	Data Unavailable
Denominator	Total number of samples tested	Data Unavailable
Unit	Percentage	
Benchmark	100%

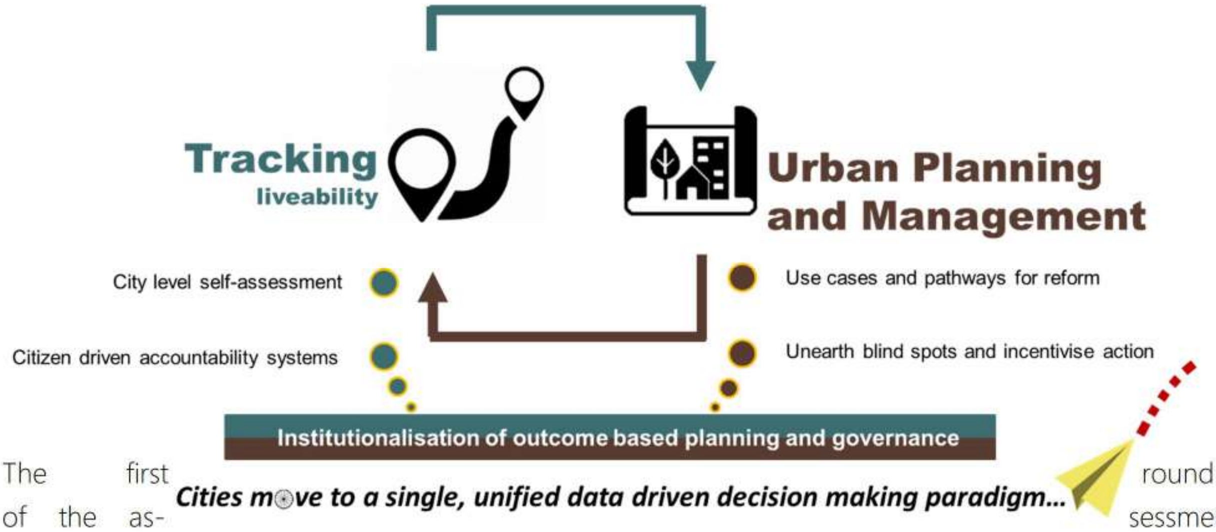
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities



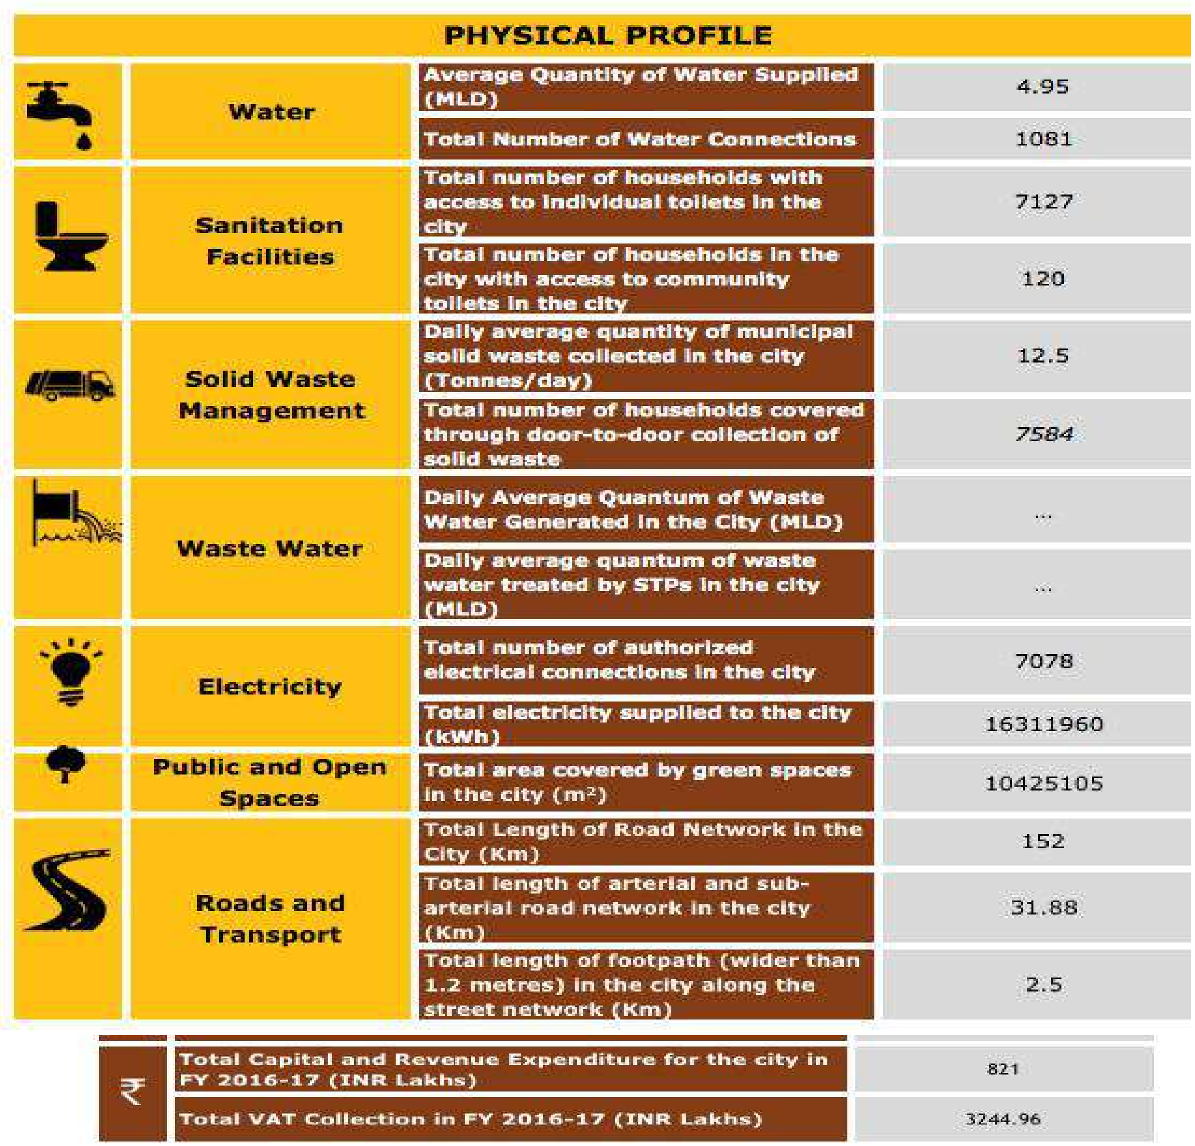
Tracking
liveability
Urban Planning and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment

commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	4.95
	Total Number of Water Connections	1081
Sanitation Facilities	Total number of households with access to individual toilets in the city	7127
	Total number of households in the city with access to community toilets in the city	120
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	12.5
	Total number of households covered through door-to-door collection of solid waste	7584
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	...
	Daily average quantum of waste water treated by STPs in the city (MLD)	...
Electricity	Total number of authorized electrical connections in the city	7078
	Total electricity supplied to the city (kWh)	16311960
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	10425105
Roads and Transport	Total Length of Road Network in the City (Km)	152
	Total length of arterial and sub-arterial road network in the city (Km)	31.88
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	2.5
₹	Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	821
	Total VAT Collection in FY 2016-17 (INR Lakhs)	3244.96

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the perfor-

mance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1. Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities

Pillars of Comprehensive Development	Category	Indicators
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year

Pillars of Comprehensive Development	Category	Indicators
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year

Pillars of Comprehensive Development	Category	Indicators
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces

Pillars of Comprehensive Development	Category	Indicators
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection

Pillars of Comprehensive Development	Category	Indicators
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through re-use
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2. Scoring and Computing Category Indices of Liveability

The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

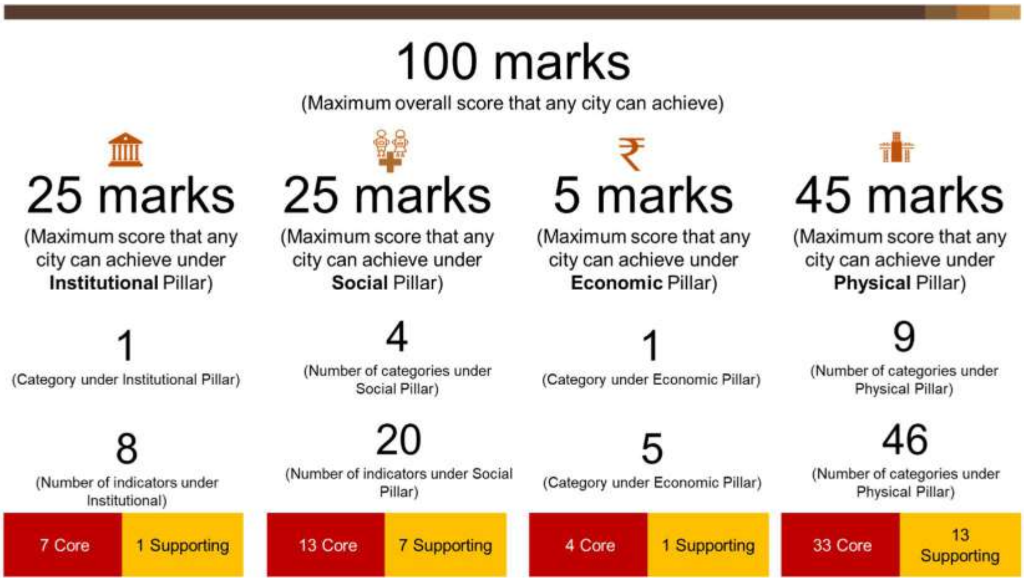
Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million

Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3. Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under **Institutional** Pillar)
25 marks
(Maximum score that any city can achieve under **Social** Pillar)
5 marks
(Maximum score that any city can achieve under **Economic** Pillar)
45 marks
(Maximum score that any city can achieve under **Physical** Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4. Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicatorvalueforthecity - indicatorvaluefortheworstperformingcity}{benchmark - indicatorvaluefortheworstperformingcity}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1. Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2. Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions

on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Municipal department
Urban Local Body	For Park and Recreation Related Questions	Municipal department
Urban Local Body	For Water Supply and Drainage related questions	Water department
Urban Local Body	For Heritage sites related data	Municipal council
Urban Local Body	For Ecological sites related data	Municipal council and town planning department
Urban Local Body	For Housing related data	Town planning department
Urban Local Body	For Building plan related data	Town planning department
Urban Local Body	For Roads related data	District Transport department
Urban Local Body	For Solid waste management related data	Municipal council
Urban Local Body	For IT services related data	Municipal council
Urban Local Body	For Vendor committee related data	Municipal council and town planning g Department
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	No
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	
Development Authority	Building Infrastructure	Town planning department
	Construction planning	TownTown planning department
	Green Building	Town planning department

	Rain water harvesting	Town planning department
	Universal Design Principle	Town planning department
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	By Electrical department
State Disaster management authority		Filled data by district disaster management officer itself
State Education Department		Collected data from Udice education department
State Health Department	Health care professionals	Collected data from office of general hospital pasighat.
	Citizen Services	Collected data by district medical officer.
	Disease Prevalence	This data has taken from the Ashamed diagnostic lab pasighat by the nodel officer
	Health Infrastructure	Collected data from all the hospitals of pasighat city.
State Renewable Energy Development Agency		Data feed by project officer of Arunachal Pradesh energy Development Agency who itself is the nodal officer .
State Sales / Commercial Taxes Department		All the datas were feed by superintendent of tax and exice Development.
Town and Country Planning Department	Land Use	Data feed by secretary Municipal council .
Traffic and Police Department		
Transport Authorities	Buses	datas were feed by district transport officer.
	Registered Vehicles	Datas were feed by district transport officer.
	Sub urban rail transport	Rail service is not available in the pasigha.Confirmation given by district transport officer.

	Mono Rail Authority	Rail service is not available in Pasighat.Confirmation given by district transport officer.
	Tramways	Service not available.Confirmation given by district transport officer.
	Marine Transport Authority	Service not available.Confirmation given by district transport officer.

4.3. List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 0 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	0
DISCOM/Electricity Department	0
Traffic and Police Department	0
Development Authority	0
Pollution Control Board	0

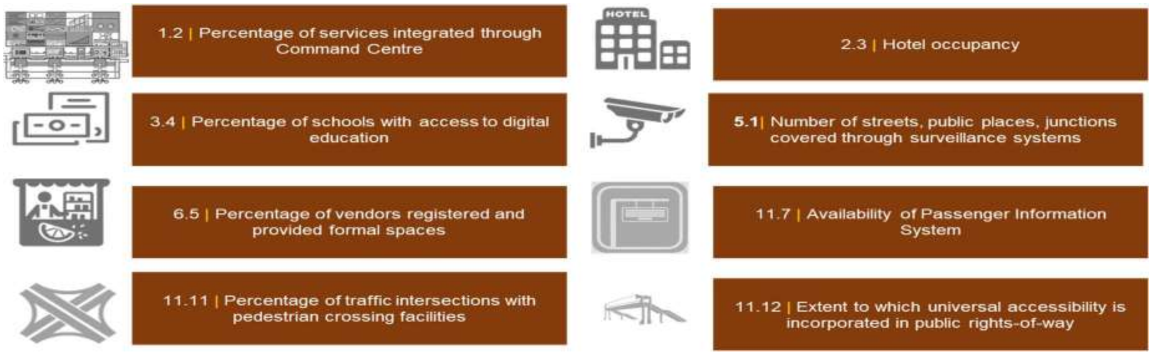
State Renewable Energy Department	0
Town and Country Planning	0
State Health Department	0
Transport Authority	0
Disaster Management	0
Urban Local Body	0
Total	0

* The count of documents is based on first round of submission.

4.4. Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5. Physical Audit

The following map presents the indicators audited at city level.

8. LA - Universal Design Principles

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	**Indicator title**
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**6.8**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0
	1.1b death certificate	0
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	0

	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	0
	1.1i professional tax	0
	1.1j information	00.384615384615385
	1.1k Grievance redressal	0.5
	1.1l electricity	0
	1.1m Building plan	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**0**
Description	Services integrated through an integrated or a singular operations command centre	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**Non-Computable**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	0
	1.3c water supply	NA
	1.3d solid waste management	0

	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	0
	1.3i information	0
	1.3j electricity	0
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**77.38**
Description		
Sub Indicators	1.4a water supply	306
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	NA
	1.4e professional tax	NA
	1.4f parks and recreational spaces	NA
	1.4g building plan	3.5
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	0

Denominator	Total demand raised for the year	0
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**34470630.77**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	2240591
Denominator	Total O&M cost for providing water supply services during the year	6.5
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	-373.18
Denominator	Total expenditure (revenue and capital accounts) in the same year	-373.18
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	12
Denominator	Total number of wards	12
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	0
Denominator	Total number of historic buildings/sites identified	4
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	2
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**9.29**
Description	Average Occupancy rate of Hotels	9.28571428571429
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	821

Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**0**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	0
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**96.86**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	6199
Denominator	Total population in the age group of 6-14 years	6400
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**99.13**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	3101
Denominator	Total female population in the age group of 6-14 years	3226
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**16.8**
Formula:	*Numerator / Denominator*	

Numerator	Total number of students in primary grades (public and private)	3494
Denominator	Total number of teachers available for primary grades (public and private schools)	208
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	0
Denominator	Total number of schools	28
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**237.74**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	237.742984470574
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**124.4**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	839937
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**81.12**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	200
Denominator	Total population of the city	24656
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	24656
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	114
Denominator	Total population of the city	24656
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**0**
Description	Total response time for health-related distress calls received in the city	0
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.32**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	79
Denominator	Total population of the city	24656
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.54**

Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	132
Denominator	Total population of the city	24656
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	Data Unavailable
Denominator	Total length of road network in the city	152
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**1241.08**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	306
Denominator	Total population of the city	24656
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**17.65**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups	54

	(women, children and elderly) in a year	
Denominator	Total crimes recorded in the same year	306
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	0
Denominator	Total population of the city	24656
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**38.35**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	899.46
Denominator	Total VAT/GST collection during preceding year	23.455
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	0

Denominator	Total Professional Tax collection during preceding year	0
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	NC
Denominator	Number of construction permits during preceding year	NC
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	Data Unavailable
Denominator	Total labour force in the city	18582
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**24.54**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	114

Denominator	Total number of vendors in the city	464.55
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**16.69**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	208
Denominator	Total number of slum and EWS households in the city	12.46
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	Data Unavailable
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**422.82**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	10425105
Denominator	Total population of the city	24656
Unit	Square metres (sq.m.)	

Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**108.68**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	2679564
Denominator	Total population of the city	24656
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	Data Unavailable
Denominator	Total area of the city (total area of all land uses)	105000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	24656
Denominator	Area allocated for residential land use (in hectares)	31000000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical**	**99.31**

	service	
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	7078
Denominator	Total number of households in the city	7127
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	Data Unavailable
Denominator	Total number of electricity connections in the city	7078
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**689**
Description	Total number of sustained electrical interruptions in a year	689
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	31680
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	10
Denominator	Total energy consumption from all sources	16312160
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	0
Denominator	Total quantum of water and waste water handled during the period	148.5
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	Data Unavailable
Denominator	Total number of street light installations	60
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	

Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	Data Unavailable
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	Data Unavailable
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.46**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	16312160
Denominator	Total population of the city	24656
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.67**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	1356
Denominator	Total area of the city (sq.km)	105
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.08**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	2
Denominator	Total population of the city	24656
Unit	Number per 1000 persons	
Benchmark	>=0.6	

Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	30
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	152
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	1
Denominator	Total number of major transport interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**	**To be computed**
Description	Mode share of non-motorised transport	0
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0**

Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	0
Denominator	Total number of major interchanges in the city	1
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	0
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**2.27**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	5
Denominator	Total available on-street parking spaces in the city	220
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.82**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	2.5
Denominator	Total length of road network in the city	304
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian**	**100**

	crossing facilities	
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	4
Denominator	Total number of junctions/ intersections on major roads in the city	4
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	Data Unavailable
Denominator	Total number of public right-of-way areas in the city	1136
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**13.4**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	955
Denominator	Total number of households in the city	7127
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**200.76**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	4.95

Denominator	Total population of the city	24656
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	0
Denominator	Total number of samples tested for water quality	108
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	4.95
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	0
Denominator	Total number of water connections in the city	1081
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of	Data Unavaila-

	designated plot size), commercial and public buildings with RWH facility	ble
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	Data Unavailable
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	8593
Denominator	Total number of properties in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	Data Unavailable
Denominator	Total number of properties in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	Data Unavailable

Denominator	Total waste water generated in the city per day	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	Data Unavailable
Denominator	Total waste water received at treatment plants per day	Data Unavailable
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	Data Unavailable
Denominator	Total length of road network in the city	152
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**117.69**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	9050
Denominator	Total number of households and establishments in the city	7690
Unit	Percentage	
Benchmark	100% door to door collection	

Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**89.29**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	12.5
Denominator	Total quantum of MSW generated in the city	14
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through re-use**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	0
Denominator	Average MSW generated in the city (tons per month)	375
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	

Indicator No: 15.3	**Concentration of PM10 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	Data Unavailable
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	Data Unavailable
Denominator	Total number of noise samples	Data Unavailable
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	Data Unavailable
Denominator	Total number of samples tested	Data Unavailable
Unit	Percentage	
Benchmark	100%

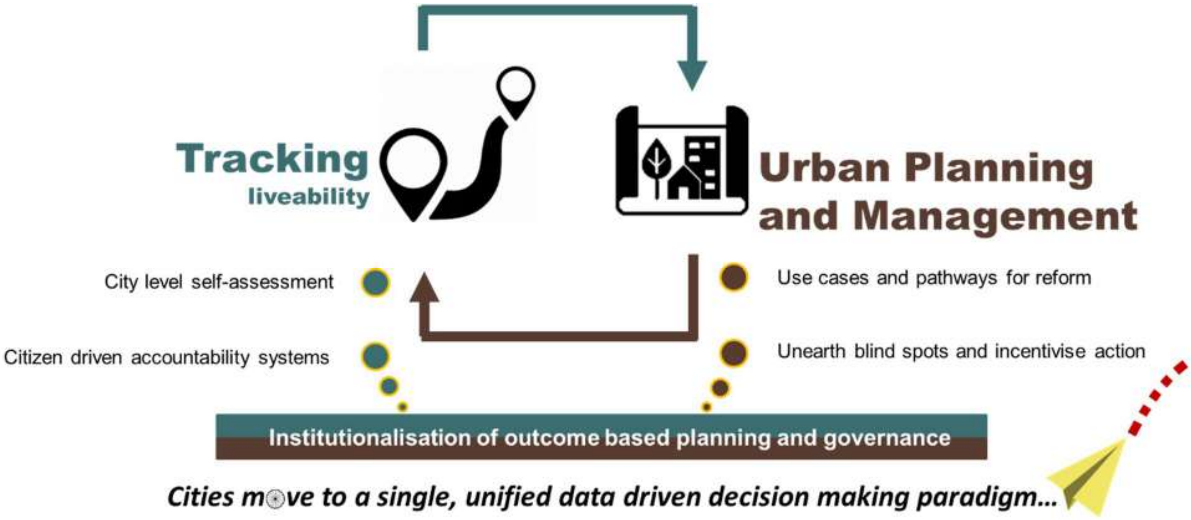
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

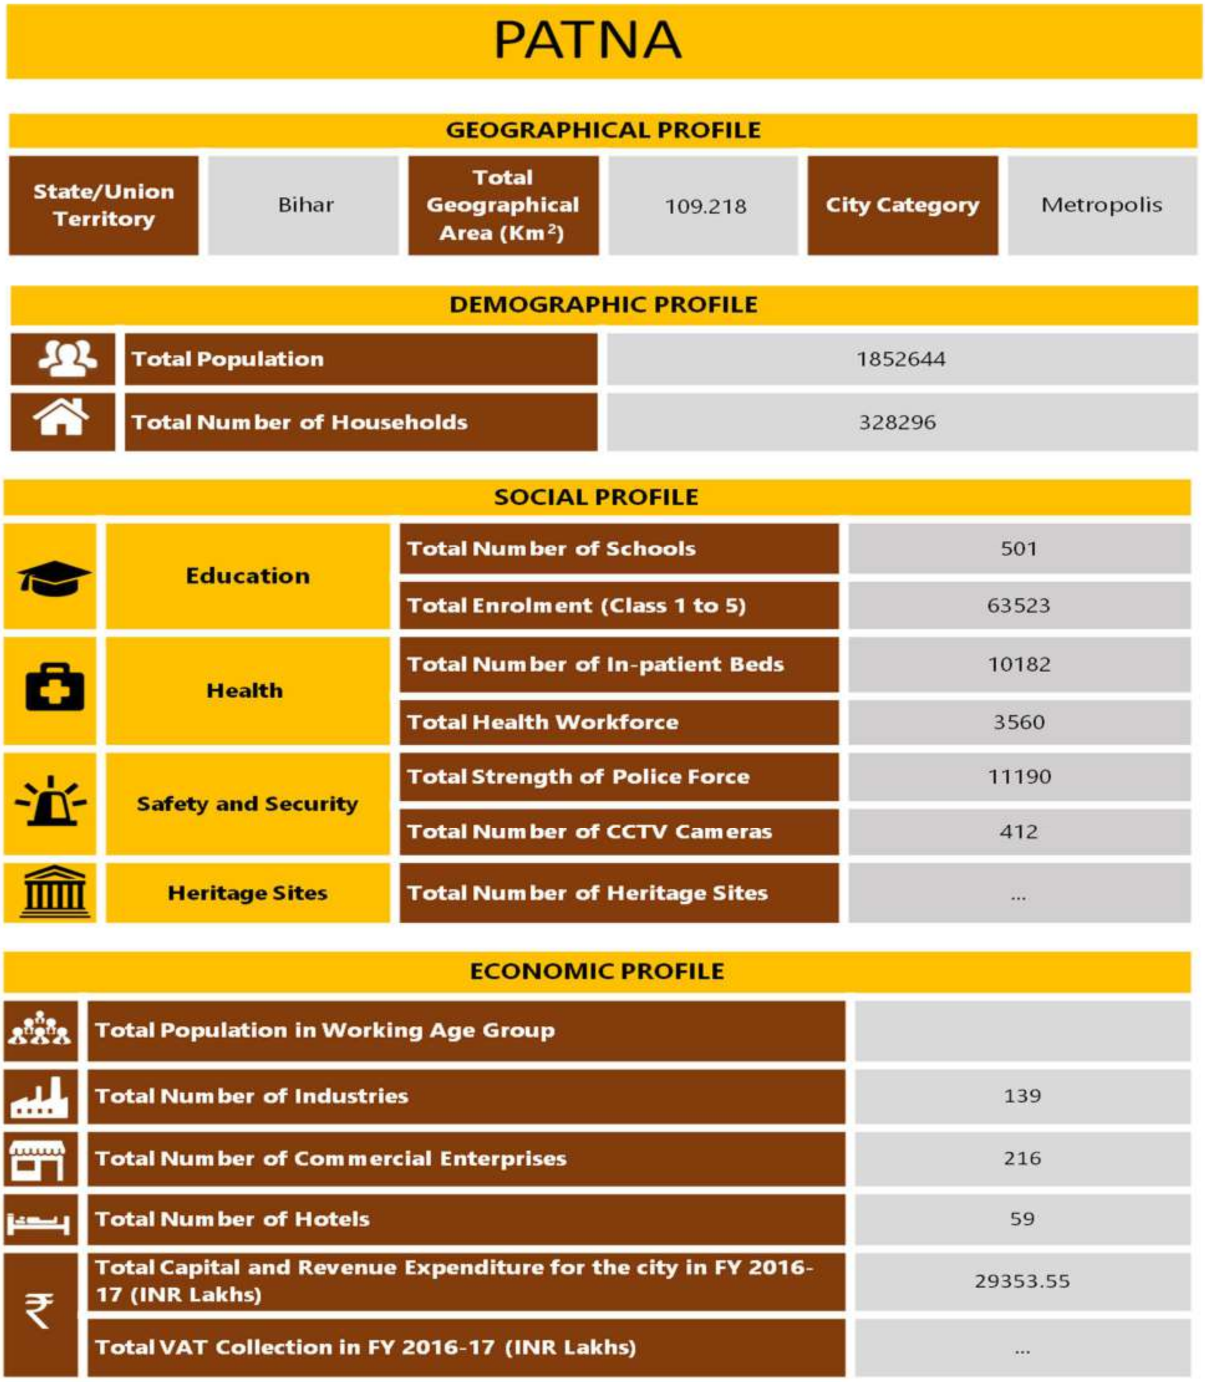


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



PATNA

GEOGRAPHICAL PROFILE

State/Union Territory	Bihar	**Total Geographical Area (Km²)**	109.218	**City Category**	Metropolis

DEMOGRAPHIC PROFILE

Total Population	1852644
Total Number of Households	328296

SOCIAL PROFILE

Education	**Total Number of Schools**	501
	Total Enrolment (Class 1 to 5)	63523
Health	**Total Number of In-patient Beds**	10182
	Total Health Workforce	3560
Safety and Security	**Total Strength of Police Force**	11190
	Total Number of CCTV Cameras	412
Heritage Sites	**Total Number of Heritage Sites**	...

ECONOMIC PROFILE

Total Population in Working Age Group	
Total Number of Industries	139
Total Number of Commercial Enterprises	216
Total Number of Hotels	59
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	29353.55
Total VAT Collection in FY 2016-17 (INR Lakhs)	...

PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	132
	Total Number of Water Connections	179695
Sanitation Facilities	Total number of households with access to individual toilets in the city	205814
	Total number of households in the city with access to community toilets in the city	1275
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	754
	Total number of households covered through door-to-door collection of solid waste	94016
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	224.6
	Daily average quantum of waste water treated by STPs in the city (MLD)	121
Electricity	Total number of authorized electrical connections in the city	433805
	Total electricity supplied to the city (kWh)	225143.19
Public and Open Spaces	Total area covered by green spaces in the city (m^2)	1660000
Roads and Transport	Total Length of Road Network in the City (Km)	2516
	Total length of arterial and sub-arterial road network in the city (Km)	53
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	26

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in

Pillars of Comprehensive Development	Category	Indicators
		schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density

Pillars of Comprehensive Development	Category	Indicators
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through

Pillars of Comprehensive Development	Category	Indicators
		meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

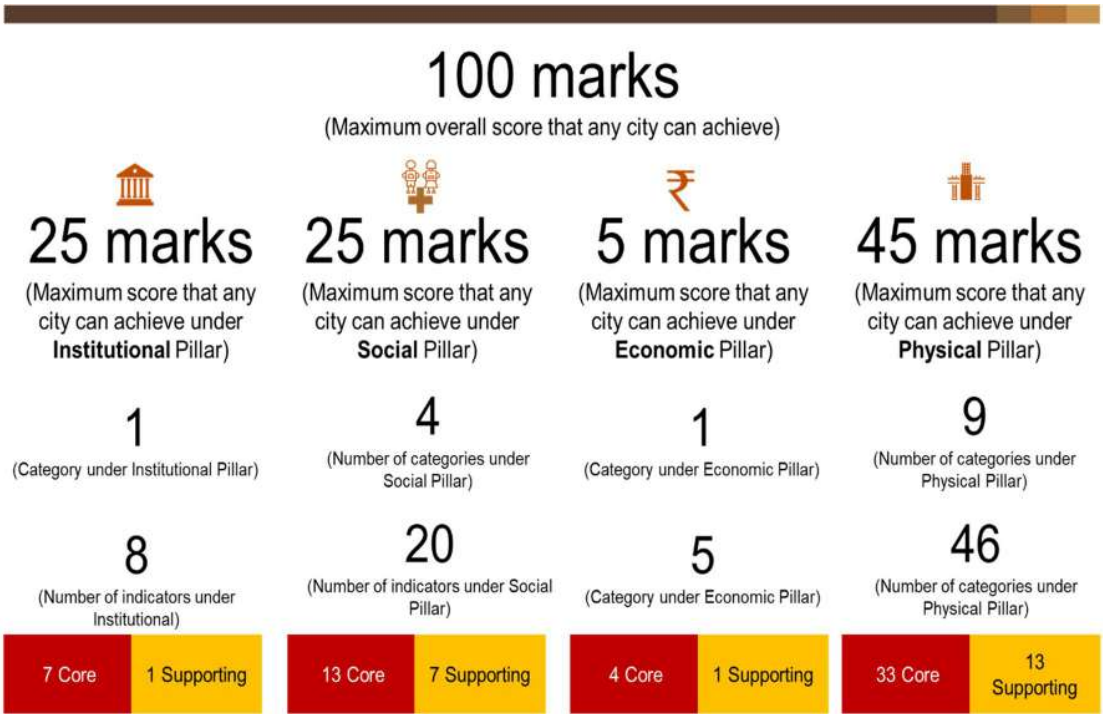
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks

(Maximum score that any city can achieve under **Institutional** Pillar)

1

(Category under Institutional Pillar)

8

(Number of indicators under Institutional)

7 Core | 1 Supporting

25 marks

(Maximum score that any city can achieve under **Social** Pillar)

4

(Number of categories under Social Pillar)

20

(Number of indicators under Social Pillar)

13 Core | 7 Supporting

5 marks

(Maximum score that any city can achieve under **Economic** Pillar)

1

(Category under Economic Pillar)

5

(Category under Economic Pillar)

4 Core | 1 Supporting

45 marks

(Maximum score that any city can achieve under **Physical** Pillar)

9

(Number of categories under Physical Pillar)

46

(Number of categories under Physical Pillar)

33 Core | 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Account Department, Patna Municipal Corporation
Urban Local Body	For Park and Recreation Related Questions	Engineering Department, Patna Municipal Corporation
Urban Local Body	For Water Supply and Drainage related questions	Engineering Department, Patna Municipal Corporation
Urban Local Body	For Heritage sites related data	Patna Municipal Corporation
Urban Local Body	For Ecological sites related data	Patna Municipal Corporation
Urban Local Body	For Housing related data	Social development Section, Patna Municipal Corporation
Urban Local Body	For Building plan related data	Engineering Department, Patna Municipal Corporation
Urban Local Body	For Roads related data	Engineering Department, Patna Municipal Corporation
Urban Local Body	For Solid waste management related data	Patna Municipal Corporation
Urban Local Body	For IT services related data	IT section, Patna Municipal corporation
Urban Local Body	For Vendor committee related data	Social Development Section, Patna Municipal Corporation
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	State Pollution Control Board, Bihar

Designated data owners	Subcategories	Data owners at city level
Development Authority	Building Infrastructure	Engineering Department, Patna Municipal Corporation
	Construction planning	Engineering Department, Patna Municipal Corporation
	Green Building	Engineering Department, Patna Municipal Corporation
	Rain water harvesting	Engineering Department, Patna Municipal Corporation
	Universal Design Principle	Engineering Department, Patna Municipal Corporation
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Bihar Power Distribution Corporation Limited
State Disaster management authority		District Collectorate Office
State Education Department		District Education Department
State Health Department	Health care professionals	Civil Surgeon Office
	Citizen Services	Civil Surgeon Office
	Disease Prevalence	State Health Mission
	Health Infrastructure	Civil Surgeon Office
State Renewable Energy Development Agency		Bihar Renewable Energy Development Authority
State Sales / Commercial Taxes Department		State Commercial and Tax department
Town and Country Planning Department	Land Use	Patna Municipal Corporation
Traffic and Police Department		Office of Senior Superintendent of Police
Transport Authorities	Buses	State Transport Authority, District Transport office
	Registered Vehicles	State Transport Authority, District Transport office
	Sub urban rail transport	
	Mono Rail Authority	
	Tramways	
	Marine Transport Authority	

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 4 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	1
State Education Department	0
DISCOM /Electricity Department	0
Traffic and Police Department	0
Development Authority	0
Pollution Control Board	3
State Renewable Energy Department	0
Town and Country Planning	0
State Health Department	0
Transport Authority	0
Disaster Management	0
Urban Local Body	0
Total	4*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the

field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

- 1.2 | Percentage of services integrated through Command Centre
- 2.3 | Hotel occupancy
- 3.4 | Percentage of schools with access to digital education
- 5.1 | Number of streets, public places, junctions covered through surveillance systems
- 6.5 | Percentage of vendors registered and provided formal spaces
- 11.7 | Availability of Passenger Information System
- 11.11 | Percentage of traffic intersections with pedestrian crossing facilities
- 11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

- 6.4 | Unemployment Rate
- 11.3 | Mode share of public transport
- 11.5 | Mode share of Non Motorized Transport
- 12.3 | Quality of Water Supplied
- 15.4 | Level of Noise Pollution

4.5 Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**52.4**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	0
	1.1d solid waste management	0.5
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0

Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	14
Denominator	Total number of historic buildings/sites identified	14
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects for restoration	Data Unavailable
Denominator	Total number of ecologically important sites identified in the city	1
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**Non-Computable**
Description	Average Occupancy rate of Hotels	Data Unavailable
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	0
Denominator	Total budget of the ULB (capital and revenue)	29353.55
Unit	Percentage	

Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**110**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	110
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**29.13**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	102943
Denominator	Total population in the age group of 6-14 years	353372
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**32.88**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	54308
Denominator	Total female population in the age group of 6-14 years	165157
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**39.33**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	63523
Denominator	Total number of teachers available for primary grades (public and private schools)	1615
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital**	**3.19**

	education	
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	16
Denominator	Total number of schools	501
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**22.04** 22.0416907
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**62.18** 179249616
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**60.45**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	10182
Denominator	Total population of the city	1684297
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**21.14**
Formula:	*Numerator / Denominator*	

Numerator	Total number of qualified healthcare professionals	3560
Denominator	Total population of the city	1684297
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**30**
Description	Total response time for health-related distress calls received in the city	30
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.17**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	2884
Denominator	Total population of the city	1684297
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.16**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	2632
Denominator	Total population of the city	1684297
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**16.38**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	412

Denominator	Total length of road network in the city	2516
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**1580.9**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	26627
Denominator	Total population of the city	1684297
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**2.73**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	727
Denominator	Total crimes recorded in the same year	26627
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	#VALUE!
Denominator	Total population of the city	1684297
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	NC
Denominator	Total VAT/GST collection during preceding year	NC
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NA
Denominator	Total Professional Tax collection during preceding year	NA
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**128.21**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	100
Denominator	Number of construction permits during preceding year	0.78
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	50146
Denominator	Total labour force in the city	353372
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**

Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	12512
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**8.13**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	1390
Denominator	Total number of slum and EWS households in the city	171.02
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**Non-Compuatble** NA
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	**Per capita availability of green spaces**	**0.99**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	1660000
Denominator	Total population of the city	1684297
Unit	Square metres (sq.m.)	

Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	**Per capita availability of public and recreational places**	**2.64**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	4441344.4
Denominator	Total population of the city	1684297
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	NA
Denominator	Total area of the city (total area of all land uses)	109218000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**33985.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1684297
Denominator	Area allocated for residential land use (in hectares)	49.56
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**103.72**

Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	340504
Denominator	Total number of households in the city	328296
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	433805
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**4324**
Description	Total number of sustained electrical interruptions in a year	4324
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	37872
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.02**
Formula:	*Numerator / Denominator*	

Numerator	Total installed capacity for generation of renewable energy in the city	554
Denominator	Total energy consumption from all sources	225143.19
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.15**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	4868908
Denominator	Total quantum of water and waste water handled during the period	7590
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.31**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	12600000
Denominator	Total number of street light installations	19001
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0

Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	225143.19
Denominator	Total population of the city	1684297
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	1497131
Denominator	Total area of the city (sq.km)	109.218
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.43**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	720
Denominator	Total population of the city	1684297
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	21
Unit	Percentage	
Benchmark		

Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	2516
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	Data Unavailable
Denominator	Total number of major transport interchanges in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0.31
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**Non-Computable**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	Data Unavailable
Denominator	Total number of major interchanges in the city	Data

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

		Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	Data Unavailable
Denominator	Total number of signalised intersections in the city	Data Unavailable
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	53
Denominator	Total available on-street parking spaces in the city	53
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**0.52**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	26
Denominator	Total length of road network in the city	5032
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	Total number of intersections with pedestrian crossing facilities on major roads	31
Denominator	Total number of junctions/ intersections on major roads in the city	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**34.94**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	87
Denominator	Total number of public right-of-way areas in the city	249
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**54.74**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	179695
Denominator	Total number of households in the city	328296
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**78.37**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	132
Denominator	Total population of the city	1684297
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	

Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	Data Unavailable
Denominator	Total number of samples tested for water quality	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	132
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	NA
Denominator	Total number of water connections in the city	179695
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**121.78**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	766
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	629
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**41.59**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	207943
Denominator	Total number of properties in the city	500000
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	Data Unavailable
Denominator	Total number of properties in the city	500000
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	0
Denominator	Total waste water generated in the city per day	224.6
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**13.47**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	24.2
Denominator	Total waste water received at treatment plants per day	179.68
Unit	Percentage	

Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**47.69**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	1200
Denominator	Total length of road network in the city	2516
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**28.62**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	94016
Denominator	Total number of households and establishments in the city	328512
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**90.52**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	754
Denominator	Total quantum of MSW generated in the city	833
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	NA
Denominator	Average MSW generated in the city (tons per month)	22620
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**12.08**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	12.08
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**37.01**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	37.01
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**Non=Computable**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	NA
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	Data Unavailable
Denominator	Total number of noise samples	36456
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**28.85**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	15
Denominator	Total number of samples tested	52
Unit	Percentage	
Benchmark	100%

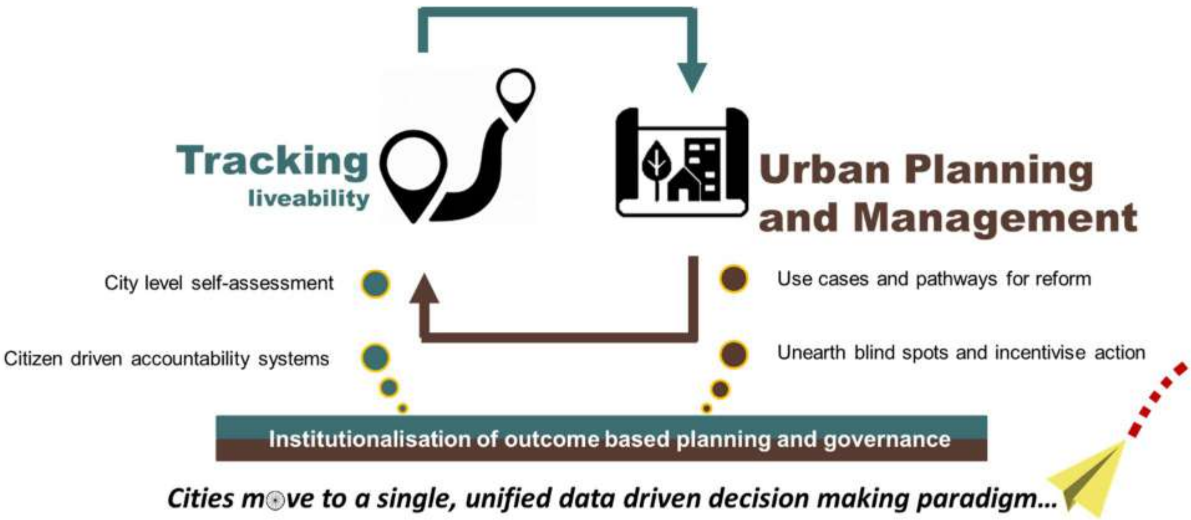
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

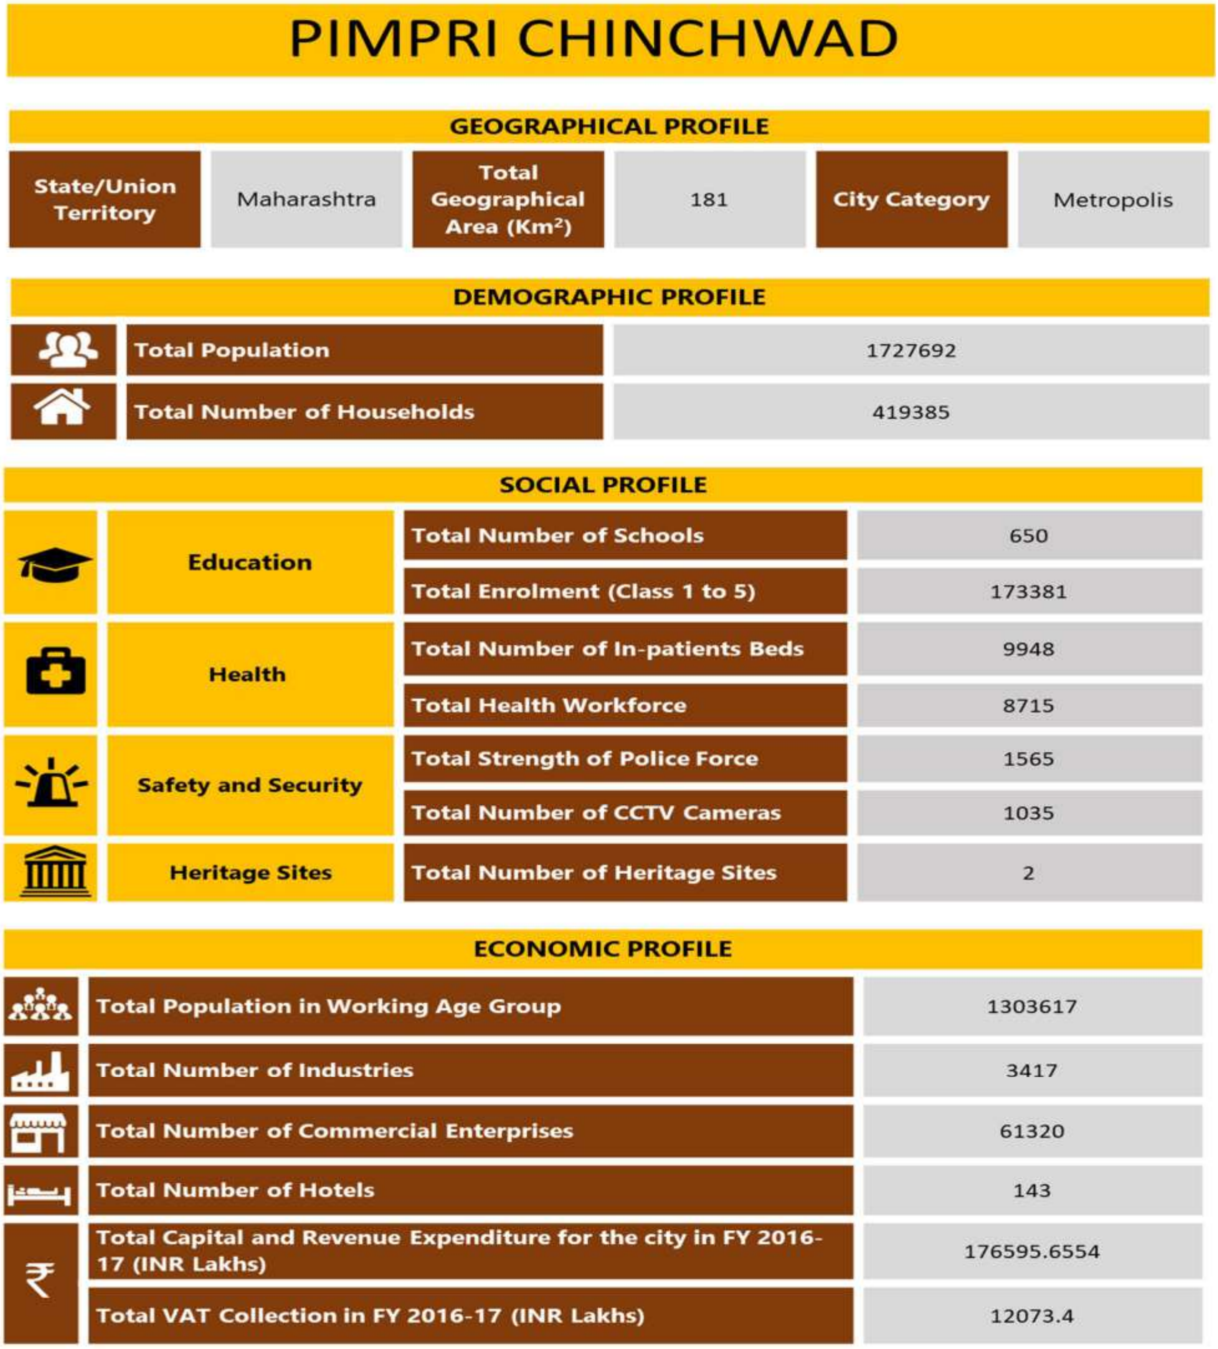


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



PIMPRI CHINCHWAD

GEOGRAPHICAL PROFILE

State/Union Territory	Maharashtra	Total Geographical Area (Km²)	181	City Category	Metropolis

DEMOGRAPHIC PROFILE

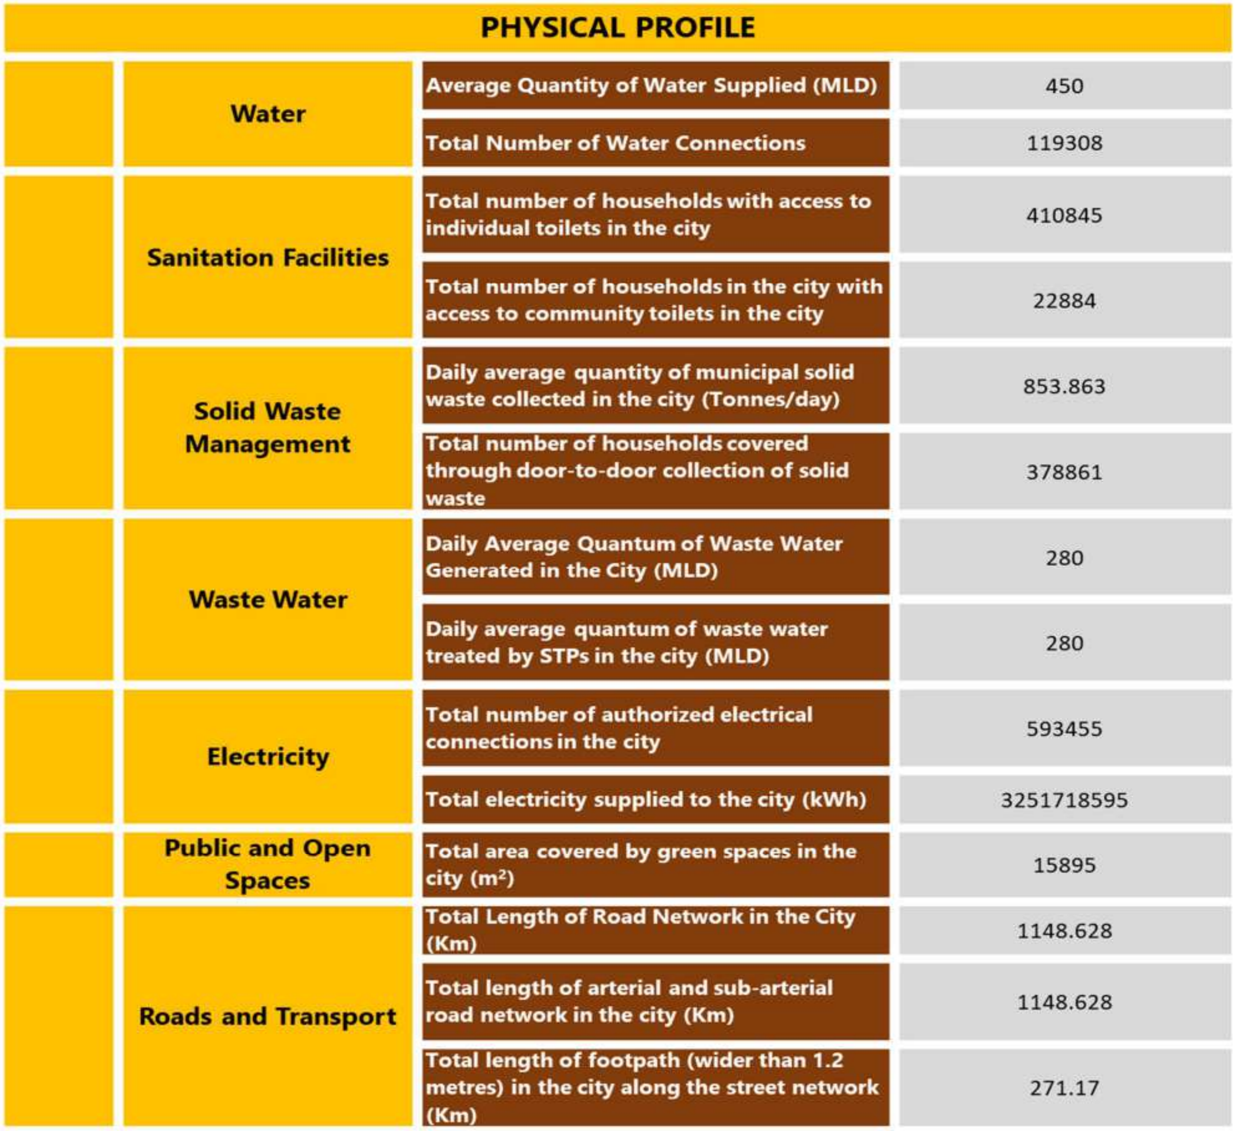
Total Population	1727692
Total Number of Households	419385

SOCIAL PROFILE

Education	Total Number of Schools	650
	Total Enrolment (Class 1 to 5)	173381
Health	Total Number of In-patients Beds	9948
	Total Health Workforce	8715
Safety and Security	Total Strength of Police Force	1565
	Total Number of CCTV Cameras	1035
Heritage Sites	Total Number of Heritage Sites	2

ECONOMIC PROFILE

Total Population in Working Age Group	1303617
Total Number of Industries	3417
Total Number of Commercial Enterprises	61320
Total Number of Hotels	143
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	176595.6554
Total VAT Collection in FY 2016-17 (INR Lakhs)	12073.4



PHYSICAL PROFILE			
	Water	Average Quantity of Water Supplied (MLD)	450
		Total Number of Water Connections	119308
	Sanitation Facilities	Total number of households with access to individual toilets in the city	410845
		Total number of households in the city with access to community toilets in the city	22884
	Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	853.863
		Total number of households covered through door-to-door collection of solid waste	378861
	Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	280
		Daily average quantum of waste water treated by STPs in the city (MLD)	280
	Electricity	Total number of authorized electrical connections in the city	593455
		Total electricity supplied to the city (kWh)	3251718595
	Public and Open Spaces	Total area covered by green spaces in the city (m^2)	15895
	Roads and Transport	Total Length of Road Network in the City (Km)	1148.628
		Total length of arterial and sub-arterial road network in the city (Km)	1148.628
		Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	271.17

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1 Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies

Pillars of Comprehensive Development	Category	Indicators
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita

Pillars of Comprehensive Development	Category	Indicators
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced	15.1 Concentration of SO2- air pollution

Pillars of Comprehensive Development	Category	Indicators
	Pollution	15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2 Scoring and Computing Category Indices of Liveability

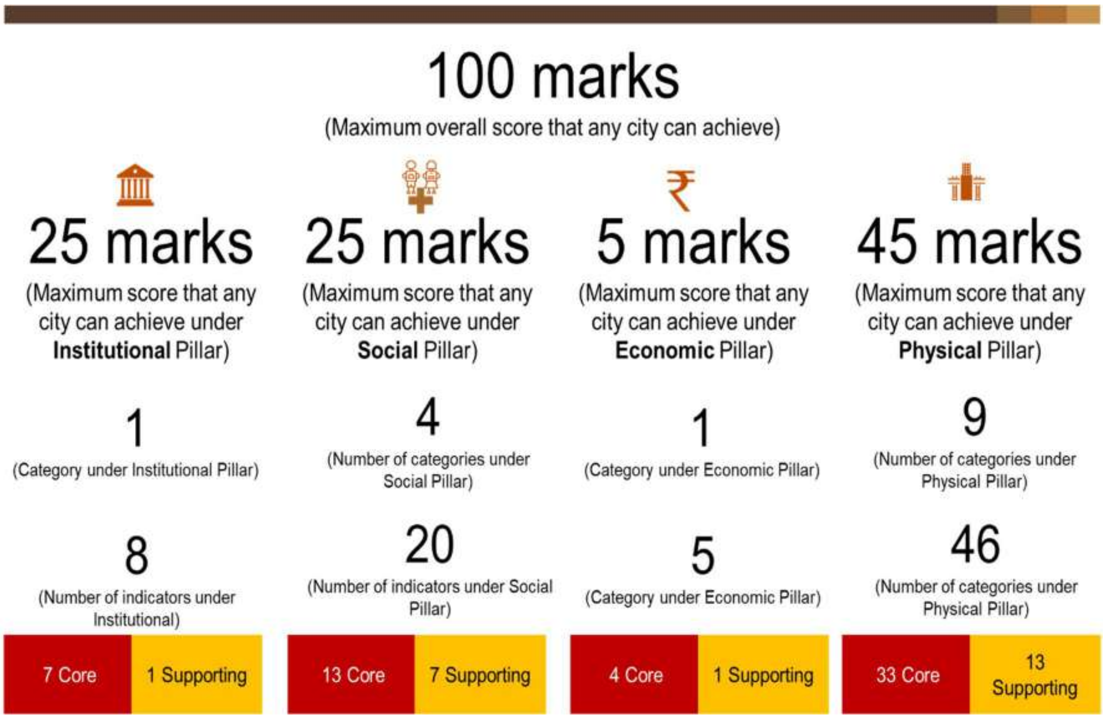
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3 Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks
(Maximum overall score that any city can achieve)
25 marks
(Maximum score that any city can achieve under **Institutional** Pillar)
25 marks
(Maximum score that any city can achieve under **Social** Pillar)
5 marks
(Maximum score that any city can achieve under **Economic** Pillar)
45 marks
(Maximum score that any city can achieve under **Physical** Pillar)
1
(Category under Institutional Pillar)
4
(Number of categories under Social Pillar)
1
(Category under Economic Pillar)
9
(Number of categories under Physical Pillar)
8
(Number of indicators under Institutional)
20
(Number of indicators under Social Pillar)
5
(Category under Economic Pillar)
46
(Number of categories under Physical Pillar)
7 Core
1 Supporting
13 Core
7 Supporting
4 Core
1 Supporting
33 Core
13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to “maximum within the comparison group” or “absolute benchmarks”. For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4 Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicator\ value\ for\ the\ city - indicator\ value\ for\ the\ worst\ performing\ city}{benchmark - \ indicator\ value\ for\ the\ worst\ performing\ city}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1 Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2 Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and

development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Accounts Department, PCMC Sales tax deparment
Urban Local Body	For Park and Recreation Related Questions	Garden Department, PCMC Civil Department, PCMC
Urban Local Body	For Water Supply and Drainage related questions	Water Supply Department, PCMC
Urban Local Body	For Heritage sites related data	Town Planning Department, PCMC
Urban Local Body	For Ecological sites related data	Town Planning Department, PCMC
Urban Local Body	For Housing related data	Housing Department, PCMC
Urban Local Body	For Building plan related data	Building & Planning Department, PCMC
Urban Local Body	For Roads related data	Roads Department, PCMC
Urban Local Body	For Solid waste management related data	Waste management Department, PCMC Drainage Department, PCMC
Urban Local Body	For IT services related data	IT Department, PCMC
Urban Local Body	For Vendor committee related data	PCMC
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	Environment Department, PCMC
Development Authority	Building Infrastructure	Building & Planning Department, PCMC
	Construction planning	Town Planning, PCMC
	Green Building	Building & Planning Department, PCMC
	Rain water harvesting	Building & Planning Department, PCMC
	Universal Design Principle	Building & Planning Department, PCMC

Designated data owners	Subcategories	Data owners at city level
DISCOM /Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	Electricity Department, PCMC Maharashtra Electricity Board,
State Disaster management authority		Disaster Department, PCMC
State Education Department		State Education Department Education Department, PCMC
State Health Department	Health care professionals	Health Department, PCMC
	Citizen Services	Health Department, PCMC
	Disease Prevalence	Health Department, PCMC
	Health Infrastructure	Health Department, PCMC
State Renewable Energy Development Agency		Maharashtra Renewable Energy Development Agency
State Sales / Commercial Taxes Department		Sales and commercial Taxes department
Town and Country Planning Department	Land Use	Town Planning department, PCMC
Traffic and Police Department		Office of Sub-Commissioner of Police
Transport Authorities	Buses	Road and Transport Office
	Registered Vehicles	Road Transport system, PCMC
	Sub urban rail transport	NA
	Mono Rail Authority	NA
	Tramways	NA
	Marine Transport Authority	NA

4.3 List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 90 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	4
DISCOM/Electricity Department	1
Traffic and Police Department	2
Development Authority	1
Pollution Control Board	0
State Renewable Energy Department	6
Town and Country Planning	0
State Health Department	2
Transport Authority	8
Disaster Management	0
Urban Local Body	66
Total	90*

* The count of documents is based on first round of submission.

4.4 Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:

1.2 | Percentage of services integrated through Command Centre
2.3 | Hotel occupancy
3.4 | Percentage of schools with access to digital education
5.1 | Number of streets, public places, junctions covered through surveillance systems
6.5 | Percentage of vendors registered and provided formal spaces
11.7 | Availability of Passenger Information System
11.11 | Percentage of traffic intersections with pedestrian crossing facilities
11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.

6.4 | Unemployment Rate
11.3 | Mode share of public transport
11.5 | Mode share of Non Motorized Transport
12.3 | Quality of Water Supplied
15.4 | Level of Noise Pollution

4.5 Physical Audit

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water
Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**81.89**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	1
	1.1b death certificate	1
	1.1c trade license	0.75
	1.1d solid waste management	0.75
	1.1e water supply	1
	1.1f sewerage/drainage	0
	1.1g fogging	1
	1.1h property tax	0.333333333
	1.1i professional tax	1
	1.1j information	0.923076923
	1.1k Grievance redressal	1
	1.1l electricity	1
	1.1m Building plan	0.888888889
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**14.29**
Description	Services integrated through an integrated or a singular operations command centre	3
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**3.83**

Indicator No. 1.4	**Average delay in grievance redressal**	**0.43**
Description		
Sub Indicators	1.4a water supply	0
	1.4b solid waste	3
	1.4c street lights	0
	1.4d sewerage	0
	1.4e professional tax	0
	1.4f parks and recreational spaces	0
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**37.39**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	39068.20287
Denominator	Total demand raised for the year	104481.774
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water**	**28.4**

	supply services	
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	3110.62
Denominator	Total O&M cost for providing water supply services during the year	10952.1
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**41.31**
Formula:	*Numerator / Denominator*	
Numerator	Total capital expenditure during a year	196456.529
Denominator	Total expenditure (revenue and capital accounts) in the same year	475515.529
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	Data Unavailable
Denominator	Total number of wards	32
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	Data Unavailable
Denominator	Total number of historic buildings/sites identified	Data Unavailable
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**19.23**
Formula:	*Numerator / Denominator*	
Numerator	Ecologically important sites covered through projects	5

	for restoration	
Denominator	Total number of ecologically important sites identified in the city	26
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**54.88**
Description	Average Occupancy rate of Hotels	54.875
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.67**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	1177.17796
Denominator	Total budget of the ULB (capital and revenue)	176595.6554
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**135**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	135
Unit

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**96.24**
Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	263794
Denominator	Total population in the age group of 6-14 years	274101
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**95.75**
Formula:	*Numerator / Denominator*	

Numerator	Total female enrolment in primary and secondary schools (public and private	121515
Denominator	Total female population in the age group of 6-14 years	126903
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**226.64**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	173381
Denominator	Total number of teachers available for primary grades (public and private schools)	765
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**50.46**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	328
Denominator	Total number of schools	650
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**146.62**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	146.6242728
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**153.19**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	857378985
Numerator	Percentage	
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**57.58**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	9948
Denominator	Total population of the city	1727692
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**50.44**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	8715
Denominator	Total population of the city	1727692
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**Non-Computable**
Description	Total response time for health-related distress calls received in the city	Data Unavailable
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**3.02**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	52126
Denominator	Total population of the city	1727692
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.03**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	517
Denominator	Total population of the city	1727692
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**90.11**
Formula:	*Numerator / Denominator*	
Numerator	Total number of CCTV cameras installed	1035
Denominator	Total length of road network in the city	1148.628
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**293.22**
Formula:	Numerator / Denominator	
Numerator	Total number of crimes recorded in a year	5066
Denominator	Total population of the city	1727692
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**12.57**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	637
Denominator	Total crimes recorded in the same year	5066
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**19.91**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	344
Denominator	Total population of the city	1727692
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**9.61**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	1058.19
Denominator	Total VAT/GST collection during preceding year	110.1521
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	0
Denominator	Total Professional Tax collection during preceding year	0
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**68.41**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	628
Denominator	Number of construction permits during preceding year	9.18
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	49441
Denominator	Total labour force in the city	274101
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	

Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**36.44**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	3946
Denominator	Total number of vendors in the city	10830
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**1.64**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	2213
Denominator	Total number of slum and EWS households in the city	1350.82
Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**0.04**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	17316923927
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	15895
Denominator	Total population of the city	1727692
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**3.44**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	5934799.55

Denominator	Total population of the city	1727692
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	0
Denominator	Total area of the city (total area of all land uses)	181000000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	1727692
Denominator	Area allocated for residential land use (in hectares)	107000000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**50.86**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at household level	213311
Denominator	Total number of households in the city	419385
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**57.97**
Formula:	*Numerator / Denominator*	

Numerator	Number of electrical connections (residential and commercial) with smart meters	344026
Denominator	Total number of electricity connections in the city	593455
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**798**
Description	Total number of sustained electrical interruptions in a year	798
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.8**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	87734
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	Data Unavailable
Denominator	Total energy consumption from all sources	3251718595
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.34**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	582143.6042
Denominator	Total quantum of water and waste water handled during the period	21900
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.32**
Formula:	*Numerator / Denominator*	

Numerator	Energy consumption on street lighting	37951976
Denominator	Total number of street light installations	74889
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**0.02**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	78284.68
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	1863268.61
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.3**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	3251718595
Denominator	Total population of the city	1727692
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.64**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	17660.57
Denominator	Total area of the city (sq.km)	181
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**0.58**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	1000
Denominator	Total population of the city	1727692
Unit	Number per 1000 persons	
Benchmark	>=0.6	

Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	8.92
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**3.74**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	43
Denominator	Total length of road network in the city	1148.628
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facilities**	**65.22**
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	15
Denominator	Total number of major transport interchanges in the city	23
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**[1]	**To be computed**
Description	Mode share of non-motorised transport	0.5
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**2.61**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	60
Denominator	Total number of major interchanges in the city	23
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are	0

---

[1] The data for this indicator will be computed based on the primary data which is currently being collected

	synchronised	
Denominator	Total number of signalised intersections in the city	75
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total available on-street paid parking spaces in the city	1
Denominator	Total available on-street parking spaces in the city	1
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**11.8**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	271.17
Denominator	Total length of road network in the city	2297.256
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**153.51**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	350
Denominator	Total number of junctions/ intersections on major roads in the city	228
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**99.06**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	843
Denominator	Total number of public right-of-way areas in the city	851
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	419385
Denominator	Total number of households in the city	419385
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**260.46**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	450
Denominator	Total population of the city	1727692
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**[2]	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	71288
Denominator	Total number of samples tested for water quality	71288
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**38.57**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	173.56
Denominator	Quantum of water put into the distribution system (mld)	450
Unit	Percentage	
Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	119308
Denominator	Total number of water connections in the city	119308
Unit	Percentage	

---

[2] The data for this indicator will be computed based on the primary data which is currently being collected

Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**68.7**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	1069
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	1556
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**110.66**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	498791
Denominator	Total number of properties in the city	450761
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**84.34**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	380167
Denominator	Total number of properties in the city	450761
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**85.71**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	240
Denominator	Total waste water generated in the city per day	280
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**116.67**
Formula:	*Numerator / Denominator*	

Numerator	Quantum of waste water recycled or reused per day	280
Denominator	Total waste water received at treatment plants per day	240
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**20.49**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	235.37
Denominator	Total length of road network in the city	1148.628
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**91.57**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	440181
Denominator	Total number of households and establishments in the city	480705
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**106.16**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	853.863
Denominator	Total quantum of MSW generated in the city	804.327
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**24.38**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	6244.83
Denominator	Average MSW generated in the city (tons per month)	25615.89
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**16.96**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	16.96
Unit	µg/m3	
Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**29.74**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	29.74
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**51.47**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	51.47
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	33
Denominator	Total number of noise samples	33
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	600
Denominator	Total number of samples tested	600
Unit	Percentage	
Benchmark	100%

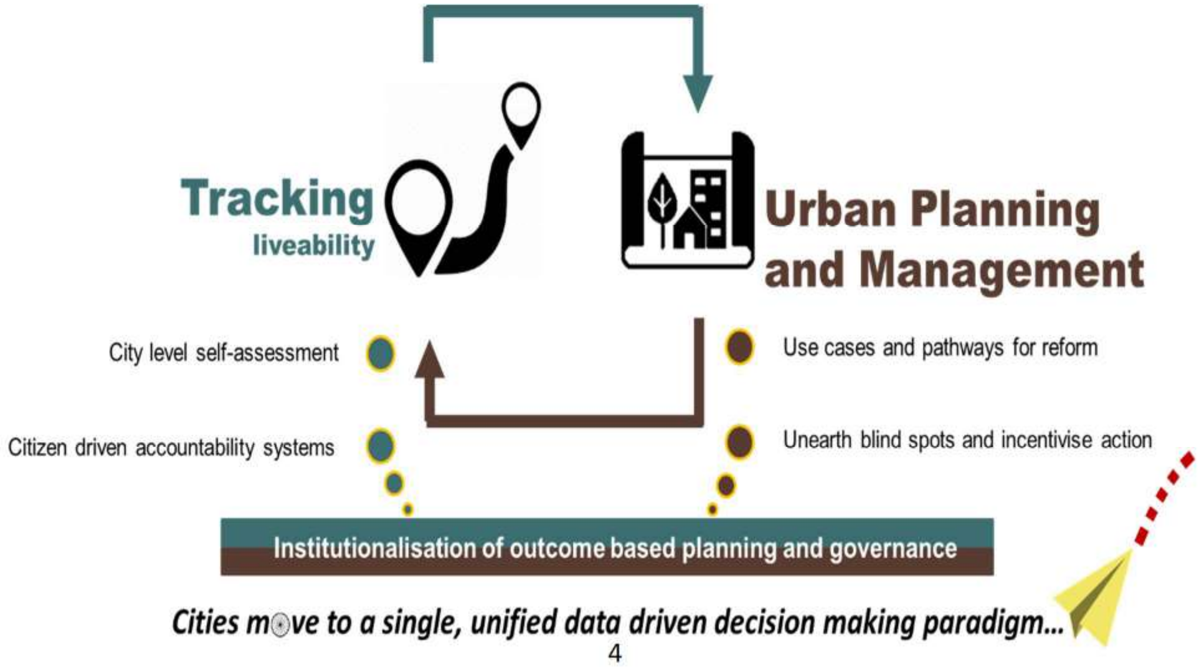
1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more 'liveable.' The overarching goal of these initiatives is to move from an input-based approach to a 'citizen centric-outcome based' assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of 'Liveability Standards' relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an 'Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city's liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities

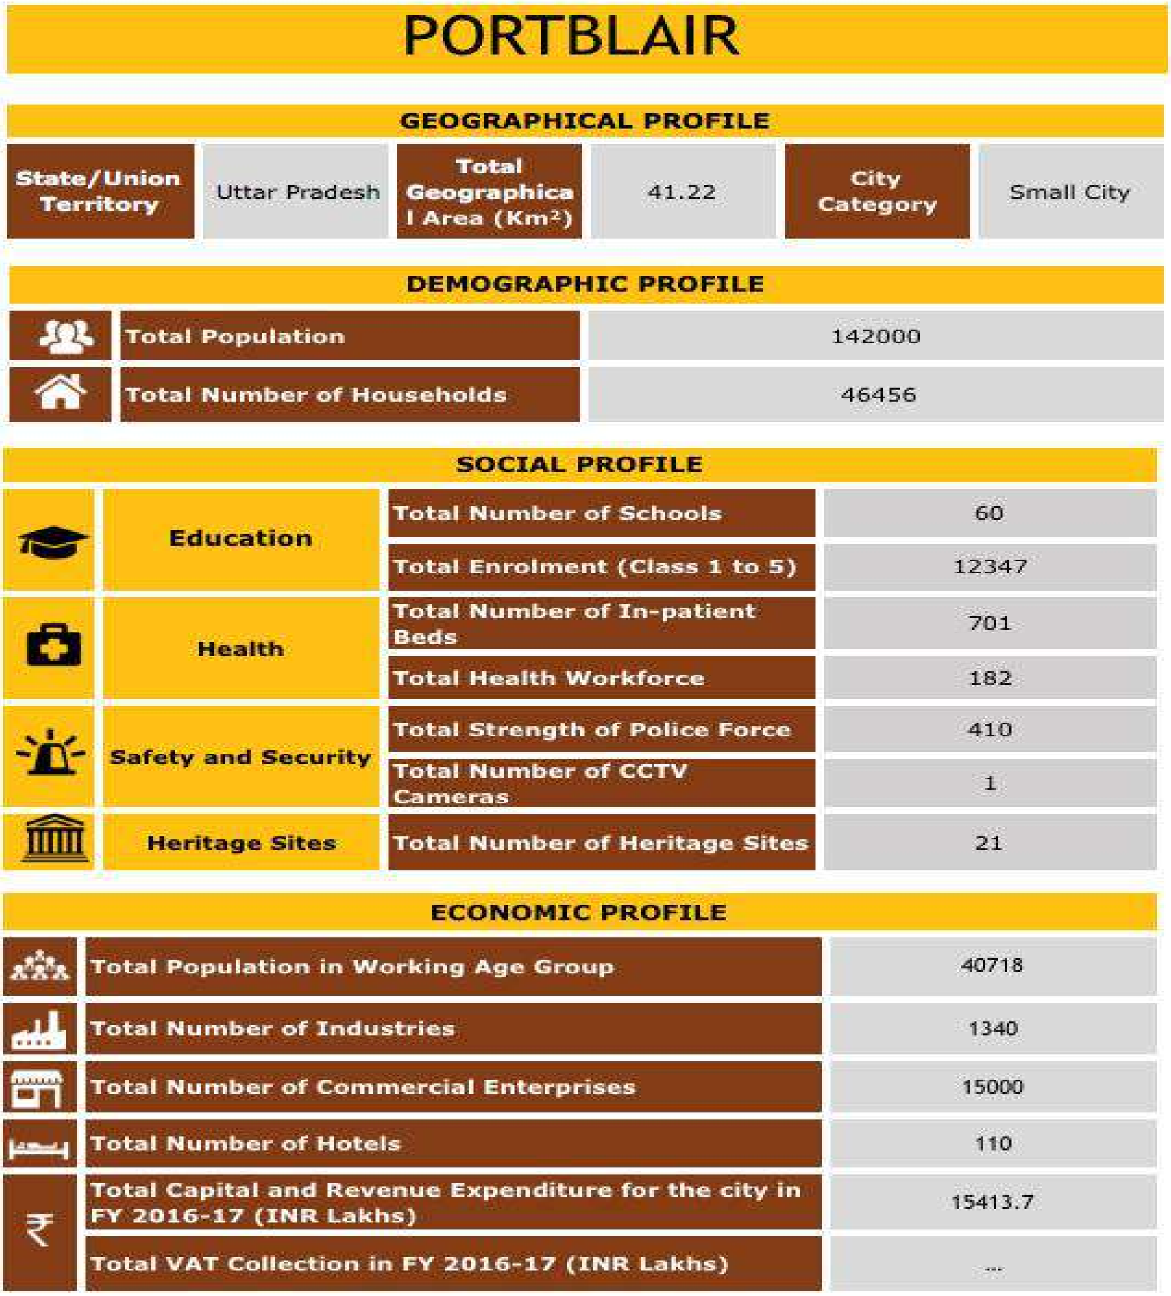


Tracking
liveability
Urban Planning
and Management
City level self-assessment
Citizen driven accountability systems
Use cases and pathways for reform
Unearth blind spots and incentivise action
Institutionalisation of outcome based planning and governance
Cities move to a single, unified data driven decision making paradigm...

The first round of the assessment commenced in January 2018 covering 116 major cities including smart cities, capital cities and cities with population of above one million each. Implementation of the liveability assessment commenced in January 2018 with a national level orientation workshop for the urban local bodies. The workshop aimed at orienting the states and urban local bodies on the overall framework, indicators, data sources, methodology and key milestones and timelines involved in the liveability assessment. Subsequently, a series of State/ Union Territory level orientation workshops were carried out in 33 states/UTs for a detailed discussion on the framework. Online data collection commenced from 9th March through an online data collection platform that supported both online and offline data submission modes. On the date of closure of the online data entry portal i.e., 16th April, 2018 112 cities submitted their data. Subsequently, comprehensive checks on the submitted data was undertaken that involved checking for outliers, logical inconsistencies etc. post which round-1 of data reconciliation was conducted. This draft report is based on round-1 of reconciled data as on 28th April, 2018.

2. City Profile

This chapter presents the city profile -Geographic and Demographic, Social (Education Health, Safety and Security, Heritage), Economic profile, and Physical (Water, sanitation and Waste Management, Electricity, Open space and roads).



PORTBLAIR

GEOGRAPHICAL PROFILE

State/Union Territory	Uttar Pradesh	**Total Geographical Area (Km^2)**	41.22	**City Category**	Small City

DEMOGRAPHIC PROFILE

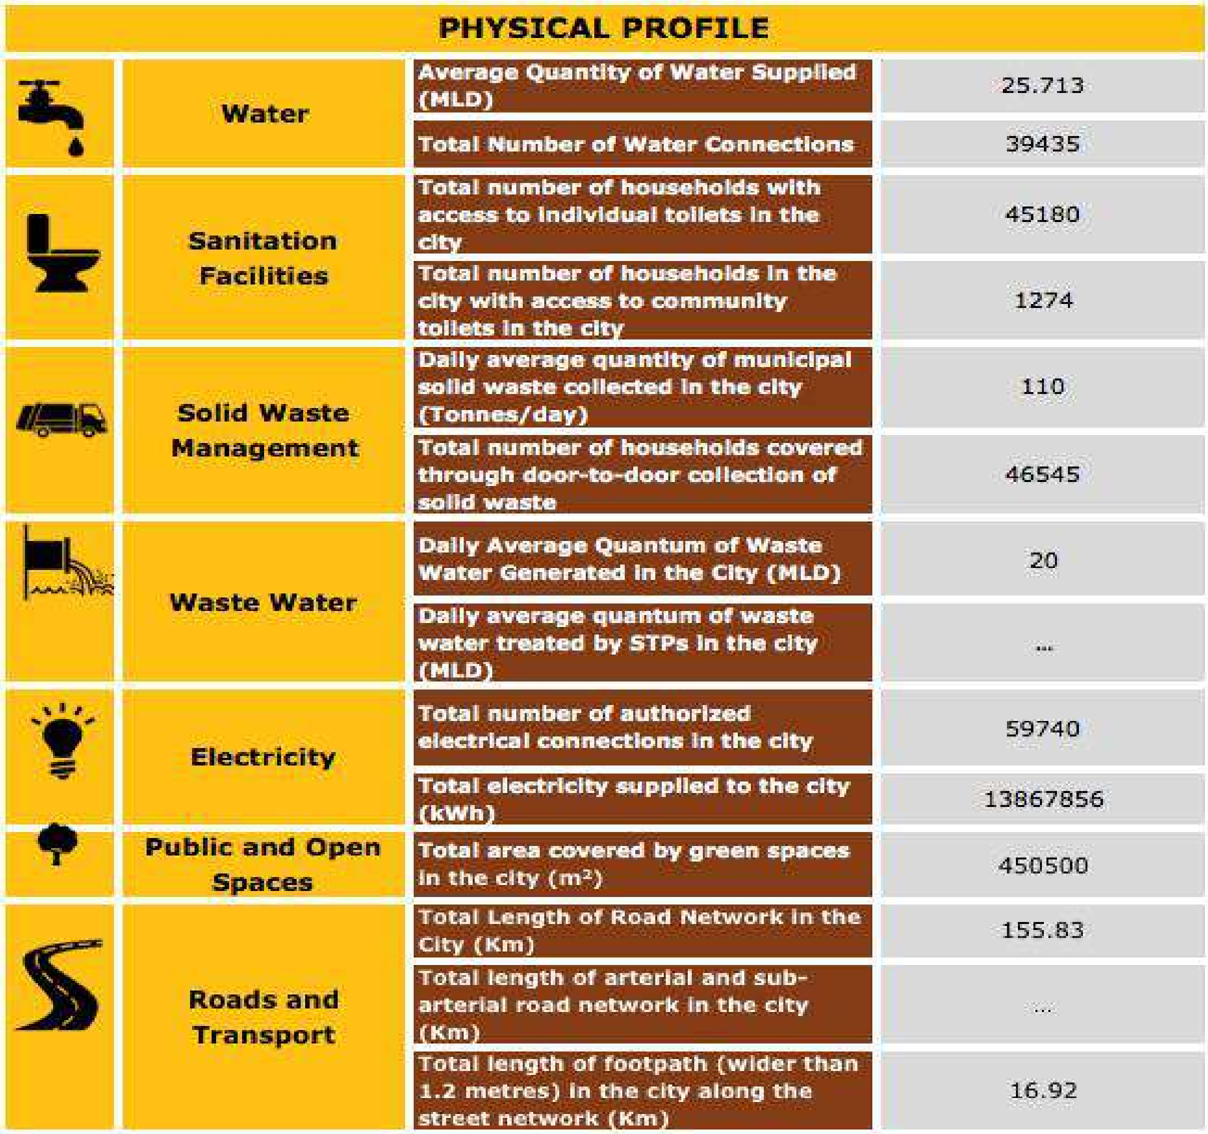
Total Population	142000
Total Number of Households	46456

SOCIAL PROFILE

Education	**Total Number of Schools**	60
	Total Enrolment (Class 1 to 5)	12347
Health	**Total Number of In-patient Beds**	701
	Total Health Workforce	182
Safety and Security	**Total Strength of Police Force**	410
	Total Number of CCTV Cameras	1
Heritage Sites	**Total Number of Heritage Sites**	21

ECONOMIC PROFILE

Total Population in Working Age Group	40718
Total Number of Industries	1340
Total Number of Commercial Enterprises	15000
Total Number of Hotels	110
Total Capital and Revenue Expenditure for the city in FY 2016-17 (INR Lakhs)	15413.7
Total VAT Collection in FY 2016-17 (INR Lakhs)	---



PHYSICAL PROFILE

Water	Average Quantity of Water Supplied (MLD)	25.713
	Total Number of Water Connections	39435
Sanitation Facilities	Total number of households with access to individual toilets in the city	45180
	Total number of households in the city with access to community toilets in the city	1274
Solid Waste Management	Daily average quantity of municipal solid waste collected in the city (Tonnes/day)	110
	Total number of households covered through door-to-door collection of solid waste	46545
Waste Water	Daily Average Quantum of Waste Water Generated in the City (MLD)	20
	Daily average quantum of waste water treated by STPs in the city (MLD)	...
Electricity	Total number of authorized electrical connections in the city	59740
	Total electricity supplied to the city (kWh)	13867856
Public and Open Spaces	Total area covered by green spaces in the city (m²)	450500
Roads and Transport	Total Length of Road Network in the City (Km)	155.83
	Total length of arterial and sub-arterial road network in the city (Km)	...
	Total length of footpath (wider than 1.2 metres) in the city along the street network (Km)	16.92

3. Liveability Framework and Indicators

The Liveability Framework comprises a total of 79 indicators (57 Core Indicators and 22 Supporting Indicators). A core indicator carries 70% weightage and a supporting indicator carries 30% weightage. These indicators are grouped under 15 thematic categories which in turn are part of four pillars of comprehensive development of cities i.e., institutional, social, economic and physical. Based on the performance of cities against the various core and supporting indicators, various 'Category Sub-Indexes' and a composite 'City Liveability Index' will be developed for each city.

3.1. Scoring and Computing Category Indices of Liveability

The set of 79 indicators, associated categories and pillars are presented in the table below:

Table 1 List of Pillars, Categories and Indicators

Pillars of Comprehensive Development	Category	Indicators
Institutional	1. Governance	1.1 Percentage of citizen services available online
		1.2 Percentage of services integrated through Command Centre
		1.3 Percentage of citizens using online services
		1.4 Average delay in grievance redressal
		1.5 Tax collected as percentage of tax billed
		1.6 Extent of cost recovery (O&M) in water supply services
		1.7 Capital spending as percentage of total expenditure
		1.8 Percentage of population covered under Ward Committees/Area *Sabhas*
Social	**2. Identity and Culture**	2.1 Restoration and reuse of historic buildings
		2.2 Percentage of ecologically important areas covered through projects for restoration
		2.3 Hotel occupancy
		2.4 Percentage of budget allocated towards cultural/sports activities

Pillars of Comprehensive Development	Category	Indicators
		2.5 Number of cultural/sports events hosted by city
	3. Education	3.1 Percentage of school-aged population enrolled in schools
		3.2 Percentage of female school-aged population enrolled in schools
		3.3 Primary education student-teacher ratio
		3.4 Percentage of schools with access to digital education
		3.5 Percentage of students completing primary education
		3.6 Percentage of students completing secondary education
	4. Health	4.1 Number of in-patient hospital beds per 10,000 population
		4.2 Healthcare professionals per 10,000 population
		4.3 Average response time in case of health emergencies
		4.4 Period prevalence of water borne diseases
		4.5 Period prevalence of vector borne diseases
	5. Safety and Security	5.1 Number of CCTV Cameras
		5.2 Number of recorded crimes per lakh population
		5.3 Extent of crimes recorded against women, children and elderly per year
		5.4 Transport-related fatality per lakh population
Economic	**6. Economy and Employment**	6.1 Increase in VAT/GST collection
		6.2 Increase in collection of Professional Tax
		6.3 Increase in issuance of Construction permits
		6.4 Unemployment rate
		6.5 Percentage of vendors registered and provided formal

Pillars of Comprehensive Development	Category	Indicators
		spaces
Physical	**7. Housing and Inclusiveness**	7.1 Percentage of Slum/EWS households covered through formal/affordable housing
		7.2 Percentage of slum areas covered through basic services
	8. Public Open Spaces	8.1 Per capita availability of green spaces
		8.2 Per capita availability of public and recreational places
	9. Mixed Land Use and Compactness	9.1 Share of mixed land use area in overall city land use
		9.2 Net Density
	10. Power Supply	10.1 Percentage of city population with authorized electrical services
		10.2 Percentage of electrical connections covered through smart meters
		10.3 Average number of electrical interruptions per year
		10.4 Average length of electrical interruptions per year
		10.5 Percentage of total energy derived from renewable sources
		10.6 Energy consumption per unit - water supply and sewerage
		10.7 Energy consumption per unit - street lighting
		10.8 Percentage of new and redeveloped buildings following green building norms
		10.9 Total energy consumption per capita
	11. Transportation and Mobility	11.1 Geographical coverage of public transport
		11.2 Availability of public transport
		11.3 Mode share of public transport

Pillars of Comprehensive Development	Category	Indicators
		11.4 Percentage of road network with dedicated bicycle tracks
		11.5 Percentage of interchanges with bicycle parking facilities
		11.6 Mode share of non-motorized transport
		11.7 Availability of Passenger Information System
		11.8 Extent of signal synchronization
		11.9 Availability of paid parking spaces
		11.10 Percentage coverage of footpaths – wider than 1.2 m
		11.11 Percentage of traffic intersections with pedestrian crossing facilities
		11.12 Extent to which universal accessibility is incorporated in public rights-of-way
	12. Assured Water Supply	12.1 Household level coverage of direct water supply connections
		12.2 Per capita supply of water
		12.3 Quality of water supplied
		12.4 Level of non-revenue water – NRW
		12.5 Percentage of water connections covered through meters
		12.6 Percentage of plots with rainwater harvesting facility
	13. Waste Water Management	13.1 Coverage of toilets
		13.2 Coverage of sewerage network and/or septage
		13.3 Collection efficiency of sewerage network
		13.4 Extent of reuse and recycling of waste water
		13.5 Coverage of storm water drains

Pillars of Comprehensive Development	Category	Indicators
	14. Solid Waste Management	14.1 Household level coverage of municipal solid waste collection
		14.2 Efficiency of collection of municipal solid waste
		14.3 Extent of municipal solid waste recovered through reuse
	15. Reduced Pollution	15.1 Concentration of SO2- air pollution
		15.2 Concentration of NO2- air pollution
		15.3 Concentration of PM10 - air pollution
		15.4 Level of noise pollution
		15.5 Quality of water in public surface water bodies

3.2. Scoring and Computing Category Indices of Liveability

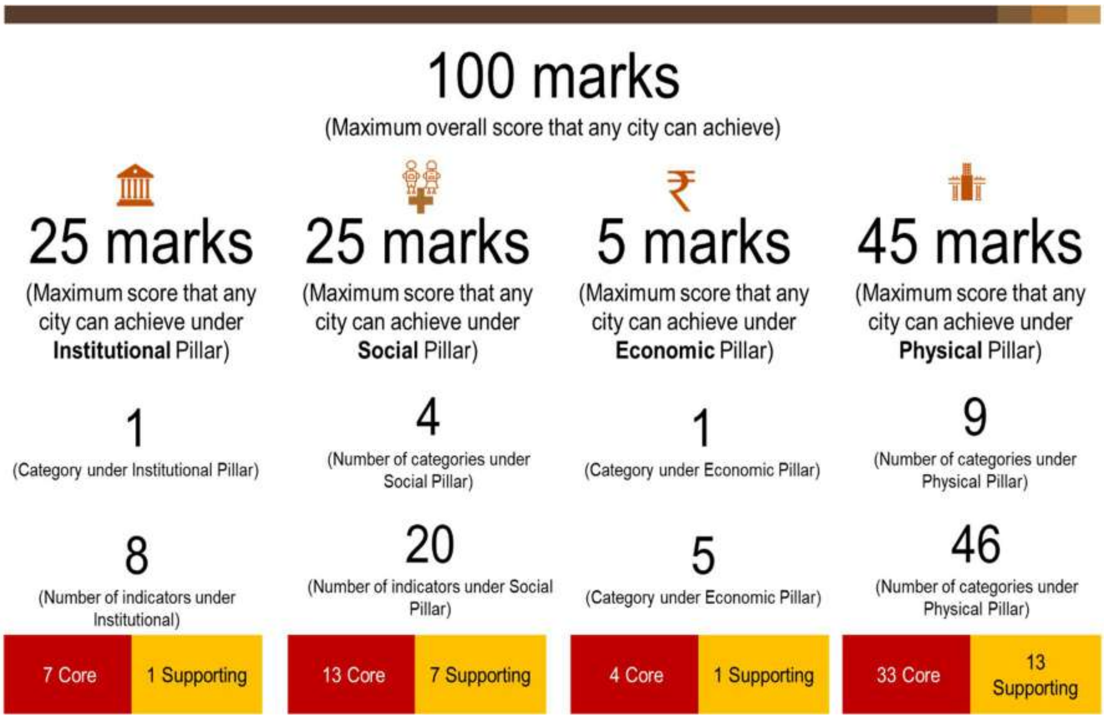
The performance achieved by cities against 79 indicators, will be assessed against given benchmarks. Where no international/national norms are available, city with the best performance in its group (population range) will be treated as a benchmark. The groups are given in the table below.

Table 2 Details on Population Range

Category	Population range
Category 1	Population ≥ 4 million
Category 2	1 million ≤ Population < 4 million
Category 3	0.5 million ≤ Population < 1 million
Category 4	Population < 0.5 million

3.3. Scoring Approach and Methodology

A city can earn a maximum score of 100 points for 79 indicators across four pillars. The pillar weights are as follows: Institutional (25 points), Social (25 points), Economy and Employment (5 points) and Physical (45 points). Based on the number and nature of indicators i.e., core vs. secondary, indicator wise maximum marks were computed.



100 marks

(Maximum overall score that any city can achieve)

25 marks
(Maximum score that any city can achieve under **Institutional** Pillar)
1
(Category under Institutional Pillar)
8
(Number of indicators under Institutional)
7 Core | 1 Supporting

25 marks
(Maximum score that any city can achieve under **Social** Pillar)
4
(Number of categories under Social Pillar)
20
(Number of indicators under Social Pillar)
13 Core | 7 Supporting

5 marks
(Maximum score that any city can achieve under **Economic** Pillar)
1
(Category under Economic Pillar)
5
(Category under Economic Pillar)
4 Core | 1 Supporting

45 marks
(Maximum score that any city can achieve under **Physical** Pillar)
9
(Number of categories under Physical Pillar)
46
(Number of categories under Physical Pillar)
33 Core | 13 Supporting

Dimensional Index Methodology (DIM) has been used to compute scores for each indicator with reference to "maximum within the comparison group" or "absolute benchmarks". For indicators where benchmarks are available, cities getting the benchmark score (or above) are given the maximum mark, and the marks awarded to other cities are calculated proportionately. For indicators where benchmarks are not available, the best performing cities in each population group are given the maximum mark, and the marks awarded to other cities (within the population group) are calculated proportionately. For indicators where benchmarks do not exist, the city data has been tested for outliers before scoring.

3.4. Scoring Normalisation:

To construct aggregate scores across cities as well as to make the scores across indicators comparable, indicator values were normalised using a min-max approach. The following formula was used to normalise the indicator values-

$$\frac{indicatorvalueforthecity - indicatorvaluefortheworstperformingcity}{benchmark - indicatorvaluefortheworstperformingcity}$$

This approach would restrict the normalised indicator value between 0 and 1. Cities that met or exceeded the benchmark received a normalised indicator value of 1. Worst performing cities are given a normalised indicator value of 0. After normalisation, the normalised value is weighted according to the category and the indicator being core or supporting.

To illustrate, consider the indicator 12.3 Quality of Water Supplied in the Category 12 for Assured Water Supply. If in City A 50% of the water samples collected qualify the potable water standards specified by the CPHEEO, and only 10% of the samples from worst performing city qualify the standards. Then, the normalised value for the indicator for city A would be 0.44 [(0.5-0.1)/(1-0.1)].

The weight for indicator 12.3 is 1.03, so the final weighted score for City A would come out to 0.45 [1.03*0.44].

4. Data Collection and Verification

4.1. Submission of Data by the cities

The Liveability Assessment is based on secondary data submitted by the urban local bodies and other concerned government agencies (collectively called as data owners). The 79 indicators were broken down into a set of easy to understand and relatable 553 questions mapped to data owners. Submission of the data was enabled through an online data entry portal on the smartnet platform of the Ministry. The portal also allowed the ULBs to download the liveability assessment questionnaire and upload filled in questionnaire. To familiarise and assist cities in identifying, mapping and collation of data points, a city level nodal person was available during the entire period of data submission process.

4.2. Mapping of Data Owners for the City

For the assessment of liveability indices broadly 12 data owners such as Central/state Pollution control board, Development authority, DISCOM/Electricity Board, State Disaster Management Authority, State Education Department, State Health department, State Renewable energy and development agency, State sales and commercial taxes department, town and country planning department, Traffic and police department, Transport authority, and Urban local body were identified to respond to the questions on the portal. However, during state workshop and subsequent city level discussions, more data owners were mapped to respond to different categories and sub categories. The following table provides the details of city level data owners mapped under the 12 data owner.

Table 3:Details of Data Owners

Designated data owners	Subcategories	Data owners at city level
Urban Local Body	For Accounts Related Questions	Port Blair Municipal Council
Urban Local Body	For Park and Recreation Related Questions	Port Blair Municipal Council
Urban Local Body	For Water Supply and Drainage related questions	Port Blair Municipal Council
Urban Local Body	For Heritage sites related data	ART AND CULTURE
Urban Local Body	For Ecological sites related data	FOREST DEPARTMENT
Urban Local Body	For Housing related data	Port Blair Municipal Council
Urban Local Body	For Building plan related data	APWD/ Port Blair Municipal Council
Urban Local Body	For Roads related data	Port Blair Municipal Council
Urban Local Body	For Solid waste management related data	Port Blair Municipal Council
Urban Local Body	For IT services related data	Port Blair Municipal Council
Urban Local Body	For Vendor committee related data	Port Blair Municipal Council
Urban Local Body	Any other departments involved in providing data for questions mentioned under Urban Local Body	HEALTH, EDUCATION,ELECTRICITY DEPARTMENT,POLLUTION CONTROL,DISASTER MANAGEMENT,APWD,PBMC,STATE TRANSPORT DEPARTMENT,POLICE DEPARTMENT.
Central / state Pollution control Board	Water Quality, Air Quality, Noise Quality	POLLUTION CONTROL / APWD
Development Authority	Building Infrastructure	APWD/ Port Blair Municipal Council
	Construction planning	APWD/ Port Blair Municipal Council

	Green Building	Port Blair Municipal Council
	Rain water harvesting	Port Blair Municipal Council
	Universal Design Principle	APWD/ Port Blair Municipal Council
DISCOM/Electricity Board	Electrical Connection/ Grievance Redressal/ Power supply	ELECTRICITY DEPARTMENT
State Disaster management authority		DISASTER MANAGEMENT
State Education Department		DIRECTORATE OF EDUCATION DEPARTMENT
State Health Department	Health care professionals	DD HEALTH
	Citizen Services	DD,PLANNING
	Disease Prevalence	DD, HEALTH
	Health Infrastructure	NRHM & STATE HEALTH SOCIETY
State Renewable Energy Development Agency		ELECTRICITY DEPARTMENT
State Sales / Commercial Taxes Department		OFFICE OF DEPUTY COMMISSIONER
Town and Country Planning Department	Land Use	APWD
Traffic and Police Department		POLICE DEPARTMENT
Transport Authorities	Buses	STATE TRANSPORT DEPARMENT
	Registered Vehicles	STATE TRANSPORT DEPARMENT
	Sub urban rail transport	NOT APPLICABLE
	Mono Rail Authority	NOT APPLICABLE
	Tramways	NOT APPLICABLE
	Marine Transport Authority	MARINE DEPARTMENT

4.3. List of secondary documents available as supportive

City has provided supporting documents/evidences against the responses given by city on the online portal. In support of their responses on the portal, city submitted 40 number of documents. Documents submitted includes reports, official orders, copy of data maintained in official register, signed copy of questionnaire, and signed letters/submissions from concern departments. Verification includes mapping of documents against responses given by city, checking the type/category of documents, and validation of data provided.

The following table presents the data owner wise number of documents:

Table 4: Data owner wise number of secondary documents submitted by city

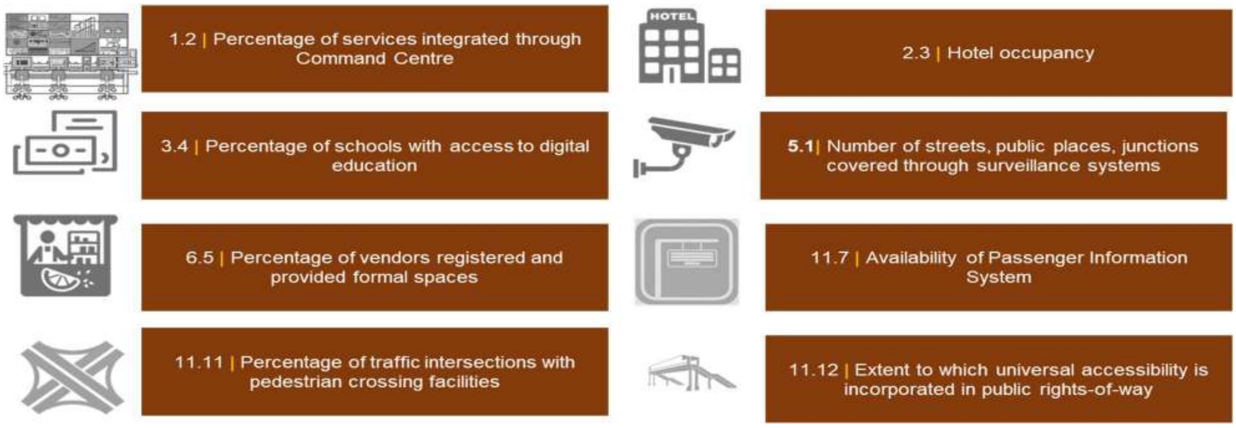
Data Owners	Number of Documents
Sales and Commercial Taxes	0
State Education Department	1
DISCOM/Electricity Department	1
Traffic and Police Department	12
Development Authority	0
Pollution Control Board	12
State Renewable Energy Department	0
Town and Country Planning	0
State Health Department	1
Transport Authority	0
Disaster Management	1
Urban Local Body	12
Total	40

* The count of documents is based on first round of submission.

4.4. Data Verification

A three-stage data quality check comprising verification of data against secondary documents furnished by data owners, logical inconsistency checks including outliers, and physical audit for select indicators (Refer the exhibit below) is being undertaken. The objective of the data quality check is to ensure that data from the source documents are accurate and verifiable. Sources of data included reports, administrative data, survey results and other statistical records, log books among other.

Physical audit of eight indicators – one indicator from the Institutional pillar, one from the Social pillar, one from the Economy pillar and five from the Physical pillar is also being carried out by the field team to ascertain the degree of reliability of data reported by the cities. The list of these eight indicators is presented below:



1.2 | Percentage of services integrated through Command Centre

2.3 | Hotel occupancy

3.4 | Percentage of schools with access to digital education

5.1 | Number of streets, public places, junctions covered through surveillance systems

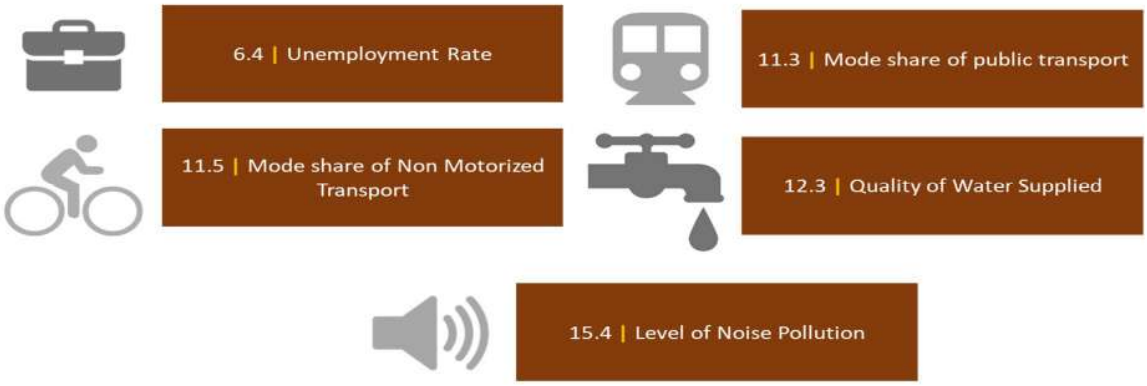
6.5 | Percentage of vendors registered and provided formal spaces

11.7 | Availability of Passenger Information System

11.11 | Percentage of traffic intersections with pedestrian crossing facilities

11.12 | Extent to which universal accessibility is incorporated in public rights-of-way

For a set of five indicators namely, unemployment rate, mode share of public transport, mode share of non-motorised transport, quality of water supplied and level of noise pollution, existing datasets were found to be not available consistently across all cities and/or were inadequate. To help cities that do not have data on these five indicators, dipstick assessments are being carried to fill data gaps.



6.4 | Unemployment Rate

11.3 | Mode share of public transport

11.5 | Mode share of Non Motorized Transport

12.3 | Quality of Water Supplied

15.4 | Level of Noise Pollution

4.5. Physical Audit

The following map presents the indicators audited at city level.

5. Indicator Values

In this chapter, indicator values for **74 indicators** excluding the five indicators for which primary data collection is currently underway is presented. The five indicators include:

Indicator number	Indicator title
Indicator No. 6.4	Unemployment rate
Indicator No. 11.3	Mode share of public transport
Indicator No. 11.5	Mode share of non-motorised transport
Indicator No. 12.3	Quality of drinking water

Indicator No. 15.4	Noise pollution

For each indicator, the corresponding definition, unit of expression i.e., number, percentage etc. indicator value based on the data provided for the numerator /denominator, subtrahend/minuend etc., and the corresponding benchmark values has been presented. The indicators are organized, pillar and category wise for easy reference.

Table 5: Details of Indicator Values

Pillar: Institutional

Category 1: Governance

Indicator No: 1.1	**Percentage of citizen services available online**	**23.37**
Description	Average citizen services available online	
Sub Indicators	1.1a birth certificate	0.75
	1.1b death certificate	0.75
	1.1c trade license	0
	1.1d solid waste management	0
	1.1e water supply	0
	1.1f sewerage/drainage	0
	1.1g fogging	0
	1.1h property tax	1
	1.1i professional tax	0
	1.1j information	0.538461538461538
	1.1k Grievance redressal	0
	1.1l electricity	0
	1.1m Building plan	0

Unit	Percentage	
Benchmark	100%	
Indicator No: 1.2	**Percentage of services integrated through Command Centre**	**4.76**
Description	Services integrated through an integrated or a singular operations command centre	1
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.3	**Percentage of citizens using online services**	**Non-Computable**
Description		
Sub Indicators	1.3a Building plan	NA
	1.3b Birth/Death Certificate	NA
	1.3c water supply	NA
	1.3d solid waste management	NA
	1.3e property tax	NA
	1.3f professional tax (RC)	NA
	1.3g professional tax (EC)	NA
	1.3h complaints/ grievance redressal	NA
	1.3i information	NA
	1.3j electricity	NA
Unit	Percentage	
Benchmark	100%	
Indicator No. 1.4	**Average delay in grievance redressal**	**4.6**

Sub Indicators	1.4a water supply	0
	1.4b solid waste	0
	1.4c street lights	0
	1.4d sewerage	NA
	1.4e professional tax	NA
	1.4f parks and recreational spaces	23
	1.4g building plan	0
Unit	Days	
Benchmark	0	
Indicator No: 1.5	**Tax collected as percentage of tax billed**	**114.11**
Formula:	*Numerator / Denominator*	
Numerator	Total tax collected in a year	399.4
Denominator	Total demand raised for the year	350
Unit	Percentage	
Benchmark	90%	
Indicator No: 1.6	**Extent of cost recovery (O&M) in water supply services**	**92.87**
Formula:	*Numerator / Denominator*	
Numerator	Total collection of user charges in water supply in a year	1296.29
Denominator	Total O&M cost for providing water supply services during the year	1395.84
Unit	Percentage	
Benchmark	100%	
Indicator No: 1.7	**Capital spending as percentage of total expenditure**	**-30.34**
Formula:	*Numerator / Denominator*	

Numerator	Total capital expenditure during a year	-9395.64
Denominator	Total expenditure (revenue and capital accounts) in the same year	30964.33
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	
Indicator No: 1.8	**Percentage of population covered under Ward Committees/ Area *Sabhas***	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of Wards with notified ward committees	0
Denominator	Total number of wards	24
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification)	

Pillar: Social

Category 2: Identity and Culture

Indicator No: 2.1	**Restoration and reuse of historic buildings**	**50**
Formula:	*Numerator / Denominator*	
Numerator	Number of historic buildings/sites restored/preserved/brought under adaptive reuse	1
Denominator	Total number of historic buildings/sites identified	2
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.2	**Percentage of ecologically important areas covered through projects for restoration**	**Non-Computable**
Formula:	*Numerator / Denominator*	

Numerator	Ecologically important sites covered through projects for restoration	0
Denominator	Total number of ecologically important sites identified in the city	0
Unit	Percentage	
Benchmark	100%	
Indicator No: 2.3	**Hotel Occupancy**	**37.14**
Description	Average Occupancy rate of Hotels	37.1428571428571
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.4	**Percentage of budget allocated towards cultural/sports activities**	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Budget allocated for cultural/sports activities	5.63
Denominator	Total budget of the ULB (capital and revenue)	15413.7
Unit	Percentage	
Benchmark	City with the highest performance (amongst cities in the same city-size classification) will be treated as the benchmark	
Indicator No: 2.5	**Number of cultural/sports events hosted by city**	**35**
Description	Number of cultural/sports events hosted by the city authority in the preceding year	35
Unit		
Benchmark		

Category 3: School Education

Indicator No: 3.1	**Percentage of school-aged population enrolled in schools**	**111.75**

Formula:	*Numerator / Denominator*	
Numerator	Total enrolment in primary and secondary schools (public and private)	19816
Denominator	Total population in the age group of 6-14 years	17732
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.2	**Percentage of female school-aged population enrolled in schools**	**113.51**
Formula:	*Numerator / Denominator*	
Numerator	Total female enrolment in primary and secondary schools (public and private	9698
Denominator	Total female population in the age group of 6-14 years	8544
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.3	**Primary education student-teacher ratio**	**16.89**
Formula:	*Numerator / Denominator*	
Numerator	Total number of students in primary grades (public and private)	12347
Denominator	Total number of teachers available for primary grades (public and private schools)	731
Unit	Ratio	
Benchmark	1 teacher for every 30 students	
Indicator No: 3.4	**Percentage of schools with access to digital education**	**45**
Formula:	*Numerator / Denominator*	
Numerator	Number of schools (public and private) with facilities for using digital educational content (availability of necessary infrastructure and connection to digital resources such as NKN)	27
Denominator	Total number of schools	60
Unit	Percentage	

Benchmark	100%	
Indicator No: 3.5	**Percentage of students completing primary education**	**92.87**
Formula:	*Product of ratios of students passing successive grades (between grades 1 to 5) in 2016-17*	
Numerator	Percentage	92.874655 72946
Unit	Percentage	
Benchmark	100%	
Indicator No: 3.6	**Percentage of students completing secondary education**	**101.46**
Formula:	*Product of ratios of students passing successive grades (between grades 6 to 8) in 2016-17*	
Numerator	Percentage	6196619
Unit	Percentage	
Benchmark	100%	

Category 4: Health

Indicator No: 4.1	**Number of in-patient hospital beds per 10,000 population**	**64.87**
Formula:	*Numerator / Denominator*	
Numerator	Number of in-patient hospital beds in public and private hospitals	701
Denominator	Total population of the city	108058
Unit	Number per 10,000 population	
Benchmark	25 beds per 10000 population	
Indicator No: 4.2	**Healthcare professionals per 10,000 population**	**16.84**
Formula:	*Numerator / Denominator*	
Numerator	Total number of qualified healthcare professionals	182

Denominator	Total population of the city	108058
Unit	Number per 10,000 population	
Benchmark	23 beds per 10000 population	
Indicator No: 4.3	**Average response time in case of health emergencies**	**13**
Description	Total response time for health-related distress calls received in the city	13
Unit	Minutes and seconds	
Benchmark	8 minutes	
Indicator No: 4.4	**Period prevalence of water borne diseases**	**0.09**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by water borne diseases in a year	97
Denominator	Total population of the city	108058
Unit	Percentage	
Benchmark	City with the lowest prevalence of water-borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 4.5	**Period prevalence of vector borne diseases**	**0.08**
Formula:	*Numerator / Denominator*	
Numerator	Number of cases of persons affected by vector borne diseases in a year	82
Denominator	Total population of the city	108058
Unit	Percentage	
Benchmark	City with the lowest prevalence of vector borne diseases (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 5: Safety and Security

Indicator No: 5.1	**Total number of CCTV cameras installed in the city**	**0.64**
Formula:	*Numerator / Denominator*	

Numerator	Total number of CCTV cameras installed	1
Denominator	Total length of road network in the city	155.83
Unit	Percentage	
Benchmark	100%	
Indicator No: 5.2	**Number of recorded crimes per lakh population**	**1096.63**
Formula:	Numerator / Denominator	1185
Numerator	Total number of crimes recorded in a year	108058
Denominator	Total population of the city	
Unit	Crimes per lakh	
Benchmark	City with the lowest crime rate (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.3	**Extent of crimes recorded against women, children and elderly per year**	**4.39**
Formula:	*Numerator / Denominator*	
Numerator	Number of crimes recorded against vulnerable groups (women, children and elderly) in a year	52
Denominator	Total crimes recorded in the same year	1185
Unit	Percentage	
Benchmark	City with the lowest proportion of crimes against vulnerable groups (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 5.4	**Transport-related fatality per lakh population**	**18.51**
Formula:	*Numerator / Denominator*	
Numerator	Total number of fatalities recorded in road accidents in a year	20
Denominator	Total population of the city	108058
Unit	Fatality per lakh	
Benchmark	<=2 persons per lakh	

Economic Pillar

Category 6: Economy and Employment

Indicator No: 6.1	**Increase in VAT/GST collection**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total VAT/GST collection during the year – Total VAT/GST collection during preceding year)	NC
Denominator	Total VAT/GST collection during preceding year	NC
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.2	**Increase in collection of Professional Tax**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	(Total Professional Tax collection during the year – Total collection during preceding year)	NC
Denominator	Total Professional Tax collection during preceding year	NC
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 6.3	**Increase in issuance of Construction Permits**	**-10.34**
Formula:	*Numerator / Denominator*	
Numerator	(Number of permits issued during the year – Number of permits during preceding year)	-27
Denominator	Number of construction permits during preceding year	2.61
Unit	Percentage	
Benchmark	City with the highest increase in collection (amongst cities in the same city-size classification) will be treated as a benchmark	

Indicator No: 6.4	**Unemployment Rate**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of unemployed persons (seeking or available for work)	44816
Denominator	Total labour force in the city	17732
Unit	Per 1000 persons	
Benchmark	City with the lowest unemployment rate (amongst cities in the same city-size classification as given in this document) will be treated as a benchmark	
Indicator No: 6.5	**Percentage of vendors registered and provided formal spaces**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Number of street vendors registered and provided formal spaces	0
Denominator	Total number of vendors in the city	443.3
Unit	Percentage	
Benchmark	100%	

Physical Pillar

Category 7: Housing and Inclusiveness

Indicator No: 7.1	**Percentage of Slum/EWS households covered through formal/ housing**	**20.03**
Formula:	*Numerator / Denominator*	
Numerator	Total number of slum and EWS households covered through formal/affordable housing	122
Denominator	Total number of slum and EWS households in the city	6.09

Unit	Percentage	
Benchmark	100%	
Indicator No: 7.2	**Percentage of slum areas covered through basic services**	**22.22**
Formula:	*Numerator / Denominator*	
Description	Product of ratios of slum households with access to each of water supply, toilets and solid waste management	28684694668
Unit	Percentage	
Benchmark	100%	

Category 8: Public Open Spaces

Indicator No: 8.1	Per capita availability of green spaces	**4.17**
Formula:	*Numerator / Denominator*	
Numerator	Total area of green space (sq.m.)	450500
Denominator	Total population of the city	108058
Unit	Square metres (sq.m.)	
Benchmark	10-12 sq.m. per capita	
Indicator No: 8.2	Per capita availability of public and recreational places	**4.99**
Formula:	*Numerator / Denominator*	
Numerator	Total area of public and recreational places (sq.m.)	539550.29
Denominator	Total population of the city	108058
Unit	Square metres (sq.m.)	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 9: Mixed Land-use and Compactness

Indicator No: 9.1	**Share of mixed land use area in overall city land use**	**63.43**

Formula:	*Numerator / Denominator*	
Numerator	Total area under mixed land use	26147254
Denominator	Total area of the city (total area of all land uses)	41220000
Unit	Percentage	
Benchmark	City with the highest percentage of mixed use (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 9.2	**Net Density**	**0.01**
Formula:	*Numerator / Denominator*	
Numerator	Total population of the city	108058
Denominator	Area allocated for residential land use (in hectares)	20629000
Unit		
Benchmark	City with the highest net density (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 10: Power Supply

Indicator No: 10.1	**Percentage of city population with authorized electrical service**	**106.4**
Formula:	*Numerator / Denominator*	
Numerator	Number of authorized electrical connections at house-hold level	49429
Denominator	Total number of households in the city	46456
Unit	Percentage	
Benchmark	City with the highest per capita availability (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.2	**Percentage of electrical connections covered through smart meters**	**0**
Formula:	*Numerator / Denominator*	

Numerator	Number of electrical connections (residential and commercial) with smart meters	0
Denominator	Total number of electricity connections in the city	59740
Unit	Percentage	
Benchmark	100%	
Indicator No: 10.3	**Average number of electrical interruptions per year**	**3942**
Description	Total number of sustained electrical interruptions in a year	3942
Unit	Number	
Benchmark	City with the lowest number of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.4	**Average length of electrical interruptions per year**	**0.81**
Description	Sum of duration of all sustained electrical interruptions in a year (in hours)	1939
Unit	Hours	
Benchmark	City with the lowest average length of outages (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.5	**Percentage of total energy derived from renewable sources**	**0.04**
Formula:	*Numerator / Denominator*	
Numerator	Total installed capacity for generation of renewable energy in the city	59870
Denominator	Total energy consumption from all sources	13919656
Unit	Percentage	
Benchmark	10%	
Indicator No: 10.6	**Energy consumption per unit - water supply and sewerage**	**0.3**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on water supply and sewerage services	528116

Denominator	Total quantum of water and waste water handled during the period	771.39
Unit	kWh per million litres	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.7	**Energy consumption per unit – street lighting**	**0.35**
Formula:	*Numerator / Denominator*	
Numerator	Energy consumption on street lighting	13632
Denominator	Total number of street light installations	13504
Unit	kWh per light installation	
Benchmark	City with the lowest per unit consumption (amongst cities in the same city-size classification) will be treated as a benchmark	
Indicator No: 10.8	**Percentage of new and redeveloped buildings following green building norms**	**NC**
Formula:	*Numerator / Denominator*	
Numerator	Built up area of new/redeveloped buildings completed that have received green ratings	0
Denominator	Total built up area of all new/redeveloped buildings completed during the same year	0
Unit	Percentage	
Benchmark	80%	
Indicator No: 10.9	**Total energy consumption per capita**	**0.81**
Formula:	*Numerator / Denominator*	
Numerator	Total energy consumption (for all uses) in the city	13919656
Denominator	Total population of the city	108058
Unit	kWh per capita	
Benchmark	City with the lowest per capita consumption (amongst cities in the same city-size classification) will be treated as a benchmark	

Category 11: Transport and Mobility

Indicator No: 11.1	**Geographical coverage of public transport**	**0.7**
Formula:	*Numerator / Denominator*	
Numerator	Total length of public transport network (km)	310
Denominator	Total area of the city (sq.km)	41.22
Unit	Transport length (kms) per square km	
Benchmark	>=1	
Indicator No: 11.2	**Availability of public transport**	**1.44**
Formula:	*Numerator / Denominator*	
Numerator	Average number of public transport vehicles available per day	156
Denominator	Total population of the city	108058
Unit	Number per 1000 persons	
Benchmark	>=0.6	
Indicator No: 11.3	**Mode share of public transport**	**To be computed**
Description	Mode share of public transport	45
Unit	Percentage	
Benchmark		
Indicator No: 11.4	**Percentage of road network with dedicated bicycle tracks**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total length of bicycle network	0
Denominator	Total length of road network in the city	155.83
Unit	Percentage	
Benchmark	>=50	
Indicator No: 11.5	**Percentage of interchanges with bicycle parking facili-**	**66.67**

	ties	
Formula:	*Numerator / Denominator*	
Numerator	Total number of major transport interchanges with bicycle parking facility (within 250m radius)	2
Denominator	Total number of major transport interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.6	**Mode share of non-motorised transport**	**To be computed**
Description	Mode share of non-motorised transport	0.04
Unit	Percentage	
Benchmark		
Indicator No: 11.7	**Availability of Passenger Information System**	**0.33**
Formula:	Numerator / Denominator	
Numerator	Total number of major interchanges with PIS	1
Denominator	Total number of major interchanges in the city	3
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.8	**Extent of signal synchronisation**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total number of signalised intersections that are synchronised	0
Denominator	Total number of signalised intersections in the city	7
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.9	**Availability of paid parking spaces**	**Non-**

Formula:	*Numerator / Denominator*	**Computable**
Numerator	Total available on-street paid parking spaces in the city	NA
Denominator	Total available on-street parking spaces in the city	NA
Unit		
Benchmark		
Indicator No: 11.10	**Percentage coverage of footpaths – wider than 1.2m**	**5.43**
Formula:	*Numerator / Denominator*	
Numerator	Total length of footpaths (wider than 1.2 m) available in the city	16.92
Denominator	Total length of road network in the city	311.66
Unit	Percentage	
Benchmark	>=75	
Indicator No: 11.11	**Percentage of traffic intersections with pedestrian crossing facilities**	**67.35**
Formula:	*Numerator / Denominator*	
Numerator	Total number of intersections with pedestrian crossing facilities on major roads	33
Denominator	Total number of junctions/ intersections on major roads in the city	49
Unit	Percentage	
Benchmark	100%	
Indicator No: 11.12	**Extent to which universal accessibility is incorporated in public rights-of-way**	**2.36**
Formula:	*Numerator / Denominator*	
Numerator	Number of public right-of-way areas designed as per universal design principles	9
Denominator	Total number of public right-of-way areas in the city	381
Unit	Percentage	
Benchmark	100%	

Category 12: Assured Water Supply

Indicator No: 12.1	**Household level coverage of direct water supply connections**	**81.55**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households with direct water supply connection	37887
Denominator	Total number of households in the city	46456
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.2	**Per capita supply of water**	**237.96**
Formula:	*Numerator / Denominator*	
Numerator	Total quantity of water supplied into the distribution system	25.713
Denominator	Total population of the city	108058
Unit	Litres per capita per day (lpcd)	
Benchmark	135 lpcd	
Indicator No: 12.3	**Quality of water supplied**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of samples meeting or exceeding specified potable water standards	1887
Denominator	Total number of samples tested for water quality	1887
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.4	**Level of non-revenue water – NRW**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of water put into distribution system (mld) - Quantum of water sold (mld)	Blank
Denominator	Quantum of water put into the distribution system (mld)	25.713
Unit	Percentage	

Benchmark	Less than 15%	
Indicator No: 12.5	**Percentage of water connections covered through meters**	**2.89**
Formula:	*Numerator / Denominator*	
Numerator	Number of metered water connections	1140
Denominator	Total number of water connections in the city	39435
Unit	Percentage	
Benchmark	100%	
Indicator No: 12.6	**Percentage of plots with rainwater harvesting facility**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Number of new developments/redevelopments (of designated plot size), commercial and public buildings with RWH facility	4
Denominator	Total number of new developments/redevelopments (of designated plot size), commercial and public buildings in the city	Data Unavailable
Unit	Percentage	
Benchmark	100% of all new developments/ redevelopments with minimum plot size of 300 sq. m., and all commercial and public buildings should have rainwater harvesting facilities	

Category 13: Waste Water Management

Indicator No: 13.1	**Coverage of toilets**	**134.18**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with access to individual and/or community toilets	46964
Denominator	Total number of properties in the city	35000
Unit	Percentage	
Benchmark	100%	

Indicator No: 13.2	**Coverage of sewerage network and/or septage**	**129.09**
Formula:	*Numerator / Denominator*	
Numerator	Total number of properties with connection to waste water management systems	45180
Denominator	Total number of properties in the city	35000
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.3	**Collection efficiency of sewerage network**	**0**
Formula:	*Numerator / Denominator*	
Numerator	Total waste water collected per day	0
Denominator	Total waste water generated in the city per day	20
Unit	Percentage	
Benchmark	100%	
Indicator No: 13.4	**Extent of reuse and recycling of waste water**	**Non-Computable**
Formula:	*Numerator / Denominator*	
Numerator	Quantum of waste water recycled or reused per day	20
Denominator	Total waste water received at treatment plants per day	0
Unit	Percentage	
Benchmark	20% or more	
Indicator No: 13.5	**Coverage of storm water drains**	**3.21**
Formula:	*Numerator / Denominator*	
Numerator	Total length of covered primary, secondary and tertiary drains (of pucca construction)	5
Denominator	Total length of road network in the city	155.83
Unit	Percentage	
Benchmark	100%	

Category 14: Solid waste management

Indicator No: 14.1	**Household level coverage of municipal solid waste collection**	**90.06**
Formula:	*Numerator / Denominator*	
Numerator	Total number of households and establishments covered through doorstep collection	55346
Denominator	Total number of households and establishments in the city	61456
Unit	Percentage	
Benchmark	100% door to door collection	
Indicator No: 14.2	**Efficiency of collection of municipal solid waste**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Total quantum of MSW collected by the ULB or private operator	110
Denominator	Total quantum of MSW generated in the city	110
Unit	Percentage	
Benchmark	100%	
Indicator No: 14.3	**Extent of municipal solid waste recovered through reuse**	**24.82**
Formula:	*Numerator / Denominator*	
Numerator	Average quantum of MSW that is processed or recycled (tons per month)	819
Denominator	Average MSW generated in the city (tons per month)	3300
Unit	Percentage	
Benchmark	80% or more	

Category 15: Reduced Pollution

Indicator No: 15.1	**Concentration of SO2 - air pollution**	**14.9**
Description	Annual mean concentration OR Mean concentration over 24 hours of SO2	14.9
Unit	µg/m3	

Benchmark	Annual mean concentration of 50 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.2	**Concentration of NO2 - air pollution**	**10.4**
Description	Annual mean concentration OR Mean concentration over 24 hours of NO2	10.4
Unit	µg/m3	
Benchmark	Annual mean concentration of 40 µg/m3 OR Mean concentration over 24 hours of 80 µg/m3	
Indicator No: 15.3	**Concentration of PM10 - air pollution**	**51.29**
Description	Annual mean concentration OR Mean concentration over 24 hours of PM10	51.29
Unit	µg/m3	
Benchmark	Annual mean concentration of 60 µg/m3 OR Mean concentration over 24 hours of 100 µg/m3	
Indicator No: 15.4	**Level of noise pollution**	**To be computed**
Formula:	*Numerator / Denominator*	
Numerator	Number of noise samples meeting acceptable noise levels	44
Denominator	Total number of noise samples	44
Unit	Percentage	
Benchmark		
Indicator No: 15.5	**Quality of water in public surface water bodies**	**100**
Formula:	*Numerator / Denominator*	
Numerator	Number of tested samples meeting prescribed standards	4
Denominator	Total number of samples tested	4
Unit	Percentage	
Benchmark	100%

1. Introduction

The Ministry of Housing and Urban Affairs (MoHUA) is implementing several flagship urban missions such as the Smart Cities Mission (SCM), Atal Mission for Urban Rejuvenation and Transformation (AMRUT), Heritage City Development and Augmentation Yojana (HRIDAY), Housing for All (HFA). Theses mission along with other transformative initiatives of the Government including National Water Mission, Power for All, National Health Mission are aimed at making Indian cities more ‘liveable.’ The overarching goal of these initiatives is to move from an input-based approach to a ‘citizen centric-outcome based’ assessment of urban liveability.

To develop a common minimum framework for cities to assess their existing status and chart their pathway towards providing a better quality of life to their citizens, the MoHUA developed a set of ‘Liveability Standards’ relevant to cities to generate a Liveability Index and ranking of cities. These standards were launched in June, 2017. The MoHUA has planned to conduct an ‘Annual Assessment of Liveability Standards in Cities – an ambitious national project that will involve yearly submission of data by cities across the various indicators, compilation and analysis, development of indices and ranking of cities. The Liveability Index is envisioned as a 360° tool for tracking, planning and transforming Indian cities. The Liveability Index is aimed at the following objectives:

- Providing strong evidence-based approach for future interventions and investments to deliver liveability outcomes
- Catalysing actions to improve the overall quality of the city’s liveability and achieve broader development outcomes including the Sustainable Development Goals
- Assessing the implementation of government policies and schemes governing characteristics of cities that can contribute to creating liveable communities
